The Electors shall meet in their respective States, and vote by ballot for President and Vice-President, one of whom at least shall not be an inhabitant of the same State with themselves; they shall name in their ballots the person voted for as President, and in distinct ballots the person voted for as Vice-President; and they shall make distinct list of all persons voted for as President, and of all persons voted for as Vice-President, and of the number of votes for each, which list they shall sign and certify, and transmit, sealed, to the seat of the Government of the United States, directed to the President of the Senate; the President of the Senate shall, in the presence of the Senate and House of Representatives, open all the certificates and the votes shall then be counted; the person having the greatest number of votes for President shall be the President, if such number be a majority of the whole number of Electors appointed; and if no person have such majority, then from the persons having the highest number, not exceeding three, on the list of those voted for as President, the House of Representatives shall choose immediately, by ballot, the President. But in choosing the President, the votes shall be taken by States, the representation from each State having one vote; a quorum for this purpose shall consist of a member or members from two-thirds of the States, and a majority of all the States shall be necessary to a choice. And if the House of Representatives shall not choose a President, whenever the right of choice shall devolve upon them, before the fourth day of March next following, then the Vice-President shall act as President, as in the case of the death or other constitutional disability of the President. The person having the greatest number of votes as Vice-President shall be the Vice-President if such number be a majority of the whole number of Electors appointed, and if no person have a majority, then from the two highest numbers on the list the Senate shall choose the Vice-President; a quorum for the purpose shall consist of two-thirds of the whole number of Senators, and a majority of the whole number shall be necessary to a choice. But no person constitutionally ineligible to the office of President shall be eligible to that of Vice-President of the United States.

ARTICLE XIII.
Slavery Abolished.

The following amendment was proposed to the Legislatures of the several States by the Thirty-eighth Congress on the 1st of February, 1865, and was declared to have been ratified in a proclamation by the Secretary of State dated December 18, 1865. It was rejected by Delaware and Kentucky: was conditionally ratified by Alabama and Mississippi: and Texas took no action.

1. Neither slavery nor involuntary servitude, except as a punishment for crime whereof the party shall have been duly convicted, shall exist within the United States, or any place subject to their jurisdiction.

2. Congress shall have power to enforce this article by appropriate legislation.

ARTICLE XIV.
Citizenship Rights Not to Be Abridged.

The following, popularly known as the Reconstruction Amendment, was proposed to the Legislatures of the several States by the Thirty-ninth Congress on the 16th of June, 1866, and was declared to have been ratified in a proclamation by the Secretary of State, dated July 23, 1868. The amendment got the support of 23 Northern States: it was rejected by Delaware, Kentucky, Maryland, and 10 Southern States. California took no action. Subsequently it was ratified by the 10 Southern States.

1. All persons born or naturalized in the United States, and subject to the jurisdiction thereof, are citizens of the United States and of the State wherein they reside. No State shall make or enforce any law which shall abridge the privileges or immunities of citizens of the United States; nor shall any State deprive any person of life, liberty, or property without due process of law, nor deny to any person within its jurisdiction the equal protection of the laws.

Apportionment of Representatives in Congress.

2. Representatives shall be apportioned among the several States according to their respective numbers, counting the whole number of persons in each State excluding Indians not taxed. But when the right to vote at any election for the choice of Electors for President and Vice-President of the United States, Representatives in Congress, the executive and judicial officers of a State, or the members of the Legislature thereof, is denied to any of the male members of such State, being of twenty-one years of age, and citizens of the United States, or in any way abridged, except for participation in rebellion or other crime, the basis of representation therein shall be reduced in the proportion which the number of such male citizens shall bear to the whole number of male citizens twenty-one years of age in such State.

Power of Congress to Remove Disabilities of United States Officials for Rebellion.

3. No person shall be a Senator or Representative in Congress, or Elector of President and Vice-President or holding any office, civil or military, under the United States, or under any State, who, having previously taken an oath, as a member of Congress, or as an officer of the United States, or as a member of any State Legislature or as an executive or judicial officer of any State, to support the Constitution of the United States, shall have engaged in insurrection or rebellion against the same, or given aid and comfort to the enemies thereof. But Congress may, by a vote of two-thirds of each House, remove such disability.

What Public Debts Are Valid.

4. The validity of the public debt of the United States, authorized by law, including debts incurred for payment of pensions and bounties for services in suppressing insurrection and rebellion, shall not be questioned. But neither the United States nor any State shall assume or pay any debt or obligation incurred in aid of insurrection or rebellion against the United States, or any claim for the loss or eman-

cipation of any slave; but all such debts, obligations, and claims shall be held illegal and void.

5. The Congress shall have power to enforce by appropriate legislation the provisions of this article.

ARTICLE XV.
Equal Rights for White and Colored Citizens.

The following amendment was proposed to the Legislatures of the several States by the Fortieth Congress on the 27th of February, 1869, and was declared to have been ratified in a proclamation by the Secretary of State, dated March 30, 1870. It was not acted on by Tennessee; it was rejected by California, Delaware, Kentucky, Maryland, and Oregon; ratified by the remaining 30 States. New York rescinded its ratification January 5, 1870. New Jersey rejected it in 1870, but ratified it in 1871.

1. The right of the citizens of the United States to vote shall not be denied or abridged by the United States or by any State on account of race, color, or previous condition of servitude.

2. The Congress shall have power to enforce the provisions of this article by appropriate legislation.

ARTICLE XVI.
Income Taxes Authorized.

The following amendment was proposed to the Legislatures of the several States by the Sixty-first Congress on the 12th day of July, 1909, and was declared to have been ratified in a proclamation by the Secretary of State, dated February 25, 1913. The income tax amendment was ratified by all the States except Connecticut, Florida, Pennsylvania, Rhode Island, Utah, and Virginia.

The Congress shall have power to lay and collect taxes on incomes, from whatever sources derived, without apportionment among the several States, and without regard to any census or enumeration.

ARTICLE XVII.
United States Senators to Be Elected by Direct Popular Vote.

The following amendment was proposed to the Legislatures of the several States by the Sixty-second Congress on the 16th day of May, 1912, and was declared to have been ratified in a proclamation by the Secretary of State, dated May 31, 1913. It got the vote of all the States except Alabama, Delaware, Florida, Georgia, Kentucky, Louisiana, Maryland, Mississippi, Rhode Island, South Carolina, Utah, and Virginia.

1. The Senate of the United States shall be composed of two Senators from each State, elected by the people thereof, for six years; and each Senator shall have one vote. The electors in each State shall have the qualifications requisite for electors of the most numerous branch of the State Legislatures.

Vacancies in Senatorships, When Governor May Fill by Appointment.

2. When vacancies happen in the representation of any State in the Senate, the executive authority of such State shall issue writs of election to fill such vacancies: Provided, That the Legislature of any State may empower the Executive thereof to make temporary appointment until the people fill the vacancies by election as the Legislature may direct.

3. This amendment shall not be so construed as to affect the election or term of any Senator chosen before it becomes valid as part of the Constitution.

ARTICLE XVIII.
Liquor Prohibition Amendment.

The following amendment was proposed to the Legislatures of the several States by the Sixty-fifth Congress, December 18, 1917: and on January 29, 1919, the United States Secretary of State proclaimed its adoption by 36 States, and declared it in effect on January 16, 1920.

Enforcement of the National Prohibition Act was in effect at 12 P. M., January 16, 1920, except as to certain sections of Title II. wherein other dates were specified.

Early in 1920, the validity of the Eighteenth Amendment was upheld by the Supreme Court of the United States, in suits to void, brought by the States of Rhode Island and New Jersey, and by various brewers and distillers.

1. After one year from the ratification of this article the manufacture, sale, or transportation of intoxicating liquors within, the importation thereof into, or the exportation thereof from the United States and all territory subject to the jurisdiction thereof for beverage purposes is hereby prohibited.

2. The Congress and the several States shall have concurrent power to enforce this article by appropriate legislation.

3. This article shall be inoperative unless it shall have been ratified as an amendment to the Constitution by the Legislatures of the several States, as provided in the Constitution, within seven years from the date of the submission hereof to the States by the Congress.

ARTICLE XIX.
Giving Nation-Wide Suffrage to Women.

The following amendment was proposed to the Legislatures of the several States by the Sixty-fifth Congress, having been adopted by the House of Representatives, May 21, 1919, and by the Senate, June 4, 1919. On August 26, 1920, the United States Secretary of State proclaimed it in effect, having been adopted (June 10, 1919-August 18, 1920) by three-quarters of the States. The Tennessee House, August 31, rescinded its ratification, 47 to 24.

1. The right of citizens of the United States to vote shall not be denied or abridged by the United States or by any State on account of sex.

2. Congress shall have power, by appropriate legislation, to enforce the provisions of this article.

ARTICLE XX. (*Now being voted on.*)
Federal Regulation of Child Labor.

The following amendment was proposed to the Legislatures of the several States by the Sixty-eighth Congress, having been adopted, as a joint resolution, by the House of Representatives (297 to 69) on April 26, 1924, and by the Senate (61 to 23) on June 2, 1924.

Section 1—The Congress shall have power to limit, regulate, and prohibit the labor of persons under eighteen years of age.

Section 2—The power of the several States is unimpaired by this article except that the operation of State laws shall be suspended to the extent necessary to give effect to legislation enacted by the Congress.

Arkansas was the first State to take action on the proposed amendment. Its House passed the joint resolution (45 to 40), June 27; the Senate (15 to 13), June 28. The Governor signed the measure, June 29.

The Georgia State Senate, July 3, unanimously rejected the amendment, and the House voted it down, 170 to 3.

The amendment has failed of ratification also in the Legislature of Louisiana and North Carolina.

THE SHIP LIQUOR TREATY WITH GREAT BRITAIN.

The high contracting parties declare that it is their firm intention to uphold the principle that three marine miles, extending from the coastline outward, and measured from low-water mark, constitute the proper limits of territorial waters.

(1) His Britannic Majesty agrees that he will raise no objection to the boarding of private vessels under the British flag outside the limits of territorial waters by authorities of the United States, its Territories or possessions, in order that inquiries may be addressed to those on board and an examination be made of the ship's papers for the purpose of ascertaining whether the vessel or those on board are endeavoring to import or have imported alcoholic beverages into the United States, its Territories or possessions, in violation of the laws there in force. When such inquiries and examination show a reasonable ground for suspicion, a search of the vessel may be initiated.

(2) If there is reasonable cause for belief that the vessel has committed, or is committing or attempting to commit, an offense against the laws of the United States, its Territories or possessions, prohibiting the importation of alcoholic beverages, the vessel may be seized and taken into a port of the United States, its Territories or possessions for adjudication in accordance with such laws.

(3) The rights conferred by the article shall not be exercised at a greater distance from the coast of the United States, its Territories or possessions, than can be traversed in one hour by the vessel suspected of endeavoring to commit the offense. In cases, however, in which the liquor is intended to be conveyed to the United States, its Territories or possessions, by a vessel other than the one boarded and searched it shall be the speed of such other vessel and not the speed of the vessel boarded which shall determine the distance from the coast at which the right under this article can be exercised.

No penalty or forfeiture under the laws of the United States shall be applicable or attach to alcoholic liquors or to vessels or persons by reason of the carriage of such liquors when such liquors are listed as sea stores or cargo destined for a port foreign to the United States * * * provided that such liquors shall be kept under seal continuously while the vessel on which they are carried remains within said territorial waters, and that no part of such liquors shall at any time or place by unladen within the United States, its Territories or possessions.

Any claim by a British vessel for compensation shall be referred for the joint consideration of two persons, one of whom shall be nominated by each of the contracting parties.

BRIEF BIOGRAPHIES OF THE PRESIDENTS.

Grant's baptismal Christian name was Hiram Ulysses; Cleveland's was Stephen Grover; Wilson's was Thomas Woodrow; Coolidge's was John Calvin.

RELIGIOUS AFFILIATIONS.

Episcopalians—Washington, Madison, Monroe, Gen. W. H. Harrison, Tyler, Taylor, Pierce, Arthur.
Presbyterians—Jackson, Polk, Buchanan, Lincoln, Cleveland, Benj. Harrison, Wilson.
Methodists—Johnson, Grant, Hayes, McKinley.
Unitarian—John Adams, J. Q. Adams, Fillmore, Taft.
Reformed Dutch—Van Buren, Roosevelt.
Baptist—Harding. *Congregationalist*—Coolidge.
Disciples—Garfield.
Jefferson did not claim membership in any denomination.

ANCESTRY.

English—Washington, J. Adams, Madison, J. Q. Adams, W. H. Harrison, Tyler, Taylor, Fillmore, Pierce, Lincoln, Johnson, Grant, Garfield, Cleveland, B. Harrison, Taft, Coolidge.
Welsh—Jefferson.
Scotch—Monroe, Hayes. *Scotch-Irish*—Jackson, Polk, Buchanan, Arthur, McKinley, Wilson. *Scotch-Dutch*—Harding.
Dutch—Van Buren, Roosevelt.

The following Presidents were lawyers—J. Adams, Jefferson, Madison, Monroe, J. Q. Adams, Jackson, Van Buren, Tyler, Polk, Pierce, Buchanan, Lincoln, Hayes, Garfield, Cleveland, B. Harrison, McKinley, Taft, Wilson, Coolidge.

Washington was a farmer and surveyor; Fillmore and Johnson were tailors.

THE PRESIDENT'S FLAG.

The flag consists of the President's seal in bronze, upon a blue background, with a large white star in each corner. The design of this seal may be seen in the floor of the entrance corridor of the White House.

When the President visits a vessel of the United States, the President's flag is broken at the main the moment he reaches the deck and is kept flying as long as he is on board.

When the President is embarked on a boat he usually directs that his flag be displayed from the staff in the bow of his barge. When he passes in a boat flying his flag, vessels of the navy parade the full guard, four ruffles are given on the drum, four flourishes are sounded on the bugle, the National Anthem is played by the band, and officers and men salute.

THE WIVES OF THE PRESIDENTS.

President.	Wife's Name.	Native State.	Born.	Married.	Died.	Sons.	Daughters.

BIOGRAPHIES OF THE PRESIDENTS AND THEIR WIVES.

The following brief biographical notes of the Presidents and their wives are supplemental to the convenient tables which precede them and of which they form a part.

George Washington, Federalist, born on a Friday, was the great-grandson of John Washington, who came from Yorkshire, England, with his brother, Andrew, and settled in 1657 on a large tract he bought in Westmoreland County, Virginia, bordering the west shore of the Potomac River near its mouth. John Washington, the pioneer settler, led troops against the Seneca Indians. He had a son, Lawrence Washington, whose second son was Augustine Washington, born in 1694. Augustine was twice married. By his first wife, who died in 1728, he had four children. His second wife, Mary Ball, whom he married March 6, 1730, bore, as her first child, George Washington. The Washingtons by that time owned much of the land in the fertile peninsula between the Potomac and Rappahannock Rivers.

George's parents moved in 1735 further up the Rappahannock to a point opposite Fredericksburg, where they settled on a large plantation. On the death of his father in 1743 George returned to his birthplace in Westmoreland County (then known as Pope Creek, now called Wakefield, on Bridge's Creek) to live with his half-brother, Augustine. When 16, George went to live with his half-brother Lawrence at Mt. Vernon, on the Potomac. There he studied mathematics and became a surveyor in the employ of William Fairfax, father of Lawrence's wife and manager of the great Virginia estate of his cousin, Lord Fairfax. George accompanied Lawrence to the West Indies and got smallpox. After his return, he entered the military service of Virginia. He later served under Gen. Braddock in the war between the English and the French.

Washington took command of the Continental Army, at Cambridge, Mass., July 3, 1775, under a commission issued by Congress on June 17, that year; after winning the Revolutionary War, he took leave of the officers of his force, Dec. 4, 1783, at Fraunces's Tavern, New York City, and formally resigned to Congress, Dec. 23, that year, his commission as Lieutenant General and Commander in Chief.

He was President of the Convention that drafted the Constitution in 1787.

The estate at Mt. Vernon, which George Washington inherited from his half-brother Lawrence, had been named by Lawrence in honor of the British Admiral, Lord Vernon, under whom Lawrence had served at the siege of Carthagena.

Congress, on July 3, 1798, when war with France was imminent, again commissioned Washington as Lieutenant General and Commander in Chief, but hostilities were averted.

Washington's death was due to exposure in a storm while riding over his estate with his managers. He went to bed with a sore throat, followed by an ague, and made his will. The end came between 10 and 11 o'clock on a Saturday night. A vault was made for Washington's body under the dome of the Capitol at Washington, but the remains were interred at Mt. Vernon.

Washington was a slave owner. He was a man of powerful physique, over 6 feet in height, with sandy hair, blue eyes, big hands and feet. He was not a prohibitionist, and was a horseback rider, hunter and fisherman. He and all his family were members of the Protestant Episcopal Church.

Washington's first inauguration was at New York, his second at Philadelphia.

Mrs. Washington was a daughter of Col. John Dandridge, planter, of New Kent County, Va., and widow of Daniel Parke Custis, also a rich farmer of that country. She was an Episcopalian.

Gen. Washington had no children of his own. His wife, who was small and plump, with dark hair and hazel eyes, had become the mother of four children, Martha Parke Custis, and Col. John Parke Custis, and two who died in infancy. Col. John Parke Custis, who inherited from his father an estate of 1,000 acres at Arlington, Va., near Washington, where now the national cemetery is located, had two children—George Washington Parke Custis, who married Mary Lee Fitzhugh of Va., and whose daughter became the wife of Gen. Robert E. Lee, Confederate General; and Eleanor Parke Custis, who became the wife of Major Lawrence Lewis, son of Fielding Lewis, whose father, Fielding Lewis, 1726-1781, had married George Washington's sister, Elizabeth, and was a rich Virginia planter, owning half of the town of Fredericksburg, on the Rappahannock River.

At White House receptions the visitors were seated while the President and wife passed among them.

John Adams, Federalist, who was born in the town of Quincy, Mass., and died there, was a great-grandson of Henry Adams, who came with his eight sons from Devonshire, England, in 1636, and settled on a grant of 40 acres. John was the eldest son of John Adams, farmer, and of Susanna Boylston daughter of Peter Boylston, of Brookline, Mass. He graduated at Harvard in 1755; taught school at Worcester; practiced law at Boston; served in the State Legislature, in the Revolutionary Provincial Congress of Massachusetts and in the Continental Congress; he was a signer of the Declaration of Independence; Commissioner to France, 1778, with Benjamin Franklin and Arthur Lee, Minister to Holland; helped negotiate treaties in Europe; Minister to England 1785-1788; elected Vice President in 1788, and again in 1792; chosen President in 1796. He was inaugurated at Philadelphia.

Enraged at his failure of re-election in 1800 he started in his coach for Massachusetts early on March 4, 1801, refusing to attend the inauguration of Thomas Jefferson.

John Adams was a Unitarian and was a cousin of Samuel Adams of Massachusetts, who also was a signer of the Declaration. He was an orator and a pamphleteer; a man of medium height, active, florid, and corpulent. He died of debility, due to old age, on the same day as Jefferson.

Mrs. Adams was a daughter of the Rev. William Smith, a Congregational minister of Weymouth, Mass. Her mother, Elizabeth Quincy, was a great-great-granddaughter of the Puritan divine, Thomas Shepard of Cambridge, Mass., and great-grand-niece of the Rev. John Morton of Boston. Mrs. Adams's older sister, Mary, was the wife of Judge Richard Cranch of Boston.

Adams's oldest son, John Quincy Adams, became sixth President in 1825. A daughter, Abigail, married Col. William S. Smith.

Thomas Jefferson was of Welsh descent and was a Republican, that is, an anti-Federalist, and is called the founder of what is now known as the Democratic Party. He was born at Shadwell, in Albemarle County, Va., the third of ten children. His mother was a daughter of Isham Harris, a rich Virginian. His father, Peter Jefferson, with the aid of thirty slaves tilled a 1,900-acre tobacco and wheat plantation. The President died of old age and chronic diarrhea, in Albemarle County, at Monticello, which he had built from his own design and which creditors would have taken but for the financial aid of friends.

Jefferson was a lawyer. He was a writer, not an orator. He served in the Virginia House of Burgesses with Washington, and in the Continental Congress; helped draft and signed the Declaration of Independence; succeeded Patrick Henry, in 1779, as Governor of Virginia; served in the Virginia militia in the Revolution; negotiated, in Europe, treaties with various countries; Secretary of State under Washington; elected Vice President under John Adams; elected President in 1800, with Aaron Burr, his rival for the Presidency, as Vice President; re-elected in 1804.

Jefferson was tall, raw-boned, freckled and sandy. He played the violin, and was a voluminous writer. He had no religious affiliations.

Jefferson was the first of the Presidents inaugurated at Washington.

Mrs. Jefferson, who was tall, slim, vivacious, with brown eyes, was a daughter of John Wayles, a wealthy lawyer of Charles City County, Va. Her first husband was Bathwest Skelton, who died before she was twenty years old.

Two of the children of the Jeffersons died in infancy. Of those who grew up, Martha, 1772-1836, became, in 1789, the wife of her cousin, Thomas M. Randolph, afterward Governor of Virginia, left a large family of sons and daughters and was the companion of her father in his declining years; Mary, 1778-1804, married her cousin, John Wayles Eppes, and had two children, one of whom, Mrs. S. R. Meikleham, died at Washington in 1897. Mrs. Jefferson's daughters were educated at Roman Catholic convent schools.

Mrs. Jefferson died nineteen years before her husband became President, and Mrs. Madison for a time acted as mistress of the White House. Later he abolished levees.

Jefferson inherited through his wife from her father 40,000 acres of land and 135 slaves.

James Madison, Republican, was born at Port Conway, King George County, Va., and died of old age at Montpelier, Orange County, Va. He was a son of James Madison, descendant of John Madison, of England, who in 1653 took out a patent for land on Chesapeake Bay between the York

and North Rivers. James Madison's paternal grandmother, Frances Taylor, of Orange County, had four brothers, one of whom was grandfather of President Zachary Taylor. Madison's mother was Nelly Conway, and he was the first of twelve children.

Madison graduated at Princeton; helped draft the Virginia State Constitution, and was a member of the first State Legislature; a delegate to the Continental Congress; again a member of the Virginia Legislature; once more a delegate to the Continental Congress; served in the Federal Convention and helped draw up and signed the Federal Constitution; drew up the Virginia Resolution against the alien and sedition laws; Secretary of State under Jefferson; President for two terms.

Madison was small in stature, neat in attire, quiet, polite, and scholarly. He spent the latter part of his life on his estate at Montpelier. There he was buried. He was an Episcopalian.

Mrs. Madison, who was raised as a Quaker, was a daughter of John Payne of North Carolina. Her mother, Mary Coles, was a cousin of Patrick Henry. Her grandfather, John Payne, an English gentleman, settled in Virginia early in the eighteenth century. Her first husband, whom she married when nineteen, was John Todd, a Pennsylvania lawyer and Quaker, who died in 1793 at Philadelphia in a yellow fever epidemic. He left her one son, Payne Todd.

Madison married Mrs. Todd at Harewood, Jefferson County, Va., the home of her younger sister, Mrs. George Steptoe Washington. Mrs. Madison and her husband fled from Washington to Virginia by night in 1814, when British troops set fire to the Capitol and other buildings.

The first marriage in the White House was in 1811 and united Congressman John G. Jackson of Virginia and Miss Todd, a relative of Mrs. Madison by her first husband.

James Monroe, Republican, was born on a Friday in Westmoreland County, Va., and died of old age at New York City. His ancestry was Scotch. The first Monroe in Virginia settled there prior to 1650. James was a son of Spence Monroe and Eliza Jones, sister of Judge Joseph Jones, a Virginia delegate to the Continental Congress. He attended William and Mary College, but soon, with teachers and students, left and joined the Revolutionary Army under Gen. Washington and was wounded in action.

He served in the Virginia Legislature, and in the Continental Congress; helped draw up the Federal Constitution; served as United States Senator; Envoy to France, 1794; Governor of Virginia twice; Plenipotentiary to France, and in 1803 took part in the Louisiana Purchase; Minister to England; Secretary of State under Madison, and in 1814-15 also Secretary of War; President for two terms. As President in 1823 he formulated the "Monroe Doctrine," which declares against European aggrandizement in the three Americas.

He died of old age. His body was buried in the Marble Cemetery, Second Street, New York City, but in 1858 was interred in Hollywood Cemetery, Richmond, Va.

Except when in New York City, Monroe lived on his estate at Oak Hill, Loudon County, Va. He was a lawyer but seldom had practiced. He was an Episcopalian.

Mrs. Monroe, Eliza or Elizabeth, was born at New York City and was a daughter of former Capt. Lawrence Kortright of the British Army. While in France Mr. Monroe, then being the American Minister, secured the release from the prison, La Force, of Mme. de Lafayette, who hourly expected to be executed. One of Mrs. Monroe's sisters was the wife of M. Heyliger, Grand Chamberlain to the King of Denmark; another sister married Nicholas Gouverneur of New York City.

One of the daughters of the Monroes married Judge George Hay of Richmond, Va.; the younger, Maria, became in 1820 the wife of a cousin, Samuel L. Gouverneur of New York City. The marriage took place at the White House. She died in 1850. Mrs. Hay died at Paris and was buried there in Pere la Chaise.

John Quincy Adams, a son of President John Adams, and likewise a Unitarian, was born at Quincy, Mass., and died following a stroke of paralysis while in Congress at Washington. His mother's grandfather was John Quincy.

J. Q. Adams was educated in Europe, graduated at Harvard, and practiced law; was Minister to Holland, and to Portugal, under Washington; in his father's Administration was Minister to Prussia; served in the Massachusetts Senate; in 1803 entered the United States Senate, where he quit the Federalist Party and became a Republican and later a Whig.

Resigning from the Senate, he taught rhetoric at Harvard; Minister to Russia under Madison; took part in the peace treaty at Ghent; Minister to England; Secretary of State under Monroe and negotiated the Florida Purchase, and took part in formulating the Monroe Doctrine; chosen President by the House of Representatives, though Gen. Jackson had got the highest number of electoral votes at the election—Jackson, 99; Adams, 84; Crawford, 41; Clay, 37.

Soon after his Presidential term ended he was elected to the House of Representatives, from Massachusetts, and fought the slave power aggressively. He was a skilful and fiery debater, insensible to fear. He was buried at Quincy, Mass.

Mrs. John Quincy Adams was born at London and was a niece of Thomas Johnson of Maryland. Her father had lived abroad for years and by direction of Congress acted as American fiscal agent in France and later in England. Miss Johnson became the wife of Adams at London and was his companion during his long diplomatic career in Europe.

Their children were: George Washington Adams, born at Berlin in 1801; John Q. Adams jr., born at Boston, July 4, 1803; Charles Francis Adams, born at Boston in 1807; and Louisa Catherine Adams, born at St. Petersburg in 1811 and died there in 1812. Their son, C. F. Adams, lawyer, served in the Massachusetts Legislature; was Free Soil candidate for Vice President in 1848; served in Congress; was Minister to England during the Civil War; was President of the Geneva Board of Arbitration. His four sons were all prominent.

Cake and wine were passed to guests at White House receptions in Adams's time.

J. Q. Adams jr. married his cousin, Miss Johnson, in 1826 at the White House.

Andrew Jackson, Democrat, was born in the Waxhaw settlement on the North Carolina-South Carolina border, and died of tuberculosis at his home, the Hermitage, near Nashville, Tenn. He was a son of Andrew Jackson, who came over from North Ireland in 1765, and his mother was Elizabeth Hutchinson, also from Ireland. He studied law at Salisbury, N. C., practiced at Nashville; he helped draw, in 1796, the Constitution of Tennessee; served in Congress, and in the U. S. Senate; resigned in 1798 to become a Tennessee Supreme Court Judge; fought several duels, in one of which he killed Charles Dickinson and was himself severely wounded.

In 1812 Jackson, "Old Hickory," headed 2,000 troops against the British; in 1813 he defeated the Creek Indians on the Tallapoosa River; in 1814 he became a Major General in the army, and he defeated the British at Mobile, at Pensacola, and at New Orleans; he seized Florida temporarily from the Spanish, and quelled Negro and Indian disorders there. In 1821, after the puchase of Florida, he was appointed Governor; in 1823 he entered the U. S. Senate. In 1824 he got more electoral votes for President than J. Q. Adams, but election was thrown into the House of Representatives, where Adams was elected President by the vote of 13 States, 7 voting for Jackson and 4 for Crawford. In 1828 Jackson was elected President, and re-elected in 1832.

He was shot at, in the Capitol at Washington, Jan. 29, 1835, by Richard Lawrence, a house painter. The weapon missed fire. He was a Presbyterian.

Mrs. Jackson, born in North Carolina, was the daughter of Col. John Donelson, a surveyor who, in 1779, sold his ironworks in Pittsylvania County, Va., and, after a 2,000-mile journey by rivers, settled near Nashville, Tenn. His daughter was the best horsewoman and dancer in that part of the country. Her first husband, Capt. Lewis Robards, divorced her, later accusing Jackson, who married her, first, at Natchez in 1791, before the divorce actually was granted, and again in 1794, after the decree.

Mrs. Jackson died before her husband went into the White House. She had no children, but Gen. Jackson adopted one of her sister's children, a boy, who was named Andrew Jackson jr. and who inherited the General's large estate.

The mistress of the White House in the Jackson Administration was his wife's sister, Emily, a slender brunette, who had married her cousin, Major A. J. Donelson. The latter served as private secretary to President Jackson. Emily's four children were born at the White House. She was assisted as mistress by Mrs. Sarah Yorke Jackson of Philadelphia, wife of the President's adopted son.

Gen. Jackson passed cheese to guests at White House levees.

There were two White House weddings in Jackson's Administration, that of M. Pageot of Martinique, later French Minister to the U. S., and Miss Lewis, daughter of Major Lewis of Nashville; and that of a niece of Jackson and Mr. Polk of Tennessee.

Martin Van Buren, Democrat, was born at Kinderhook, N. Y., and died there of asthma. He was the son of Abraham Van Buren and Mary Hoes (originally spelled Goes), widow of a man named Van Alen. James J. Van Alen was his half-brother. The whole family was of Dutch origin.

Van Buren practiced law; was Surrogate of Columbia County; a State Senator; Attorney General of the State; re-entered the State Senate; became U. S. Senator in 1821, and resigned to become Governor of New York; was Secretary of State under President Jackson; resigned in 1831 to be Minister to England but was not confirmed; was elected Vice President in 1832, in 1836 was elected President; was Free Soil candidate for President in 1848, but was defeated.

He was a member of the Dutch Reformed Church.

Mrs. Van Buren, like her husband, was of British descent and was a blood relative of his mother, Mary Hoes (originally spelled Goes) and was his classmate at the public school at Kinderhook, N. Y.

Of the Van Buren children, Abraham, 1807-1873, was a West Point graduate, an army officer on the western frontier, secretary to his father as President, an army officer in the Mexican War, and in his later years a man of leisure at New York City. Another son "Prince" John, 1810-1866, a lawyer, was elected Attorney General of New York State in 1845. He died at sea.

Abraham's wife, Angelica Singleton, born in South Carolina in 1820, daughter of a planter, was a cousin of William C. Preston and of President Madison's wife. She was mistress of the White House during most of Van Buren's term. Mrs. Van Buren was a member of the Dutch Reformed Church.

W. H. Harrison, a Whig, of English descent, was born at Berkeley, Charles City County, Va., and died of pneumonia at Washington. He was the third son of Benjamin Harrison, a signer of the Declaration of Independence. He graduated at Hampden Sidney College and studied medicine. Against the advice of his guardian, Robert Morris, he joined the army and went west and fought the Indians.

Harrison was Secretary of the Northwest Territory; a delegate in Congress; Governor of the Indian Territory; defeated the Indians at Tippecanoe, on the Wabash River; in 1812 took command of all United States troops in the northwest; in 1813 defeated the British in Canada. In 1816 he entered Congress; in 1819 he was in the Ohio Senate; in 1824 he entered the United States Senate, resigning to be Minister to Colombia; in 1836 he was defeated for President; in 1840 he was elected, and a month after his inauguration he died of pneumonia.

Harrison was an Episcopalian.

Mrs. Harrison was a daughter of Col. John Cleves Symmes, a delegate to the Continental Congress, a soldier in the Revolutionary Army, and Chief Justice of the New Jersey Supreme Court. She was born in Morristown, N. J.

Of President Harrison's sons, John Scott Harrison of Indiana, 1804-1878, was a Whig in Congress and was the father of Benjamin Harrison, the twenty-third President. His daughter, Lucy, 1798-1826, born at Richmond, Va., became the wife of D. K. Este, a lawyer and judge of Cincinnati.

Gen. Harrison died a month after his inauguration. His wife, who was an invalid, did not go to the White House with him, but remained at her home, North Bend, O. Mrs. Harrison was brought up a Methodist.

John Tyler, a Democrat, second son of Judge John Tyler and Mary Armistead, both of English ancestry, was born at Greenway, Charles City County, Va., and died Jan. 17, 1862, of liver trouble at Richmond, Va. He graduated at William and Mary College; practiced law; served in the Virginia Legislature; fought in 1813 in the defense of Richmond against the British; re-elected to the Legislature; entered the House of Representatives in 1816, retiring in 1821 because of his health; entered the Legislature; became rector and chancellor of William and Mary College; in 1825 was elected Governor of Virginia, and was re-elected; in 1826 was elected to the U. S. Senate; was defeated, in 1836, for Vice President on the State-Rights Whig ticket; resigned from the Senate after refusing to obey a resolution of the Virginia Legislature demanding he vote for the Benton resolution; in 1838 re-entered the Virginia Legislature; in 1840 was chosen Vice President, and became President on Gen. Harrison's death.

In 1861 Tyler was a delegate from Virginia to the Peace Convention of 13 northern and 7 border States, at Washington, called after the secession of South Carolina, to adopt a place for settling the controversy between the North and the South. He was President of the gathering. The U. S. Senate rejected the convention's proposals. Tyler was elected by Virginia to the Confederate Congress, but died before it assembled.

Tyler was an Episcopalian, tall, thin, clean-shaven, with a Roman nose and a high receding forehead. His eyes were blue, his voice shrill. He was playing "knuckles" with his children at Williamsburg, Va., when notified, by a messenger who had come from Washington by sail boat, of President Harrison's sudden death, and he had to borrow money to get to the national capital. He was a violin player.

The first **Mrs. Tyler** was a daughter of Robert Christian, a planter of New Kent County, Va. She was delicate and died in the White House. She was an Episcopalian.

Of her children, Robert Tyler, 1818-1877, lawyer, editor, poet, married Priscilla, a daughter of T. A. Cooper, the tragedian, and she and her daughter, Mrs. Letitia Semple, were the mistresses of the White House. The latter was the wife of the nephew and adopted son of Judge Semple of Williamsburg, Va. One daughter, Elizabeth, married at the White House, William Waller of Williamsburg, Va.; another, Alice, married the Rev. H. M. Denison of Wyoming, Pa.

The second **Mrs. Tyler,** whom he married at New York City, was born on Gardiner's Island, near Easthampton, N. Y., and was a member of the family that held manorial rights on that island. Of her children, Lyon Gardiner Tyler, lawyer, legislator, became, in 1888, President of William and Mary College, Williamsburg, Va.

Mrs. Tyler was a Roman Catholic. Her father was killed by a cannon explosion on a warship on the Potomac, and his body and that of other victims—the whole party having been the President's guests on a pleasure cruise—were removed to the White House. There Miss Gardiner met the President and aroused his affection.

James K. Polk, a Democrat, was born in Mecklenburg County, N. C., and died of diarrhoea at Nashville, Tenn. The name originally was Pollock, and the family came from Ireland. His father was Samuel Polk, a farmer and surveyor, and his mother, Jane Knox, of Iredell County, N. C.

He graduated at the University of North Carolina; practiced law; served in the Legislature and in Congress; was elected Governor of North Carolina in 1839. He was called the "Napoleon of the Stump." He was, 1835-1839, Speaker of the U. S. House of Representatives; chosen President in 1844. He was a Presbyterian, wore his hair long, and was democratic and affable.

Mrs. Polk was a daughter of Joel Childress, a wealthy planter near Murfreesboro, Tenn. She was educated in a Moravian school. She abolished drink and dancing from White House receptions. She was a handsome woman of the Spanish type. Having no children, Mrs. Polk, after her husband's death, adopted a niece.

Zachary Taylor, a Whig, fifth in descent from an English immigrant of 1658, was born in Orange County, Va., and died of indigestion at the White House. His father, Col. Richard Taylor, was an American officer in the Revolution.

Zachary Taylor, at 23, entered the Army, fought the Indians along the Wabash and in Florida, in the Black Hawk and Seminole Wars; he defeated the Mexicans at the Rio Grande border of Texas, and, with Gen. Winfield Scott, was a hero of the Mexican War; was elected President in 1848. He was a cotton planter and had a large landed estate in Louisiana. He was buried at Springfield, near Louisville, Ky. He was an Episcopalian.

Mrs. Taylor was a daughter of Walter Smith, a planter of Calvert County, Md. Her younger daughter, Elizabeth ("Betty") Taylor, wife of Major W. W. S. Bliss, was mistress of the White House. "Betty," when a widow, married P. P. Sandridge of Winchester, Pa.

The Taylor's older daughter, Ann, became the wife of Dr. Robert Wood, Assistant Surgeon General of the Army. Another, Sarah Knox Taylor, became the wife of Jefferson Davis.

Taylor's son, Richard, 1826-1879, born in Kentucky, served in the Confederate Army under "Stonewall" Jackson, and rose to be a Lieutenant General. He died at New York City.

Millard Fillmore, a Whig, was of English descent, the first of the name in the United States having been John, a mariner, of Ipswich, Mass. Millard's father, Nathaniel, was a pioneer log-cabin settler in Cayuga County, N. Y. Millard served apprenticeship as a wool carder, and then became a lawyer, at Buffalo. He served in the Legislature and in Congress, was State Comptroller, and in 1848 was elected Vice President and succeeded to the Presidency on Gen. Taylor's death, July 9, 1850.

All of his papers and documents were destroyed in 1891, under a clause in the will of his son, Millard

Powers Fillmore, a Buffalo lawyer. Ex-President Fillmore passed his last years at Buffalo, dying there of old age, and was buried in Forest Lawn Cemetery, Buffalo. He was a Unitarian.

The first **Mrs. Fillmore** was the daughter of a Baptist clergyman, the Rev. Lemuel Powers of Stillwater, Saratoga County, N. Y. She taught school in Cayuga County, N. Y., in a backwoods district, and continued to teach after Fillmore married her. Owing to Mrs. Fillmore's health, her daughter, Miss Mary Abigail, was the White House mistress.

The second **Mrs. Fillmore**, whom he married at Albany, N. Y., at the Schuyler mansion, was Caroline Carmichael, a daughter of Charles Carmichael and Temperance Blachley of Morristown, N. J., and widow of Ezekiel C. McIntosh, a prominent merchant of Albany.

Franklin Pierce, a Democrat, born on Friday, inaugurated on Friday, died on Friday, first saw the light at Hillsborough, N. H., and died of stomach trouble at Concord, N. H. He was a son of Benjamin Pierce, farmer and officer in the Revolutionary Army. He graduated at Bowdoin College in 1824; practiced law; served in the New Hampshire Legislature, in the United States House of Representatives, and in the U. S. Senate, resigning in 1842 to resume his profession; was an officer, in 1847, in the war in Mexico; was elected President in 1852. After his term, he made a tour of Europe.

Pierce was handsome, graceful, well-dressed; and was a notable orator. He was an Episcopalian. He left an estate valued at $72,000.

Mrs. Pierce was born at Hampton, N. H., was a daughter of the Rev. Jesse Appleton, President of Bowdoin College. Of the children of the Pierces, two sons died in early youth and the youngest, Benjamin, thirteen years old, was killed, Jan. 6, 1853, in a railroad accident near Lawrence, Mass., in the presence of his parents. This was two months before Mr. Pierce's inauguration.

James Buchanan, a Federalist, later a Democrat, of Scotch descent, was born near Mercersburg, Pa., and died of rheumatic gout, at Lancaster, Pa. He served as a volunteer in the defense of Baltimore, in the war of 1812; graduated at Dickinson College; practiced law; served in the Pennsylvania Legislature; was elected in 1820 to the House of Representatives, from which he resigned in 1831, when President Jackson appointed him Minister to Russia; was elected in 1824 to the U. S. Senate, where he stayed till 1845 when he became Secretary of State under President Polk. In 1849 he retired to Wheatland, his 22-acre estate near Lancaster; in 1853 was Minister to England; in 1856 he was elected President. He was a Presbyterian.

President Buchanan was a bachelor. The mistress of the White House in his Administration was his sister Jane's daughter, Harriet Lane, whose father, Elliott T. Lane, came from an old Virginia family and had grown wealthy as a transcontinental trader. He lived at Mercersburg, Pa.

Miss Lane tall and blonde, with violet eyes, had been educated at a Roman Catholic school at Georgetown; later in life she became an Episcopalian. Her mother died when she was seven, her father when she was nine, thereafter she made her home with her uncle. She was with him in his diplomatic career abroad.

The Prince of Wales (later King Edward) was a guest at the White House in the Buchanan Administration.

In January, 1866, Miss Lane married Henry Elliott Johnston of Baltimore. Her son, James Buchanan Johnston, died in 1881.

Abraham Lincoln, a Whig, later a Republican, 6 ft. 4 in. in height, was born in Hardin County, Ky., and was a descendant of Samuel Lincoln, who came over from Norwich, England, and settled at Hingham, Mass. The Lincolns in successive generations lived in New Jersey, Pennsylvania, Virginia and Kentucky. Abraham's father Thomas, was a carpenter, his mother, Nancy Hanks, was the niece of a carpenter. Abraham had a sister and a brother. The sister married but had no children. The brother died in infancy. In 1816 Abraham's parents moved across the Ohio River into Indiana, where his mother died in 1818. His father then married a widow, Sarah Bush Johnston. In 1830 the family moved to Macon County, Ill.

Abraham cleared the forest and helped build their cabin home; with Denton Offutt he carried farm produce by water to New Orleans and sold it; he kept a general store at New Salem, Ill., he served as an officer of volunteers in the Black Hawk Indian War; was Postmaster at New Salem; he served in the Illinois Legislature 1834-1840; practiced law at Springfield, Ill.; in 1846 was elected to House of Representatives and served one term; in 1858 debated slavery with Stephen A. Douglas in the latter's successful campaign for re-election to the U. S. Senate; in 1860 was elected President; re-elected in 1864; was shot Friday, April 14, 1865, at Ford's Theatre, Washington, by John Wilkes Booth, an actor, and died the next day. The assassin was shot to death April 26, by Sergt. Boston Corbett, U. S. Army, near Fredericksburg, Va. Lincoln was buried at Springfield, Ill.

There were coincidences in the lives of Abraham Lincoln and Jefferson Davis. Both were born in Kentucky; Lincoln in 1808, Davis in 1808. Both removed from their native State in childhood, Lincoln to the Northwest, Davis to the Southwest. Lincoln was a Captain of Volunteers and Davis a Second Lieutenant of Regulars in the Black Hawk War of 1832. They began their political careers the same year, 1844, Lincoln being a Presidential Elector for Clay, and Davis for Polk. They were elected to Congress about the same time, 1845 and 1846. They were called to preside over their respective Governments the same year and within a few days, Davis, Feb. 8, 1861; Lincoln, March 4, 1861.

Mrs. Lincoln was born at Lexington, Ky., was a daughter of Robert S. Todd, a pioneer settler, and a sister of the son of Gov. Ninian Edwards of Illinois.

Of the Lincoln children, William Wallace died in 1862, and Thomas ("Tad") in 1871. Another son, Robert Todd Lincoln, born at Springfield in 1843, studied law at Harvard, served in the Civil War, was Secretary of War in the Garfield Cabinet, then Minister to Great Britain, and later counsel to and President of the Pullman Palace Car Co.

It is said of Mrs. Lincoln that she had from girlhood the ambition to be a President's wife. She refused an offer of marriage from Senator Stephen A. Douglas. As mistress of the White House there was little opportunity for formal receptions or for indulgence in her fondness of society, owing to the Civil War. The Executive Mansion was almost constantly the scene of war councils.

Andrew Johnson, a Democrat, whose father perished in rescuing a man from drowning, was born at Raleigh, N. C., and died of paralysis near Carter's Station, Tenn., and was buried at Greenville, Tenn. He was apprenticed, at 10 years, to a tailor, and worked as a journeyman tailor. He married Eliza McArdle, who taught him to write; was elected an Alderman and in 1830 Mayor of Greenville, Tenn.; in 1855 entered the Legislature; in 1843 was elected to the House of Representatives as an anti-U. S. Bank Democrat, and served till 1853, when he was elected Governor of Tennessee; in 1857 he was elected to the U. S. Senate, where he was a Union man; was appointed by President Lincoln in 1862 Military Governor of Tennessee; in 1864 was elected Vice President when Lincoln was re-elected; was impeached by the House of Representatives for having removed without the Senate's consent E. M. Stanton, Secretary of War, and on other charges. Johnson was tried by the U. S. Senate, which voted 35 for conviction, 19 for acquittal; but as two-thirds vote was necessary for conviction, the impeachment failed.

In 1875 he was again elected to the U. S. Senate from Tennessee. Johnson, bitter at his failure of renomination, refused to ride with Gen. Grant to the latter's inauguration and remained at the White House. He was a stocky man of medium height.

Mrs. Johnson, born at Leesburg, Tenn., died at Howe, Tenn., was the only daughter of a widow in a mountain hamlet when Johnson married her.

Their daughter, Martha, born in 1828, was educated at Georgetown, D. C., was often a guest at the White House in Polk's Administration. In 1857 she married Judge D. T. Patterson and was mistress of the White House in place of her invalid mother. Another daughter, Mary, 1832-1883, was the wife, first of Daniel Stover of Carter County, Tenn., and, after his death, of W. R. Bacon of Greeneville, Tenn. By Stover she had three children.

Ulysses S. Grant, of Scotch descent, the pioneer in America being Matthew Grant, who settled in 1630 at Dorchester, Mass., was born at Point Pleasant, Ohio, and died of cancer on Mt. McGregor, near Saratoga, N. Y. Grant's Tomb overlooks the Hudson at New York City.

He was the oldest of the six children of Jesse R. Grant, a tanner, and Hannah Simpson, and was baptized as Hiram Ulysses Grant. He worked as a boy on his father's farm; graduated in 1843 at the U. S. Military Academy; served as an officer under Gen. Zachary Taylor, 1845-48 in the war with Mexico; resigned in 1854, after service in the West, from the army, and was a farmer and real estate dealer at St. Louis; in 1860 clerked in his father's hardware and leather store at Galena, Ill.

At the outbreak of the Civil War he drilled volunteers, and was commissioned Colonel of the 21st Illinois Regiment by Gov. Yates. In 1862, after his capture of Ft. Donelson, he was made a Major General; captured Vicksburg July 4, 1863; won the battle of Chattanooga Nov. 24,-25, 1863; in 1864 he was made Lieutenant-General; forced Lee's surrender at Appomattox, Va., April 9, 1865; in 1866 Congress commissioned him General of the Army.

Gen. Grant was elected President in 1868, by the Republican party. Early in life he was a Whig, but in 1856 he voted for Buchanan. In 1872 he was re-elected President on the Republican ticket; in 1877-1879 made a tour of the world and in 1880 visited the South, Cuba, and Mexico; in 1880 his Republican friends failed to renominate him for the Presidency, after 36 ballots; in 1884 he lost his fortune in the failure of Grant & Ward, New York, bankers, but recouped it by writing his memoirs. He was a Methodist.

Mrs. Grant was a daughter of Judge Frederick Dent of St. Louis, a son of a Revolutionary officer. The Grants had four children—Frederick Dent, Ulysses jr., Jesse and Nellie. The last named became the wife of Algernon Sartoris of London.

Gen. Frederick Dent Grant, West Point graduate and soldier, was Minister to Austria in the Benj. Harrison Administration, a New York City Police Commissioner, a general officer in the war with Spain.

Nellie Grant and Capt. Sartoris were married at the White House in 1874. Sartoris's mother was a sister of the actress Fannie Kemble. In 1912 Mrs. Sartoris, then a widow, became the wife of Frank H. Jones, a lawyer, who was First Assistant Postmaster General in Cleveland's Administration.

Rutherford B. Hayes, a Whig and then a Republican, was born, a posthumous child, on a Friday at Delaware, O., and died of heart disease at Fremont, O. His mother was Sophia Birchard, of Suffield, Conn. He graduated at Kenyon College, studied law at Harvard, and began to practice at Fremont; was City Solicitor of Cincinnati; served as a Union General in the Civil War; served in the House of Representatives, 1865-1867; was elected Governor of Ohio, in 1867 and was re-elected; defeated for Congress in 1872; re-elected Governor in 1875; in 1876 was the Republican candidate for President. The votes of Louisiana, South Carolina and Florida being in dispute, Congress appointed an Electoral Commission of 5 Senators, 5 Representatives and 5 Justices of the United States Supreme Court, who, by vote of 8 to 7, decided the votes of these States in favor of Gen. Hayes and he was seated.

He was a Methodist, and was a descendant of George Hayes, a Scotchman, who settled in 1680 at Windsor, Conn.

Mrs. Hayes was a daughter of Dr. James Webb of Chillicothe, O., and a granddaughter of Dr. Isaac Cook. The Webbs had come from North Carolina. She refused to let wine be served in the White House. She was a Methodist and was a college graduate.

President Hayes and his wife had eight children: Birchard A. (1853); Webb C. (1856); Rutherford P. (1858); Joseph T. (1861-1863); George C. (1864-1866); Fanny (1867); Scott R. (1871); Manning F. 1873-1874).

In June, 1878, a White House wedding united Gen. Russell Hastings to his second wife, Emily Platt, niece of President Hayes and daughter of William A. Platt of Columbus, O. Gen. Hastings was a Civil War soldier born in Massachusetts in 1835. His first wife was Adele Humphreys of Michigan, by whom he had a son, Clive Hastings. By the White House bride he had three children. Russell Platt Hastings, Lucy Webb Hastings, and Fannie Hastings.

James A. Garfield, a Republican, born at Orange, O., died at Elberon, N. J. from assassin Guiteau's bullet, was a descendant of Edwin Garfield, an English Puritan, who, in 1630, was one of the founders of Watertown, Mass. His mother was Eliza Ballou, a New England descendant of a French Huguenot. His father, Abraham Garfield, was a native of New York who pioneered in 1830 to the Ohio wilderness.

Garfield worked on a boat on the Ohio canals; did carpentry; was baptized in youth a Campbellite into the fold of "The Disciples;" graduated at Williams College; taught school at Hiram, O.; was admitted to the bar; in 1859 was elected to the State Senate; served as a Union General in the Civil War; resigned from the army in 1863 to take a seat in the United States House of Representatives, and served until 1880 when he was elected to the United States Senate. While in the House he was charged with having owned stock in the Credit Mobilier, a dummy scheme to aid the Union Pacific Railroad in Congress. This he denied.

In 1880 Garfield was elected President, and was inaugurated on a Friday; on July 2, 1881, he was fatally shot at the Baltimore and Potomac railway depot, Washington, by Charles Jules Guiteau. Garfield was buried at Cleveland, O. Guiteau was convicted of murder and was hanged at the jail at Washington, June 30, 1882.

Garfield was burly and strong. He was remarked for his bright green "gander" eyes.

Mrs. Garfield's father was Zeb Rudolph, a farmer at Garrettsville, O. She and Garfield were schoolmates, and when she became his wife he was President of the Eclectic Institute at Hiram, O. Her mother was a daughter of Elijah Mason of Lebanon, Conn., and a descendant of Gen. Nathaniel Greene.

Of the Garfield children, Harry A., lawyer, became President of Williams College; James R., lawyer, was Secretary of the Interior under Roosevelt; Abram became an architect; Mary married J. Stanley Brown.

Chester A. Arthur, a Whig, then a Republican, who became President when Garfield died, was born at Fairfield, Vt., and died at New York City. He was a son of the Rev. William Arthur and Malvina Stone, of an old New Hampshire family.

He graduated at Union College; taught school at Pownall, Vt.; studied law in New York City, helped organize in 1861 the New York State Militia, and when the Civil War began he was appointed Quartermaster General and equipped State troops for service at the front; in 1871 was appointed Collector of the Port of New York and served until 1878, when President Hayes removed him for political reasons. In 1880 as delegate at large from New York State he was a leader in the fight at the Republican National Convention to name Gen. Grant for a third term, and in the interests of harmony was put on the ticket for Vice President.

Arthur was tall, portly, dark, handsome, courtly. His death was due to apoplexy. He was buried at Albany, N. Y. He was an Episcopalian.

Mrs. Arthur, who died before her husband became President, was a Virginian from Fredericksburg, and was a daughter of Commander William Lewis Herndon of the Navy, who, in 1851, explored the Amazon River. The Arthurs had three children, W. L. H. Arthur, who died in infancy, Chester Alan Arthur Jr., born 1865, and Ellen Herndon Arthur, born 1871, who became the wife of Charles Pinkerton.

The mistress of the White House in Arthur's Administration was his sister Mary, wife of John E. McElroy of Albany, N. Y.

Grover Cleveland, a Democrat, born at Caldwell, N. J., died of debility at Princeton, N. J., was descended from Moses Cleveland, of England, who settled near Woburn, Mass., in 1635. Grover's father, Richard Falley Cleveland, was a son of a watchmaker, and was pastor of the Presbyterian Church at Caldwell. His mother was Anne Nealy, of Baltimore, daughter of a merchant, of Irish birth, and was tall, dark and slim. Grover was named after the Rev. Stephen Grover, his father's predecessor at Caldwell. He dropped the "Stephen" while a lad at Fayetteville, N. Y., whither his family had moved.

Cleveland clerked in a store at Clinton, N. Y.; his father dying when 16; he taught, with an older brother, at the New York City Institution for the Blind; he made up a herd book for his uncle, Lewis F. Allen, a stock breeder at Black Rock, near Buffalo; studied law at Buffalo and was admitted to the bar in 1859; in 1863 became Assistant District Attorney of Erie County; defeated for District Attorney in 1865, but was elected Sheriff in 1870; in 1881 was elected Mayor of Buffalo; in 1882 was elected Governor of New York; in 1884 he was elected President; defeated in 1888; re-elected President in 1892.

After leaving the White House he settled at Princeton, N. J. On the change of control of the Equitable Life Assurance Society of New York he was made a trustee. He was fond of hunting and fishing.

Mrs. Cleveland's father, Oscar Folsom, was a law partner of Cleveland at Buffalo. Her mother was Emma C. Harmon. She married the President at the White House and their second daughter was born there in 1893. Before the marriage, the mistress of the Executive Mansion was the President's youngest sister, Rose Elizabeth Cleveland.

President Cleveland had four children, Esther, Marion, Frances G., and Richard Folsom. Cleveland's widow married, Feb. 10, 1913, Thomas Jex Preston jr., Professor of Archaeology at Princeton University.

Benjamin Harrison, a Republican, was born at North Bend, O., and died of pneumonia, at Indianapolis. He was descended from the Virginia Harrisons. He was the third son of John Scott Harrison, a son of President William Henry Harrison.

By some, the Harrison lineage is traced to Pocahontas. Benjamin's mother was Elizabeth F. Irwin.

He worked on his father's 400-acre farm; graduated at Miami University; was admitted to practice law in 1853 at Cincinnati; elected in 1860 as reporter of the Indiana Supreme Court; raised volunteers and served as a Union General in the Civil War; defeated for Governor in 1876; in 1879 a member of the Mississippi River Commission; in 1881 elected from Indiana to the United States Senate; in 1888 was elected President; in 1892 was renominated but was defeated.

Harrison was an elder in the Presbyterian Church at Indianapolis. He was short, sandy, astute, unsociable, with small, bright, sharp eyes. His estate was estimated at $375.000.

The first **Mrs. Harrison**, who was born at Oxford, O., and died in the White House, was a daughter of Prof. John W. Scott of Miami University, later President of Oxford Seminary. She was a musician and painter, a Presbyterian Sunday school teacher, and was the first President-General of the Daughters of the American Revolution. Mrs. Harrison's son, Russell B., mining engineer and journalist, is a Lafayette graduate. Her daughter, Mary, married James R. McKee an Indianapolis merchant.

The second **Mrs. Harrison** was Mrs. Mary Scott Lord Dimmick, niece of the first Mrs. Harrison, and widow of Walter Erskine Dimmick, a lawyer, who died at sea. She had spent two years at the White House during her aunt's life. The ex-President married her at New York City. By the second wife Mr. Harrison had one child, Elizabeth Harrison, born in 1897. In 1921, when she was a lawyer, she married James Blaine Walker jr., a great-nephew of James G. Blaine. The children of the first wife fought the second wife in court over a division of the Harrison estate.

William McKinley, a Republican , was born at Niles. O. and died at Buffalo, N. Y. He was of Highland Scotch descent, his ancestors having lived long in Ireland though before settling in York County, Pa. His father was William McKinley, operator of charcoal furnaces at Niles, O., his mother was Nancy Allison, of Scotch lineage, whose family had settled in Westmoreland County, Pa.

McKinley was the seventh of nine children. He quit Allegheny College to make a living, and taught school; enlisted as a private and served in the Civil War, and came out a Major; studied law and practiced at Canton, O.; elected, 1869, Prosecuting Attorney of Stark County; in 1876 was elected to the House of Representatives and served until 1891, except for a short time in 1884 when a contest unseated him; elected Governor, 1891 and re-elected in 1893; elected President in 1896 and re-elected in 1900; assassinated by an anarchist, Leon Czolgosz, who shot him twice, with a pistol hidden in a handkerchief, Sept. 6, 1901, at the Pan-American Exposition, Buffalo, N. Y. The President died Sept. 14, at the home of John G. Milburn, at Buffalo. Czolgosz was convicted and was electrocuted Oct. 29, 1901, at Auburn State Prison.

McKinley was a Methodist. He was buried at Canton, O.

Mrs. McKinley was a daughter of James Asbury Saxton and Catherine DeWalt. She was educated in private schools, spent some time in Europe and was cashier in her father's bank at Canton, Ohio, when she married. Her two children, Katie and Ida, died in early childhood. A nervous ailment then made her an invalid for the rest of her life. She was, nevertheless, the mistress of the White House, accompanied her husband everywhere, and was with him at Buffalo when he was assassinated.

Theodore Roosevelt, Republican, of Holland descent, was born at New York City and died in sleep of heart trouble at Oyster Bay, N. Y. He was a son of Theodore Roosevelt. His grandfather explored the Ohio and Mississippi on the first steamboat that navigated them. Theodore's mother, Martha Bullock, of Roswell, Ga., was descended from Georgia's first Governor, Archibald Bullock.

Roosevelt graduated at Harvard, traveled in Europe; served 1882-1884 in the New York State Assembly; lived 1884-1886 on a North Dakota ranch; was an unsuccessful candidate for Mayor of New York City in 1886; was Police Commissioner; was a member of the National Civil Service Commission; 1897-1898 Assistant Secretary of the Navy, resigning to organize, with Surgeon Leonard Wood, 1st U. S. Cavalry (Roosevelt's Rough Riders), which served in Cuba in the Spanish American War, and of which he became Colonel; elected Governor of New York 1898; elected Vice President in 1900 and became President in 1901 on McKinley's assassination; elected President in 1904; hunted in East Africa in 1909-1910; defeated for President on the Progressive (Bull Moose) ticket in 1912; visited and explored South America, 1913-1914.

Roosevelt was a voluminous author, and fond of athletics. He was awarded the Nobel Peace Prize in 1906.

He was shot and wounded at Milwaukee, Oct. 14, 1912, by a crank. He belonged to the Reformed Dutch Church. He was buried at Oyster Bay, N. Y.

The first **Mrs. Roosevelt** was Alice Hathaway Lee, daughter of George Cabot Lee of Boston; she died in 1884. Her only child was Alice Lee Roosevelt, who, in 1906 at the White House, married Nicholas Longworth, a Cincinnati lawyer and landowner and a Republican Representative in Congress.

The second **Mrs. Roosevelt**, whom he married in 1886 at London, was Edith Kermit Carow, daughter of Charles Carow of New York City. By this union there were five children—Theodore jr., Kermit, Ethel Carow (Mrs. Richard Derby), Archibald Bullock, and Quentin. The last, an aviator in Europe in the World War, was killed in action and was buried where he fell. Theodore, who served as Lieutenant Colonel in the World War, was Assistant Secretary of the Navy under Harding and held over under Coolidge. Kermit and Archie also served in the war.

William H. Taft was born at Cincinnati, the son of Alphonso Taft and the latter's second wife, Louisa Maria Torrey, and he is a brother of Henry W. and Horace D. Taft, and a half-brother of Charles P. Taft, the latter's mother being Fannie Phelps, of Vermont. Alphonso Taft was Attorney General in Hayes Cabinet.

W. H. Taft graduated in 1878 at Yale, and in 1880 at the Cincinnati Law School; admitted to the Bar in 1880; was a law reporter on Cincinnati dailies; Assistant Prosecuting Attorney 1881-1883; Assistant City Solicitor, 1887; Judge Cincinnati Superior Court 1887-1890; United States Solicitor General, 1890-1892; United States Circuit Judge, 1892-1900; professor at the University of Cincinnati, 1896-1900; President of the United States Philippine Commission, 1900-1901; Civil Governor of the Philippines. 1901-1904; in 1902 arranged at Rome with Pope Leo XIII. the question of purchase of Roman Catholic lands in the Philippines; Secretary of War under Roosevelt, 1904-1908; Provisional Governor of Cuba for a while in 1907; on Government mission in 1907 to Cuba, Panama and the Philippines.

He was elected President in 1908; defeated for re-election in 1912; professor of law at Yale University, 1913-1921; appointed Chief Justice United States Supreme Court, June 30, 1921.

He is a Unitarian. Taft is tall, portly and suave.

Mrs. Taft was Helen Herron of Cincinnati, a daughter of Judge John W. Herron and Harriet Collins. She is one of eight children, a musician and a founder of the Cincinnati Orchestra. Her father was a law partner of Rutherford B. Hayes before the latter became President. She comes from an old New England family. Her only daughter is Helen Herron Taft, wife of Frederick J. Manning, an instructor in history at Yale University; her sons are Robert Alphonso Taft and Charles Pheips Taft 2d, both of whom are married.

Mrs. Taft had a nervous breakdown in 1909 and the mistress of the White House for a time was her sister, Mrs. Louis More, wife of a professor at the University of Cincinnati. She is an Episcopalian. She instituted 5 o'clock teas at the White House. She has blue-gray eyes and a contralto voice, a broad forehead and brown hair.

Woodrow Wilson, a Democrat, was born at Staunton, Va., and died of heart disease, at Washington. He was a son of a Presbyterian minister the Rev. Joseph Ruggies Wilson and Janet Woodrow, daughter of a Scotch Presbyterian Minister; and a grandson of James Wilson, a Presbyterian, of Uister, Ireland, who settled at Philadelphia in 1807 and became a printer, marrying, in 1808, a girl, also an Ulster Presbyterian, who had come across the Atlantic in the same ship with him. The Wilson ancestry was Scotch-Irish on both sides.

Wilson graduated at Princeton University, 1879; graduated in law at the University of Virginia in 1881; and took his Ph.D. degree at Johns Hopkins in 1886. He practiced law at Atlanta, Ga., 1882-1883; taught history and political economy at Bryn Mawr College, 1885-1888 and at Wesleyan University, 1888-1890, professor of jurisprudence and political economy at Princeton University, 1890-1902.

In 1902 he was chosen President of Princeton University and served until Oct. 1910; Governor of New Jersey, 1911-1913; elected President in 1912; re-elected in 1916. He helped draft a treaty of peace with Germany, at Paris, in 1919, welding in it the covenant of the League of Nations. The treaty was accepted by Japan and the Allies in Europe, but was rejected by the United States Senate. In campaigning in the West to arouse public sentiment for

the treaty, the President became partly paralyzed by apoplexy and thereafter was an invalid. He was awarded the Nobel Peace Prize in 1919. Wilson was a Presbyterian. He was entombed at the P. E. Cathedral Washington.

The first **Mrs. Wilson**, Ellen Louise Axson of Rome, Ga., was a sister of Prof. Stockton Axson of Princeton University and a daughter of the Rev. S. E. Axson and Margaret Hoyt. She was aided, as mistress of the White House, by her three children, Margaret W., Eleanor R., who there became the second wife of William G. McAdoo, Secretary of the Treasury under Wilson; and Jessie W., who also there married Francis B. Sayre, professor of law, Harvard. He is a member of the Pennsylvania family that has large coal and railroad properties. The first Mrs. Wilson died at the White House.

The second **Mrs. Wilson** was Edith Bolling of Wytheville, Va., widow of Norman Galt, a Washington jeweler. She is one of three sisters, inherited a fortune from her first husband and was mistress of the White House during the last of the first and all of the second Wilson Administration, accompanied him to the Versailles Peace Conference and was his companion in all of his travels in Europe and the United States. She was with him when he was stricken in the West.

Warren G. Harding was born at Corsica, O., and died of heart trouble, following pneumonia, at San Francisco. He was the son of Dr. George Tryon Harding and Phoebe Elizabeth Dickerson. He studied, 1879-1882, at Ohio Central College; in 1884 became connected with the Daily Star, at Marion, O., and later owned and edited the paper, selling it shortly before his death.

He served in the State Senate, 1900-1904; was Lieutenant Governor of Ohio, 1904-1906; defeated for Governor in 1910; entered the United States Senate in 1915; elected United States President in 1920.

The Limitation of Armament Conference was held under his invitation, at Washington, beginning on Nov. 11, 1921.

Harding was tall and leisurely in movement, genial, and a pacifier. He was a Baptist. He was buried at Marion, O.

Mrs. Harding, Florence Kling, is a daughter of Amos O. Kling, a Marion, Ohio, hardware merchant and later a banker. Her family are Mennonites. Mrs. Harding's first husband was Henry De Wolfe, by whom she had a son, Marshall Eugene De Wolfe. The couple were separated by a divorce decree and the Ohio Court restored her maiden name. De Wolfe died in Colorado of tuberculosis after having been aided by Harding in establishing himself in the newspaper business. De Wolfe's children were given legacies in the Harding will.

Calvin Coolidge, a Republican, was born in Plymouth, Vt., son of Col. John Calvin Coolidge, farmer and storekeeper, and Victoria J. Moor. His ancestor, John Coolidge, came with his wife, Mary, from England and settled at Cambridge (then Watertown) in the Puritan Colony of Massachusetts Bay in 1630.

Calvin Coolidge graduated at Amherst College, 1895; admitted to practice law, 1897, at Northampton, Mass.; City Councilman, 1899; City Solicitor, 1900-1901; clerk of the Courts, 1904; member of the Lower House of the Massachusetts Legislature, 1907-1908; Mayor of Northampton, 1910-1911; member of the State Senate, 1912-1915, and President of that body, 1914-1915; Lieutenant Governor of Massachusetts, 1916-1918; Governor, 1919-1920; elected Vice President in 1920, and became President on Harding's death, Aug. 2, 1923.

Coolidge is a Congregationalist.

Mrs. Coolidge is the daughter of Capt. Andrew I. Goodhue and Almira Barret, of Burlington, Vt. The Captain was a Democrat and was a steamboat inspector while Grover Cleveland was President. The President's wife was born at Burlington, graduated at the University of Vermont in 1902 and then taught at the Clarke Institute for the Deaf, Northampton, Mass. They had two children, John B. Coolidge, born in 1906, now in Amherst College, and Calvin Coolidge jr., born in 1908, who died in Washington, July 7, 1924. Mrs. Coolidge is a brunette, active in social work, skilled in cooking and needlework. She is a Congregationalist.

SALARY OF THE PRESIDENT.

The salary of the President of the United States was the cause of discussion in the First Congress, in view of the fact that the Constitution declared that the President should receive compensation for his services. Washington had notified his fellow citizens that he desired no salary. The limits suggested in Congress ranged from $15,000 to $70,000.

The salary was finally placed at $25,000, and this remained the compensation until President Grant's second term (March 3, 1873), when it was increased to $50,000.

Chapter 2918 of the Laws of the Second Session of the Fifty-ninth Congress, approved March 4, 1907, appropriated "for traveling expenses of the President of the United States, to be expended at his discretion and accounted for by his certificate solely, $25,000."

In the Second Session of the Sixtieth Congress the President's salary was fixed at $75,000 a year.

PRESIDENT'S TRAVELING EXPENSES.

The appropriation in 1907 of $25,000 for the President's traveling expenses covered only that one fiscal year. Annually since then Congress has made the same allowance, which now covers also "official entertainment" expenses.

The unexpended balance of an annual appropriation for one fiscal year may not be obligated in a succeeding fiscal year without legislative authority such as was given in the deficiency act of March 4, 1923, as follows:

"The appropriation of $25,000 for traveling and other expenses of the President of the United States for the fiscal year 1923 is hereby continued and made available for the same purposes until expended."

Such expenditures and obligations as are made and incurred by the President under authority of the appropriation in question are paid by the special disbursing agent of the White House, said special disbursing agent being advanced funds for disbursement under that appropriation pursuant to approved requisitions.

The funds thus advanced are accounted for the same as funds advanced to other disbursing agents of the Government, all payments being supported by vouchers, etc., approved and certified by the President.

The unexpended balances of the amounts thus advanced for disbursements are deposited in the Treasury and credited under the appropriation from which drawn, the unexpended balance of the appropriation from which the advances are made, as explained, being carried to the surplus fund and covered into the Treasury after remaining on the books of the Treasury for two full fiscal years after the fiscal year for which the appropriation is available for obligation. This is in order to give belated expense bills a chance to drift in.

The President's use of the U. S. S. Mayflower, or any other vessel of the Navy, is pursuant to and by virtue of his authority as Commander-in-Chief of the Army and Navy of the United States. (Article II., section 2, clause 1, of the Constitution of the United States.)

The expenses of operating the U. S. S. Mayflower are paid from the appropriations for the Navy available for that purpose.

The President's personal expenses of subsistence and entertainment while on the Mayflower are authorized to be charged under the appropriation for "traveling expenses of the President."

The following table shows the amounts appropriated for "traveling expenses of the President" for the fiscal years 1914 to 1925, inclusive, and the amounts carried to the surplus fund and covered into the Treasury, for the fiscal years 1914 to 1922, inclusive, the differences representing the expenditures during those fiscal years:

a and *b* include, respectively, six and two cadets, United States Military Academy. The foregoing figures do not include members of the Marine Corps who served with the Army in France.

275,630 AT ARMY TRAINING CAMPS IN 1924.

The number of men who received military training under War Department supervision in the summer of 1924 was 275,630. of whom 23,250 were officers, as shown in reports to Maj. Gen. Hines, Chief of Staff, U. S. Army.

The period of training ranged from fifteen days for the National Guard and organized reserves to three months of concentrated activity for the regulars who compose the instructor and demonstration force, around which work of the civilian soldiers was centred.

The bulk of the training was in the National Guard camps, where a total of 156,515 men and officers were in attendance.

The turnout of organized reserves amounted to 8,705, of whom all but 492 were officers.

The Reserve Officers' Training Corps contributed 7,012 to the grand total and the Citizens' Military Training Camps 33,983, bringing the total number of men to be graduated from these camps since they were first established on a post-war basis up to 70,000.

Of importance in the summer training to the new national defense policy is the annual product of the Reserve Officers' Training Corps and the Civilian Military Training Camps in Second Lieutenants for the maintenance of the Officers' Reserve Corps.

These two branches afford source for replacements and new blood for the reserve officers' organization, which in Oct., 1924, numbered 82,240 men on War Department rolls.

It has been estimated that 10,000 young men must come into the corps annually as Second Lieutenants if it is to be kept at adequate strength, and the Reserve Officers' Training Corps is expected ultimately to produce 7,000 of these young reserve officers a year, the other 3,000 to come from the citizen camps, Regular Army, National Guard and other sources.

There were in 1924 in the colleges and schools of the country 325 units of the Reserve Officers' Training Corps with a total enrolment of 103,894 under training. From this source in the last five years up to Sept. 4, 1924, a total of 9,817 Second Lieutenants had been commissioned in the Reserve Corps.

The number actually at the camps, 33,983 for thirty days, was a big increase over 1923, while the number of applications received amounted to 53,000.

Of that number 44,000 proved to have the physical and other qualifications necessary for admission.

PENSIONED EX-SOLDIERS OF THE WORLD.

The International Labor Bureau at Geneva, Switzerland, records that in 1923 over 750,000,000 ex-soldiers were drawing pensions. Among the figures are:

Germany	1,537,000	Canada	45,000
Austria	164,000	United States	157,000
Australia	70,600	France	1,500,000
Belgium	50,000	Great Britain	1,170,000
Italy	800,000	Russia	775,000
Roumania	100,000	Czecho-Slovakia	236,000
Poland	320,000	New Zealand	20,000
Serbia	164,000		

Statistics are not available for Turkey, Bulgaria, the Baltic states, Hungary, Portugal, and Japan, so that the total is estimated to be really in the neighborhood of 10,000,000.

Disbursements in year ended June 30, 1924, were apportioned as follows—Civil War pensioners, $202,999,955.16; pensioners of war with Spain, $21,139,863.45; others, $5,854,958.99.

The number of pensioners on the rolls on June 30, 1924, was:

Civil War—Soldiers, 146,748; widows, etc., 253,136; nurses, 67.

War with Spain—Soldiers, 85,038; widows, etc., 16,104.

Regular Army—Soldiers, 12,283; widows, etc., 3,754.

World War—Soldiers, 56; widows, etc., 22.

Indian War—Soldiers, 3,893; widows, 2,937.

War with Mexico—Soldiers, 31; widows, 1,437.

War of 1812—Widows, 33.

In the widows, etc., cases on the roll, June 30, 1924, there were 16,101 children under 16 years of age, and 939 helpless children, each drawing an additional allowance of from $2 to $6 per month.

In the year ended June 30, 1924, the number of Civil War pensioners who died was 43,150.

The peak of Civil War pensions came in 1898, when there were 745,822 on the rolls.

a Credits. *b* All expenditures made from premiums—not included in totals.

c Expenditures through fiscal year 1922, covered by premiums and not included in totals. After that date appropriations which are included in totals are: 1923, $36,235,000; 1924, $90,000,000; 1925, $88,000,000.

STATISTICS AS OF JUNE 30, 1924.

The total amount appropriated by Congress to date for expenditure by the United States Veterans' Bureau and the various agencies now merged with it aggregates $2,209,954,269.55.

The appropriation for the fiscal year 1925 is $349,065,000.

The total expenditures by the United States Veterans' Bureau and agencies now merged with it to June 30, 1924, were $2,669,426,285.29.

To June 30, 1924, 2,146,504 allotment and allowance claims aggregating $583,201,121.96 have been paid; 958,307 compensation claims have been filed, of which 461,377 were allowed, 485,484 disallowed and 11,446 were pending; disbursements for death and disability compensation to June 30, 1924, totaling $596,882,250; there have been allowed 71,271 burial claims; 650,253 training claims have been filed, 330,943 were allowed (of which 173,632 entered training), 314,014 disallowed and 8,213 were pending; there were 45,347 trainees on July 1, 1924, and to that date, $556,309,780 had been disbursed for that purpose. 210,094 insurance claims have been filed, 165,859 allowed, 43,218 disallowed and 1,012 were pending.

There have been 379,053 admissions of veterans to hospitals; 4,684,459 applications for term insurance and 438,562 applications for converted insurance have been received.

On June 30, 1924, payments of compensation were being made on 237,147 claims; payments of insurance were being made on 151,913 claims; 45,347 veterans were in training and 22,726 veterans were in hospitals.

209,385 term insurance policies aggregating $1,609,030,534 and 353,215 converted insurance policies aggregating $1,375,542,924.06, making a total of 562,600 policies for $2,984,573,458.06 were in force.

There is no National Guard in Nevada.

Totals include: Hawaii, 1,427; Porto Rico, 2,012

In addition to the classified troops shown in the table, the total includes "other army troops," 2,936; General Headquarters Reserves, 1,541; Fixed Coast Defense, 7,742; and State Staffs, 881.

National Guard totals, by **branch and assignment**—Infantry, 101,430; cavalry, 12,788; field artillery, 34,852; coast artillery, 13,607; civil engineers' corps, 7,613; air service, 1,525; signal corps, 187; total combatants, 172,002.

Medical corps, 5,449; transportation, 2,401; military police, 68; State staffs, 881; special division, 4,472; total staff, 13,271; grand total, 185,273.

National Guard totals, by **corps area and assignment**—First, 20,757; second, 28,107; third, 20,895; fourth, 20,496; fifth, 17,715; sixth, 19,047; seventh, 24,187; eighth, 16,277; ninth, 14,353; Hawaii, 1,427; Porto Rico, 2,012; total, 185,273.

UNITED STATES MARINE CORPS.

John A. Lejeune, Major General Commandant. Headquarters, Navy Building, 18th and B Streets, N. W., Washington, D. C. The authorized strength of the corps is (Aug. 31, 1924): 1,093 officers, 114 warrant officers, 42 pay clerks and 27,400 enlisted men.

The losses due to the World War were: Killed in action, 1,450; died of wounds, 1,007; died of disease, 304; accidentally killed, 28; died of other causes, 18; total, 2,807. Wounded, 7,714. Total casualties, 10,521.

Commissioned officers are appointed from graduates of the Naval Academy, from worthy noncommissioned officers of the Marine Corps, and from civil life.

Information regarding pay, allowances, etc., may be obtained from the U. S. Marine Corps, Washington, D. C. Re-enlistments are made at all marine barracks, posts and stations.

SOLDIERS' HOMES.

NATIONAL HOME FOR DISABLED VOLUNTEER SOLDIERS.

There are branches of the National Home at Dayton, Ohio; Milwaukee, Wis.; Togus, Me.; Hampton, Va.; Leavenworth, Kan.; Santa Monica, Cal.; Marion, Ind.; Danville, Ill.; Johnson City, Tenn, and Hot Springs, S. D. The aggregate number of members cared for is about 28,000.

STATE HOMES FOR DISABLED VOLUNTEER SOLDIERS.

STATES.	Location.	STATES.	Location.	STATES.	Location.

The United States Soldiers' Home in the District of Columbia was established by an Act of Congress, approved March 3, 1851, for the relief and support of invalid and disabled soldiers of the army.

Blank applications for admission may be obtained from the Board of Commissioners, U. S. Soldiers' Home, Washington, D. C.

UNITED STATES NAVAL OBSERVATORY, WASHINGTON, D. C.

The Naval Observatory at Washington, D. C., sends out daily the time signals which establish standard time for the country and enable the mariner at sea to ascertain his chronometer error and his longitude by observation.

The signals are transmitted by the Naval Radio Stations at Arlington, Annapolis and Key West, and the noon signal by land wire also.

Similar service for the Pacific Coast is furnished by the Navy Chronometer and Time Station at Mare Island, Cal.

Special signals are sent by the Naval Observatory for use of U. S. and foreign scientific institutions, astronomical work, surveying, eclipse and longitude expeditions.

At the Naval Observatory is carried on the administration for the development, supply, upkeep, repair, and inspection of navigational, aeronautical, and aerological instruments for the ships and aircraft of the Navy.

The Naval Observatory maintains continuously observations for absolute positions of the fundamental stars, and the independent determination, by observations of the sun, of the position of the ecliptic and of the equator among the stars, and of the positions of the stars, moon, and planets with reference to the equator and equinoxes, in order to furnish data to assist in preparing the American Ephemeris and Nautical Almanac and improving the tables of the planets, moon, and stars.

At the same time this department furnishes the observations for determining the time.

THE ARMY OF THE UNITED STATES.

The army of the United States consists of the Regular Army, the National Guard while in the service of the United States, and the Organized Reserves, including the Officers' Reserve Corps and the Enlisted Reserve Corps.

The Regular Army consists of the Infantry, the Cavalry, the Field Artillery, the Coast Artillery Corps, the Air Service, the Corps of Engineers, the Signal Corps, which are designated the combatant arms or the line of the army; the General Staff Corps, the Adjutant General's Department, the Signal Corps, which are designated the combatant arms or the line of the army; the General Staff Corps, the Adjutant General's Department, the Inspector General's Department, the Judge Advocate General's Department, the Quartermaster Corps, the Finance Department, the Medical Department, the Ordnance Department, the Chemical Warfare Service, the officers of the Bureau of Insular Affairs, the officers and enlisted men under the jurisdiction of the Militia Bureau, the chaplains, the professors and cadets of the United States Military Academy, the present military storekeeper, detached officers, detached enlisted men, unassigned recruits, the officers and enlisted men of the retired list, and such other officers and enlisted men as are now or may hereafter be provided for. Except in time of war or similar emergency when the public safety demands it, the number of enlisted men of the Regular Army shall not exceed 280,000, including the Philippine Scouts; however, the Army Appropriation Act, approved June 7, 1924, for the fiscal year of 1925, provides for only 125,000 enlisted men of the Regular Army and 7,953 enlisted men of the Philippine Scouts.

The National Guard consists of the regularly enlisted militia between the ages of 18 and 45 years and of commissioned officers between the ages of 21 and 64 years, of the several States, Territories and the District of Columbia. The organization thereof in general is the same as that prescribed for the Regular Army. The National Guard may be called as such into the service of the United States, and when so called is subject to the laws and regulations governing the Regular Army as far as applicable. When Congress has authorized the use of troops in excess of those of the Regular Army, the members of the National Guard may be drafted into the militia service to serve therein for the period of the war or emergency, unless sooner discharged. The strength of the National Guard on June 30, 1924, was 177,286.

The Organized Reserves constitute a war force to meet any major emergency requiring the use of troops in excess of those of the Regular Army and the National Guard. They are liable to military service only in the event of a serious national emergency especially proclaimed by Congress.

MILITARY DEPARTMENTS AND CORPS AREAS, U. S. ARMY.

Department or Corps Areas.	Headquarters.	Jurisdiction.
First Corps Area	Boston	Me., N. H., Vt., Mass., R. I., Conn., part of Long Island.
Second Corps Area	N. Y. (Gov. Island)	N. Y., N. J., Del., Porto Rico.
Third Corps Area	Baltimore, Md	Pa., Md., Va., D. C.
Fourth Corps Area	Atlanta, Ga	N. C., S. C., Ga., Fla., Ala., Tenn., Miss., La.
Fifth Corps Area	Ft. Hayes, Ohio	Ohio, W. Va., Ind., Ky.
Sixth Corps Area	Chicago, Ill	Ill., Mich., Wis.
Seventh Corps Area	Omaha, Neb	Ark., Mo., Kan., Iowa, Neb., Minn., N. Dak., S. Dak.
Eighth Corps Area	Ft. Sam Houston, Tex.	Tex., Okla., Col., N. Mex., Ariz.
Ninth Corps Area	Presidio of San Francisco, Cal	Wash., Ore., Idaho, Mont., Wyo., Utah, Nev., Cal., Alask.L
Hawaiian Dept	Honolulu	Hawaiian Islands and dependencies.
Philippine Dept	Manila	Philippine Islands.
Pan. Canal Dept	Quarry Heights, Balboa Heights	Canal Zone.
U. S. Army forces in China	Tientsin, China	U. S. troops in China.

COAST ARTILLERY DISTRICTS.

First	Boston	Coast defenses of Boston, L. I. Sound, Narragansett Bay, New Bedford, Portland and Portsmouth.
Second	Ft. Totten, N. Y.	Coast defenses of the Delaware, Eastern N. Y., Sandy Hook, and Southern N. Y.
Third	Ft. Monroe, Va	Coast defenses of Baltimore, Chesapeake Bay, and the Potomac.
Fourth	Ft. McPherson, Ga	Coast defenses of Charleston, Key West and Pensacola.
Ninth	Presidio of San Francisco, Cal	Coast defenses of the Columbia, Los Angeles, Puget Sound, San Diego, and San Francisco.
Panama	Ft. Amador, Canal Zone	Coast defenses of Balboa and Cristobal.
Hawaiian	Honolulu	Coast defenses of Honolulu and Pearl Harbor.

Effective Sept. 1, 1920, the six military departments within the continental limits of the United States were discontinued and the continental area divided into nine corps areas. The military departments and corps areas include the coast artillery districts, coast defenses, forts and camps within their limits. In October, 1920, there was attached to the First Corps Area such part of the State of New York as lies east of west longitude 72° 30′; Sept. 1, 1920, the island of Porto Rico, with the islands and keys adjacent, was attached to the Second Corps Area, and the Territory of Alaska to the Ninth Corps Area. Sept. 1, 1920, there was attached to the Ninth Corps Area that part of the State of Arizona west of the 114th meridian and south of the 33d parallel. Aug. 1, 1922, Jefferson Barracks, Mo., was attached to the Sixth Corps Area. The territorial limits of the coast artillery districts within the continental limits of the United States are those of the corps areas bearing the same numerical designations.

TACTICAL DIVISIONS.

The active tactical divisions, with their headquarters, are as follows: *First*, Ft. Hamilton, N. Y.; *Second*, Ft. Sam Houston, Tex.; *Third*, Camp Lewis, Wash.; *Hawaiian Division*, Schofield Barracks, H. T.; *Panama Canal Division*, Ft. Amador, C. Z.; *Philippine Division*, Ft. Wm. McKinley, P. I.; *First Cavalry Division*, Ft. Bliss, Tex.

GENERAL ARMY HOSPITALS.

The General Hospitals of the army are located at Hot Springs, Ark. (also navy); Denver, Col., Presidio of San Francisco; Manila, Philippines; Honolulu, Hawaii; Takoma Park at Washington, D. C., and El Paso, Tex.

UNITED STATES MILITARY ACADEMY AT WEST POINT.

The United States Military Academy is situated on the Hudson River, at West Point, N. Y., a place rich in historical interest and made memorable by the treason of Benedict Arnold. The massive stone buildings rising grandly above the broad, winding river harmonize beautifully with the background of blue hills to form an ideal location for this, the greatest military school in the world. The buildings and grounds represent a money value of approximately $25,000,000.

The maximum authorized strength of the Corps of Cadets is 1,338, selected from candidates between the ages of seventeen and twenty-two years, nominated as follows: two by each United States Senator, two by each Representative in Congress and Territorial Delegate, two by the Vice President, sixty by the President, twenty selected from among honor graduates of "honor military schools," two from natives of Porto Rico, four from natives of the Philippine Islands, four from the District of Columbia, and one hundred and eighty from among enlisted men of the Regular Army and National Guard. Those from the last mentioned class are required to be between the ages of nineteen and twenty-two years and must have served in their respective organizations for at least one year.

Appointments to the Academy are made only to fill vacancies as they may occur, and candidates may be designated one year in advance of admission. For each vacancy from a State or Congressional district three candidates may be nominated, a principal, a first alternate, who is entitled to admission only in the event of the failure of the principal, and a second alternate, who is entitled to admission only in the event of the failure of both the principal and the first alternate. The selection of these candidates is left entirely with the Senator or Representative who has the vacancy at his disposal and may be either by competitive examination or direct choice at the option of the Congressman.

Each candidate must pass a rigid physical examination and none is accepted who has any defect or infirmity which renders him unfit for military service. In addition each candidate must pass an examination in the subjects of Algebra, Geometry, English Grammar, Composition and Literature, and History. However, graduates of first class High Schools and students at universities and colleges of recognized standing may submit educational certificates which will be considered by the Academic Board, and if satisfactory, may be accepted in lieu of the mental examination.

The course of study is four years, during which time the cadets are under strict military discipline. The summers are spent in camp. Academic work begins in September of each year and ends the following June. Cadets of the first, second and third classes not undergoing examinations, are allowed short leaves of absence at Christmas, and those who have successfully completed the third class course are allowed leaves of absence from about the middle of June to August 28. The course is largely mathematical and professional. The principal subjects taught are Mathematics, English, French, Spanish, Drawing, Drill Regulations of all arms of the service, Natural and Experimental Philosophy, Chemistry, Mineralogy, Geology, Electricity, History, International, Constitutional and Military Law, Civil and Military Engineering, Art and Science of War, Economics and Government, and Ordnance and Gunnery.

The pay of a cadet is $780 per year and commutation of rations, at present fixed at 80 cents per day. The total is $1,072, which, with proper economy, is sufficient to meet his actual needs at the Academy.

Each cadet when admitted to the Academy signs an agreement to serve for a period of eight years, unless sooner discharged by competent authority. Upon graduation, cadets are commissioned second lieutenants in the United States Army, with the exception of the Filipino cadets who are eligible for commission only in the Philippine Scouts.

The total number of graduates, including foreigners receiving instruction under special Acts of Congress, from 1802 to June 12, 1924, inclusive, is 7,624. The number of cadets in the Corps on July 31, 1924, was 1,093. The Superintendent is Brigadier General Fred W. Sladen, U. S. A., and there are 205 officers and instructors at the Academy.

Detailed information as to the appointment and admission of cadets is contained in an attractively illustrated pamphlet, a copy of which will be furnished, without cost, upon application to the Adjutant General of the Army, Washington, D. C.

a Estimates on total troops run from 250,000 to 395,858. Greatest strength of Continental Army was about 35,000, in November, 1778.

b Evidently represents *enlistments* and not individual soldiers, hence is considerably in excess of actual number of troops employed, as it is known that a large proportion of the men rendered more than one term of service and are counted that number of times.

c Hostilities began on this date. The Act of Congress approved May 13, 1846, declared the existence of a state of war.

d Date of Gen. Lee's surrender.

e Of this number only 46,347 were actually drafted, the remaining 73,607 having served as substitutes.

f Army only; does not include Marines who served with the Army in France.

The Continental Army was organized by the Continental Congress June 15, 1775, under George Washington as Major-Gen. and Commander-in-Chief. The so-called Continentals in the Revolution totaled 231,462. The War Department was established Aug. 7, 1789. The standing army organized September, 1790.

UNION ARMY LOSSES IN THE CIVIL WAR.

(From "Regimental Losses in the American Civil War," by William F. Fox, Lieutenant-Colonel, U. S. V.)

Date.	Battle.	Killed.	Wounded.	Missing.	Aggregate.
July 1-3, 1863	Gettysburg	3,070	14,497	5,434	23,001
May 8-18, 1864	Spottsylvania	2,725	13,413	2,258	18,396
May 5-7, 1864	Wilderness	2,246	12,037	3,383	17,666
September 17, 1862	Antietam	2,108	9,549	753	12,410
May 1-3, 1863	Chancellorsville	1,606	9,762	5,919	17,287
September 19-20, 1863	Chickamauga	1,656	9,749	4,774	16,179
June 1-4, 1864	Cold Harbor	1,844	9,077	1,816	12,737
December 11-14, 1862	Fredericksburg	1,284	9,600	1,769	12,653
August 28-30, 1862	Manassas	1,747	8,452	4,263	14,462
April 6-7, 1862	Shiloh	1,754	8,408	2,855	13,047
December 31, 1862	Stone River	1,730	7,802	3,717	13,249
June 15-19, 1864	Petersburg (assault)	1,688	8,513	1,185	11,386
July 21, 1861	Bull Run (first Manassas)	470	1,071	1,793	3,334

Northern writers usually estimate the total number of Confederate troops in the Civil War at 1,400,000, based on a population of 5,000,000 whites. Southern historians estimate the total number of Confederate troops at 600,000. R. H. McKim puts the total at 621,800. On March 1, 1862, by Confederate records, the total was 340,250. Woodrow Wilson, in his "History of the American People," estimated the Confederate troops at 900,000.

The Confederate losses in particular engagements were as follows: Bull Run (first Manassas), July 21, 1861, killed, 387; wounded, 1,582; captured and missing, 13; aggregate, 1,982. Fort Donelson, Tenn., February 14-16, 1862, killed, 466; wounded, 1,534; captured and missing, 13,329; aggregate, 15,829. Shiloh, Tenn., April 6-7, 1862, killed, 1,723; wounded, 8,012; captured and missing, 950; aggregate, 10,694. Seven Days' Battle, Virginia, June 25-July 1, 1862, killed, 3,478; wounded, 16,261; captured and missing, 875; aggregate, 20,614. Second Manassas, August 21-September 2, 1862, killed, 1,481; wounded and missing, 7,627; captured and missing, 89; aggregate, 9,197. Antietam campaign, September 12-20, 1862, killed, 1,886; wounded, 9,348; captured and missing, 1,367; aggregate, 12,601. Fredericksburg, December 13, 1862, killed, 596; wounded, 4,068; captured and missing, 651; aggregate, 5,315. Stone River, Tenn., December 31, 1862, killed, 1,294; wounded, 7,945; captured and missing, 1,027; aggregate, 10,266. Chancellorsville, May 1-4, 1863, killed, 1,665; wounded, 9,081; captured and missing, 2,018; aggregate, 12,764. Gettysburg, July 1-3, 1863, killed, 2,592; wounded, 12,706; captured and missing, 5,150; aggregate, 20,448. Chickamauga, September 19-20, 1863, killed, 2,268; wounded, 13,613; captured and missing, 1,090; aggregate, 16,971. Franklin, Nov. 3, 1864, killed, 6,252.

The number of casualties in the volunteer and regular armies of the United States during the war of 1861-65, according to a statement prepared by the Adjutant-General's office, was as follows: Killed in battle, 67,058; died of wounds, 43,012; died of disease, 199,720; other causes, such as accidents, murder, Confederate prisons, etc., 40,154; total died 349,944; total deserted, 199,105. Number of soldiers in the Confederate service who died of wounds or disease (partial statement), 133,821; deserted (partial statement), 104,428. Number of United States troops captured during the war, 212,608; Confederate troops captured, 476,169. Number of United States troops paroled on the field, 16,431; Confederate troops paroled on the field, 248,599. Number of United States troops who died while prisoners, 30,156; Confederate troops who died while prisoners, 30,152.

NAVAL EDUCATION SYSTEM OF THE UNITED STATES.

The Bureau of Navigation of the Navy Department is charged with the training and education of the line officers of the Navy and each staff bureau with the training of the staff officers. Midshipmen, when appointed, are given four years' instruction in general and technical subjects at the Naval Academy. Upon graduation these midshipmen are commissioned as line officers and are ordered to sea duty. None is sent to any special school until he has had at least one year at sea. Officers who have shown special qualifications and interest in the subjects mentioned below are selected for special instruction.

In recent years 40% to 80% of each Naval Academy class have received special instruction in some of these subjects. The following courses are maintained by the Bureau of Navigation:

War College, Newport, R. I., one year; senior class, for officers of command or flag rank; junior class, for all lieutenant commanders and lieutenants with at least six years' commissioned service; correspondence course for any officer ashore or afloat.

Post Graduate Work, Naval Academy, Annapolis, Maryland, and various educational institutions; two to three years. The first year of this course is at the Naval Academy and consists of preparation and technical groundwork. This work merges into the specialization course continued at the institution offering the best available facilities in the work given, viz: Engineering (mechanical, electrical, aeronautical, communication, acoustics); Ordnance, (design, torpedo, ballistics, explosives, metallurgy, fire control, optics); naval construction; civil engineering. Special instruction is given at the following institutions: Columbia University, Harvard University, Yale University, Massachusetts Institute of Technology, University of Chicago, University of Iowa, University of Michigan, Rensselaer Polytechnic Institute.

Naval Construction—Naval Academy and Massachusetts Institute of Technology; two to three years. First year, postgraduate work at Naval Academy and the remainder at Massachusetts Institute of Technology, studying design and construction of ships. These officers are transferred from the line to the construction corps.

Submarines—New London, Conn.; three months. This course is practical training in handling submarines and firing torpedoes from them.

Torpedoes—Naval Torpedo Station, Newport, R. I.; five months' theoretical and practical instruction in the assembly, firing, care and maintenance of various types of torpedoes.

Aviation—Pensacola, Florida; six months' training in both heavier than air and lighter than air craft.

Law—Judge Advocate General's Office and Georgetown and George Washington Universities. Certain officers while on duty in the Judge Advocate General's Office take the regular three years' course given at the institutions mentioned.

Optical Instruction, Washington Navy Yard and Mare Island Navy Yard, course for range finder officers, 4 weeks; long course for officers, six months.

Gyro Compass Instruction—Fourteen weeks' course under supervision of the Inspector of Navigational Material, Navy Yard, New York—instruction at Navy Yard and various industrial plants.

TRAINING OF ENLISTED MEN.

There are shore training stations at Newport, R. I., Hampton Roads, Va., Great Lakes, Ill., and San Diego, Calif. At the Hampton Roads and San Diego Training Stations there are special schools for enlisted men who desire to enter the Naval Academy. Trade schools are maintained at the stations and at several of the Navy Yards and naval air stations. The course of training for apprentice seamen at training stations is eight weeks. Upon the completion of the course of training at training stations, apprentice seamen will be sent to cruising ships or to trade schools and their training continued for eight weeks more. If qualified, they may then be rated seamen 2c or fireman 3c. Every endeavor is made to qualify those who are unable to swim fifty yards. This is particularly desirable in the case of line petty officers, and no man shall be made a coxswain or a member of a power boat who has not so qualified.

Men need not be continuous service men to be eligible for entrance to a trade school, but, except in the case of recruits who will enter immediately after enlistment no men will be detailed who will not have at least two years to serve on their current enlistment after they have completed their course. A recruit must have enlisted for at least four years to be eligible for entrance to any trade school having a course of six months or more. Men who complete a course of instruction in any service trade school are not qualified for furlough without pay or discharge by special order during the remainder of the enlistment in which the course was completed. A man who applies for instruction in any service trade school shall be so informed and required to sign a statement that he has no intention of requesting furlough without pay or discharge by special order during his current enlistment, and that no reason exists or can be anticipated to necessitate such discharge. Men who have completed one course of instruction in any trade school whose course is six months or longer will not be considered eligible for entrance to another trade school. No man, whether graduate of trade school or not, can be advanced to petty officer ratings until he has completed one year's total service.

The training given men at regular training stations is supplemented and continued through navy education courses, supplied through the Bureau of Navigation for men on active duty in naval vessels and at naval shore stations. These courses are designed primarily for increasing the technical knowledge and efficiency of enlisted personnel in regular naval trades. They cover a wide range of technical courses closely related to naval duties, as well as the fundamental subjects needed by men whose general education is not adequate for a proper study of the technical courses related to these duties.

UNITED STATES NAVAL ACADEMY AT ANNAPOLIS.

The students of the Naval Academy are styled midshipmen. Three midshipmen are allowed for each Senator, Representative and Delegate in Congress, one for the Resident Commissioner from Porto Rico, two for the District of Columbia, and fifteen appointed each year from the United States at large.

In addition, one Filipino is allowed for each class. The appointment from the District of Columbia and fifteen each year at large are made by the President. It is the custom of Presidents to give the appointments of midshipmen at large to the sons of officers of the army, navy and marine corps, for the reason that officers, owing to the nature of their duties, are usually not in a position to establish permanent residences.

The selection of candidates, by competitive examination or otherwise, for nomination for vacancies in the quota of Senators, Representatives and Delegates in Congress is entirely in the hands of each Senator, Representative and Delegate in Congress having a vacancy; and all applications for appointment or inquiries relative to competitive examinations should be addressed accordingly. Two examinations for admission are held each year, the first on the third Wednesday in February, the second on the third Wednesday in April.

The law authorizes the appointment of one hundred enlisted men each year, to be selected as a result of a competitive examination of enlisted men of the Regular Navy and Marine Corps, and members of the Naval Reserve Force on active duty, who must not be more than twenty years of age on April 1 of the year they enter, and who will have been in the service at least one year by August 15 of that year. The mental and physical requirements, as well as the amount of money to be deposited upon admission, are the same for these candidates as for other candidates for midshipmen. The competitive examination of these enlisted men is held on the third Wednesday in April of each year. Candidates may also be accepted on certificate. For details write Bureau of Navigation, Navy Department, Washington, D. C.

All candidates, except 4 Filipinos, are required to be citizens of the United States and must not be less than 16 or more than 20 years of age on April 1 of the calendar year in which they enter the Naval Academy.

The course for midshipmen is four years. During the summer, midshipmen of the first, second and third classes go to sea for about three months. Midshipmen after graduation are commissioned as Ensigns in the navy, and occasionally to fill vacancies in the Marine Corps and in certain of the staff corps of the navy. The act of June 29, 1906, prescribes that the Secretary of the Navy shall notify in writing each Senator, Representative and Delegate in Congress of any vacancy that will exist at the Naval Academy and which he shall be entitled to fill by nomination of a candidate and one or more alternates therefor. The nomination of a candidate and alternate or alternates to fill said vacancy shall be made upon the recommendation of the Senator, Representative or Delegate, if said recommendation is made by the fourth day of March of the year following that in which said notice in writing is given, but if it is not made by that time the Secretary of the Navy shall fill the vacancy by appointment of an actual resident of the State, Congressional district or Territory, as the case may be, in which the vacancy will exist, who shall have been for at least two years immediately preceding the date of his appointment an actual and bona fide resident of the State, Congressional district or Territory.

The height of candidates for admission shall not be less than five feet two inches, at the age of sixteen years, with an increase of one inch for each additional year or fraction of a year over one-half; and the minimum weight at sixteen years shall be one hundred and eleven pounds, with an increase of not less than three pounds for each additional year or fraction of a year over one-half. Any marked deviation in the height and weight relative to the age of a candidate will add materially to the consideration for rejection. Candidates must be unmarried, and any midshipman who shall marry, or who shall be found to be married before his final graduation, shall be dismissed from the service. Each candidate who has passed the required examinations must, before being admitted as a midshipman, deposit the sum of $100 to cover part of the cost of his initial outfit.

After being admitted, he is credited with the sum of $250, which is needed in addition to the $100 cash deposit to complete paying for the uniforms, clothing, textbooks, etc. This amount ($250) is deducted from the midshipman's pay in monthly installments. Any midshipman may, however, immediately after entering the Academy repay this amount in full from his own funds and thus obviate the necessity of having a certain amount deducted monthly from his pay for this purpose. It is urgently recommended that all those midshipmen financially able to do so make the repayment as soon as possible after entering the Academy.

Each candidate before admission will be required to sign articles by which he binds himself to serve in the United States Navy during the pleasure of the President of the United States (including his time of probation at the Naval Academy) unless sooner discharged. The pay of a midshipman is $780 a year.

THE UNITED STATES NAVY, AS OF OCTOBER 1, 1924.

The Colorado went into commission Aug. 30, 1923, at Camden, N. J. She has four electrically-driven propellers, each of 7,000 horsepower, and is an oil-burner. All the furniture is of metal. Airplanes can be catapulted from the deck. The ship was launched March 22, 1921.

The Colorado can shoot a broadside in less than a minute after the enemy is discovered. She is of the "post-Jutland" type and is protected alike from direct fire, plunging fire, submarine torpedoes and airplane bombs.

Not only has she an eighteen-inch belt of main armor and several heavy protective decks, but she is a honeycomb of watertight compartments and must be shot to pieces before she can be put out of action or sunk.

The Army Ordnance Department has developed a 14-inch .50 calibre gun that will hurl a 1,560-lb. projectile 23 miles and pierce any ship's armor.

For dealing with airplanes she has four three-inch anti-aircraft guns with a vertical range of two miles, and also carries several battle planes for direct action.

The latest United States anti-aircraft gun now will shoot a projectile 8,400 yards straight up in the air, and it has a horizontal range of 17,000 yards.

Each battleship has two submerged twenty-one inch torpedo tubes, with the exception of the New York and Texas, which carry four each. One or more airplanes are carried, or will be, by each battleship.

The United States is allowed eighteen capital ships (battleships and battle cruisers) by the terms of the Armament Pact.

No battle cruisers have ever been completed for the United States Navy, and it is doubtful whether further such ships will be built in other navies, the tendency under the treaty being the building of slightly speedier batt eships, with their better protection against bombing by aircraft and torpedoes.

The West Virginia was commissioned on Dec. 1, 1923, and is the last battleship that can be built by the United States Navy until 1934, when the Florida, Utah and Wyoming may be replaced, due to their age.

The West Virginia on her speed trial, off the Maine coast, made 21.66 knots an hour and developed 35,000 horse power.

The total tonnage of the remaining eighteen capital ships is 525,850 tons.

The term "battleship" is agin used exclusively in referring to ships of the battleship type. Due to the wholesale scrapping, only battleships of the dreadnought, or all big gun, type are now in service and the former need for the differentiating terms "pre-dreadnought" and "dreadnought" no longer exists.

On Aug. 17, 1923, the Naval Limitation Pact drawn up at the Washington Conference came into effect. The duly ratified treaties were that day deposited with the United States State Department by representatives of the five participating powers.

Bids were immediately asked for by the Navy Department for the scrapping of the capital ships that were building, and for the completed old capital ships already out of commission. The capital ships building were:

Battleships—Washington, Indiana, South Dakota, Montana, North Carolina, Massachusetts and Iowa. (Total tonnage, 291,800.)

Battle Cruisers—Constitution, United States, Consellation, Ranger. (Total tonnage, 174,000.)

All the above ships were still on the building ways, with the exception of the Washington, which had been launched and over 75 per cent. completed.

On the following old completed capital ships the first stages of scrapping, that of rendering them unfit for further warlike service, was begun:

Battleships—Virginia, New Jersey, Rhode Island, Georgia, Nebraska, Connecticut, Louisiana, Kansas, Vermont, Minnesota, New Hampshire, South Carolina, Michigan, Delaware, North Dakota. (Total tonnage, 255,240.)

All of the above old battleships were of the pre-dreadnought class, with the exception of the South Carolina, Michigan, Delaware, and North Dakota. In the days when they participated in the famous cruise around the world, 1908-1909, they were classed as splendid and formidable craft.

By Feb. 17, 1924, all of the above ships were no longer capable of performing warlike service, and by Feb. 17, 1925, they must be destroyed.

The New Jersey and Virginia have already been bombed and sunk by flyers of the Army Air Service.

SUMMARY OF UNITED STATES NAVY, AS OF SEPT. 1, 1924.

Personnel—8,126 officers, 87,327 men.

In Commission—18 battleships, 5 cruisers, 2d line; 8 light cruisers, 1st line; 3 light cruisers, 2d line; 1 aircraft carrier, 2d line; 2 mine layers, 2d line; 103 destroyers, 1st line; 6 light mine layers, 44 submarines, 1st line; 37 submarines, 2d line; 22 Eagle boats, 29 sub-chasers, 9 gunboats, 6 converted yachts, 6 destroyer tenders, 8 submarine tenders, 2 repair ships, 3 store ships, 1 aircraft tender, 2 colliers, 10 oil tankers, 2 ammunition ships, 5 cargo ships, 2 transports, 2 hospital ships, 30 fleet tugs, 33 mine sweepers, 296 airplanes.

Out of Commission—6 cruisers, 2d line; 8 light cruisers, 2d line; 164 destroyers, 1st line; 9 destroyers, 2d line; 2 mine layers, 2d line; 8 light mine layers, 3 fleet submarines, 1st line; 32 submarines, 2d line; 31 Eagle boats, 5 sub-chasers, 3 converted yachts, 2 destroyer tenders, 2 store ships, 3 colliers, 10 oil tankers, 3 cargo ships, 1 hospital ship, 8 fleet tugs, 12 mine sweepers.

Building—2 aircraft carriers, 1st line; 2 light cruisers, 1st line; 1 repair ship, 1 destroyer tender, 1 submarine tender, 6 submarines, 1st line; 3 fleet submarines, 1st line; 1 mine laying submarine.

Navy Yards—Portsmouth, N. H.; Boston, Mass.; Brooklyn, N. Y.; Philadelphia, Pa.; Washington, D. C.; Norfolk, Va.; Charleston, S. C.; Mare Island, Cal.; Bremerton, Wash.; Pearl Harbor, T. H. **Stations**—Newport, R. I.; New London, Conn.; Key West, Fla.; Pensacola, Fla.; New Orleans, La.; San Diego, Cal.; Guam, Samoa, Cavite, P. I.; St. Thomas, W. I.; Guantanamo, Cuba; Balboa, C. Z.

Training Stations—Hampton Roads, Va.; San Diego, Cal.; Great Lakes, Ill.; Newport, R. I.

The *italics* in the first column signify that craft are not in commission.

The total tonnage of aircraft carriers allowed the United States by the Washington naval pact is 135,000 tons, the same as for the British Empire, and five-thirds greater than the tonnage allowed Japan. This is the only auxiliary type of ship limited by the pact, and competition still exists in cruisers, destroyers and submarines.

The scout cruiser Detroit is as long as the Washington Monument is tall, faster and more powerful than any passenger liner afloat, her turbines capable of developing more horse power than those of the Leviathan itself.

Her trim lines and sharp bow bespeak for her the fact that she was built for speed, and her record in the trials off Rockland, Me., of 35.05 knots was the greatest ever made by a vessel of her dimensions.

The Detroit at maximum speed could cross the Atlantic from New York to Liverpool in eighty hours, while the fastest passenger liner on the seven seas could not do it below 120 hours.

She is an oil burner and can carry 2,000 tons of fuel oil in her tanks. At full speed of thirty-five knots, equal to more than forty land miles an hour, the furnaces of the vessel would consume 100,000 pounds of fuel oil an hour, which would require 624,000 cubic feet of air a minute to effect combustion.

She is equipped with twelve oil-fired, water tube, express type boilers, situated three each in four watertight compartments, and operated under forced draft.

She has two watertight engine room compartments amidships and four propelling shafts and propellers, each driven through a reduction gear by one high-pressure, intermediate pressure and low pressure, high speed Curtis turbine.

Figures for France do not include funds for new construction in progress.

The figures for 1922-1924, inclusive, are in the money units of the respective countries. They represent appropriations and budget estimates, not actual expenditures.

COMPARATIVE NAVAL DATA FOR THE TREATY POWERS, JULY, 1924.

PERSONNEL (UNLIMITED).

	Regular Establishment.		Regular Establishment on Basis of 5-5-3-1.75-1.75 Ratio.		Increment Necessary to Attain the 5-5-3-1.75-1.75 Ratio in Regular Establishment.		Reserve Personnel.	
	Officers.	*Men.*	*Officers.*	*Men.*	*Officers.*	*Men.*	*Officers.*	*Men.*
United States	7,873	86,000	12,585	97,125	4,712	11,175	4,256	18,179
British Empire	8,571 (a)	91,397 (b)	12,585	97,125	4,014	5,728	2,179 (d)	43,858 (d)
Japan	7,550	58,274	7,550	58,274	None	None	1,819	29,600
France	3,914	55,741	4,404	34,994	490	(–)20,747	2,395	96,700
Italy	2,347	42,501	4,404	34,994	2,057	(–)7,607	4,513	see (c)

(a) These figures include 319 officers and 1907 men of the British Royal Air Force that are engaged in naval aviation exclusively. The Royal Air Force is a separate department ranking with the army and navy and has in round numbers 3,000 officers and 26,000 men. As in the United States, Japan and France, naval aviation personnel forms an integral part of the navy, it seems only fair that the personnel of the British Royal Air Force engaged in naval aviation should be classed in this comparison.

(b) Includes 3,790 civilians manning auxiliaries and yard craft for which regularly enlisted personnel are required in cases of other powers.

(c) There is no organized naval reserve of men in Italy, but men who have served in navy may be called to colors by levy.

(d) Does not include 7,664 retired officers of all ages nor 18,768 pensioners under fifty-five years of age, who are additional.

CAPITAL SHIPS (LIMITED).

	Being Scrapped.				Retained.

France	5	23,440 (d)	3	24,000	8	47,440	99,738	5	52,298
Italy	10	38,300 (d)	None		10	38,300	99,738	6	61,438

(a) Five of 10,000 tons each contracted for within last several months.

(b) Four of 7,100 tons each and four of 10,000 tons each ordered since the Washington Conference.

(c) The Navy Department has requested Congress to authorize eight 10,000-ton cruisers.

(d) Many of these are vessels taken over from the Central Powers.

(e) To get parity with British Empire 22 ships, 223,380 tons.

MODERN SUBMARINES.

MODERN (LONG RADIUS) SUBMARINES OF OVER 1,000 TONS EACH (UNLIMITED).

	Built.		Building.		Totals.		Tonnage on Basis of 5-5-3-1.75-1.75.	Increment Necessary to Attain the 5-5-3-1.75-1.75 Ratio.

Italy	0	.....	0	.....	0	.....	18,529	15	18,529

(a) The Appropriation Bill, 1925, provides funds for one large mine-laying submarine—the first craft to be laid down by the U. S. Navy since the Washington Conference.

(b) This is an estimate based on Admiral Kato's statement in announcing post-treaty building program to the effect that Japan would build twenty-two submarines of a total tonnage of 28,165 tons. The other one included is the No. 52, reported to be of 1,200 tons displacement. The average displacement of the 22 submarines in the post-treaty program is 1,280 tons.

MODERN COAST DEFENSE SUBMARINES OF LESS THAN 1,000 TONS EACH (UNLIMITED).

	Built.		Building.		Totals.		Tonnage on Basis of 5-5-3-1.75-1.75	Increment Necessary to Attain the 5-5-3-1.75-1.75 Ratio.

The total number of men 21 years of age and over comprised 28,442,400 whites, 2,792,006 Negroes, 61,229 Indians, 46,979 Chinese, 53,411 Japanese, and 7,345 men of other races—Filipinos, Hindus, Hawaiians, Malays, etc.

Of the white men, 21,513,948 were natives and 6,928,452 were foreign-born, and of the natives, 15,805,063 were of native parentage, 3,956,384 of foreign parentage, and 1,752,501 of mixed native and foreign parentage.

The total number of male citizens of all races, 27,661,880, comprised 24,339,776 natives and 3,322,104 foreign-born naturalized men.

Expressed in percentages, the distribution of the several classes of men 21 years of age and over, in 1920, was as follows:

Total white, 90.6 per cent; native white of native parentage, 50.3 per cent.; native white of foreign parentage, 12.6 per cent.; native white of mixed native and foreign parentage, 5.6 per cent.; foreign-born white, 22.1 per cent.; Negro, 8.9 per cent.; Indian, two-tenths of 1 per cent.; Chinese, one-tenth of 1 per cent.; Japanese, two-tenths of 1 per cent.; total citizens, all races, 88.1 per cent.; native citizens, all races, 77.5 per cent.; and foreign-born naturalized citizens, all races, 10.6 per cent.

U. S. POPULATION, MALE AND FEMALE.

La	100.9	101.7	101.1	Ohio	105.4	104.4	102.3	Whole U. S.	104.0	106.0	104.4

Ratio of males to females, whole U. S., prior years: (1820) 103.3; (1830) 103.1; (1840) 103.7; (1850) 104.3; (1860) 104.7; (1870) 102.2; (1880) 103.6; (1890) 105.0.

In 1920 in the U. S., there were 104.4 white males to each 100 white females; there were 99.2 negro males to each 100 negro females.

PROPORTIONATELY MORE SINGLE WOMEN NOW THAN IN COLONIAL TIMES.

The New Hampshire colonial censuses of 1767 and 1773 furnish information to set up a reasonably accurate marriage rate for females as it existed a century and a half ago.

A direct comparison between the New Hampshire census and the 1920 figures is perhaps best obtained, however, by using the native white group for 1920, since the total population includes the negro and the foreign-born elements, both of which groups introduce new factors into the problem.

Making the comparison in this manner, if the proportion had been the same for the United States in 1920 as for New Hampshire in 1773, the number of unmarried native white women in the country would have been a million less than that shown by the census returns.

This increase in the proportion single is presumably due to the increased opportunities for self-support, as suggested before, and to the change in the social status of the unmarried woman.

DENSITY OF POPULATION PER SQUARE MILE IN UNITED STATES.

The areas and population of Alaska, Hawaii, and Porto Rico in 1900, 1910, and 1920, of Alaska and Hawaii in 1890, and of Indian Territory in 1860, 1870, and 1880, are not considered.

The term "family," as used in the census, signifies a group of persons, whether related by blood or not, who live together as one household, usually sharing the same table. One person living alone is counted as a family, and, on the other hand, all the occupants and employees of a hotel or boarding house, or lodging house, if that is their usual place of abode, and all the inmates of an institution, however numerous, are treated as constituting a single family.

The members of a natural family, in many cases do not live together in the same private family. In particular, the older sons and daughters are likely to be members of other households.

DEFINITION OF THE TERM "CITIZEN."

The total number of citizens, male and female, in the above table, is 54,421,832. The citizens comprise all native persons and all naturalized foreign-born persons.

The total number of those who voted at the 1920 presidential election was 26,674,171, not including blank or void ballots, or votes cast for names not on any ticket.

Under the provisions of the naturalization laws at the time the 1910 census was taken, the citizenship status of a married woman was the same as that of her husband (but if the husband had taken out his naturalization papers only, his wife was classified in the census returns as an alien); for an unmarried woman the process of naturalization was the same as for a man; a foreign-born widow or foreign-born divorced wife of a citizen of the United States retained the citizenship status of her former husband so long as she continued to reside in this country; and a foreign-born widow or foreign-born divorced wife of an alien could become naturalized in the same manner as a man.

U. S. POPULATION BY AGE GROUPS, 1880-1920.

The total population in 1920 included 2,257,255 infants under 1 year. The percentage for infants under 1 was 2.1 in 1920, as against 2.4 in 1910. The decrease in the proportions of young children and infants between 1910 and 1920 is due, in whole or in part, to decline in the birth rate.

The proportion of persons at and above the age of 25 has become larger from census to census since 1880, the increase between 1910 and 1920 having been noteworthy in the case of persons aged 45 and over.

The number of centenarians reported in 1920 was 4,267, as against 3,555 in 1910. Of the persons reported as centenarians in 1920, 1,561 were men and 2,706 were women.

The greater longevity of women is also shown by the fact that, although the males outnumbered the females in the population as a whole, the women predominated in each of the 5-year age periods above 75, in both 1920 and 1910.

The census takers had no means of verifying the ages of the persons enumerated by them, and consequently the age returns, especially for centenarians, are not absolutely accurate. It is probable the number of centenarians has been overstated at every census.

The U. S. Census figures of Jan. 1, 1920, show that there has been an increase during recent years in the proportion of married persons among the younger element of the population.

For each year of age from 15 to 34 the figures for 1920 show, without exception, in the case of each sex, an increase in the proportion married as compared with 1910, the change being especially noticeable for the younger ages.

For the ages from 35 to 44 inclusive, considered as a group, there was also an increase during the decade in the proportion married, but this increase was less pronounced, especially in the case of women, than the increase shown for the younger ages.

Among the persons at the ages of 45 and upward, considered in three groups—45 to 54, 55 to 64, and 65 and over—the proportion married was somewhat smaller in 1920 than for the corresponding groups in 1910.

The total value of Indians' individual and tribal property, on June 30, 1922, was estimated at $727,746,397, of which $198,065,171 was tribal, including $24,937,146 balance of funds in the U. S. Treasury.

Oklahoma still leads in Indian population with 119,989 redskins, and next in order with more than 5,000 each are Arizona, 42,941; South Dakota, 23,962; New Mexico, 20,834; California, 18,702; Minnesota, 13,920; Montana, 12,953; Washington, 12,664; North Carolina, 11,949; Wisconsin, 11,236; Michigan, 7,631; Nevada, 6,157; New York, 6,135; North Dakota, 9,818; and Oregon, 6,692.

The figures do not include some 60,000 who have surrendered their tribal identity and are counted in the general population.

Of the present Indian population, 165,537 are classed as fullblood.

The number of Indians in the United States in 1492 was estimated at 846,000 by James Mooney of the Smithsonian Institution at Washington.

ESTIMATED POPULATION OF BIG UNITED STATES CITIES, JULY 1, 1924.

(By the Bureau of the Census; see note below the table.)

MUNICIPALITY.	Est. Pop. July 1, 1924.	MUNICIPALITY.	Est. Pop. July 1, 1924.	MUNICIPALITY.	Est. Pop. July 1, 1924.

Indianapolis, Ind.	351,073	Philadelphia, Pa.	1,951,076		

Estimates for *cities in italics* are for July 1, 1923.

Estimates for Atlanta, Columbus, Dallas, Schenectady, Toledo, and Trenton, are subject to correction, as they provide for no changes in area since July 1, 1923. Los Angeles' Mayor claims the city had over 1,000,000 population July 1, 1924.

Detroit's population, according to a census taken in September, 1924, by the municipal water board, then was 1,222,500 in the city proper, and 1,500,000 in the greater city.

The population, Jan. 1, 1920, of the metropolitan district of New York, including the city and part of Westchester County and suburban New Jersey, was 7,910,415.

Of the blind, 30,160 were males, 22,407 were females; 45,737 were white; 6,302 Negroes; 488 Indians; 40 were Chinese or Japanese.

The above table contains data only as to the *enumerated* blind. The Census Bureau estimates the *actual number* of blind at 70,000 to 71,000 in 1910, and at 74,600 to 76,000 in 1920. This would raise the number per million population to 761 in 1910 and to 705 in 1921.

There were 169 deaf mute blind in the United States in 1920.

Age at which vision was lost—born blind, 3,978; birth to 2 yrs., 2,995; 2 to 19 yrs., 7,643; 20 to 44 yrs., 8,520; 45 to 64 yrs., 8,821; 64 yrs. and over 7,853.

The chief causes of blindness are: Cataract, glaucoma, atrophy of the optic nerve, opthalmia, neonatorum, and trachoma.

Seventeen of 3,978 persons born blind (0.43 per cent.) reported that both parents were blind and 161 others (4 per cent.) reported one parent blind; 200 of those born blind (5 per cent.) reported their parents were first cousins.

DEAF MUTES.

Deaf mutes in the United States on Jan. 1, 1920, numbered 44,885, or 425 per million of general population.

Wyoming, with 36, has fewer in proportion to population (185 per 1,000,000) than any other State, and Delaware, with 46, ranks next lowest. The highest is the District of Columbia, with 802 per 1,000,000, and the next highest is Wisconsin, with 641 per 1,000,000.

New York State, with 4,022, has 387 per 1,000,000 inhabitants.

Of the 35,026 deaf mutes from whom detailed information was obtained, 19,166 were males and 15,860 were females; 18,317 were white males and 15,1.. are white females; 16,825 were native born white m..les and 13,980 were native born white females; 1,492 were foreign born white males and 1,130 were foreign born white females; 786 were male Negroes and 701 were female Negroes; 63 males and 49 females were Indians, Chinese, Japanese or other colored persons.

Deafness was congenital (from birth) in the cases of 13,513 of the deaf mutes, and the affliction was acquired by 21,513 at less than 10 years of age (and by 16,458 of the 21,513 at less than 5 years of age).

Out of the 35,026 deaf mutes from whom detailed information was obtained, 700 (1.9 per cent.) reported both parents deaf, and 443 others reported one parent deaf. Of the 13,513 deaf mutes who were born without the faculty of hearing, 471 (3.5 per cent.) reported both parents deaf, and 244 others (1.8 per cent.) reported one parent deaf.

Of 31,230 deaf mutes 10 years of age and over, 10,196 males and 2,482 females were gainfully employed.

There were 169 blind deaf mutes in the United States in 1920.

The victims of suicide include also a large number of people socially prominent, educated and wealthy. Among those, during 1923, were 62 physicians, 48 lawyers and judges, 14 ministers, 32 college students, 64 bankers, 72 brokers, 43 actors, 26 editors, 32 club men, 50 society women and over 100 wealthy men and women, some being ranked as millionaires, aside from 110 presidents and owners of large business concerns.

Annually we have probably 12,000 to 15,000 suicides, 10,000 murders, and 80,000 or more accidents of all kinds, which remain ill-defined or of doubtful determination.

For the registration States of the United States for 1922, the rate for males was 18.4 and for females 6.0 per 100,000 of population.

JICIDE RATES ABROAD.

Italy less than 9 per 100,000 of population; Finland during 1918 was 12.5; Japan, 17 per 100,000; Saxony, which has always had near to the highest rate in Europe, 35; Prussia, 17; Bavaria, 14; Holland, 7; Ireland, which has always had one of the lowest rates on record, 2.5; Hawaii, 22; New Zealand, 10; England and Wales, 9.

LYNCHINGS IN THE UNITED STATES SINCE 1885.

LYNCHING DATA FOR 1923.

In 8 instances during the year persons charged with being connected with lynching mobs were brought to trial.

Of the 52 persons thus before the courts only 2 were sent to the penitentiary.

Of the 33 persons lynched in 1923, 29 were Negroes and 4 were whites; two of the former were women: 7 or less than one-fourth of those put to death were charged with attacking women; one of the victims was burned to death; one was put to death and then the body was burned.

The charge against the one burned to death was murder.

The offenses charged against the whites were: participation in strike depredations, 1; being taken as a Negro, 1; no charge reported.

The ten states in which lynchings occurred and the number in each are: Alabama, 1; Arkansas, 2; Florida, 9; Georgia, 3; Louisiana, 1; Mississippi, 8; Missouri, 1; Oklahoma, 1; Texas, 5; Virginia, 1.

PRISON, ASYLUM AND HOSPITAL CENSUS.

According to the Bureau of the Census, there were, early in 1923, a total of 893,679 persons confined in Federal, State, city, county, and private institutions for defectives, dependents, criminals, and juvenile delinquents.

In addition the report shows that 4,973,032 patients were treated in hospitals during the year 1922, and that there were 21,621,761 visits of patients for treatment in general and special dispensaries.

The number of prisoners in penal institutions numbered 108,939 on Jan. 1, 1923, of whom 4,670 were in Federal penitentiaries, 77,340 were in State prisons, reformatories, etc., and 26,929 were in county and city jails, workhouses and the like.

Between Jan. 1 and June 30, 1923, the number of prisoners committed was as follows—To Federal penitentiaries, 2,010; to State prisons, etc., 19,518; to county and city jails, etc., 147,489.

Inmates in institutions for juvenile delinquents numbered 29,343 on June 30, 1923.

In hospitals for mental diseases there were 290,457 patients on the books; in psychopathic wards of general hospitals, 1,842; in institutions for feebleminded, 46,722; in institutions for epileptics, 9,153.

The number of persons treated in 1922 in general, special, and Federal hospitals was 4,973,032; the total number of beds in hospitals of the three classes named was 366,491, of which 47,037 were in Federal hospitals.

In dispensaries in 1922 the number of visits by patients was 21,621,761.

During the year named 63,807 persons were admitted to almshouses, 44,066 were discharged or transferred, 15,772 died, and the total number of inmates on Jan. 1, 1923, was 78,090.

In institutions (other than almshouses) for dependents there were about 100,000 adults and 137,000 children; and 64,000 dependent children were in outside homes that had been found for them.

Total and average	66,935,800	1,519,595	22.7	24.3	798,893	11.9	11.7	115,648	76	76

The totals include the District of Columbia.

The 1922 figures are provisional. Figures for Massachusetts and Utah are omitted because transcripts for the entire year have not been received.

Illinois, Montana and Wyoming were not in the birth registration area in 1921.

The population of Mississippi is as of Jan. 1, 1920; decrease since 1910; no estimate made.

DISEASES FATAL TO WOMEN.

Among the diseases which, according to a statistical bulletin of the Metropolitan Life Insurance Company, kill more women than men are—cancer, organic heart disease, apoplexy, whooping cough, tuberculosis of the intestinal tract, pellagra.

Ailments of the thyroid, parathyroid, pituitary, adrenal, and pancreatic glands.

Diabetes, chorea (St. Vitus's dance), mental troubles, anaemia (not *pernicious* anaemia), yellow atrophy of the liver, gallstones, chronic bronchitis, vein diseases.

The first quarter of the year, in the North Temperate Zone, brings more deaths of both sexes than any other period.

"Ordinary receipts" include receipts from customs, internal revenue, direct tax, public lands, and miscellaneous, but do not include postal revenues, or receipts from loans, premiums, or Treasury notes. The figures cover actual receipts as of Treasury accounts.

The receipts from customs and internal revenue are shown elsewhere, in a separate table, as also are postal revenues, etc.

The receipts from Panama Canal in 1924 (fiscal year), were $27,063,204.

"Ordinary disbursements" cover disbursements for War, Navy, Indians, pensions, interest payments, and civil and miscellaneous items; but do not include payments for postal service, Panama Canal, public debt, or special purposes.

War and Navy disbursements are shown in table below.

Figures in "War" column are on a warrant basis, and, up to and including the fiscal year 1922, include expenditures for rivers and harbors, but not expenditures on account of the Panama Canal or civil expenditures under the War Department at Washington.

Beginning with the fiscal year 1923, the figures include all expenditures, civil and military, under the War Department, exclusive of Panama Canal.

Figures in "Navy" column are on a warrant basis, and, up to and including the fiscal year 1922, do not include civil expenditures under the Navy Department at Washington.

Beginning with the fiscal year 1923, the figures include all expenditures, civil and naval, under the Navy Department.

Included in the 1923 coinage were 2,268,250 gold double eagles; 56,631,000 standard silver dollars, 2,452,000 half-dollars, 11,076,000 quarters, 56,570,000 dimes, 41,857,000 nickels, and 83,423,000 cents.

NEW CHARTERS AND CAPITAL ISSUES.

In 1923, according to the New York Journal of Commerce, 9,164 new charters were granted to business concerns in the United States, with a total authorized capital of $8,415,105,719, as against $8,400,153,390 in 1922 and $7,959,111,400 in 1921.

New capital issues in the United States in 1923, by the same authority as the above, totaled $3,601,438,300, as against $3,423,948,320 in 1922, and $2,624,868,900 in 1921.

The 1924 interest charge includes $25,020,344.59 accrued discount on war savings certificates of the series of 1918 and 1919.

The interest bearing debt is exclusive of bonds issued to the Pacific railways (provision having been made by law to secure the Treasury against both principal and interest) and the Navy pension fund (which was in no sense a debt, the principal being the property of the United States).

The non-interest bearing debt includes old demand notes; United States notes, less the amount of the gold reserve since 1900; postal currency and fractional currency less the amounts officially estimated to have been destroyed; and also the redemption fund held by the Treasury to retire national bank notes of national banks failed, in liquidation, and reducing circulation, which prior to 1890 was not included in the published debt statements. Does not include gold, silver, or currency certificates or Treasury notes of 1890 for redemption of which an exact equivalent of the respective kinds of money or bullion was held in the Treasury.

The gross debt of the United States on Aug. 31, 1919, when the war debt was at its peak, was $26,596,701,648.01; the net balance in the general fund on that day was $1,118,109,534.76; making the net debt $25,478,592,113.25.

Net public debt, with per capita in earlier years—(1800) $82,976,294—$15.63; (1810) $53,-173,217—$7.34; (1820) $91,015,566—$9.44; (1830) $48,565,406—$3.77; (1840) $3,573,344—$0.21; (1850) $63,452,774 — $2.74; (1860) $59,964,402 — $1.91; (1865) $2,674,815,857—$76.98; (1870) $2,331,169,-956—$60.46; (1880) $1,919,326,748—$38.27; (1890) $890,784,371—$14.13; (1895) $901,672,967—$12.96.

A large part of the appropriations made by Congress are annual appropriations, intended only to cover the running expenses of the Government during a specific fiscal year Such appropriations can be used only to pay bills incurred during the fiscal year for which they were made, and if not required for this purpose, unless repealed before being entered on the books, are carried to the surplus funds at the end of the third fiscal year.

Appropriations for rivers and harbors work, lighthouses and public buildings, are by law exempted from the fiscal year limitation, and are available until expended, as are also other appropriations when expressly exempted by law.

In the case of these appropriations the amount that can be expended during any one fiscal year is sometimes limited. If not limited the appropriation can all be used in one year or spread over a period of years according to the nature of the undertaking.

Still other appropriations are indefinite both as to time and amount, such as appropriations for interest on the public debt.

The 1925 appropriations include the sum of $201,357,768 in two bills which failed of enactment at the first session of the 68th Congress, ending June 7, 1924, but which were scheduled for passage in the second session, beginning in December, 1924.

POSTAL SAVINGS TOTAL $132,655,147.

The amount of money on deposit with the Postal Savings system on June 30, 1924, totaled $132,-655,147, as against $131,671,300 a year before.

The deposits at the chief Post Offices were as follows:

New York, N. Y.....	$41,741,170	Kansas City, Mo.....	$1,546,627	Butte, Mont.....	$748,703
Brooklyn, N. Y.....	11,556,444	Tacoma, Wash.....	1,501,568	San Francisco, Cal.....	698,284

						1923...	$131,671,300

MONETARY SYSTEM OF THE UNITED STATES.

(Revised by the Director of the Mint.)

GOLD COIN—Weight, 25.8 grains to the dollar; fineness, 900-1000, unlimited as to issue, denominations, $2.50, $5, $10, $20; legal tender, unlimited; receivable for all public dues; exchangeable for gold certificates and subsidiary and minor coin.

STANDARD SILVER DOLLARS—Weight, 412.5 grains; fineness, 900-1000; ratio to gold, 15.988 to 1; coinage ceased in 1905, resumed in 1921; legal tender, unlimited, unless otherwise contracted; receivable for all public dues; exchangeable for silver certificates and smaller coin.

SUBSIDIARY SILVER COIN—Weight, 385.8 grains to the dollar; fineness, 900-1000; ratio to gold 14.953 to 1. Limit of issue, needs of the people. Denominations 10 cents, 25 cents, 50 cents; legal tender not to exceed $10; receivable for all dues up to $10; exchangeable for minor coin; redeemable in "lawful money" at the Treasury in sums or multiples of $20.

MINOR COIN—Weight, 5 cent piece, 77.16 grains, 75 per cent. copper, 25 per cent. nickel; 1 cent piece, 48 grains, 95 per cent. copper, 5 per cent. tin and zinc; limit of issue, needs of the people; legal tender not to exceed 25 cents; receivable for all dues up to 25 cents; redeemable in "lawful money" at the Treasury in sums or multiples of $20.

GOLD CERTIFICATES—Limit of issue for gold bullion to two-thirds of the amount of gold certificates outstanding; for gold coin, unlimited, unless gold coin reserve against United States notes (greenbacks) falls below $100,000,000; denominations, $10, $20, $50, $100, $500, $1,000, $5,000, $10,000; made legal tender by act Dec. 24, 1919; receivable for all public dues; redeemable in gold coin at the Treasury.

SILVER CERTIFICATES—Unlimited as to issue for standard silver dollars; denominations, $1, $2, $5, $10, $20, $50, $100; not a legal tender; receivable for all public dues; redeemable in silver dollars at the Treasury.

UNITED STATES NOTES—Limit of issue, $346,681,016; denominations, $1, $2, $5, $10, $20, $50, $100, $500, $1,000; legal tender for all debts, public and private, except customs and interest on the public debt; receivable for all public dues; redeemable in gold at the Treasury.

TREASURY NOTES OF 1890—No further issues, volume steadily diminishing by redemption in silver dollars; denominations, $1, $2, $5, $10, $20, $50 $100, $500, $1,000; legal tender, unlimited, unless otherwise contracted; receivable for all public dues; redeemable in gold or silver dollars at the Treasury.

NATIONAL BANK NOTES—Limit of issue not to exceed capital of banks; denominations, $5, $10, $20, $50, and $100; notes of denominations of $1, $2, $500 and $1,000 authorized, but none issued or available for issue; not a legal tender; receivable for all public dues except customs; redeemable in "lawful money" at the Treasury or at bank of issue.

FEDERAL RESERVE BANK NOTES—Issue unlimited, subject to deposit of the required security, and the discretion of the Federal Reserve Board; denominations $1, $2, $5, $10, $20, $50, $100, $500, $1,000; not a legal tender; receivable for all public dues except customs; redeemable in "lawful money" at the Treasury or at bank of issue.

FEDERAL RESERVE NOTES—Limit of issue same as Federal Reserve Bank notes; denominations, $5, $10, $20, $50, $100, $500, $1,000, $5,000, $10,000; not a legal tender; receivable for all public dues; redeemable in gold at the Treasury, and in gold or "lawful money" at any Federal Reserve Bank.

Gold coin and gold bullion in the United States on July 1, 1924, totaled $4,490,716,239, of which $3,785,302,042 was in the Treasury, $308,999,380 was held by Federal Reserve banks and agents, and $396,414,817 was in circulation.

The amount in circulation was $3.52 per capita.

The figures for gold coin and gold bullion do not include hoarded gold or gold outside the Treasury and Federal Reserve banks and agents.

The difference between the amount of money in circulation and the total stock of money in the United States represents mostly money (coin, bullion, etc.) held in the Treasury to back up the Government's paper money, including that of National and Federal Reserve banks.

Gold certificates are secured dollar for dollar by gold held in the Treasury for their redemption; silver certificates are secured dollar for dollar by standard silver dollars held in the Treasury for their redemption; United States notes are secured by a gold reserve of $152,979,025.63 held in the Treasury.

This reserve fund may also be used for the redemption of Treasury notes of 1890, which are also secured dollar for dollar by standard silver dollars held in the Treasury.

Federal Reserve notes are obligations of the United States and a first lien on all the assets of the issuing Federal Reserve bank. Federal Reserve notes are secured by the deposit with Federal Reserve agents of a like amount of gold or of gold and such discounted or purchased paper as is eligible under the terms of the Federal Reserve Act.

Federal Reserve banks must maintain a gold reserve of at least 40 per cent., including the gold redemption fund which must be deposited with the United States Treasurer, against Federal Reserve notes in actual circulation.

Federal Reserve bank notes and National bank notes are secured by United States Government obligations, and a 5 per cent. fund for their redemption is required to be maintained with the Treasurer of the United States in gold or lawful money

$400,000,000 HOARDED OUTSIDE BANKS IN UNITED STATES.

In the collective ginger jars and stockings of the United States there is a total of more than $400,000,000 jealously hoarded away, according to estimates by Joseph S. McCoy, United States Treasury actuary.

8,000 Americans may safely be put in the miser class, McCoy believes. They just like to see their money and gloat over it and call it pet names, and among them they are keeping $400,000,000 out of circulation.

Then there are the children's banks. Probably 2,500,000 kids have such banks, and there is perhaps an average of 60 cents in each, making a total of $1,500,000 thus hoarded away.

About half of the entire hoarded wealth of the United States is in the cupboards and under the mattresses of foreign-born residents.

And farmers are hoarding a total sum of $125,000,000, McCoy says.

$125,000,000 A YEAR EMBEZZLED IN UNITED STATES.

The National Surety Company has prepared the subjoined table showing that the annual embezzlement losses paid by all fidelity insurance companies in the United States have increased very greatly. Previous to 1906, fidelity losses were not separated from surety losses in company statements.

Chairman William B. Joyce of the National Surety Company estimates present losses of the American public from embezzlement at $125,000,000 a year.

Of the males in the U. S. 10 to 15 years of age 11.3 per cent. were gainfully occupied in 1920, as against 24.8 per cent. in 1910; 26.1 in 1900; 25.9 in 1890; and 24.4 in 1880. Of the females, 5.6 per cent. worked in 1920, as against 11.9 per cent. in 1910; 10.2 in 1900; 10.0 in 1890; and 9.0 in 1880.

Of the 1,060,858 persons 10 to 15 years old in 1920 earning wages, 647,309 were employed in agriculture, 7,191 in the extraction of minerals, 185,337 in manufacturing and mechanical industries, 18,912 in transportation, 63,368 in trade, 1,130 in public service, 3,465 in professional service, 54,006 in domestic and personal service, and 80,140 in clerical occupations.

Of the workers above enumerated, 527,176 were native white children of native parentage; 175,060 were native white children of foreign or mixed parentage; 38,692 were children born abroad; 317,231 were Negro children; 2,359 were Indians; 158 Chinese; and 169 were Japanese.

From 1910 to 1920 there was an *increase* of 15.5 per cent. in the total number of children 10 to 15 years of age, but there was a *decrease* of 46.7 per cent. in the number of children 10 to 15 years engaged in gainful occupations. This was largely due to the fact that the 1920 census was taken at the beginning of a period of industrial depression and at a season of the year when employment in many occupations, especially in agriculture, was at its lowest ebb.

Moreover, in 1920, the employment of children was discouraged by a Federal child-labor law.

Since the Census of 1920 was taken this law has been declared unconstitutional, the industrial depression has been succeeded by a period of increasing employment, and were a census to be taken at the present time it would doubtless show a notably larger number of employed children than that of January, 1920.

HOW CHILD LABOR IS REGULATED BY THE STATES.

The laws are enforced through a work-permit system administered in most States by local school authorities and through inspection of the place of employment by some State agency, usually the Department of Labor. Moreover, in every State the compulsory school attendance law, if enforced, indirectly regulates the employment of children during school hours.

The failure of the State child-labor laws to prevent the widespread employment of children shown by the census reports is not altogether due to low standards; it is due also to the numerous exemptions permitted by many of the State laws and to inadequate enforcement of the laws.

Few State laws apply specifically to farm work or domestic service. Although a number of child-labor laws apply to "all gainful occupations," and therefore nominally cover farm work and housework, almost the only regulation of these types of child labor is that which results indirectly from the operation of the compulsory school attendance laws.

MANUFACTURES IN CONTINENTAL UNITED STATES, 1849-1919.

(Data by the Bureau of the Census.)

In 1810 the value of products of manufacture in the United States was estimated for the year 1809, by the Treasury, at over $120,000,000.

The 1810 census estimate for 1809 was $198,613,471.

There are no reliable data for 1819, 1829, or 1839.

SUMMARY, 1849-1919.

YEAR.	No. of Establishments.	Wage Earners, Ave. No.	Capital.	Wages in the Year.	Cost of Materials.	Value of Products.
1849	123,025	957,059	$533,245,351	$236,755,464	$555,123,882	$1,019,106,616
1859	140,433	1,311,246	1,009,855,715	378,878,966	1,031,605,092	1,885,861,676
1869	252,148	2,053,996	1,694,567,015	620,467,474	1,990,741,794	3,385,860,354
1879	253,852	2,732,595	2,790,272,606	947,953,795	3,396,823,549	5,369,579,191
1889	355,405	4,251,535	6,525,050,759	1,891,219,696	5,162,013,878	9,372,378,843
1899	512,191	5,306,143	9,813,834,390	2,320,938,168	7,343,627,875	13,000,149,159

The figures for years above cover not only factories but also "hand and neighborhood and building industries." Value figures for 1869 are on a gold basis.

1899	207,514	4,712,763	8,975,256,496	2,008,361,119	6,575,851,491	11,406,926,701
1904	216,180	5,468,383	12,675,580,874	2,610,444,953	8,500,207,810	14,793,902,563
1909	268,491	6,615,046	18,428,269,706	3,427,037,884	12,142,790,878	20,672,051,870
1914	275,791	7,036,247	22,790,979,937	4,078,332,433	14,368,088,831	24,246,434,724
1919	290,105	9,096,372	44,466,593,771	10,533,400,340	37,376,380,283	62,418,078,773

Of the wage earners in manufactures in 1919, males numbered 7,267,030; females, 1,829,342. Of those under 16, 64,501 were males, 56,418 females.

Including proprietors and salaried persons, the total number in manufactures in 1919 was 10,812,736.

Manufactures in 1919 in 88 *United States Government plants*, not included in the above table, employed 106,763 wage earners, whose wages in the year totaled $151,363,384; value of products, $396,402,001.

Of the employees, 7,700 were engaged in making firearms and ammunition, 20,177 in making ordnance and accessories, 59,941 in building ships valued at $239,603,243.

Bituminous coal, tons of 2,000 pounds	203,463,622	166,589,372	161,793,058
Coke, tons of 2,000 pounds	42,595,019	32,539,325	37,925,338
Fuel, oils, barrels	89,695,223	48,689,232	34,331,632
Gasoline and other volatile oils, barrels	2,344,469		
Gas (excluding blast-furnace gas), 1,000 cubic feet	341,921,022	284,947,899	269,640,535

Includes bituminous coal used as material in the manufacture of coke.

PRIMARY HORSEPOWER USED IN MANUFACTURES.

Summary of total—(1909) 18,675,376 hp.; (1914) 22,437,072 hp.; (1919) 29,504,792 hp.

FUEL ENERGY RESOURCES OF THE UNITED STATES.

(By the U. S. Geological Survey.)

The estimated avarage thermal values used in the comparisons between natural gas, coal and petroleum are 1,000,000 British thermal units per M cubic feet for gas; 24,000,000 British thermal units per ton for coal; 6,000,000 British thermal units per barrel for petroleum.

Pennsylvania	169,996	257,000	638,000
Rhode Island	30,188	25,000	40,000
South Carolina	357,510	429,000	632,000
South Dakota	18,171	63,000	110,000
Tennessee	128,465	432,000	710,000
Texas	13,820	238,000	514,000
Utah	115,329	1,420,000	1,586,000
Vermont	167,816	80,000	169,000
Virginia	109,798	459,000	812,000
Washington	480,356	4,970,000	7,871,000
West Virginia	14,711	355,000	980,000
Wisconsin	404,282	285,000	480,000
Wyoming	7,886	704,000	1,182,000
United States	9,086,958	34,818,000	55,030,000

The data in the above table cover 3,200 water plants of 100 horse power or more.

The increase in 1924 is about 1,160,000 horse power, or nearly 15 per cent. over 1921, when the total was 7,926,958 horse power.

Of the 1924 horse power, 7,348,197 horse power is in 1,390 public utility and municipal plants; and the rest, 1,738,761 horse power, is in 1,821 manufacturing and miscellaneous plants.

The proposed turbine capacity of projects under construction, for which licenses were issued by the Federal Power Commission in 1921, 1922 and 1923 was 2,600,000 horse power.

The developed horse power in Alaska is 40,000; in Hawaii, 25,000; in Porto Rico, 15,000.

The potential horse power, available 90 per cent. of the time, is 1,000,000 in Alaska, 19,000 in Porto Rico, and 100,000 in Hawaii.

Assuming that all sites may eventually be developed to a point where the wheel capacity is 131 per cent. of the power available 50 per cent. of the time, we may say that the installed capacity will reach 72,000,000 horse power.

The present installed capacity of plants of 100 horse power or more is 9,087,000 horse power, and on the above assumption of the ultimate installed capacity about 12.5 per cent. of the potential water power of the country has now been developed.

ELECTRICAL SERVICE DEVELOPMENT IN THE UNITED STATES.

(Supplied to The World Almanac by the Society for Electrical Development, Inc.)

Central Stations and Municipal Plants.	1923.	1922.	Movement.
			Per Cent.
Investment in plant and equipment	$5,800,000,000	$5,100,000,000	13.7 increase

Ind.	1,261,097,000	Neb.	316,684,000	S. C.	894,893,000		

Total kilowatt hours in previous years: 1919, 38,921,000,000; 1920, 43,554,880,000; 1921, 40,975,617,000; 1922, 47,659,004,000.

Of the electricity produced (1923) 234,487,000 kilowatt hours were due to the use of wood; 19,347,499,000 k. w. from water power; 36,326,936,000 from fuels.

Of fuels used (1923) coal totaled 38,954,338 short tons; fuel oil, 14,679,205 bbls.; gas, 31,433,205 m. cubic feet.

The average consumption of coal (or its equivalent in other fuels) in 1923, per kilowatt hour, was 2.4 lbs.

ALUMINUM INDUSTRY IN THE UNITED STATES.

(Data by the Geological Survey, Department of the Interior.)

The demand for aluminum increased by the expansion of the automobile industry, coupled with the greater use of aluminum parts by the makers of automobiles.

Exclusive of Ford cars, the average consumption of aluminum is 100 pounds to the car.

The frame of the airship *Shenandoah* was built of the 17 S alloy, containing besides aluminum 4 per cent. of copper and 0.5 per cent. of magnesium and manganese.

The new silicon-aluminum alloys, containing as much as 15 per cent. of silicon, are also coming into more general use, particularly for casting, and nickel-silicon-aluminum and copper-silicon-aluminum alloys are being used for die casting.

Aluminum powder is finding a much larger market in the paint trade and is proving a protective pigment for structural steel.

The use of aluminum cables for transmitting high-tension electric current has been further expanded. It is stated that there is in the United States 125,000 miles of aluminum cable in use for electric power transmission, of which 85,000 miles is of steel reinforced type.

Canadian aluminum plants were very much more active in 1923 than in 1922.

VALUE OF ALUMINUM PRODUCED IN THE UNITED STATES, IMPORTED, AND EXPORTED.

Year (Cal.)	Domestic Production		Imports.	Exports.	Year (Cal.)	Domestic Production		Imports.	Exports.
	Primary Metal.	Secondary Metal.				Primary Metal.	Secondary Metal.		
	Dollars.	*Dollars.*	*Dollars.*	*Dollars.*		*Dollars.*	*Dollars.*	*Dollars.*	*Dollars.*
1919....	38,558,000	12,014,600	4,568,595	3,890,326	1922....	13,622,000	6,085,900	9,695,012	2,836,116
1920....	41,375,000	9,489,100	13,077,022	5,630,781	1923....	28,305,000	10,824,600	8,742,563	3,571,539
1921....	10,906,000	3,775,400	8,889,791	3,108,857					

Value of primary metal based on average open-market price at New York for small lots, as quoted by the Engineering and Mining Journal-Press, and that of secondary aluminum based on average price at New York as given by American Metal Market.

Imports for consumption include aluminum in crude form, scrap, bars, strips, rods, plates, sheets, and all manufactures of aluminum.

Exports include ingots, metal and alloy, plates and sheets, and all other manufactures of aluminum.

The import duty or tariff on aluminum was 7 cents a pound 1910-1912, 2 cents a pound 1913-1921, 5 cents a pound 1922 and since.

The average price (cents per lb.) to consumers of aluminum ingots has been: (1910) 22; (1911) 21; (1912) 21; (1913) 20; (1914) 19; (1915) 26; (1916) 37; (1917) 38; (1918) 33; (1919) 33; (1920) 33; (1921) 27; (1922) 21; (1923) 26; (1924, to Sept.) 28.

These figures were given to the press by Secretary of the Treasury A. W. Mellon, who had been named in the Democratic Presidential campaign as a large owner of the Aluminum Co. of America, which was declared by the Democrats to be a monopoly.

Mr. Mellon denied that the company was a monopoly or that it was aided in that direction by the tariff.

Aluminum salts produced in the United States in 1923 totaled 289,904 short tons, valued at $8,987,421.

ANNUAL PRICE OF SILVER IN LONDON.

Louisiana in 1919 includes Mississippi.

MINERAL PRODUCTS—STATES THEY COME FROM.

Mineral.	Chief Producing States.
Aluminum	N. Y., N. C., Tenn.
Antimonial lead	Not separable by States.
Arsenious oxide	Not separable by States.
Asbestos	Ariz., Md., Vt., Cal.
Asphalt	Cal., Tex., Ind., Ill.
Barytes (crude)	Mo., Ga., Tenn., Ala.
Bauxite	Ark., Ga., Ala., Tenn.
Borax (crude)	Cal., Nev.
Bromine	Mich., W. Va., Ohio.
Cadmium	Not separable by States.
Calcium-magnes, chloride	Mich., W. Va., Ohio.
Cement	Pa., Ind., Cal., Ill.
Chromic iron ore	Ore., Cal., Md.
Clay: Products	Ohio, Pa., N. J., Ill.
Raw	N. J., Mo., Pa., Ohio.
Coal: Bituminous	Pa., W. Va., Ill., Ky.
Anthracite	Pennsylvania.
Coke	Pa., Ala., Ohio, Ind.
Copper	Ariz., Mich., Utah, Mont.
Diatomaceous earth	Cal., Ill., Okla., Ore.
Emery	New York, Virginia.
Feldspar (crude)	N. C., Me., N. Y., N. H.
Ferroalloys	Pa., N. Y., Ohio, Tenn.
Fluorspar	Ill., Ky., N. Mex., Col.
Fuller's earth	Fla., Ga., Tex., Ill.
Garnet, for abras. purposes	New York, N. Hampshire
Gems and precious stones	Mont., Ariz., Nev., Cal.
Gold	Cal., Alaska, Col., S. D.
Graphite	Ala., Tex., R. I., Cal.
Grindstones-pulpstones	Ohio, W. Va., Mich.
Gypsum	N. Y., Mich., Ohio, Iowa.
Iron: Ore	Minn., Mich., Ala., Wis.
Pig	Pa., Ohio, Ala., Ill.
Lead	Mo., Idaho, Utah, Okla.

Mineral.	Chief Producing States.
Lime	Pa., Ohio, W. Va., Mo.
Magnesite (crude)	Cal., Wash.
Manganese ore	Mont., Ark., Va., Cal.
Manganiferous ore	Minn., N. Mex., Col., Mich.
Mica	N. C., N. H., Ala., S. D.
Millstones	N. Y., N. C., Va., Ala.
Mineral Paints: Nat. pig.	Canvass discontinued.
Zinc and lead pigments	Pa., Mo., Ohio, Kan.
Mineral waters	Wis., N. Y., Cal., Minn.
Natural gas	W. Va., Pa., Okla., Cal.
Natural-gas gasoline	Okla., W. Va., Cal., Tex.
Nickel	Not separable by States.
Oilstones, etc	Ark., Ohio, Ind., N. H.
Peat	Cal., N. J., Ill., Mich.
Petroleum	Cal., Okla., Tex., La.
Phosphate rock	Fla., Tenn., Ky., Idaho.
Platinum allied metals	Cal., Alaska, Ore., Idaho.
Potash	Cal., Utah, Col., Neb.
Pumice	Kan., Neb., Ariz.
Pyrites	Cal., Tl. Y., Va., Wis.
Quicksilver	Tax., Cal., Nev., Ore.
Salt	Mich., N. Y., Ohio, Kan.
Sand and gravel	Pa., Ohio, Ill., N. Y.
Sand-lime brick	Mich., Wis., Fla., D. C.
Silica (quartz)	Wis., Conn., Md., N. Y.
Silver	Utah, Nev., Mont., Idaho.
Slate	Pa., Vt., N. Y., Me.
Stone	Pa., Ill., Mich., Ohio.
Sulphur (shipments)	Tex., La., Nev., Utah.
Talc and soapstone	Va., N. Y., Vt., Cal.
Tin	Alaska.
Titanium ore (rutile)	Va.
Uranium-vanadium mins	Col., Utah.
Zinc	Okla., N. J., Kan., Mont.

Cement's 100th birthday, in 1924, was marked by a tablet erected in the City of Leeds, England, in memory of Joseph Aspdin, the modern discoverer of "liquid stone," or concrete.

Hydraulic cement was used in Imperial Rome by mixing and baking lime and volcanic ashes. Nowadays, blast furnace slag is often used in the calcium-alumina mixture. Rocks are ground to powder in the process.

MINERAL PRODUCING STATES AND THEIR LEADING MINERAL PRODUCTS.

State.	Principal Mineral Products.
Ala.	Coal, iron ore, cement, clay products.
Alaska	Gold, copper, silver, coal.
Ariz.	Copper, gold, silver, lead.
Ark.	Petroleum, coal, natural gas, beauxite.
Cal.	Petroleum, cement, natural gas, clay products.
Col.	Coal, gold, silver, clay products.
Conn.	Clay products, stone, lime, sand, gravel.
Del.	Clay products, stone, sand, gravel.
D. of C.	Clay prod., sand, gravel, sand-lime, brick, stone.
Fla.	Phosph. rock, fuller's earth, stone, clay prod.
Ga.	Clay prod., stone, fuller's earth, cement.
Idaho.	Lead, silver, gold, copper.
Ill.	Coal, petroleum, clay products, cement.
Ind.	Coal, cement, clay products, stone.
Iowa.	Coal, cement, clay products, gypsum.
Kan.	Petroleum, coal, natural gas, cement.
Ky.	Coal, petroleum, clay products, natural gas.
La.	Petrol., sulphur, nat. gas, nat.-gas gasoline.
Me.	Stone, lime, clay products, slate.
Md.	Coal, cement, clay products, sand and gravel.
Mass.	Stone, clay products, lime, sand and gravel.
Mich.	Iron ore, copper, cement, salt.
Minn.	Iron ore, clay products, cement, stone.
Miss.	Sand and gravel, clay prod., min. wat., stone.
Mo.	Lead, coal, clay products, cement.

State.	Principal Mineral Products.
Mont.	Coal, silver, copper, zinc.
Neb.	Clay products, cement, sand and gravel, stone.
Nev.	Silver, gold, gypsum, copper.
N. H.	Stone, clay products, sand and gravel, mica.
N. J.	Clay products, zinc, cement, stone.
N. M.	Coal, copper, silver, gold.
N. Y.	Clay products, cement, stone, gypsum.
N. C.	Clay products, stone, sand and gravel, coal.
N. D.	Coal, clay prod., min. wat., sand and gravel.
Ohio.	Coal, clay products, petroleum, natural gas.
Okla.	Petrol., natural gas, nat.-gas gasoline, zinc.
Ore.	Cement, sand and gravel, stone, gold.
Pa.	Coal, cement, clay products, natural gas.
R. I.	Stone, clay prod., sand and gravel, min. wat
S. C.	Stone, clay products, sand and gravel.
S. D.	Gold, stone, sand and gravel, silver.
Tenn.	Coal, cement, clay products, stone.
Tex.	Petroleum, sulphur, natural-gas gasoline.
Utah.	Coal, silver, lead, copper.
Vt.	Stone, slate, lime, talc.
Va.	Coal, clay products, cement, stone.
Wash.	Coal, cement, clay products.
W. Va.	Coal, natural gas, petroleum, clay products
Wis.	Stone, sand and gravel, min. water, iron ore
Wyo.	Petroleum, coal, natural gas, nat.-gas gasoline

VALUE OF MINE AND QUARRY PRODUCTS OF THE UNITED STATES, 1890-1923.

Year.	Metallic.	Non-Metallic.	Other and Total.
	Dollars.	*Dollars.*	*Dollars.*
1890	303,440,000	310,995,000	615,429,000

1910	749,879,000	1,237,668,000	1,987,844,000
1911	680,907,000	1,242,942,000	1,924,081,000
1912	862,008,000	1,375,420,000	2,237,794,000
1913	878,869,000	1,554,298,000	2,433,545,000
1914	686,639,000	1,424,063,000	2,111,172,000
1915	991,730,000	1,400,484,000	2,394,644,000
1916	1,620,745,000	1,884,413,000	3,508,439,000
1917	2,086,234,000	2,900,462,000	4,992,496,000
1918	2,153,318,000	3,380,478,000	5,540,496,000
1919	1,351,600,000	3,257,900,000	4,613,000,000
1920	1,724,300,000	4,977,500,000	6,951,410,000
1921	654,130,000	3,481,890,000	4,138,670,000
1922	987,180,000	3,656,410,000	4,647,290,000
1923	1,498,200,000	4,515,300,000	6,018,000,000

Included in the non-metallic totals is *mineral oil*, production of which in 1923 was valued at $3,382,500,000.

UNITED STATES MINE AND QUARRY PRODUCTION IN 1923.

(Data by the Geological Survey. Values in Parentheses.)

METALLIC.

Aluminum, $28,305,000.
Anitmonial lead, 14,900 s. t. ($1,950,370).
Antimony, 2,170 s. t. ($338,500).
Bauxite, 522,690 l. t. ($3,156,610).
Chromite, 227 l. t. ($3,819).
Copper, 1,434,999,962 lbs. ($210,945,000).
Ferro alloys, 579,051 l. t. ($48,082,426).
Gold, 2,502,632 troy ounces ($51,734,000).
Iron ore, 69,811,472 l. t. ($240,738,921).
Iron, pig, 38,363,509 l. t. ($935,908,540).
Lead, refined, 543,841 s. t. ($76,138,000).
Manganese ore, 32,269 l. t. ($880,178).
Manganiferous ore, 1,433,897 l. t. ($4,888,393).
Nickel, 100 s. t. ($71,605).
Platinum and allied metals. 49,797 troy ounces ($5,-761,304).
Quicksilver, 7,937 flasks of 75 lbs. net ($521,302).
Quicksilver ore, 51,000 s. t.
Silver, 73,335,170 troy ounces ($60.134,839).
Tin (metallic equivalent), 2 s. t. ($1,623).
Titanium ore (rutile) 270 s. t.
Tungsten ore, 251 s. t. ($150,000).
Uranium and vanadium ores, 2,025 s. t. ($150,000).
Zinc, 508,335 s. t. ($69,134,000).
Total metallic ($1,498,200,000).

NON-METALLIC.

Arsenious oxide, 14,271 s. t. ($2,808,801).
Asbestos, 310 s. t. ($24,826).
Asphalt, 1,326,630 s. t. ($16,223,515).
Barytes (crude), 214,183 s. t. ($1,664,156).
Borates, 129,400 s. t. ($3,988,770).
Bromine, 842,352 lbs. ($146,176).
Calcium-magnesium chloride, 43,596 s. t. ($642,874).
Cement, 137,183,792 bbls. of 376 lbs. net. ($259,631,-776).
Clay, raw, 3,434,560 s. t. ($11,187,863).
Coal, bituminous, 545,400,000 s. t. ($1,636,200,000).
Coal, Penn. anthracite, 85,218,000 l. t. ($491,537,-000).
Coke. 55,487,000 s. t.
Diatomaceous earth, 92,915 s. t. ($1,082,163).
Emery. 2,286 s. t. ($29,478).
Feldspar (crude) 145,004 l. t. ($1,057,595).
Fluorspar, 121,188 s. t. ($2,505,819)
Fuller's Earth, 149,134 s. t. ($2,247,523).
Garnet for abrasives, 9,000 s. t. ($688,437).
Gems ($65,000).
Graphite, amorphous, 3,200 s. t.
Graphite, crystalline, 3,280,900 lbs. ($148,234).
Grindstones and pulpstones, 46,570 s. t. ($1,689,315).
Gypsum, 4,753,448 s. t. ($34,888,155).
Lime, 4,057 s. t. ($39,413,000).
Magnesite (crude) 147,250 s. t. ($1,103,700).
Mica, scrap, 8,290 s. t. ($155,820).
Mica, sheet, 1,782,200 lbs. ($308,000).
Millstones ($22,229).
Mineral paints, zinc and lead pigments, 163,240 s. t. ($23,660,381).
Mineral waters, 44,600,000 gal ($6,500,000).
Natural gas, 900,000,000,000 cu. ft. ($250,000,000).
Natural gas gasoline 788,000,000 gal. ($74,000,000).
Oilstones, 1,223 s. t. ($231,812).
Peat, 61,355 s. t. ($376,834).
Petroleum, 733,260,000 bbls. of 42 gals. ($930,-760,000).
Phosphate rock, 3,006,706 l. t. ($11,576,049).
Potash, 19,281 s. t. ($784,671).
Pumice, 56,575 s. t. ($214,169).
Pyrites, 181,628 l. t. ($661,000).
Salt, 7,033,000 s. t. ($27,600,000).
Sand, glass, 2,034,958 s. t. ($3,751,778).
Sand, other, and gravel, 137,897,195 s. t. ($87,-151,876).
Silica (quartz), 20,601 s. t. ($193,630).
Slate, 726,800 s. t. ($12,076,624).
Stone, 107,200,000 s. t. ($161,880,000).
Sulphur, 1,618,841 l. t. ($26,000,000).
Talc and soapstone, 196,692 s. t. ($3,012,253).
Total non-metallic ($4,515,800,000).
Total mineral fuels ($3,382,500,000).
Total unspecified ($4,000,000).
Grand total of all ($6,018,000,000).

NOTE.—s. t. means short tons; l. t. means long tons.

Some of the figures are subject to final revision.

PRODUCTION OF COAL-TAR DYES IN THE UNITED STATES.

(Data by the United States Tariff Commission.)

KIND OF PRODUCT.	1918.	1919.	1920.	1921.	1922.	1923.
	Pounds.	*Pounds.*	*Pounds.*	*Pounds.*	*Pounds.*	*Pounds.*

Tanning materials	} 4,233,356	3,794,534	3,142,861	1,902,597	1,910,519	} 9,763,685
Synth. phenol resins			4,659,680	1,643,796	5,944,133	

The production of dyes and coal-tar chemicals in this country is dependent on the production of by-product coke, which in 1923 was over 53,000,000 tons.

The output of coal-tar in 1923 was 440,000,000 gallons as against 328,000,000 gallons in 1922.

The sales in the United States in 1923 (value in parentheses) of dyes and coal-tar chemicals were, in pounds, as follows: Intermediates, 83,582,808 ($18,916,058); finished products (total), 115,297,586 ($65,898,177); dyes, 86,567,446 ($47,223,161); color lakes, 12,627,357 ($5,124,732); photographic chemicals. 321,083 ($443,697); medicinals, 2,995,448 ($4,720.253); flavors, 1,442,387 ($1,780,213); perfumes, 1,275,430 ($789,431); tanning materials and synthetic phenolic resins, 10,068,431 ($5,816,590).

Total imports of coal-tar dyes in 1923 were 3,098,193 pounds valued at $3,151,363, as against 3,982,631 pounds valued at $5,243,257 in 1922, and 45,950,895 pounds in 1914.

Non-Coal-Tar Chemicals—The production of synthetic organic chemicals other than those derived from coal-tar in 1923 was 90,597,712 pounds and sales for that year amounted to 67,727,067 pounds valued at $13,875,521. The production in 1922 was 79,202,155 pounds and in 1921, 21,545,186 pounds.

Figures of production issued jointly by the Bureau of the Mint and the Geological Survey.
Values for 1922 are at $1 an ounce, provided by the Pittman Act of April 23, 1918, for domestic product.
Values for 1923 are at 82 cents an ounce—average of Pittman Act price ($1 an ounce) January to June and New York price July to December.

IMPORTS OF DIAMONDS AND OTHER GEMS.

Diamonds and other gems to the value of $73,155,143 were imported into the United States in the year ended June 30, 1924, as against a valuation of $81,833,708 in 1923. The imports in 1924 included diamonds, uncut, $8,554,615; diamonds, cut but not set, $49,367,400; pearls, not strung or set, $5,879,639; imitation precious stones, $2,201,313.

Precious stones valued at $65,000 were mined in the United States in the calendar year 1923.

Figures for pig iron and steel rails are for calendar years. Pig iron prices are as at Philadelphia after 1909 and are for No. 2 foundry, which is usually 50 cents below No. 1; pig iron prices since 1917 are for Bessemer pig iron at Pittsburgh. Steel rail prices are as at the mills in Pennsylvania, and are for Bessemer down to and including 1913; the $2 extra a ton on open hearth was annulled Oct. 22, 1921.

Lowest price for pig iron—$11.66, in 1898; highest, $48.94, in 1872.

Lowest price for rails—$17.62, in 1898; highest, $120.58, in 1873.

Coal prices are average domestic export; years are fiscal down to and including 1918; subsequently, calendar.

Lowest price for coal: Anthracite—$3.15, in 1878; highest, $16.13 in 1921; bituminous—lowest, $2.06, in 1899; highest, $11.82 in 1921.

Mineral oil (petroleum) prices are average domestic export, and cover fiscal years down to and including 1918; subsequently, calendar.

Lowest price for petroleum—4.2 cents, in 1894; highest, 21 cents, in 1877.

Copper prices are calendar year average in the United States.

Lowest price for copper—9.5 cents, in 1894.

Total iron ore mined in the U. S., 1810-1922—1,477,379,407 gross or long tons.

Hematite ore comes chiefly from Minnesota, Michigan, Alabama, and Wisconsin; brown ore from Alabama, Virginia, Utah, and Tennessee; magnetite from New York, Pennsylvania, New Jersey, and New Mexico; carbonate only from Pennsylvania.

Rolled blooms and billets for forging purposes are included from 1905, while semi-finished products rolled for export are included for 1912 and subsequent years. Prior to 1892 structural shapes were included in "all other finished rolled products."

Two-thirds of the rails produced now weigh 85 pounds or over a yard, and one-quarter of the rails weigh 100 pounds or over a yard. Four-fifths of the rails are by open-hearth process. Girder and high T rails for electric and street railways are included in the figures given above. No iron rails have been produced since 1911.

Of the 1923 rolled iron and steel production, 32,321,479 tons were rolled *steel*, and 955,597 tons were rolled *iron*.

"Other finished products" in 1923 included 5,552,796 tons of *merchant bars*, 20,167 tons of railroad ties, 17,672,582 kegs (100 lbs. each) of cut and wire *nails*, of which 1,029,971 kegs were exported.

Copper and its products—Exports from the United States in year ended June 30, 1924, totaled 1,000,947,545 lbs., valued at $143,610,964; copper imports were valued at $100,108,314, mostly from Chile, Cuba, and Mexico. Exports were chiefly to Germany, France, and Britain.

Quicksilver produced in the United States in 1923 totaled 7,937 flasks of 76.5 lbs. each, valued in all at $521,302.

Quicksilver imports, in year ended June 30, 1923, were valued at $692,686; exports totaled 20,669 lbs., valued at $22,996.

The above figures do not include the cut of 2,186 mills, each of which sawed less than 50,000 feet of lumber, or the equivalent in lath and shingles.

The total cut of these small mills was reported as 55,224,000 feet of lumber, 7,928,000 lath, and 26,439,000 shingles.

The cut of laths in 1922 totaled 2,940,714,000; shingles, 8,131,242,000.

CONSUMPTION OF WOOD IN THE UNITED STATES.

(From a Bulletin of the Chief U. S. Forester.)

Out of every ten acres of the virgin forest which Columbus discovered, four and one-quarter acres have passed under the plough; four acres more have been cut over but still lie untilled—an aggregate area over ten times the State of New York.

Of the four acres, three contain culled timber, second-growth timber, or young trees, often scattered and incomplete to be sure, but enough to represent some small degree of forest replacement.

The fourth acre is the idle acre, the acre which has been so denuded and burnt that it is producing nothing.

The idle quarter of our cut-over forest lands represents 81,000,000 acres, mainly in the Eastern States and much of it within a stone's throw of great lumber-using centres like Boston, Pittsburgh and Detroit.

Our remaining forests of all sorts are being cut at the rate of about 10,000,000 acres a year.

A million acres are stumped and put under the plough each year; but nearly an equal area of old plough land, at one point or another, reverts each year to pine seedlings, brush, or barrens. Many a piece of old New England mow land is now a white-pine lot. Many a former cotton plantation is now in "old-field" pine.

However the pendulum may swing from year to year, in the long run timber appears to be the only practicable crop on not far from one-fourth of the soil of the United States.

The United States leads the nations of the earth in the use of wood. We consume nearly half of the world's cut of lumber and two-fifths of all the forest products which it produces. The quantity, variety, and cheapness of our timber have led to its use in our homes, industries, and commerce to a degree that is without parallel in human history.

Ninety-eight per cent. of our rural dwellings and from 59 to 98 per cent. of our urban dwellings, varying in the different States, are still built of wood.

From twenty-five to twenty-eight billion board feet of lumber are used annually in building and construction, the farmers being the largest consumers and nine billion shingles are laid annually in roofing these homes and other structures.

Another six billion feet of lumber are manufactured yearly into crates and boxes to carry our commerce.

Our railroads normally require from 100 to 125 million wooden ties annually.

Our mining industry could not live without timber, and consumes nearly 300 million cubic feet of stulls and lagging every year.

A hundred million cords of fuel are cut annually from our forests and woodlots.

To support a per capita consumption of paper which is double that of any other nation, we cut 5,000,000 cords of pulpwood from our forests every year, and still import from Canada and other foreign sources over half of our paper or paper-making materials.

And so on, down a long and constantly growing list. It is seldom realized how much of our timber goes into industrial use—for the manufacture of furniture, sash and doors, automobiles, agricultural implements, cooperage, and so forth.

There are fifty-three categories of manufacturers, down to tobacco pipes, which depend upon wood.

All told, we take nearly twenty-two and one-half billion cubic feet of wood from our forests annually. This is divided almost equally between timber of saw-log size and the smaller products, but is equivalent roughly to fifty-three billion board feet.

VALUE OF FARM PROPERTY IN THE UNITED STATES.

U. S. CORN CROPS; ACREAGE, PRODUCTION, VALUE, ETC.

NOTE to tables on corn and wheat—Figures in *italics* are census returns; figures in roman are estimates of the Department of Agriculture. Estimates of acres are obtained by applying estimated percentages of increase or decrease to the published acreage of the preceding year, except that a revised base is used for applying percentage estimates whenever new census data are available. Acreages have been revised for years 1890-1908, so as to be consistent with the following as well as the preceding census acreage, and total production and farm values are adjusted accordingly.

YEAR.	Acreage.	Ave. yield per Acre	Production.	Average Farm Price per Bush. Dec. 1	Farm Value Dec. 1.	Chicago Cash Price per Bushel, Contract.				Domestic Exports, Including Corn Meal, Fiscal Year Beginning July 1.	Imports During Fiscal Year Beginning July 1.	Per Cent. of Crop Exp'ted.

The 1924 corn crop was estimated on Oct. 1, by the Department of Agriculture, at 2,459,000,000 bushels, grown on 105,604,000 acres.

In 1909 and 1910 the United States imports of corn were not separately reported but were included in "all other breadstuffs."

Cotton production figures exclude linters, which totaled 651,810 bales in 1923.

There are more than 37,000,000 active cotton spindles in the United States.

The boll weevil bug does, yearly, $200,000,000 damage to cotton plants in this country.

Cotton goods in the United States in 1921 were made in 1,527 establishments, by 425,817 wage earners; wages, $340,749,958; cost of materials, $731,584,919; value of products, $1,330,263,117.

U. S. exports show domestic raw cotton in 1923 totaled 5,279,165 bales, valued at $807,102,507.

Exports of domestic cotton goods were valued at $138,000,106.

Imports of raw cotton totaled 187,365,365 lbs., valued at $49,442,868.

Imports of cotton goods in 1923 were valued $100,154,179.

Tobacco production in 1923, by types, with values, was—cigar types, 195,788,000 lbs. ($53,934,000); chewing, smoking, snuff and export types, 1,278,998,000 lbs. ($248,925,000).

Pennsylvania, Wisconsin, Connecticut, Ohio and Massachusetts produce most of the cigar type, in the order named.

Of the other types, Kentucky produces the most burley, Paducah, Henderson, Old Sucker, and Clarksville and Hopkinsonville; and North Carolina the most Old Belt and New Belt.

In 1922, in this country, 7,415,518,584 cigars, and 55,780,473,074 cigarettes were manufactured, also 120,174,363 lbs. of plug tobacco, 10,947,547 lbs. of twist tobacco, 6,892,417 lbs. of fine-cut tobacco, 243,355,372 lbs. of smoking tobacco, and 38,136,406 lbs. of snuff—total, 419,506,105 lbs.

The production of the above required, according to the Commissioner of Internal Revenue, who furnishes the figures, 619,517,231 lbs. of leaf tobacco.

U. S. exports of domestic tobacco in 1923, included 474,500,139 lbs. of leaf tobacco, valued at $152,303,061; 22,846,496 lbs. of stems, trims, and scraps ($1,135,668); 12,252,528,000 cigarettes ($23,085,136); and about $2,600,000 of chewing and smoking tobacco.

Imports in 1923 of foreign tobacco, were valued at $66,855,897, and included over 57,000,000 lbs. of leaf, and about 5,000,000 lbs. of cigars and cigarettes.

There are in the United States over 1,000 woolen mills, with 89,000 looms and over 4,000,000 active spindles.

Above figures do not include pulled wool, production of which ranges from 40,000,000 to 50,000,000 lbs. a year.

Wool manufactures in the United States in 1921 were carried on in 961 establishments, with 190,894 wage earners, who received, in the year, $209,573,000, and produced goods valued at $888,558,000, of which woolen goods represented $230,945,000, worsted goods $524,639,000, and carpets and rugs $103,881,000.

OTHER CROPS IN THE UNITED STATES.

The 1924 figures on this page are Oct. 1 estimates of the U. S. Dept. of Agriculture. Values, stated in dollars, are as of Dec. 1, at the farm.

Cane sugar refining in this country in 1923 was done in twenty plants. The total output in the year was 4,429,128 short tons of refined sugar, 21,947,183 gallons of syrups, and 19,149,380 gallons of molasses.

The total value of the refinery products in 1923 was $726,241,577.

AMERICANS FOND OF SWEETS.

In the United States, in 1921, according to the Bureau of the Census, 61,004 persons were employed in making confectionery: 20,209 in making ice cream and 9,083 in the manufacture of chocolate and cocoa products.

The confectionery manufactured was valued at $313,998,000; the ice cream, at $213,262,000; the chocolate and cocoa products, at $81,649,432. These figures do not cover the output of smaller plants, making goods valued in the year at less than $5,000, nor do the figures include home made goods.

New York State leads in the production of candy and ice cream; Pennsylvania, in the manufacture of chocolate and cocoa.

The chocolate manufactured totaled, in pounds, as follows; sweetened, 36,433,128; unsweetened, 12,542,414; with nuts, 28,128,527; coatings, sweetened, 79,747,391; coatings, unsweetened, 15,852,669; milk chocolate, 26,134,183; chocolate liquor, 8,138,681; other chocolate, 11,131,069.

The cocoa manufactured totaled, in pounds; powdered, in cans, 32,263,664; in other forms, 30,318,422; cocoa butter, 17,763,635.

In 1923, according to the U. S. Census of manufactures, the total output of chocolate and cocoa products was valued at $95,531,461, though the number of employees was smaller than in 1921.

The increase in output in 1923 was chiefly in coatings, sweetened, which totaled 127,295,611 lbs.

SILK STATISTICS OF THE UNITED STATES.

Imports of spun silk for consumption, 1923, cover six months only; the total imports, 1923, of spun silk, were 993,466 lbs. ($2,956,169).

Silk manufactures in the United States in 1921 were valued at $583,418,756; wage earners in the industry, 121,378; wages in the year, $113,396,000.

In that year American silk looms made 273,591,388 yards brood silks; 11,477,143 yards velvet; 5,580,386 yards plushes; 973,749 yards upholsteries and tapestries; ribbons valued at $53,597,988.

CROP PRODUCTION PER CAPITA FALLING IN UNITED STATES.

(By the Bureau of Crops and Markets, U. S. Department of Agriculture.)

Falling crop production in relation to the population is indicated by comparisons.

The results are determined by index numbers of crop production, based on the combined production of 10 crops (corn, wheat, oats, barley, rye, buckwheat, potatoes, hay, tobacco, and cotton) which have more than 95% of the total acreage of all crops, and therefore represent the changes in total production.

The first column of the accompanying table gives index numbers of total production, which are obtained by applying a constant average price to the yearly production of each crop. The second column gives the index of production per capita of population in the United States.

The value given for the fishing products of Alaska is their value as prepared for market.

Statistics for 1922 do not include mussel fisheries.

The Alaska seal herd in 1923 numbered 653,008 and 15,920 were killed for their skins.

The Pacific Coast salmon pack in 1923 amounted to 6,402,960 cases.

In 1923 the bureau distributed 1,463,730,432 fish eggs; 2,586,812,290 fry; and 264,316,307 fingerlings, yearlings and adults.

The yield of the **Great Lakes Fisheries** in 1922, by lakes, was—Superior, 10,988,020 lbs. ($484,273); Michigan, 21,141,394 lbs. ($1,932,836); Huron, 13,942,115 lbs. ($945,259); St. Clair and Detroit River, 310,012 lbs. ($17,365); Erie, 55,079,128 lbs. ($2,944,204); Ontario, 1,025,799 lbs. ($131,801); total, 102,486,468 lbs.

WHAT THE AVERAGE FAMILY EATS IN A YEAR.

(Pounds where not stated. Data by the United States Department of Labor.)

The following table shows the amount of certain foods consumed in a year by the average American family the head of which is a wage earner or a medium salaried person. The study was made to cover 1918-19, in 11,900 families, in more than ninety cities and localities.

Item.	Quantity.
Meats:	
Beef, fresh, steak	66.1
Beef, fresh, roast	59.9
Beef, fresh, stew	44.7
Beef, salt, corned	6.1
Veal	16.2
Pork, fresh	40.5
Pork, salt, bacon	17.0
Pork, salt, ham, should.	19.9
Pork, salt, side, dry	7.5
Mutton, chops	5.0
Mutton, roast	6.2
Mutton, stew	6.1
Poultry, hens	23.4
Sausage	16.5
Liver	8.9
Ham, cooked	7.4
Sea food:	
Fish, fresh	31.4
Fish, salt	4.4
Fish, canned, salmon	8.8
Oysters, quart	2.3
Milk and milk prod.:	
Milk, not skim, quart	324.0
Milk, skimmed, quart	2.0
Milk, conden, evap	62.2
Buttermilk, quart	39.1
Ice cream	6.2
Butter	67.5
Cheese, Amer	12.0
Oleo	16.7
Lard	36.6
Eggs, dozen	61.2
Grain products:	
Flour, wheat	260.1
Flour, rye	7.7
Corn meal	69.4
Hominy or grits	9.0
Cornstarch	4.5
Breakfast foods—	
Wheat	6.2
Corn	5.9
Oats	39.6
Bread, wheat	397.7
Bread, rye	32.5
Rolls and buns	18.9
Crackers	15.3
Cakes, cookies	15.5
Macar, spagh, noodles	20.6
Rice	32.1
Pies	4.0
Sugar	147.5
Molasses, syrup, honey	33.6
Candy	10.6
Chocolate	1.1
Fruits, fresh:	
Apples, peck	17.0
Peaches, peck	2.6
Bananas, dozen	10.0
Lemons, dozen	3.6
Fruits, dried:	
Apples	1.2
Prunes	10.3
Peaches	1.8
Fruits, canned:	
Peaches	4.1
Pineapple	2.2
Jellies, preserv, marm	5.4
Vegetables, fresh:	
Potatoes, Irish	709.2
Potatoes, sweet	53.5
Cabbage	63.1
Spinach, kale, peck	2.1
Peas, peck	1.6
Beans, string, peck	4.9
Tomatoes	100.0
Onions	65.5
Beets	18.9
Carrots	22.7
Turnips	19.7
Vegetables, dried:	
Beans	23.4
Peas	3.4
Other	10.6
Vegetables, canned:	
Beans, baked	6.4
Peas	9.7
Corn	10.3
Tomatoes	15.2
Asparagus	.3
Tea	6.7
Coffee	39.3
Cocoa	4.6

Great Lakes figures are included in those for coastwise trade, etc.

In 1790 the registered American merchant tonnage was 346,254.

The American merchant marine fleet, as of June 30, 1924, consisted of 7,736 steam vessels (14,870,103 gross tons); 11,014 gas vessels (445,240 gross tons); and 7,825 sailing and unrigged ships (2,425,204 gross tons); total, all kinds—26,575 vessels of 17,740,557 gross tons.

The merchant fleet on June 30, 1920, contained 28,183 vessels of 16,324,024 gross tons; the highest tonnage was 18,462,967 on June 30, 1922, when the vessels numbered 27,358.

SAILING AND STEAM VESSELS BUILT IN THE UNITED STATES.

Of the vessels built in the United States, the following were either sailing or steam craft.

YEAR (Fisc.)	Sailing.		Steam.		YEAR (Fisc.)	Sailing.		Steam.

Figures for steam vessels prior to 1915 included gas craft.

Of vessels of all kinds built in the United States in the year ended June 30, 1924, shipyards on the seaboard turned out 695 of 149,989 gross tons; those on the Great Lakes launched 91 of 50,223 gross tons.

"TONNAGE" DEFINED.

Deadweight tonnage expresses the number of tons of 2,240 pounds that a vessel can transport of cargo, stores and bunker fuel.

Cargo tonnage is either "weight" or "measurement." The weight ton in the United States and in British countries is the English long or gross ton of 2,240 pounds. In France and other countries having the metric system a weight ton is 2,204.6 pounds. A "measurement" ton is usually 40 cubic feet.

Gross tonnage applies to vessels, not to cargo. It is determined by dividing by 100 the contents, in cubic feet, of the vessel's closed-in spaces. A vessel ton is 100 cubic feet.

Net tonnage is a vessel's gross tonnage minus deductions of space occupied by accommodations for crew, for machinery, for navigation, by the engine room and fuel.

Displacement of a vessel is the weight, in tons of 2,240 pounds, of the vessel and its contents. Displacement "light" is the weight of the vessel without stores, bunker fuel, or cargo. Displacement "loaded" is the weight of the vessel plus cargo, fuel, and stores.

Exclusive of lives lost on vessels suffering no material damage.

The above table covers wrecks and casualties on and near the United States coasts, on United States rivers and the Great Lakes, at sea, and on the coasts of foreign countries.

Of the 1924 casualties, for example, 28 of the vessels were lost, with 79 lives, at sea and on foreign coasts.

VESSELS ENTERED AND CLEARED AT UNITED STATES PORTS.

The following figures, compiled by the U. S. Bureau of Foreign and Domestic Commerce, at Washington, show the total tonnage of American and foreign vessels entered and cleared at all U. S. ports in the foreign trade of this country, by fiscal years.

Year.	American.	Per Cent.	Foreign.	Per Cent.	Year.	American.	Per Cent.	Foreign.	Per Cent.

In 1923, on the Sault Ste. Marie Canals, the eastbound freight totaled 71,235,870 tons.

BEAUMONT AND PORT ARTHUR SHIP CHANNEL.

(By Harvey W. Gilbert, member Waterway Committee.)

The Beaumont and Port Arthur Ship Channel has not only become the world's oil refining centre, but has attained its place among the world's greatest ports as a tonnage producer for general merchandise, sulphur and lumber. The channel is of merit, due to the fact that it is dug in clay throughout from one end to the other, to a point thirty miles inland. Beaumont, the largest city on the waterway, is at the head of tide water, and Port Arthur—about midway to the Gulf—enjoys shipping facilities as well as Beaumont.

The President has signed the bill giving the waterway thirty feet mean-low-tide from Beaumont to the Gulf, and the committee is laying plans to further deepen to thirty-five feet within the next three or four years.

Approximately 400,000 barrels of petroleum are handled daily on the channel, the following plants being located on this waterway: Pennsylvania Ship Yards & Car Building Works, Magnolia Petroleum Company's two plants, Sun Company plant, Humphreys-Pure Oil Company, Texas Company's two plants, Gulf Oil Corporation, Atlantic Refining Company.

Foreign Trade of the United States.

Fiscal years 1821, 1830, and 1840, in above table, ended on Sept. 30.
Figures for calendar year 1918 are for last six months of that year.
"Imports for Consumption" embrace about 97 per cent. of all imports; the rest (3 per cent.) are imports intended for re-export.

a Covers only railways of Classes I. and II. and their non-operating subsidiaries.

Railroad taxes and assessments in 1922, for Class I. carriers and their non-operating subsidiaries totaled $301,413,784, excluding $779,749 Canadian taxes, $641 Cuban taxes, and $1,251 not localized by States. These amounts were charged to income.

RAILWAYS IN THE UNITED STATES HAVE 627,930 SHAREHOLDERS.

The railways in the United States own more than one-quarter of American railway stocks—$2,389,615,047 out of a total share valuation of $9,140,964,901 on Dec. 31, 1922, according to an inquiry made by the Interstate Commerce Commission.

Their holding of railway bonds, on the same date, was $2,620,759,969 of a total railway bond valuation of $13,149,136,284.

Thus, of a total of railway capitalization, Dec. 31, 1922, amounting to $22,290,101,185, almost one-quarter in value, or $5,010,375,016, was owned by the railways.

The proportion of bonds on Dec. 31, 1916, was $2,135,086,517 out of $11,202,607,096.

The total number of outstanding railway shares was 97,475,776 and the number of shareholders was 627,930, on Dec. 31, 1917.

These figures, gathered by the commission, cover 572 Class I. roads and their non-operating subsidiaries—all the lines of any consequence in the country.

There were 8,301 persons, corporations, estates, and partnerships, comprising, on Dec. 31, 1917, the twenty largest holders, in each railway, of the stock of that railway; and their total holdings were 50,873,322 shares.

Of the 8,301 there were 958 individual females, with 1,082,868 shares; 1,092 estates, with 1,333,961 shares; individual males, number not given, owned 6,945,205 shares; voting trustees, 5,307,043 shares; non-railway corporations and partnerships (life insurance companies, etc.), 11,565,838 shares; and the number of railway shares held by other railroads than those issuing the shares was 24,638,407.

The Pennsylvania Railroad has over 100,000 stockholders; Atchison, 44,561; Union Pacific, 33,875; Southern Pacific, 37,853; Baltimore and Ohio, 29,360; N. Y. Central, 27,062; Great Northern, 26,716; Northern Pacific, 25,780; New Haven, 25,249; Chicago, Milwaukee & St. Paul, 20,549; Chicago & Northwestern, 12,770; Lehigh Valley, 12,325; Illinois Central, 10,783; the Erie, 9,571; the Southern, 9,564; Chicago, Burlington & Quincy, 326; Philadelphia & Reading, 13.

One woman owns 50,500 Pennsylvania Railroad shares; seven women own 102,458 shares of the Pittsburgh & Lake Erie; one woman owns 39,000 shares of Chesapeake & Ohio; two women own 36,405 shares of the Santa Fe; two women own 86,300 shares of the Chicago, Milwaukee & St. Paul; one woman owns 35,037 shares of the Northern Pacific, and two women own 48,451 shares of Union Pacific.

Life insurance companies in New York State in 1918 owned $1,681,242,371 of railway bonds.

In 1923, the steam railways paid $369,924,942 for 166,803 new cars, of which 1,837 were passenger cars and 164,966 were for freight.

PUBLIC ROADS IN THE UNITED STATES.

The following table, prepared from data of the Bureau of Public Roads of the U. S. Department of Agriculture, shows the mileage of surfaced roads as of Jan. 1, 1922; the total mileage of all types of roads (including dirt roads) as of the same date; and the mileage surfaced during 1922.

STATE.	Surfaced.	Total, incl. surfaced.	Surfaced in 1922.	STATE.	Surfaced.	Total, incl. surfaced.	Surfaced in 1922.	STATE.	Surfaced.	Total, incl. surfaced.	Surfaced in 1922.

The total mileage in Oklahoma included 26,000 miles of section lines declared "public highways" by law but which were not open for general traffic.

Miles of each type of surfacing, as of Jan. 1, 1922—sand clay, 63,339; gravel chert shale, 199,899; W. B. macadam, 58,038; surface treated macadam, 19,309; bit. macadam, 10,264; sheet asphalt, 1,601; bit. concrete, 4,978; cement concrete, 15,611; brick, 3,333; wood block, 27; stone block, 60; miscellaneous, 11,303.

In the seven years ending June 30, 1923, the sum of $407,704,641 was spent in building 23,297 miles of roads in this country, of which the Federal Government contributed $174,044,674.

New roads built, under way or approved, in the year ending June 30, 1924, total 26,491 miles, at an estimated cost of $505,626,454, of which the Federal Government pays $227,311,475.

The Federal Aid Highway System, provided by the Act of 1921, consists of approximately 170,000 miles of road and has been designated by the States and approved by the Federal Government.

At the beginning of 1924 it was estimated that 60,000 miles of the system had been surfaced, about 8,700 miles graded, leaving 110,000 to be surfaced. Some of this work had been done by the States independent of Federal aid.

The $75,000,000 appropriated by Congress to the States as aid in road building in the year ended June 30, 1925, is divided as follows:

STATE.	Amount.	STATE.	Amount.	STATE.	Amount.	STATE.	Amount.

Ind.	1,939,903.32						

Highway fatalities in 1923, according to the Census Bureau, numbered 2?,621. This was a death rate of 20.4 per 100,000 population. Injured numbered 678,000; property damage, $600,000,000.

Of the fatal accidents on highways, train grade-crossings caused 2,268; street car accidents, 2,006; auto accidents, 16,452; motorcycle accidents, 336; other vehicle accidents, 1,559.

ROAD BUILDING.

Brick roads—Road bricks are blocks of hard clay which have been baked in an oven.

Before the bricks are laid on the road the surface is graded. Then the curbs are built and a layer of concrete is spread over the roadbed if the drainage is a difficult problem and if heavy traffic is expected. Otherwise a layer of crushed stone may be used as a foundation.

A sand cushion, about one-half inch deep, covers the concrete and completes the foundation.

When the bricks are laid on the road a heavy steam roller is run over them and either concrete or tar is poured into the joints between the bricks, and this holds them tightly together.

Asphalt roads—Asphalt pavements are used most frequently in cities, and especially in localities where the noise of traffic needs to be avoided.

Liquid asphalt is a mineral pitch. It is black and sticky and is found in a natural state in pockets and reservoirs under the surface of the earth.

Manufactured asphalt is made from petroleum. It is the thick sticky substance which is left after the gases have been distilled from petroleum.

The asphalt streets used in cities are built by spreading a layer of crushed stone mixed with asphalt on a concrete foundation.

The materials for these layers are prepared by heating. The stones and sand are heated in a big drum which revolves. The asphalt is heated and then mixed with the stone or sand in a mixer especially made for that purpose.

After the layers are spread the road is rolled until the surface is smooth and even

Macadam roads—Macadam roads are made of layers of crushed stone that are built up on the roadbed in two or three courses. First a layer of coarse stone is spread over the surface of the roadbed, and then it is rolled by a machine of at least ten tons weight until the stones are packed into a hard mass.

Then a layer of smaller stones is spread over the first course and it is rolled until it is hard and smooth. The last course is a layer of fine stones and stone dust, which is the binder. It is sprinkled with water.

The macadam road was named for Sir John L. Macadam, who first advocated using small broken stones to cover a roadbed. He was a noted Scotch engineer, born in 1756.

Concrete roads—Road concrete is prepared by mixing grains of sand and pieces of crushed stone or gravel with cement and water. When this mass is spread on a roadbed, it will harden into a stone-like surface.

The crushed stone and sand and gravel, with the cement, are put into a big hollow drum. The water is poured and the drum turns around until the stones and cement are thoroughly mixed together. Then it is spread on the roadbed to harden.

Concrete is used in building other roads as well. Many road surfaces are now built on a concrete base. Brick roads and asphalt roads are generally laid over a concrete foundation.

Reinforced concrete roads are used where the drainage problem is a difficult one. The concrete in these roads is reinforced by steel wires that are embedded in it and that sustain and support it against the weight of traffic.

Figures for 1899, 1904, 1909, 1914, 1921, and 1923 are by U. S. Census. Those for 1917 and 1918 are by the War Industries Board, from sworn statements by manufacturers. Those for all other years are by the National Automobile Chamber of Commerce, and include production of plants in Canada making motor vehicles of U. S. design. This Canadian production was: (1920) 94,144; (1921) 66,246; (1922) 101,007; (1923) 148,791.

Rubber tires and inner tubes manufactured in 1923 in the United States were valued at $567,217,141. Included were 45,362,747 auto casings ($457,374,439); 56,933,640 auto inner tubes ($74,660,021); and 923,549 auto truck solid tires ($28,203,142).

About 80 per cent. of all the rubber imported in 1923 went into the production of auto tires and parts, the total so used being 547,468,544 lbs. Other articles used in that year in U. S. auto production, with percentages, were: Leather, 60,000,000 sq. ft. (69 per cent.); plate glass, 47,229,500 sq. ft. (53 per cent.); hard lumber, 1,163,232,000 board feet (14 per cent.); lead, 135,349,000 lbs. (12 per cent.); iron and steel, 3,434,800 tons (10.2 per cent.); tin, 7,300 tons (10 per cent.); copper, 121,949,150 lbs. (9.3 per cent.); aluminum, 91,514,000 lbs.; soft lumber, 300,121,000 board feet; imitation leather, 166,319,000 sq. ft.; asbestos, 60,000,000 feet; hair and padding, 40,870,000 lbs.; nickel, 6,275,000 lbs.; paint and varnish, 14,304,500 gals.

Gasoline consumption in 1923 in the U. S., was 6,685,035,280 gallons.

Exports from the U. S. in 1923 of motor vehicles, with their wholesale value, were: Passenger cars, 127,035 ($90,692,272); motor trucks, 24,861 ($15,318,054). Imports in 1923 totalled 853 cars and trucks ($884,125).

INCREASING ANNUAL TOTAL OF MOTOR VEHICLES SCRAPPED.

Year.	Exports (U. S. and Canada).	Imports (U. S.).	Vehicles Going Into Domestic Market Annually.	Cumulative Number of Vehicles Put Into Domestic Use.	Total Vehicles Scrapped to Date.	Motor Vehicles Scrapped Annually.
1919	96,910	117	1,877,223	9,136,376	1,570,930	458,394
1920	196,150	926	1,940,333	11,076,709	1,844,768	273,838
1921	58,004	522	1,557,732	12,634,441	2,171,146	326,378
1922	92,962	483	2,483,309	15,117,750	2,879,375	708,229
1923	221,816	853	3,864,328	18,982,078	3,889,901	1,010,526

The capital invested in the U. S. automobile business in 1924 is estimated at $1,571,722,411. The wages paid in 1923 totalled $406,730,278. There are ninety manufacturers of passenger autos, and 147 of motor trucks. There are 43,600 auto dealers in this country.

MOTOR VEHICLE REGISTRATIONS AND FEES, IN THE UNITED STATES.

(Data, by U. S. Bureau of Public Roads, Department of Agriculture, cover 1923.)

RED THE BEST DANGER SIGNAL.

That red signal lights are most easily distinguished from other colors at a distance and require the lowest light intensity for unmistakable recognition is one of the conclusions drawn from an investigation of the visibility of traffic signals conducted by the Bureau of Standards, Department of Commerce.

Green signals came second on the list of colored lights easy to identify, but for street traffic a yellow green is considered preferable to the blue green used on the railroads.

Blue ranked third on the list, but was found to require the highest intensity.

The railroad yellows, it was found, were often mistaken for orange and red, and a lemon yellow gave much better results.

AMERICAN (U. S.) TELEGRAPH AND CABLE LINES.

(Data, by Bureau of the Census, cover 1922).

Number of companies or systems	24	Balance Sheet:	
Miles of pole line	252,991	Assets, total	$459,469,284
Miles of single wire owned and leased	1,853,250	Plant and equipment	$326,661,860
Nautical miles of ocean cable	76,711	Investment and marketable securities, long-term advances, and miscellaneous investments	$78,838,774
Number of messages	191,121,333	Cash and current assets, including supplies and sundries	$53,968,650
Number of telegraph offices	27,354		
Income, total	$151,858,086	Liabilities, total	$459,469,284
Telegraph traffic	$146,805,215	Capital stock	$177,203,778
All other sources	$5,052,871	Funded debt	$71,394,000
		Reserves	$90,222,189
Expenses, total	$127,990,615	Accounts payable	$14,712,890
General operation and maintenance, including salaries and wages and legal expenses	$113,139,825	Interest, taxes, dividends, and rents, due and accrued, and sundries	$35,419,643
Interest and taxes	$10,195,036	Net surplus	$70,516,784
All other expenses	$4,655,754		
Net income	$23,867,471	Number of employees	68,632
Dividends	$10,715,577	Salaries and wages	$76,161,926

Wire mileage does not include 285,002 exclusively operated by railways. Income figures do not include sinking fund charges.

The mileage of wires of land-telegraph companies was 1,849,312.

Cable companies reported 52,430 nautical miles of ocean cable. This was exclusive of 24.281 miles of Western Union cables. The cable companies in 1922 handled 5,280,066 messages, not including 4,322,493 ocean messages over Western Union cables.

U. S. GOVERNMENT LAND AND CABLE WIRES (not included above).

The Government, in 1922, operated the following mileage of land and cable lines:

Alaska—land, 470; cable, 2,669. Canal Zone—land, 470. Philippines—land, 5,227; cable, 850. Porto Rico—land, 195.

The Washington-Alaska Military Cable and Telegraph System, operated by the Signal Corps of the Army, connects Seattle, Wash., with the most important points in Alaska. The service has been extended through connection with the Navy Radio Communication Service. The cable system connects with the telegraph lines of the Government railroad and other railroads in Alaska and with nine telephone systems in the Territory, all of which handle telegrams.

The Panama Canal Zone System is operated by the Panama Railroad Co.

The telegraph lines in the Philippines are operated as a part of the Postal Service.

The United States Weather Bureau operates nine telegraph and telephone lines in localities where no commercial lines are available, primarily for the purpose of transmitting meteorological observations, weather forecasts and warnings, vessel and wreck reports, and general Government business.

The combined length of these 9 Weather Bureau lines is 289 miles, including 15 miles of leased wire and 66 miles of cable. The commercial telegrams transmitted numbered 25,000.

The Coast Guard, Lighthouse Service, and Naval Communication Service co-operate with the Weather Bureau in the maintenance of these lines and make extensive use of some of them.

Because of their location, some of the Weather Bureau lines are of great benefit to logging, shipping, fishing and other private interests.

Wireless—The wireless service in 1922 included 37 tower stations, which handled 2,365,109 messages; income $8,111,102; expenses, $5,111,574; net income, $2,999,528.

Radio apparatus valued at $43,460,676 was made in this country in 1923, including 1,889,614 head sets; 521,085 receiving sets; 1,073 transmitting sets.

TELEPHONES IN THE UNITED STATES IN 1922, BY STATES.

The Census Bureau gives the number of telephones, in 1922, by States, as follows:

State.	Telephones	State.	Telephones	State.	Telephones	State.	Telephones
	Number.		*Number.*		*Number.*		*Number.*
Ala	84,401	Iowa	533,347	Nev	10,313	S. C	54,078
Ariz	24,353	Kan	354,251	N. H	68,874	S. D	101,555
Ark	99,490	Ky	201,545	N. J	383,496	Tenn	171,413

Ind	508,726	Neb	273,500				

The number of telephones in 1917 in the United States was 11,716,520.

In 1902 telephones numbered 2,371,044, with 4,900,451 miles of wire.

Other 1922 data—number of systems or lines, 57 253: miles of wire, 37,265,958; estimated number of messages or talks, 24,647,560,860; number of public exchanges, 19,260; number of employees, 312,015, of which 207,582 were females; salaries and wages paid in the year, $352,925,570; revenue, $684,923,557; value of plant and equipment, $2,205,183,150.

BELL TELEPHONE STATISTICS.

(Compiled by Chief Statistician, American Telephone and Telegraph Co., N. Y. City.)

Jan. 1.	Stations in Bell System.			Employees.	Miles of Wire.	Average Daily Messages.
	Bell Owned Stations.	Bell Connected Stations.	Total.			
1915	5,584,853	3,064,140	8,648,993	142,527	17,475,594	27,848,174

FEDERAL INCOME TAX CHART.

(Compiled by the Guaranty Trust Co., of N. Y., and based on Revenue Act of 1924 signed by President Coolidge on June 2.)

Chart shows tax payable by a married person or head of a family, personal exemption $2,500, but does not take cognizance of any exemption for dependants. The first $5,000 of net income in all cases is deemed to be earned.

In the Net Income column no allowance is made for credit for dividends or interest on U. S. obligations, if any, included in net income.

Amount of surtax is the total of the instalments for the income considered.

In addition to decreasing rates of individual income tax for 1924, and thereafter, the act provides for an allowance by credit or refund of 25 per centum of the individual income tax for 1923.

Another feature is the differentiation between earned and unearned income, earned income of individuals up to $10,000 being taxed at lower rates than unearned income.

The act increases the Federal estate tax rates and imposes a tax on gifts.

The stamp tax on checks, drafts, and promissory notes and the taxes on telegraph and telephone messages and on soft drinks are repealed.

PUBLICITY OF INCOME TAX RETURNS.

The new law requires the Secretary of the Treasury to furnish, on request of the Committee on Ways and Means of the House of Representatives, the Committee on Finance of the Senate, or a special committee of the Senate or House, any data contained in or shown by the returns that may be required by the committee.

Moreover, such committee is given the right, acting directly as a committee or by and through examiners or agents designated by it, to inspect returns, and any relevant or useful information thus obtained may be submitted by the committee obtaining it to the Senate or the House, or both.

The Commissioner of Internal Revenue is also required to prepare lists giving the name, post office address, and the amount of tax paid by each person making an income tax return.

Such lists are to be available for public inspection in the office of the collector of each internal revenue district and in such other places as the Commissioner may designate.

Cents are omitted in the figures by States, but the totals include the addition of all the cents. Excluding refunds for erroneous and illegal collections, the net total return for 1924 was $2,712,520,603. Enforcing the National Prohibition Act cost $7,510,000; the Narcotic Law, $723,000.

ESTATE TAX; GIFT TAX.

The Estate Tax, which is in lieu of the tax laid under Title IV. of the Revenue Act of 1921, is imposed upon the transfer of the net estate of every decedent dying after the passage of the law, whether a resident or non-resident of the United States. The schedule below shows the rates effective.

A tax is also imposed upon *gifts* during life on and after Jan. 1, 1924, at the same rates.

Net Estate or Amount of Gift.	Rate of Tax.	Tax on Separate Amounts in First Column.	Tax on Totals of Amounts in First Column.	Net Estate or Amount of Gift.	Rate of Tax.	Tax on Separate Amounts in First Column.	Tax on Totals of Amounts in First Column.
First $50,000	Ex'm't	.....	.....	$500,000	15%	$75,000	$151,000
Next 50,000	1%	$500	$500	500,000	18%	90,000	241,000
50,000	2%	1,000	1,500	1,000,000	21%	210,000	451,000
50,000	3%	1,500	3,000	1,000,000	24%	240,000	691,000
100,000	4%	4,000	7,000	1,000,000	27%	270,000	961,000
200,000	6%	12,000	19,000	3,000,000	30%	900,000	1,861,000
300,000	9%	27,000	46,000	2,000,000	35%	700,000	2,561,000
250,000	12%	30,000	76,000	In excess of 10,000,000	40%	.....	.....

Exemption on the first $50,000 is not allowed estates of non-residents, and not allowed gifts by non-residents.

STAMP TAXES.

Internal revenue stamp taxes are provided in the Income Tax Bill, June 2, 1924, in twelve classes. Each class contains various provisions and modifications so that the law should be consulted to assure accuracy in instances where questions arise. The classes and rates are:

Bonds—5 cents per $100; *Capital Stock*, issued—5 cents per $100; *Capital Stock*, sales or transfers—2 cents per $100; *Produce, Sales of, on Exchange*—1 cent per $100; *Conveyances*, deeds, etc.—50 cents between $100 and $500, 50 cents for each additional $500.

Entry of Goods at Custom House—25 cents for first $100, 50 cents between $100 and $500, $1 exceeding $500; *Entry for Withdrawal* from customs bonded warehouse—50 cents; *Passage Ticket* to any foreign country except Canada or Mexico—$1 not exceeding $30, $3 between $30 and $60, $5 exceeding $60.

Proxies for Voting (except religious, educational, charitable, fraternal or literary societies, or public cemeteries)—10 cents; *Power of Attorney*—25 cents; *Playing Cards*—10 cents per pack; *Policy of Insurance*—3 cents on each dollar of the premium charge.

RECAPITULATION FOR 1923 AND 1924.

NOTE ON THE ABOVE TABLE.

Alaska, in 1921 and 1922, is included in the State of Washington.

In 1918—the only year when they were segregated—the tax levied on non-resident aliens and citizens residing abroad totaled $8,665,567. Since then those returns are included in the State of residence.

Personal net income exempt from normal tax in 1920 totaled $15,632,079,896.

CORPORATION INCOME TAX RETURNS, 1921.

Total	356,397	171,239	48.05	60,051,123,329	55,715,075,516	4,336,047,813

Note to the above table, by the Commissioner of Internal Revenue—On the "Transportation and Other Public Utilities" group, both gross income and general deductions should be greatly in excess of the amounts shown. This is due to railroad and other utility corporations, to a large extent, reporting on the face of the return merely the amount of net income or deficit.

Net income of personal service corporations is included in personal net income returns.

AMERICAN COLLEGES AND UNIVERSITIES.

This list is based on the 1924 Education Directory of the United States Bureau of Education, Department of the Interior. The number of students is of those studying for degrees and does not include those taking extension courses or casual courses in the summer schools. The number of teachers is for the regular courses leading to degrees.

Where the name of the institution is in *italics*, the figures are from the 1924 ALMANAC. In other cases the data are from questionnaires returned by the institutions in the year 1924.

The abbreviations following the names of the colleges indicate: *C.*, co-educational; *E*, has extension courses; *Eve.*, has evenings sessions; *S*, has summer school; *W*, for women only.

The number of colleges and universities reporting summer schools is 244 with 159,896 students in attendance in 1924. The number of colleges and universities reporting extension courses is 173 with 233,085 students taking them.

GIFTS TO STATE UNIVERSITIES.

President P. L. Campbell, of the University of Oregon, gave out a statement in May, 1924, listing the value of the gifts of public spirited citizens to State universities. Many of these gifts took the form of buildings, athletic fields, stadiums, and some trust funds for libraries, hospitals, professorships and research, etc. From his returns from forty-three universities he made this list:

Alabama Polytechnic Institute	$630,000
Alabama, University of	200,000
Alaska Agric. Coll. and School of Mines	2,000
Arizona, University of	170,000
California, University	13,000,000
Colorado School of Mines	110,000
Colorado, University of	1,500,000
Connecticut Agricultural College	213,500
Delaware, University of	1,400,000
Florida, University of	350,000
Georgia School of Technology	2,000,000
Georgia, University of	1,310,000
Illinois, University of	377,000
Indiana, University	2,500,000
Iowa State College	1,214,000
Iowa, University of	2,672,750
Kansas, University of	1,815,568
Kansas State College	320,000
Kentucky, University of	40,000
Maryland, University of	440,000
Michigan College of Mines	75,000
Michigan, University of	25,000,000
Minnesota, University of	4,000,000
Mississippi Agric. and Mech. College	$65,000
Mississippi, University of	65,000
Montana, University of	75,000
Nebraska, University of	625,000
Nevada, University of	392,270
New Hampshire, University of	1,200 000
New Jersey (Rutgers) College	1,083,684
North Carolina, University of	2,604,865
North Dakota Agricultural College	23,400
North Dakota, University of	50,000
Ohio State University	1,684,000
South Carolina Agricultural and Mechanical College	110,000
Pennsylvania State College	464,000
South Dakota, University of	41,500
Tennessee, University of	117,000
Utah Agricultural College	10,600
Washington State College	10,000
Washington, University of	320,000
West Virginia University	1,500,000
Wisconsin, University of	967,000
Total	$70,748,537

CATHOLIC BOYS' BRIGADE OF THE UNITED STATES.

Founded in 1916, by the late Cardinal Farley, New York City—a national official organization for Catholic boys. National office: National Catholic Welfare Council, 1312 Massachusetts Ave. N. W., Washington, D. C. General Executive Headquarters, 260 West 34th Street, New York. This movement aims to improve, it is announced, the religious and civic character of boys. It has a program of athletics, sports, military exercises, signalling, first aid, civics, music, entertainments, hikes, camping, parades, contests and employment; it aims to promote patriotism, religious practices and higher education. Membership is open to all manly boys 10 years of age or over. *Junior and Senior division* branches all over the country and has its own uniform. Executive officers, N. Y. General headquarters, 260 West 34th St., New York City: Rev. Thomas J. Lynch, Director General; Rev. Fr. Kilian, O. M. Cap., Chief Commissioner; Michael F. Lonergan, Executive Secretary.

RHODES SCHOLARSHIPS.

Two Rhodes Scholarships to the University of Oxford are assigned to each State in the Union. The scholarships are tenable for three years and have the value of £350 a year. To be eligible a candidate must be—(a) A male citizen of the United States; (b) Over nineteen and not over twenty-five years of age; (c) Above sophomore standing in some recognized degree-granting university or college in the United States. Candidates may apply either from the State in which they have their ordinary private domicile, home, or residence, or from the State in which they have received at least two years of their college education.

Selections are made on the basis of the candidate's record in school and college, supplemented by references of persons who know him and by a personal interview with the Committee of Selection. There is no written examination. Elections are made on the basis of—(1) Qualities of manhood, force of character, and leadership; (2) Literary and scholastic ability and attainments; (3) Physical vigor, as shown by interest in outdoor sports or in other ways. No restriction is placed on a Rhodes scholar's choice of studies. He may read for the Oxford B. A. in any of the Final Honor Schools, he may enter for any one of the so-called Diploma Courses, or, if qualified by previous training, may be admitted to read for advanced degrees such as the B. Sc., B. Litt., B. C. L., or Ph. D.

An election is held each year in two-thirds of the States of the Union.

In 1925 one scholar will be elected in the following States: Ariz., Conn., Del., Fla., Idaho, Ill., Ind., Ky., La., Me., Md., Mass., Mont., Nev., N. H., N. J., N. M., N. Y., N. C., N. D., Ohio, Okla., Pa., R. I., S. C., S. D., Tenn., Utah, Vt., Va., W. Va., and Wyo.

Applications will be due on or before Oct. 24, 1925; the election will be held on Dec. 12, 1925; and the Rhodes scholars so elected will enter Oxford in October, 1926.

Application blanks and further information may be obtained from the officers of any college or university in the United States or from President Frank Aydelotte, American Secretary to the Rhodes Trustees, Swarthmore College, Swarthmore, Pa.

The 1923 Rhodes scholar from New York is Waldon Pell 2d (Princeton University), 230 East 79th St., New York City.

The Secretary of the Committee of Selection for New York State is Dr. Augustus S. Downing, State House, Albany.

SCHOOLS OR COURSES OF JOURNALISM IN THE UNITED STATES.

Courses in journalism, according to the Federal Bureau of Education, are taught in a yearly increasing number of colleges and universities in this country.

The State universities include those of Arkansas, California, Colorado, Florida, Georgia, Idaho, Illinois, Indiana, Iowa, Kansas, Kentucky, Louisiana, Maine, Michigan, Minnesota, Missouri, Montana, Nebraska, Nevada, New Hampshire, North Carolina, North Dakota, Ohio, Oklahoma, Oregon, South Carolina, South Dakota, Tennessee, Texas, Utah, Ve mont, Washington, West Virginia, Wisconsin.

The private colleges and universities include Akron University, Beloit College, Boston University, Bradley Polytechnic Institute, Bucknell University, Carleton College, Coe College, Colby College, Columbia University, Cumberland University, De-Pauw University, Emory University, Emporia College Georgetown College, George Washington University, Grinnell College, Goucher College, Knox College, Lawrence College, Leland Stanford Jr. University, Marquette University, McKendree College, Mercer University, Morningside College, Northwestern University, Notre Dame University, Ohio Northern University, Ripon College, Syracuse University.

The State agricultural colleges include those of Colorado, Georgia, Iowa, Kansas, Michigan, Mississippi, New Mexico, North Carolina, Oklahoma, Oregon, Pennsylvania, South Dakota, Texas, Utah, Virginia, and Washington.

WORKERS' COLLEGE AT KATONAH, NEW YORK.

(Contributed by the Chairman of Faculty.)

Brookwood, the first educational enterprise for resident students from the organized labor movement, was established in October, 1921, at Katonah, N. Y. The studies undertaken are of college grade and cover a course of two years. The first class was graduated in June, 1923, consisting of fifteen students from nine industries and seven nationalities. Six of these were girls and nine men. The total enrolment for the year 1922-3 was thirty-two. For the year 1924-5 it will be about forty-five.

The first year courses are "How to Study," "History of Civilization," "Social Economics," "Psychology," and "The Use of the English Language."

The second year courses are more immediately related to the labor movement and its problems and consist of the "Theory and Practice of Government," "History of the American Labor Movement," "Trade Union Administration," "Trade Union Organization Work," "Contemporary History in Other Countries," and "How to Use the English Language."

The last ten weeks of the second year are exclusively devoted to a "Seminar in the Strategy of the Labor Movement." A course in public speaking is also provided and special courses in journalism, workers' education and statistics may be taken by qualified students.

A labor-co-operating committee serves "to keep Brookwood close to the heart and purpose of the American Labor Movement." It has power of veto on the engaging of teachers and on the budget in whole or in part and may initiate a referendum vote among its members on questions affecting the institution. It appoints from its own number a sub-committee of three, known as the Labor Executive Committee, who have full faculty and community status with a right to a voice and a vote in the meetings of both bodies.

Brookwood is organized in three groups on the functional basis, each group having the necessary powers to fulfil its appropriate duties. These groups are the faculty, the student body, and the community, the last consisting of the first two groups meeting together to decide such matters as affect the community as such, for, although it is primarily an educational institution, it is also a self-governing community.

During the summer of 1924 courses were given for the first time and will be continued.

ROSENWALD RURAL SCHOOLS.

The Julius Rosenwald Fund has aided in building more than 2,500 rural schoolhouses for Negroes in fourteen Southern States. By June 30, 1925, the total will be over 3,000, the fund having provided $476,630 as its share of the cost of the additional buildings.

Up to June 30, 1924, the end of the budget year, 2,453 buildings, requiring 6,052 teachers and providing accommodations for 272,340 pupils, were completed at a total cost of $9,760,000.

Of this amount the Negroes gave about $2,250,000, the whites $475,000, public funds, $5,280,000 and the Julius Rosenwald Fund $1,800,000.

The number of school buildings erected in each State and their total value are:

State.	Scho'ls	Total Value.	State.	Scho'ls	Total Value.	State.	Scho'ls	Total Value
Alabama	291	$587,111	Maryland	51	$ 271,840	Tennessee	199	$847,334
Arkansas	131	521,736	Mississippi	292	1,277,193	Texas	160	548,277
Florida	17	135,030	North Carolina	422	1,794,438	Virginia	203	787,388
Georgia	114	405,510	Oklahoma	59	276,316			
Kentucky	93	407,149	South Carolina	184	1,109,352	Total	2,453	$9,758,840
Louisiana	237	780,166						

Julius Rosenwald has contributed $375,000 toward the cost of thirteen Y. M. C. A. buildings and two Y. W. C. A. buildings for Negroes in the following cities: Y. M. C. A.—Atlanta, Baltimore, Brooklyn, Chicago, Cincinnati, Columbus, Indianapolis, Kansas City, New York, Philadelphia, Pittsburgh, St. Louis and Washington. Y. W. C. A.—New York and Philadelphia. The Negro population of these cities is about 1,000,000. The total cost of the buildings was about $2,570,000.

76,000 COLLEGE GRADUATES IN 1923.

According to a published survey made by The World newspaper there were over 76,000 graduates of 577 colleges and universities in the school year ended June and July, 1924. A fact of interest revealed by the survey is the large proportion of young men who are becoming engineers.

PROPERTY OF UNIVERSITIES, COLLEGES AND PROFESSIONAL SCHOOLS.

BEGINNINGS OF FAMOUS FOREIGN UNIVERSITIES.

The University of Oxford is said to have been founded by King Alfred in 872.

The first college of the University of Cambridge was founded by Hugo, Bishop of Ely, in 1257.

The University of Paris was founded by King Philip II. about 1200.

The first university in the German Empire was at Prague, Bohemia, 1348.

The University of Moscow was founded in 1755 by the Empress Elizabeth, and the University of St. Petersburg in 1819 by Czar Alexander I.

The oldest Spanish university is that of Salamanca, founded in 1240.

The University of Copenhagen, Denmark, was founded in 1479.

The oldest Italian universities are Bologna, founded 1200; Padua, 1222; Naples, 1224; Genoa, 1243; Perugia, 1276; Macerata, 1290. There were nine more founded between 1300 and 1550. Italy was the greatest resort of students for the higher education in the middle ages.

Trinity College, Dublin, was incorporated by royal charter in 1591.

The University of Edinburgh was founded in 1582 by a charter granted by King James VI. of Scotland.

The University of Jagielle, of Cracow, Poland, where Copernicus received his education, was founded in 1364 by the Polish King Kazimiers the Great, and endowed by a later Polish King, Jagielle, in 1400.

Note—The dates of founding of the higher institutions in the United States and Canada will be found in the tables of American colleges and universities.

THE HASKELL ORIENTAL MUSEUM OF THE UNIVERSITY OF CHICAGO.

The Haskell Oriental Museum was erected through the generosity of Mrs. Caroline E. Haskell. Its collections, now exceeding 18,000 original objects, are intended to exhibit as systematically as possible the early civilizations of the Near East. Egypt is most largely represented. Both the Egyptian and the Assyro-Babylonian sections have been augmented in part by expeditions of the university's Oriental Exploration Fund in 1903-7 and by its Oriental Institute since 1919. The latter organization is a recent expression of the interest of John D. Rockefeller jr. It supplements the museum not only by adding to its collections but by cataloguing and co-ordinating in research the materials there assembled, both originals and reproductions, with the library facilities of the university. The museum houses also some materials for the study of Palestine and of the religions of the Far East.

The pronounced differences between the percentages of illiteracy for the total population and for native whites which appear for many cities are due to the large proportions of illiterates among the foreign-born whites and the Negroes, the former having a considerable effect upon the average percentages in the Northern cities, and the latter in the Southern cities. For example, in Fall River, Mass., where the illiteracy in the population 10 years of age and over was 11.9 per cent. for all classes combined, it was only 1 per cent. for the native, but was 25.5 per cent. for the foreign-born whites. Again, in Birmingham, Ala., the percentage of illiteracy was 8.4 for the total population, 0.7 for the native whites, and 18.4 for the Negroes.

School Attendance—The fourteenth census inquiry as to school attendance was as to whether the person had attended school at any time between September 1, 1919, and January 1, 1920.

The number of persons shown by the report as attending school in 1920 is not, therefore, identical with the number simultaneously in attendance at any time in 1919 or 1920.

At the thirteenth census the period covered by inquiry extended from September 1, 1909, to April 15, 1910.

The comparability of the figures is not affected materially by the difference between the lengths of the two periods, since nearly all persons who attended school at any time during the scholastic year, 1919-1920, began their attendance prior to January 1.

Irregular attendance is estimated to cost about $175,000,000 a year in the administration of public schools.

Approximately 10,000,000 of the children of the country live in rural territory—that is, in the open country—9,000,000 are enrolled, and 7,000,000 are in average daily attendance in open-country schools.

The average number of days attended by each pupil enrolled in urban schools is 143, in open-country schools, 96.

COST OF PUBLIC SCHOOLS IN BIG UNITED STATES CITIES, (SCHOOL YEAR 1921-1922).

(a) Included in "Instruction" column.

In 1920 there were 7,835 kindergartens reported, with 10,739 teachers and 510,949 pupils; in 1922, 8,889 kindergartens reported, with 11,842 teachers and 555,830 pupils.

There are 160 schools for the deaf in the United States, of which sixty-seven are State institutions, nineteen are private, and the rest are city day schools. Excluding six State institutions, for which the United States Bureau of Education received no reports, the pupils, in 1922, totaled: In State schools, 10,738; in private, 716; in city day schools, 2,911.

Of the pupils, 11,399, or 79 per cent., were taught speech during the year.

There are in the United States fifty-three State and thirty private schools for feeble-minded children. The pupils in the State schools number (1922) 38,761; in the private schools, 1,386. The State schools hold property valued at $45,821,771; the private schools, $1,460,862.

EDISON GOLD MEDAL WINNERS.

(Awarded by a committee of the American Institute of Electrical Engineers.)

1909, to Elihu Thomson; 1910, to Frank J. Sprague; 1911, to George Westinghouse; 1912, to William Stanley; 1913, to Charles F. Brush; 1914, to Alexander Graham Bell; 1916, to Nikola Tesla; 1917, to John J. Carty; 1918, to Benjamin G. Lamme; 1919, to W. L. R. Emmet; 1920, to Michael I. Pupin; 1921, to Cummings C. Chesney; 1922, to Robert A. Millikan; 1923, to John W. Lieb.

THE SHARE OF THE STATES IN COST OF PUBLIC SCHOOL EDUCATION.

According to figures compiled in the Federal Bureau of Education for the year 1920, the proportions of school revenues provided in the country as a whole by the three important units—State, county and local district—were 16.8 per cent., 1–.4 per cent., and 71.8 per cent., respectively.

The respective percentages of school revenues contributed by the several States as such in the school year 1921-1922, are as follows:

	Pct.		Pct.		Pct.		Pct.
Alabama	35.1	Kentucky	22.6	New Hampshire	10.8	South Carolina	13.5
Arizona	19.3	Louisiana	23.6	New Jersey	18.0	South Dakota	.7
Arkansas	19.7	Maine	25.7	New Mexico	80.5	Tennessee	17.6
California	15.0	Maryland	14.9	New York	17.0	Texas	33.4
Colorado	.7	Massachusetts	9.7	North Carolina	8.3	Utah	29.9
Connecticut	5.8	Michigan	11.3	North Dakota	2.3	Vermont	13.2
Delaware	90.5	Minnesota	9.7	Ohio	5.9	Virginia	24.7
Florida	2.5	Mississippi	36.0	Oklahoma	2.3	Washington	18.6
Idaho	.8	Montana	.7	Oregon	12.8	West Virginia	5.1
Illinois	6.5	Nebraska	.6	Pennsylvania	9.4	Wisconsin	10.3
Indiana	4.6	Nevada	11.6	Rhode Island	3.0	Wyoming	8.1
Kansas	.7

THE ALFRED B. NOBEL PRIZES.

The Swedish scientist Alfred B. Nobel, the inventor of dynamite, died in 1896, bequeathing his fortune, estimated at $9,000,000, to the founding of a fund the interest of which should yearly be distributed to those who had mostly contributed to the benefit of mankind improvement during the year immediately preceding that of the award. The Board of Directors of the Nobel Foundation, exclusively consisting of Swedes, must reside in Stockholm. The board has in its care the funds of the institution, and hands yearly over to the awarders of the prizes the amount to be given away. The value of each prize is on an average $35,000.

THE FRENCH ACADEMY (AS OF OCT. 23, 1924).

The French Academy, founded in 1630 and incorporated in 1637, was abolished by the Revolution; but was revived in 1795 as one of the sections of the Institute of France.

The Academy, when full, consists of 40 regular members. There are, in addition, ten members at large (from whom the regular members are selected by the Academy to fill vacancies), eight foreign members, and seventy corresponding members.

United Kingdom, 417,000; Continental Europe, 152,000; Latin America, 13,000; Australasia, 118,818; Total number of Grand Lodges in the world, about 24,500; membership, 3,020,000.

GRAND LODGE F. AND A. M., STATE OF NEW YORK.

Grand Master—William A. Rowan, New York City. *Deputy Grand Master*—Harold J. Richardson, Lowville. *Senior Grand Warden*—Charles E. Johnson, Albany. *Junior Grand Warden*—Robert E. Owens, Cortland. *Grand Treasurer*—Jacob C. Klink, 120 Broadway, New York City. *Grand Secretary*—Robert Judson Kenworthy, Masonic Hall, New York City.

UNITED GRAND LODGE OF ENGLAND, 1921-1922.

Grand Master—His Royal Highness the Duke of Connaught and Strathearn, K. G. *Pro-Grand Master*—Br. the Rt. Hon. Lord Ampthill, G. C. S. I., G. C. I. E. *Deputy Grand Master*—Br. Sir Frederick Halsey, Bart., P. C. *Grand Wardens*—Rt. Hon. Lord Blythswood and Rt. Hon. Lord Meston. *Grand Chaplains*—Ven. Arch. D. H. Griffiths and Rev. J. A. Nairn. *Treasurer*—Edward J. Lowther. *Grand Registrar*—Sir Thos. W. Chitty.

ODD FELLOWS, INDEPENDENT ORDER OF

Officers of the Sovereign Lodge: *Grand Sire*—Lucian J. Eastin, St. Joseph, Mo.; *Grand Secretary*—J. Edward Kroh, Baltimore. Total membership in the order, in the world, 2,674,456, of which 1,938,476 are males. There are 16,829 lodges, and 3,631 subordinate encampments, the latter having 353,495 members. The number of Rebekah lodges is 10,156, with a membership of 1,065,122. They are women. The total amount of relief paid out in 1921 was $7,660,354.71.

The New York State officers are: *Grand Master*—Mortimer A. Fiederspiel, Lockport; *Grand Secretary*—Harry Walker, 31 Union Square West, N. Y. City. Membership in the Empire State, as of Jan. 1, 1924, was 905 lodges, with 143,846 members. Rebekah lodges numbered 622. Relief paid out in the State in 1923 was $138,239

ELKS, BENEVOLENT AND PROTECTIVE ORDER OF

Grand Lodge officers for 1924-25: *Grand Exalted Ruler*—John G. Price, Columbus, Ohio. *Grand Esteemed Leading Knight*—John B. Knapp, Wilkes-Barre, Pa. *Grand Esteemed Loyal Knight*—John D. O'Brien, St. Paul, Minn. *Grand Esteemed Lecturing Knight*—George W. Edgington, Idaho Falls, Idaho. *Grand Secretary*—Fred C. Robinson, Chicago, Ill. (Congress Hotel). *Grand Treasurer*—John K. Burch, Grand Rapids, Mich. *Grand Tiler*—F. B. Wilkinson, Jackson, Tenn. *Grand Inner Guard*—J. E. Breaux jr., Biloxi, Miss. *Grand Chaplain*—Rev. Dr. John Dysart, Flint, Mich. *Grand Esquire*—Chas. H. Grakelow, Philadelphia, Pa. *Secretary to Grand Exalted Ruler*—John W. Kaufman, Columbus, Ohio. *Pardon Commissioner*—Jefferson B. Browne, Tallahassee, Fla.

National Memorial Headquarters Commission—John K. Tener (Chairman), Charleroi, Pa.; Joseph T. Fanning (Sec., Treas. and Exec. Director), 50 East 42d St., N. Y. City; James R. Nicholson, Boston, Mass.; Edward Rightor, New Orleans, La.; Fred Harper, Lynchburg, Va.; Bruce A. Campbell, East St. Louis, Ill.; William M. Abbott, San Francisco, Cal.; Rush L. Holland, Colorado Springs, Col.; Frank L. Rain, Fairbury, Neb.; Wm. W. Mountain, West Toledo, Ohio; J. Edgar Masters, Charleroi, Pa.; John G. Price (ex-officio).

Board of Grand Trustees: Chairman, John Halpin, Kansas City, Mo.; *Vice Chairman*, R. A. Gordon, Atlanta, Ga.; Secretary, Louis Boismenue, East St. Louis, Ill.; Robert A. Scott, Linton, Ind.; Edward W. Cotter, Hartford, Conn.

The Elks' Support Fund has provided vocational training, at a cost of $69,000, to 106 disabled American boys.

The total receipts of the War Relief Commission were $428,010; disbursements, $191,734.

Disbursements for charity in the last three years: (1921), $2,044,218.97; (1922), $2,017,561.11; (1923), $2,432,641.50.

Total membership, 839,429, by States as follows: (April 1, 1924)—Agana, Guam, 176; Ala., 2,923; Alaska, 1,840; Ark., 5,572; Ariz., 7,305; Cal., 55,809; Canal Zone, 255; Col., 20,547; Conn., 16,812; N. Dak., 6,276; S. Dak., 8,680; Del., 958; D. of C., 2,558; Fla., 6,175; Ga., 7,725; Hawaii, 1,234; Idaho, 9,393; Ill., 48,953; Ind., 28,605; Iowa, 20,346; Kan., 15,228; Ky., 10,814; La., 10,480; Me., 3,989; Md., 4,097; Mass., 42,215; Mich., 32,521; Minn., 16,724; Miss., 3,975; Mo., 13,283; Mont., 8,143; Neb., 12,748; Nev., 3,182; N. H., 5,382; N. J., 45,233; N. M., 84,487; N. Mex., 3,334; N. C., 3,892; Ohio, 48,467; Okla., 10,665; Ore., 18,470; Pa., 72,001; Philip. Is., 536; Porto Rico, 324; R. I., 5,997; S. C., 1,839; Tex., 19,757; Tenn., 6,061; Utah, 5,789; Vt., 2,182; Va., 8,765; Wash., 29,433; W. Va., 11,965; Wis., 20,760; Wyo., 4,499.

The largest lodge is Brooklyn, No. 22, with 14,833 members.

MILITARY ORDER OF THE LOYAL LEGION OF THE UNITED STATES.

Commander in Chief—Lieut. Gen. Nelson A. Miles, U. S. A., Washington, D. C. *Recorder in Chief*—Brevet Capt. John O. Foering, 1805 Pine St., Philadelphia, Pa.

The Military Order of the Loyal Legion of the United States was organized by officers and ex-officers of the Army, Navy and Marine Corps of the United States who took part in the war of 1861-65. Total membership of the Loyal Legion, 4,717, as of April 30, 1924.

There are twenty-one Commanderies. The earliest was organized at Philadelphia, April 15, 1865; the latest at Baltimore, Dec. 8, 1904.

THE KNIGHTS OF COLUMBUS.

(By John B. Kennedy of K. of C. Headquarters, New Haven, Conn.)

The Knights of Columbus—the leading Catholic laymen's organization in the world—was founded by Rev. M. J. McGivney in 1882 in St. Mary's parish, New Haven, Conn. From an original membership of eleven it grew from city to city in Connecticut and then from State to State and beyond national boundaries, until its membership is more than 800,000, and it operates in the United States and its possessions, in Canada, Newfoundland, Mexico and Cuba. It has 2,300 councils, many of which own club buildings and are governed by State jurisdictions, of which there are 60 and by a Supreme Council, composed of elected State representatives, while executive power is vested in a board of directors. The primary object of the Knights of Columbus is to associate Catholic men for religious and civic usefulness. There are four degrees of membership, none of which has any secret or oathbound stipulation—the competent ecclesiastical and civic authorities being empowered to demand and receive the degree work of the order.

The Knights have maintained since their inception an insurance feature for members. Insurance on members now in force amounts to more than $250,000,000. The solvency of the order, as measured by actuarial standards, is over 134 per cent. Non-insurance members are associates. The order was originally made up of only insurance members. Previous to their emergence into general public notice as an agency of war welfare work the Knights had done educational and social work. They founded the first chair of American history in this country—at the Catholic University, Washington—and they endowed the same university with $500,000 for fifty scholarships in perpetuity. State and local councils also supported educational and social work. The Knights aided the victims of many catastrophes as in the San Francisco disaster, the Mid-West cyclones and floods, Halifax explosion and Japanese earthquake.

An important work of the Knights had been their nine-year fight against extreme radicalism through the medium of public forums. Lecturers have been sent through the country to combat materialistic Socialism. This work had met with success and is being continued. The K. of C. first entered war welfare work in the Spanish-American War. When the war with Germany started they raised $1,500,000 among their members and began at the cantonments at home. Later, on Gen. Pershing's invitation, the Knights went overseas and there, as well as at home, supported by a fund of $14,000,000 donated by all classes, they carried on intensive and extensive work.

In all, the Knights received approximately $40,000,000 from the American people. With the balance remaining at the conclusion of active war work, they financed a Nation-wide chain of employment bureaus, finding work for 500,000 former service men at a minimum wage of $20 per week; they awarded 416 free college scholarships to former service men in institutions like Yale and Georgetown, and inaugurated a Nation-wide chain of free night schools for service men and women, with nominal charges for civilians. These schools graduated over 40,000 pupils last year. There are more than 100 of them in operation teaching technical, business and citizenship courses. The balance of the war camp fund on hand is for use in continuing the educational work in hand and in conducting hospital relief work for the ex-service men in the public health service hospitals.

The most recent national activities of the Knights of Columbus have been the conduct of an American history movement for the improvement of history teaching, in which the K. of C. offered prizes in a monograph contest, both prizes being won by non-Catholics; the institution of the K. of C. National Correspondence School at New Haven for war veterans of America, which in its first year of existence enrolled 35,000 men in 45 free technical and clerical courses and the expansion of K. of C. hospitalization service so that in 511 hospitals, 165 K. of C. workers, all of war experience, serve some 31,000 war veterans in the manner in which they were served overseas.

In round figures, the Knights are spending at the rate of $2,000,000 per year in behalf of the American war veterans of all denominations.

Besides Nation-wide welfare work the Knights of Columbus decided in 1923 to open up the K. of C. Correspondence School at New Haven, Conn., to the entire membership of the organization on a course-at-cost basis, while maintaining the free courses for war veterans of all denominations.

In addition, the Knights during 1923 firmly established their $1,000,000 endowed (from their private funds) American welfare work in Rome under the auspices of the Vatican, Pope Pius XI. himself having donated Vatican property for one of the K. of C. playgrounds.

This work was originally undertaken at the request of Pope Benedict XV., when the Knights made their pilgrimage to St. Peter's, Rome, following their presentation to France at Metz of a statue of Lafayette by Paul Bartlett and of a jewelled baton to Marshal Foch, who, with Cardinal Mercier, King Albert of Belgium and the Duke de Veragua (Columbus's sole living male descendant) are the only European honorary members of the K. of C.

In launching a new movement for boys to be known as the Columbian Squires the Knights have undertaken the task of organizing Catholic youth in the seven countries in which the order operates, where a demand for such organization is felt to justify it.

Supreme Director—Daniel A. Tobin of Brooklyn N. Y.

Of a total membership more than 125,000 is in New York State.

THE AMERICAN LEGION.

(National Headquarters, Indianapolis, Indiana.)

The American Legion, composed of men and women who served honorably in the armed forces of the United States in the World War, was organized in Paris, France, in 1919. The 1924 Convention was held at St. Paul in September.

Membership (Dec. 31, 1923) 643,837; number of Posts, 11,129.

NATIONAL OFFICERS

Commander—James A. Drain, Washington, D. C. *Vice-Commanders* — Frank MacFarland, Topeka, Kan.; Eugene Armstrong, Waterbury, Conn.; A. L. Perry, Gatun, Panama, C. Z.; Peyton Hoge, jr., Louisville, Ky.; William Stearns, Fargo, N. D.; *Chaplain*—Father Joseph Lonergan, Durand, Ill. *Adjutant*—Russell G. Creviston, Indianapolis, Ind. *Treasurer*—Robert H. Tyndall, Indianapolis, Ind. *Judge Advocate*—Robert A. Adams, Indianapolis, Ind. *Historian*—Eben Putnam, Wellesley Farms, Mass.

AMERICAN LEGION AUXILIARY.

(Headquarters at Indianapolis.)

National Officers: *President*—Mrs. O. D. Oliphant, Trenton, N. J. *Vice-Presidents*—Mrs. Cornie G. Conklin, Vt.; Mrs. Eugene Fenelon, N. D.; Mrs. E. B. Stewart, Ore.; Mrs. W. H. Morgan, Ill.; Mrs. E. W. Burt, N. C. *Treasurer*—Mrs. Dorothy Harper, Hawaii. *Chaplain*—Mrs. Caroline Talbot, Alaska. *Secretary*—Miss Bess B. Wetherholt, Ohio. Membership (Dec. 31, 1923) 201,588; number of units, 6,044.

SPINGARN MEDAL WINNERS.

The Spingarn Medal was instituted in 1914 by J. E. Spingarn, then Chairman of the Board of Directors of the National Association for the Advancement of Colored People, who gives annually a gold medal to be awarded for the highest or noblest achievement by an American Negro during the preceding year or years.

The purpose of the medal is twofold—First, to call the attention of the American people to the existence of distinguished merit and achievement among American Negroes, and secondly, to serve as a reward for such achievement, and as a stimulus to the ambition of colored youth.

The winners have been—(1915) Prof. E. E. Just, head of the Department of Physiology, Howard University Medical School, for research in biology; (1916) Major Charles Young, U. S. Army, for development of constabulary and good roads in Liberia; (1917) Harry T. Burleigh, composer, pianist, singer, for creative music; (1918) William S. Braithwaite, poet, critic, editor, for achievement in literature; (1919) Archibald H. Grimke, ex-U. S. Consul in Santo Domingo, President American Negro Academy, for seventy years of service to his race; (1920) William E. B. DuBois, editor of *The Crisis*, for founding the Pan-African Congress; (1921) Charles S. Gilpin, actor, for success in Eugene O'Neill's play, "Emperor Jones"; (1922) Mary B. Talbert, ex-President National Association of Colored Women, for services to race and for restoration of home of Frederick Douglass; (1923) Prof. George W. Carver of Tuskegee (Ala.) Institute, for discovering by-products of peanuts and sweet potatoes, and for potash research; (1924) Roland Hayes, singer.

THE NATIONAL EDUCATION ASSOCIATION OF THE UNITED STATES.

(By the Secretary, J. W. Crabtree.)

The National Education Association of the United States is a voluntary organization of teachers whose purpose, as expressed in its charter, is to elevate the character of the teaching profession, advance the interests of the profession, and promote the cause of education in the United States. It was organized in 1857, at Philadelphia, Pa., and is now the largest teachers' organization in the world, having an active membership of 150,000. Headquarters are maintained at No. 1201 Sixteenth St. N.W., Washington, D. C. The business and professional work of the association are transacted through a representative assembly composed of delegates from affiliated State and local associations, an executive committee, a board of trustees, a board of directors, twenty-two departments, twenty standing and special committees, and a staff at headquarters.

The most important yearly event of the association is the annual meeting held the first week in July which serves as a clearing house for educational ideas and reviews the progress of the year in education. In connection with this meeting the departments of the association and a number of allied organizations hold sessions for the discussion of the various phases of education. The department of superintendence holds an annual meeting the last week in February at which time fourteen allied organizations also meet. The most outstanding achievement of the past two years is the establishment and development of a monthly Journal which gives special consideration to new movements in education and to matters of national and international concern. The association also publishes an annual volume of proceedings and numerous reports and bulletins on subjects pertaining to education.

The association is carrying on an active legislative campaign for the passage of the Education Bill known in the Sixty-eighth Congress as the Sterling-Reed Bill. This measure provides for a Department of Education with a Secretary in the President's Cabinet, for Federal aid to the States in the removal of illiteracy, in Americanization and in the training of teachers. The research division keeps available the latest information on the financing of public education, the curriculum, teachers' salaries, tenure, retirement systems and other school problems. It regularly collects the latest studies from all bureaus of educational research throughout the country and issues a research bulletin five times each year.

The following divisions have been established at headquarters: Records and accounts, field work, business, publications, research, elementary school service, and superintendence. The officers are President, Olive M. Jones, New York City; Secretary, J. W. Crabtree, Washington, D. C.; Treasurer, Cornelia S. Adair, Richmond, Va.

HEADQUARTERS OF RELIGIOUS DENOMINATIONS.

(Data supplied by the Federal Council of Churches.)

African Methodist Episcopal, 1808 McCulloh St., Baltimore, Md. *Bishop,* Benjamin S. Lee, Wilberforce, Ohio. *Secretary,* Bishop John Hurst.

African M. E. Zion, 1425 W. Walnut St., Louisville, Ky. *Bishop,* G. C. Clement.

Baptist Convention, National, Selma, Ala. *President,* Rev. L. K. Williams, 3115 S. Park Ave., Chicago, Ill. *Secretary,* Prof. R. B. Hudson.

Baptist Convention, Northern, Portland, Me. *President,* Carl E. Muhlken. *Cor. Secretary,* William C. Bitting, 5109 Waterman Ave., St. Louis, Mo.

Central Christian, Dallas, Tex. *Secretary,* Rev. Robert Graham Frank.

Christian, General Convention of, Dayton, Ohio. *President,* Rev. Frank G. Coffin, 406 E. Daniel St., Albany, Mo.

Church of God in N. A. (General Eldership), Mt. Pleasant, Pa. *President,* Rev. J. L. Updegraph, Frazer St., Findlay, Ohio.

Colored Methodist Episcopal, General Conference of, 4145 Enright Ave., St. Louis, Mo. *Bishop,* N. C. Cleaves. *Secretary,* Rev. M. F. Brinson.

Congregational, National Council of, 287 Fourth Ave., N. Y. City. *Moderator,* Rev. Rockwell H. Potter, Centre Church House, Hartford, Conn. *Secretary,* Rev. Charles E. Burton.

Disciples of Christ, International Convention of the, Cleveland, Ohio. *President,* Rev. J. H. Goldner.

Evangelical Church, General Conference of the, 836 Centre Ave., Reading, Pa. *President,* Board of Bishops, Bishop S. C. Breyfogel.

Evangelical Synod of North America, 671 Madison St., Milwaukee, Wis. *President,* Rev. John Baltzer, 2013 St. Louis Ave., St. Louis, Mo. *Secretary,* Rev. Gustave Fischer.

Free Baptists, General Conference of, 105 E. 22d St., N. Y. City. *President,* Dr. Joseph W. Mauck, 173 Hillsdale St., Hillsdale, Mich. *Cor. Secretary,* Rev. A. W. Anthony.

Friends, Society of, 101 S. Eighth St., Richmond, Ind. *General Secretary,* Dr. W. C. Woodward.

Lutheran, United, 437 Fifth Ave., N. Y. City. *President,* Rev. F. H. Knubel. *Secretary,* Rev. M. G. G. Scherer, 437 Fifth Ave., N. Y. City.

Methodist Episcopal, 63 Ponce de Leon Ave., Atlanta, Ga. *Secretary of General Conference,* Rev. R. J. Wade, 740 Rush St., Chicago, Ill. *Secretary of the Board of Bishops,* Bishop E. G. Richardson. There are Methodist denominational headquarters also at 150 5th Ave., N. Y. City.

Methodist Protestant, 2844 Wisconsin Ave., Washington, D. C. *President,* Rev. T. H. Lewis. *Secretary,* Rev. Chas. H. Beck, 613 West Diamond St., N. S., Pittsburgh, Pa.

Moravian, Northern Province, 45 N. Church St., Bethlehem, Pa. *President,* Rt. Rev. Charles L. Moensch.

Moravian, Southern Province, Winston-Salem, N. C. *President,* Rt. Rev. Edward Rondthaler.

Presbyterian Church in the U. S. A.—*Moderator,* Dr. Clarence E. N. Macartney, of Philadelphia. *Vice Moderator,* William Jennings Bryan. *Stated Clerk,* Dr. Lewis S. Mudge, Witherspoon Building, Philadelphia, Pa.

Board of National Missions—President, Rev. Joseph A. Vance, D. D., Detroit. *Secretary,* Rev. John A. Marquis, D. D., 156 Fifth Ave., N. Y. City.

Board of Foreign Missions—President, Rev. Geo. Alexander, D. D., 47 University Pl., N. Y. City. *Secretary,* Dr. Robert E. Speer, 156 Fifth Ave., N. Y. City.

Board of Christian Education—President, Rev. H. T. Kerr, D. D., Shadyside, Pittsburgh. *Secretary,* Rev. W. C. Covert, D. D., Witherspoon Bldg., Philadelphia.

In 1916, according to the Bureau of the Census, there were 41,926,854 church members in the United States, of whom 15,721,815 were Roman Catholics; 7,166,451, Methodists; 7,153,313, Baptists; 2,467,516, Lutherans; 2,255,626, Presbyterians; 1,226,028, Disciples of Christ; 1,092,821, Episcopalians; 791,274, Congregationalists; 537,822, Reformed Church; rest, scattering.

THE VOLUNTEERS OF AMERICA.

(Contributed by that organization, as of Oct. 10, 1924.)

A Christian, philanthropic, benevolent organization, under the presidency of Gen. Ballington Booth, incorporated in 1896. While its government is modeled on the United States Army, yet its rules and regulations are made by the Grand Field Council composed of officers of and above the rank of Major.

The Volunteers of America is established in upward of 100 of the principal centres of America, and has the indorsement of all the leading Cabinet and State officials.

Some idea of the scope and polity of the Volunteers may be gleaned from its report of the last year's work. During that period Volunteer philanthropic homes and institutions provided 204,519 free lodgings and 235,538 lodgings paid for in cash and by work, making a total of 440,057 lodgings provided those needing them. During this term 425,749 meals were paid for in cash and by employment and 824,429 meals were given free, making a total of 1,250,178 meals provided. 34,738 persons and families, many in desperate circumstances, were assisted in a timely manner, apart from the above aid furnished in their benevolent institutions. Employment was found for 32,244 persons, many of whom were practically stranded. 118,717 garments and pairs of shoes were provided for the very poor and needy. 33,936 mothers and children were given summer outings and thousands were taken to fresh air camps, many hundreds of children remaining amid health-giving surroundings for two and three weeks at a time.

During the holiday and Christmas season in the work among the destitute, 95,655 special dinners and provisions were sent into the homes of families who without this aid and thought would have spent cheerless holiday seasons.

The attendance at the Volunteer indoor services reached 1,485,736, while at the outdoor services it numbered 2,267,117, making a total congregation of 3,752,853.

During the year it is estimated that over 500 prisoners returning to freedom from the State prisons have been helped to a new chance in life, positions being secured for them and the moral support so desirable at such a time provided. Over 100,000 men within the walls of the State prisons have become members of the Volunteer Prison League since its inauguration by Mrs. Ballington Booth.

The above account does not embrace the efficient work done by the Volunteers of America during the World War, 226 of its officers and associate workers being sent to the front. These volunteered in different capacities, some with the Red Cross, some with the Y. M. C. A., some as chaplains and others for work in canteens. In the United States, Volunteer Service clubs were organized, providing entertainment, reading and writing rooms, sleeping accommodations, baths, etc.

The Volunteers' Gazette is the official organ, and national headquarters is maintained in their own building at No. 34 West 28th Street, New York City, New York.

ROMAN CATHOLIC HIERARCHY.

At the head of the Roman Catholic Church is the SUPREME PONTIFF, PIUS XI., Achille Ratti, born at Desio, Italy, May 31, 1857, made Archbishop of Milan, April, 1921; Cardinal, June 13, 1921; elected Pope, as successor of Benedict XV., Feb. 6, 1922; crowned, Feb. 12, 1922. The Pontiff is, in orders, a Bishop. His ecclesiastical title is: His Holiness, the Pope; Bishop of Rome and Vicar of Jesus Christ; Successor of St. Peter, Prince of the Apostles; Supreme Pontiff of the Universal Church; Patriarch of the West; Primate of Italy; Archbishop and Metropolitan of the Roman Province; Sovereign of the Temporal Dominions of the Holy Roman Church. The American Cardinals reached Rome too late to cast their ballots for a successor to Benedict XV. In consequence, the new Pope, Pius XI., has made a change in the regulations, extending the interval between the death of a Pope and the election of his successor, so as to give the foreign Cardinals a chance to take part.

THE COLLEGE OF CARDINALS.

The College of Cardinals, when complete, is made up of 70 members, of whom 6 are Cardinal-Bishops, 50 are Cardinal-Priests, and 14 are Cardinal-Deacons. The College is the Senate of the Roman Church. They advise the Pope and elect his successor. The Cardinal-Bishops take their titles from the Suburban Sees of Rome: Porto and Santa Rufina, Albano, Palestrina, Sabina, Frascati, and Velletri.

NAME.	Office or Dignity.	Nationality	Year of Birth.	Year of Creation.
Cardinal-Bishops—				
Vincenzo Vannutelli	Bishop of Palestrina, Archpriest of Patr. Liberian Basilica, Datary of the Pope	Italian	1836	1889

Hawaiian Islands—John D. Lamothe (miss.), Honolulu.
Mexico—(vacant).
Philippines—Gouverneur F. Mosher (miss.). Manila.
Porto Rico—Chas. B. Colmore (miss.), San Juan; M. Ferrando, Suffragan.
Presiding Bishop—Rt. Rev. Ethelbert Talbot of Bethlehem, Pa., born 1848, consecrated 1887.
President of the National Council—Rt. Rev. Thomas F. Gailor of Tenn.

RETIRED BISHOPS.

A. R. Graves, late Bishop of Kearney, Sonora, Cal
Wm. M. Brown, late Bishop of Arkansas, Galion, O.
Lemuel H. Wells, late Spokane, Tacoma, Wash.
James S. Johnston, late Bishop of West Texas, San Antonio.
Paul Jones, late Bishop of Utah, Orange, N. J.
E. W. Osborne, late Bishop of Springfield, San Diego, Cal.
Henry B. Restarick, late Bishop of Hawaii, Honolulu.
R. L. Paddock, late Bishop of East Oregon, Williamstown, Mass.
James D. Morrison, late Bishop of Duluth, Ogdensburg, N. Y.
Henry D. Aves, late Bishop of Mexico.
H. St. George Tucker, late Bishop of Kioto.
P. M. Rhinelander, late Bishop of Pennsylvania.
Frank K. du Moulin, late Bishop Coadjutor of Ohio.
Frank H. Touret, late Missionary Bishop of Idaho.

THE SALVATION ARMY.

(Prepared by that Organization, as of September, 1924.)

National Headquarters, 120-130 West 14th Street, New York City.

International officials—William Bramwell Booth, eldest son of the founder of the Salvation Army, is General of the entire organization, the international headquarters being in London, England. His wife, Mrs. Bramwell Booth, has charge of the work in the British Isles.

The Salvation Army in the United States is under the general direction of Commander Evangeline Booth. For administrative purposes, there are three territories with headquarters in New York, Chicago and San Francisco, the leaders being Commissioner Thomas Estill, Commissioner William Peart and Lieut. Commissioner Gifford, respectively. Each territory has its full complement of departmental officers, publishes its own War Cry, etc., and the territorial leader is fully responsible for all branches of the work within the boundaries of the territory.

DOMESTIC STATISTICS.

In the United States the Salvation Army has 1,325 field corps and outposts, 4,090 field officers and cadets, 16,298 local officers and bandsmen, 84 hotels for men, 1 hotel for women, 14 young women's boarding houses, 100 industrial homes, 8 children's homes, 31 rescue homes and maternity hospitals, 13 slum posts and nurseries, and 10 general hospitals and dispensaries.

The Salvation Army gives each year about 450,000 Christmas dinners, 175,000 toys, and over 25,000 Thanksgiving dinners.

PRINTING AND PUBLISHING INDUSTRY.

(Data by the U. S. Census Bureau.)

The printing and publishing industry in 1921 in the United States was carried on in 20,318 establishments, employing 229,489 wage earners, whose yearly pay totaled $356,670,960. The cost of materials was $589,279,172, and the value of products was $1,827,809,475.

The income of newspapers in 1921 totaled $734,321,115, of which $521,684,483 came from advertising and $212,635,632 from subscriptions and sales.

Sunday newspapers numbered 537, with 20,110,206 circulation per issue.

The circulation of daily newspapers published in big cities was as follows:

THE FRANKLIN INSTITUTE OF THE STATE OF PENNSYLVANIA.

(15 South Seventh Street, Philadelphia, Pa.)

The Franklin Institute of the State of Pennsylvania for the Promotion of the Mechanic Arts was organized in 1824.

FRANKLIN MEDAL WINNERS.

The following medals have been awarded by the Institute:

Arrhenius, Svante August (1920).
Carty, John J. (1916).
Dewar, Sir James (1919).
Edison, Thomas Alva (1915).
Fabry, Charles (1921).
Ferrie, Auguste Gustave, General (1923).
Lorentz, Hendrik Antoon (1917).
Marconi, Guglielmo (1918).
Mendenhall, Thomas Corwin (1918).
Michelson, Albert A. (1923).
Modjeski, Ralph (1922).
Onnes, Heike Kamerlingh (1915).
Parsons, Sir Charles Algernon (1920).
Richards, Theodore Wm. (1916).
Rutherford, Sir Ernest (1924).
Sprague, Frank J. (1921).
Squier, George Owen (1919).
Taylor, David Watson (1917).
Thomson, Sir Joseph John (1922).
Weston, Edward (1924).

AMERICAN UNIVERSITY UNION IN EUROPE.

(Administered by a Committee of the American Council on Education.)

Secretary: J. W. Cunliffe, Journalism Building, Columbia University, New York City.

Members of the Committee: H. P. Judson, Univ. of Chicago, Chairman; A. P. Stokes, Yale, Vice Chair.; J. W. Cunliffe, Columbia, Secretary; Dean H. V. Ames, Pennsylvania, President; J. R. Angell, Yale; Prof. E. C. Armstrong, Princeton; Dean E. B. Babcock, N. Y. University; Dr. S. P. Duggan, Institute of International Education; President L. Farrand, Cornell; E. F. Greene, Wellesley; President J. G. Hibben, Princeton; President D. Kinley, Illinois; Prof. A. O. Lovejoy, Johns Hopkins; President A. L. Lowell, Harvard; Dr. G. E. MacLean, Iowa; Prof. Paul Monroe, International Institute of Teachers' College; Dr. C. R. Mann, Director, American Council on Education; H. Mills, California; Prof. G. H. Nettleton, Yale; C. L. Pack, Western Reserve; H. B. Thompson, Princeton; Dr. H. W. Tyler, Massachusetts Institute of Technology; Prof. Paul van Dyke, Princeton; Prof. C. B. Vibbert, Michigan.

London Headquarters: 50 Russell Square, W. C. 1; Director, Dean C. A. Gayley, California; Assistant Director and Secretary, R. H. Simpson.

Paris Headquarters: 173 Boulevard St. Germain; Director, Prof. H. C. Lancaster; Assistant Director and Secretary, Dr. H. S. Krans.

THE FEDERAL COUNCIL OF THE CHURCHES OF CHRIST IN AMERICA.

(Contributed by the Organization.)

The Federal Council of the Churches of Christ in America was established in 1908 by the official action of twenty-nine Protestant denominations in the United States to represent them and act for them in matters of common interest.

The bodies now composing the Federal Council are:

Baptist Churches, North; National Baptist Convention; Free Baptist Churches; Christian Church; Churches of God in North America (General Eldership); Congregational Churches; Disciples of Christ; Friends; Evangelical Synod of North America; Evangelical Church; Methodist Episcopal Church; Methodist Episcopal Church, South; African Methodist Episcopal Church; African M. E. Zion Church; Colored M. E. Church in America; Methodist Protestant Church; Moravian Church; Presbyterian Church in the U. S. A.; Presbyterian Church in the U. S., South; Primitive Methodist Church; Protestant Episcopal Commission on Christian Unity and Department of Christian Social Service; Reformed Church in America; Reformed Church in the U. S.; Reformed Episcopal Church; Seventh Day Baptist Churches; United Brethren Church; United Lutheran Church (consultative member); United Presbyterian Church.

The work of the Federal Council is carried on through several commissions, interdenominational in membership, dealing with various fields of the churches' interest.

Through the Commission on Evangelism the evangelistic agencies of the various denominations co-operate in organizing united evangelistic efforts by the churches in communities throughout the country.

The Commission on the Church and Social Service unites the social service departments of the churches in matters of social regeneration, the church and social questions, particularly emphasizing better industrial relations and organizing conferences between churches and representatives of employers and labor to promote co-operation and a Christian spirit in industry.

The Commission on International Justice and Goodwill is pursuing a vigorous program in behalf of Christian internationalism, stressing at the present time a campaign for the reduction of armament, for better relations with the Orient, and for the outlawry of war through the achievement of world justice based on international law defined in general treaties and ratified by the governments of all the principal nations.

The Commission on Councils of Churches is responsible for organizing and developing local federations or councils of churches in the larger communities with a view of making the churches more effective forces in the community life.

The Church and Race Relations was organized in 1921 for the purpose of working for co-operation between the white and the Negro races in securing better conditions for the Negro people.

The Federal Council also has established a Committee on Mercy and Relief, which has acted as a central agency of the churches in the relief of the Russian famine and other similar appeals. Other important commissions deal with Christian education, temperance and relations with religious bodies in Europe.

The Department of Research and Education gathers, authenticates and interprets to the council's constituency facts concerning social, educational, economic and industrial conditions and movements, reporting them through a weekly information service and occasional bulletins; makes researches in social education; conducts occasional special investigations bearing upon the social ministry of the church.

The central office of the council is at 105 East 22d Street, New York City. Offices are also maintained in the Woodward Building, Washington, D. C., and at 77 W. Washington Street, Chicago, Ill. The officers of the council are: President, Robert E. Speer; Treasurer, Alfred R. Kimball; General Secretaries, Charles S. Macfarland and Samuel M. Cavert.

The officers and secretaries of the commissions are as follows:

Evangelism and Life Service—Rev. J. Ross Stevenson, Chairman; Rev. Charles L. Goodell, Executive Secretary.

Christian Education—Rev. William Adams Brown, Chairman.

Churches and Social Service—Shelby M. Harrison, Acting Chairman; Rev. Worth M. Tippy, Executive Secretary; Rev. Carl H. Barnett, Community Relations Secretary.

Church and Race Relations—Dr. George E. Haynes and Rev. W. W. Alexander, Executive Secretaries.

Temperance—Carl E. Milliken, Chairman.

International Justice and Goodwill—Dr. John H. Finley, Chairman; Rev. Sidney L. Gulick, Secretary.

Relations with France and Belgium—William Sloane Coffin, Chairman.

Relations with Religious Bodies in Europe—Bishop James Cannon jr., Chairman.

Councils of Churches—Fred B. Smith, Chairman; Rev. Roy B. Guild and Harry N. Holmes, Secretaries.

Department of Research and Education—Rev. F. Ernest Johnson, Executive Secretary.

YOUNG MEN'S CHRISTIAN ASSOCIATIONS OF NORTH AMERICA.

(Contributed by the Organization.)

General offices, 347 Madison Avenue, New York City. Officers: *Chairman*—James M. Speers. *Vice Chairman*—Cleveland E. Dodge, Gerald Birks, Roger H. Williams, William D. Murray. *Treasurer*—B. H. Fancher. *General Secretary*—John R. Mott.

From its annual report issued Sept. 1, 1924, the International Committee describes the past year as exceeding the record of any preceding year.

The 1,693 local Ys report 988,622 members, of which 244,529 are boys.

There are 5,194 paid officers in this work including the local, State, national and training agencies; their net property is $159,521,100.

The operating expenditure of $49,990,700 is practically $1,000,000 per week during the year.

Positions were found for 95,154 men, over 8,000,000 lodgings in dormitories were furnished, and 28,000,000 lunches and meals were served; 90,192 different men and boys were trained for two weeks or more in Y. M. C. A. summer camps.

In physical training 429,455 men and boys used the gymnasium, 244,977 were taught swimming and life saving.

In educational work 2,841 paid teachers and leaders served over 90,000 regular students in nearly 200 different courses of study.

The State Executive Committee of the Young Men's Christian Associations of the State of New York has its general office at 2 West 45th Street, Room 1001, New York City. *Chairman*—William M. Kingsley. *Treasurer*—Samuel Woolverton. *State Secretaries*—Frank W. Pearsall and Fred I. Eldridge.

General office, Y. M. C. A. of City of New York, 2 West 45th Street, Room 1402, New York City. Officers: *President*—William M. Kingsley. *Treasurer*—Cleveland E. Dodge. *General Secretary*—Walter T. Diack. *Comptroller*—Henry M. Orne.

The total membership of the city is 28,506, including 2,907 boys. There are 891 employees, including 162 paid teachers.

YOUNG WOMEN'S CHRISTIAN ASSOCIATION OF THE U. S. OF AMERICA.

(Contributed by that organization, as of September, 1924.)

The officers of the Association are: *President*, Mrs. Frederic M. Paist, of Wayne, Pa.; *Vice Presidents*, Mrs. Chester C. Ashley, of Los Angeles, Cal.; Miss Elizabeth Skinner, of Dunedin, Fla.; *Secretaries*, Miss Bertha Pabst, of Washington, D. C., and Miss Lois Kugler, of Boston, Mass.

The officers of the National Board are: *President*, Mrs. Robert E. Speer; *Chairman of the Executive Committee*, Mrs. John French; *Secretary*, Miss Katharine Lambert; *Treasurer*, Mrs. Samuel J. Broadwell.

The *General Secretary* is Miss Mabel Cratty, No. 600 Lexington Avenue, New York City.

The officers of the Metropolitan Board are: *President*, Mrs. Howard Gillespie Myers; *Vice Presidents*, Mrs. Jonathan Bulkley, Mrs. Dwight Whitney Morrow; *Secretary*, Mrs. William Sloane Coffin; *Treasurer*, Mrs. William Henry Hays; *Assistant Treasurer*, Mrs. Warren A. Ransom.

The *General Secretary* is Miss Bertha Boody, No. 129 East 52d Street, New York City.

FIELD MUSEUM OF NATURAL HISTORY, CHICAGO.

Field Museum of Natural History, established 1893, at the close of the World's Columbian Exposition of 1893, removed June 1, 1920, to its new building in Grant Park. The founding of a scientific institution of this character in Chicago was made possible by a gift of $1,000,000 by Marshall Field, whose name the institution bears, and who, on his death, January 6, 1906, bequeathed a further $8,000,000, of which $4,000,000 was for the erection of a permanent building and $4,000,000 for endowment. The sum of $2,200,000 has been contributed by others, and there is an annual income from other sources than endowment of approximately $375,000.

The nucleus of the exhibition material was gathered by gifts and purchase at the World's Columbian Exposition. Several departments created at the organization have been abandoned, until, after a lapse of thirty years and expenditure of over $11,000,000, the museum is now divided into five departments: Anthropology, botany, geology, zoology, and the N. W. Harris Public School Extension. Many expeditions for the purpose of obtaining study, exhibition, and exchange material and data have been despatched to all parts of the world. The results are published by the museum from time to time. It has a working library of 80,000 titles, an extensive exchange system, fully equipped departmental laboratories, an herbarium of 560,000 sheets, study collections of mammals, birds, fishes, reptiles and insects reaching many thousand specimens, a large taxidermy section, a printing shop, illustration studios, assaying and lapidary rooms, etc. In North America, Philippine, Chinese, and Thibetan ethnology, in meteorites, in the world's mineralogy, in economic botany, the museum is particularly prominent, while its series of mounted mammals and birds and plant reproduction furnish examples of advanced museum practice. The institution is open to the public on all days. A small admission fee is charged except on Thursdays, Saturdays, and Sundays, when it is free to all. Students, public school children and teachers are admitted free at all times.

The museum is incorporated under Illinois State law, and the administrative control rests in a board of twenty-one trustees. The building is 750 feet by 350 feet, and with the exterior outer lines, including entrances and terrace, the structure covers about eleven acres of ground. Director, D. C. Davies.

1923 EXPEDITIONS OF THE MUSEUM.

The Field Museum maintained, in 1923, the following expeditions (funds provided by Capt. Marshall Field unless otherwise indicated): Botanical, to Peru; ethnological and archaeological to China; ethnological, to the Malayan Archipelago, funds provided by Arthur B. Jones; archaeological, to Colombia; geological, to Brazil; zoological, to Honduras; zoological, to Chili, Argentina, Brazil, Uruguay, and Bolivia; zoological, to Peru and Brazil; paleontological, to Patagonia and Argentina; archaeological, to Mesopotamia; ichthyological, to Texas, and zoological, to Central Africa.

NATIONAL ACADEMY OF SCIENCES, WASHINGTON, D. C.

There are 223 living members, comprising investigators in many departments of science. The geographical distribution of members covers the United States, but is not considered in their election. The National Academy has often been called into the service of the Government. Committees appointed in accordance with acts of Congress at the request of joint commissions and committees on Congress, of the President of the United States, and of the various departments of the National Government, have reported on a great variety of subjects. From time to time trust funds have been established, the incomes of which are devoted to the award of medals or to grants for research. The will of Alexander Dallas Bache, first President of the Academy, directed that the residue of his estate, after the death of his wife, should be paid over to the National Academy of Sciences for the "prosecution of researches in physical and natural science by assisting experimentalists and observers." Other trusts have been left to the academy. Several hundred thousand dollars have been disbursed by the academy from the income of trust funds in direct aid of scientific research. A recent gift was that of the Carnegie Corporation, $5,000,000, for a suitable building for the academy and the National Research Council, and an endowment for the purposes of the Academy and Research Council. The new building at B and 21st Streets was dedicated and opened to the public April 30, 1924.

JOHN FRITZ MEDAL WINNERS.

The John Fritz Medal Board of Award—Societies represented: American Society of Civil Engineers, American Institute of Mining and Metallurgical Engineers, American Society of Mechanical Engineers, American Institute of Electrical Engineers. Office, 29 West 39th Street, New York.

The first award of the medal was made to John Fritz at a dinner given to him on his eightieth birthday, Aug. 21, 1902. The other awards have been as follows: 1905, to Lord Kelvin, for work in cable telegraphy; 1906, to George Westinghouse for invention and development of airbrake; 1907, to Alexander Graham Bell, for invention and introduction of telephone; 1908, to Thomas Alva Edison, for invention duplex and quadruplex telegraph, phonograph, development of a commercially practical incandescent lamp, the development of a complete system of electric lighting, including dynamos, regulating devices, underground system protective devices and meters; 1909, to Charles T. Porter, for advancing knowledge of steam engineering and improvements in engine construction; 1910, to Alfred Noble, for notable achievements as a civil engineer; 1911, to Sir William H. White, for notable achievements in naval architecture; 1912, to Robert W. Hunt, for contributions to early development of Bessemer steel process; 1913, no award; 1914, to Prof. John E. Sweet, for achievements in machine design, and pioneer work in construction and development of high-speed steam engine; 1915, to Dr. James Douglas, for achievement in mining metallurgy, education, and industrial welfare; 1916, to Elihu Thomson, for achievement in electrical invention, in electrical engineering and industrial development, and in scientific research; 1917, to Dr. Henry M. Howe, for his investigations in metallurgy; 1918, to J. Waldo Smith, for providing New York with water; 1918, to Gen. George W. Goethals, as builder of the Panama Canal; 1920, to Orville Wright, for development of the airplane; 1921, to Sir Robert Hadfield, for invention of manganese steel; 1922, to Eugene Schneider, for development of ordnance (75-m. gun); 1923, to Guglielmo Marconi, for the invention of wireless telegraphy; 1924, to Ambrose Swasey, for achievement as a designer and manufacturer of instruments and machines of precision, a builder of great telescopes, a benefactor of education, and the founder of Engineering Foundation.

CORCORAN GALLERY OF ART, WASHINGTON, D. C.

The Corcoran Gallery of Art, at Washington, D. C., founded and endowed by the late William Wilson Corcoran in 1869, solely for encouraging American genius in the fine arts, is a private corporation controlled by a self-perpetuating board of nine trustees. The original home of the institution was at Pennsylvania Avenue and 17th Street; but in 1897 its collections were transferred to the present building, designed by Ernest Flagg of New York, and located at New York Avenue and 17th Street N. W. The value of the building and grounds connected therewith is approximately $2,000,000, and the present value of the collection is estimated at $1,500,000. The endowment fund amounts to $1,000,000.

The collection of paintings is particularly representative of American artists. In addition, the gallery has examples of the French, Dutch, English, and other schools. The sculptures include casts from the antique and the Renaissance, and modern works, as well as original works in marble and bronze. There are over 100 original bronzes by Antoine-Louis Barye, French sculptor of animals It is open to the public: Mondays, 12 M. to 4.30 P. M.; other week days, 9 A. M. to 4.30 P. M.; Sundays, 1.30 to 4.30 P. M.

The Gallery holds numerous exhibitions of paintings, sculptures, prints, etc.; and perhaps the most important among these are the biennial Exhibitions of Contemporary American Oil Paintings, the Ninth of which opened Dec. 16, 1923.

The Corcoran School of Art, also endowed by Mr. W. W. Corcoran, is open from October to May, inclusive, each year, with no tuition fee, and only the expense of an annual entrance fee of $10 and materials to each student.

MOUNT VERNON AND THE TOMB OF WASHINGTON.

"MOUNT VERNON," on the west shore of the Potomac River, 15 miles below Washington, belongs to the Mount Vernon Ladies' Association. It was built in 1743 by Lawrence, half brother of George Washington. On the death of Lawrence and of his only daughter, George Washington inherited the estate. He had lived there since 1747. He died and was buried there in 1799. In 1753 John Augustine Washington offered it for sale. A patriotic daughter of South Carolina, Ann Pamela Cunningham, devoted herself to raising $200,000 required for the purpose. In 1856 the Mount Vernon Ladies' Association of the Union was incorporated (it had existed since 1853); with Miss Cunningham as regent, and vice regents representing 12 States. Contributions were solicited and popular support was enlisted. The full sum was in hand before the end of 1859; and in 1860 Mount Vernon became the property of the association. A further fund was provided for permanent care and maintenance. Portions of the original estate that had been sold have been acquired again; buildings which had fallen into ruin have been restored; the deer park under the hill has been restocked; the mansion has been repaired; many articles of furniture and adornment have been restored to the several rooms; numbers of valuable relics and mementos of George and Martha Washington and of their time have been deposited here, including the key of the Bastile, presented to Washington by Lafayette in 1789. The area of the estate is 237½ acres.

The regent is Miss Harriet Clayton Comegys, Dover, Del., elected 1909; there are 34 vice regents from as many States.

THE CITY ART MUSEUM OF ST. LOUIS.

The City Art Museum of St. Louis was established in 1879 and became a municipal institution in 1909. The building is in Forest Park, 160x350 feet, with forty-four galleries on three floors.

The collections include paintings, prints, sculpture, textiles, arms and armor, furniture, metal work, Chinese, Japanese and Persian art, Egyptian, Greek and Roman antiquities. The modern paintings include examples by American, French, Dutch, Spanish, British, Russian, Swedish, and Belgian artists. There is a small group of paintings by old Italian, French, Flemish and English masters.

The sculpture embraces examples by American and European artists. In the Chinese collection are ceramics, bronzes, jades, textiles, paintings and sculpture, representative of the historic periods of Chinese culture.

The department of European decorative arts includes Gothic and Renaissance tapestries, sixteenth, seventeenth and eighteenth century French furniture, sixteenth century Italian furniture, eighteenth century English silver and furniture, Limoges enamels, metal work, etc.

The collection of classical antiquities contains Greek sculpture in marble and bronze, vases, glass, jewelry, mosaic and gems, Roman portrait busts, etc.

The museum is open daily, except Christmas and New Year's days, 10 A. M. to 5 P. M. Admission is free.

PAN-AMERICAN UNION.

The Pan-American Union is the international organization and office maintained in Washington, D. C., by the twenty-one American republics, as follows: Argentina, Bolivia, Brazil, Chili, Colombia, Costa Rica, Cuba, Dominican Republic, Ecuador, Guatemala, Hayti, Honduras, Mexico, Nicaragua, Panama, Paraguay, Peru, Salvador, United States, Uruguay, and Venezuela. It is devoted to the development and advancement of commerce, friendly intercourse, and good understanding among these countries. It is supported by quotas contributed by each country, based upon the population. The Union publishes a monthly bulletin in English, Spanish, and Portuguese, which is a record of Pan-American progress. It also publishes booklets on Latin-American cities, countries, and commodities. Its *library*, the Columbus Memorial *Library*, contains 55,000 volumes, 25,000 photographs, 200,000 index cards, and a collection of 1,600 maps. The Union is housed in a building erected through the gifts of Andrew Carnegie and the contributions of the American republics.

Director-General—Dr. L. S. Rowe; *Assistant Director*— E. Gill Borges.

NATIONAL GEOGRAPHIC SOCIETY, WASHINGTON, D. C.

(By the President, Gilbert Grosvenor, LL. D.)

Founded in 1899, "for the increase and diffusion of geographic knowledge," the National Geographic Society has filled such an important role in the encouragement of science and its application to the needs of mankind that its membership now exceeds 825,000. In the promotion of its work of increasing geographic knowledge the society pioneered in the study of Alaska and the encouragement of the opening up of that territory; supported Peary in his Polar work; investigated the problems of vulcanism and seismology at Mont Pelee, Messina and in Alaska; explored the ruins of the Inca country of the high Andes, unearthing its holy city, Machu Picchu, and the staircase farms of the Incas, which far eclipse the Hanging Gardens of Babylon; studied the history of the Ice Age, as exemplified in the glaciers of Alaska; discovered the Valley of Ten Thousand Smokes, a vast area of steaming spouting fissures.

As a result of the society's discoveries this area has been created a National Monument by Presidential proclamation.

In its recognition of the services to mankind of those who labor to push back the horizons of geography, the society has awarded the Hubbard Gold Medal to Peary for his furthest North in 1906; to Amundsen for achieving the Northwest Passage and locating the North Magnetic Pole; to Gilbert for his physiographic researches; to Shackleton for his Antarctic explorations; and to Stefansson for his discovery of a hundred thousand square miles of territory in the Canadian Arctic. It also awarded special gold medals to Peary and Amundsen for their attainment of the North and South Poles, respectively; and to Gen. George W. Goethals in recognition of his service to the world in the building of the Panama Canal. In its work of diffusing geographic knowledge the society relies principally on its leading publication, the National Geographic Magazine. That periodical goes into 950,000 homes, and also is made wide use of in the schools of the country in the teaching of geography.

Through the columns of more than 500 leading American daily newspapers and the large plate matter syndicates the society's geographic news bulletins are reaching into more than half the homes of the United States. These bulletins are furnished gratis to the press, and through them the society is able to interpret the geographic and historical backgrounds that give significance to the news despatches from every corner of the globe.

A further educational activity undertaken by the society in recent months is its Pictorial Geography. By means of a continuing series of loose-leaf geographic text and pictures, prepared in recognition of the fact that the average map and the technical phraseology of geographies mean little to children, the society is aiming to bring them mental pictures of busy places, living peoples and beautiful landscapes and to portray to them nature's moods and processes in terms they understand and forms they enjoy. Another activity of the society in the diffusion of geographic knowledge is the publication of books, maps and monographs on subjects of first interest. Its map of the war zone in France was readily used by American officers at home and abroad; and the War Department has adopted its map of Mexico as the base for the army's military map of that turbulent country. It has recently published new maps of Europe, Africa, South America, Asia, the United States, and of the world. In 1917 the society appropriated $20,000 and in 1920 $13,500 out of its reserve fund, the money necessary to save from destruction the privately owned "Big Trees" in Sequoia National Park, California, and had the ground they occupy deeded in perpetuity to the United States for the benefit of posterity. More recently the society and a group of its members added a fund of nearly $100.000 for the preservation of another large group of these big trees.

For a review of the society's scientific work in the past year reference is made to the article on "Scientific Progress in 1924," elsewhere in this Almanac. The officers and editorial staff are: President and Editor, Gilbert Grosvenor; Vice President, Henry White; Vice President and Associate Editor, John Oliver La Gorce; Secretary, O. P. Austin; Associate Secretary, George W. Hutchison; Treasurer, John Joy Edson; Assistant Editors, William J. Showalter and Ralph A. Graves; Chief of Illustrations Division, Franklin L. Fisher; Chief of School Service, J. R. Hildebrand.

AMERICAN GEOGRAPHICAL SOCIETY.

The American Geographical Society was established in 1852 for the advancement of geographical science. It maintains a large geographical library, an extensive collection of maps and a yearly program of lectures.

In recognition of special distinction in the field of exploration and geographical research the Society awards three gold medals: the Cullum Geographical Medal and the Charles P. Daly Medal for distinguished geographical service in any field, and the David Livingstone Centenary Medal, founded by the Hispanic Society of America, for scientific achievement in the geography of the southern hemisphere.

From November, 1917, to December, 1918, the Society's building was the headquarters of the body of experts known as The Inquiry, which later attended the Peace Conference in Paris, where the members served on various territorial and economic commissions.

A program of research in the geopgraphy of Hispanic America, inaugurated by the Society in 1920, is being advanced satisfactorily. Its published results include monographs, articles, handbooks, and maps, the principal feature being a map of Hispanic America on the millionth scale, drawn and printed in close conformity with the standards of the International Millionth Map of the World. When completed this map will comprise approximately 100 sheets, a number of which have already appeared.

A School of Survey has recently been inaugurated under the Society's auspices. Its purpose is to give instruction in modern methods of geographical survey.

The *Geographical Review*, the Society's quarterly, is a scientific periodical devoted to the publication of original articles, notes, and book reviews. The Society also publishes a Research Series and a series of special publications. Each Fellow is entitled annually to a complimentary copy of a book published by the Society. The *New York Walk Book*, published by the Society in 1923, is an illustrated trampers' guide to the vicinity of New York City.

The Officers of the Society for 1924 are: *President*, John Greenough; *Vice Presidents*, James B. Ford, Philip W. Henry, Alexander Hamilton Rice; *Foreign Corresponding Secretary*, Professor William Libbey; *Domestic Corresponding Secretary*, W. Redmond Cross; *Recording Secretary*, Hamilton Fish Kean; *Treasurer*, Henry Parish. The headquarters are located at Broadway at 156th Street. Dr. Isaiah Bowman is the *Director*.

The following is the offical list of winners of the medals of the American Geographical Society.

AMERICAN GEOGRAPHICAL SOCIETY'S MEDALS.

CULLUM GEOGRAPHICAL MEDAL WINNERS.

1896, Robert E. Peary; 1897, Fridtjof Nansen 1899, Sir John Murray; 1901, T. C. Mendenhall 1902, A. Donaldson Smith; 1903, Luigi Amedeo, Duke of the Abruzzi; 1904, G. von Neumayer. 1904, Sven Hedin; 1906, Robert F. Scott; 1906, Robert Bell; 1908, Wm. Morris Davis; 1909, F. P. Moreno; 1909, Sir E. H. Shackleton; 1910, Hermann Wagner; 1911, J. B. E. A. Charcot; 1914, Ellen C. Semple; 1914, Sir John S. Keltie; 1917, Geo. W. Goethals; 1918, Frederick H. Newell; 1919, E. de Margerie; 1919, Henry F. Osborn; 1921, Albert I., Prince of Monaco; 1922, Edward A. Reeves; 1924, Jovan Cvijic.

CHARLES P. DALY MEDAL WINNERS.

1902, Robert E. Peary; 1906, Thor. Thoroddsen; 1908, George Davidson; 1909, William W. Rockhill; 1909, Chas. Chaille-Long; 1910, Grove Karl Gilbert; 1912, Roald Amundsen; 1913, Alfred H. Brooks; 1914, Albrecht Penck; 1915, Paul V. de la Blache; 1917, Geo. G. Chisholm; 1918, Vilhjalmur Stefansson; 1920, George Otis Smith; 1922, Sir F. Younghusband; 1922, E. de K. Leffingwell; 1922, Adolphus W. Greely; 1924, Claude H. Birdseye.

DAVID LIVINGSTONE CENTENARY MEDAL WINNERS.

1916, Sir Douglas Mawson; 1917, Theodore Roosevelt; 1917, Manuel Vicente Ballivian; 1918, Candido Mariano da Silva Rondon; 1920, Wm. Speirs Bruce; 1920, Alexander H. Rice; 1923, Griffith Taylor; 1924, Frank Wild.

SMITHSONIAN INSTITUTION.

The Smithsonian Institution at Washington, D. C., was established by statute in 1846, under the terms of the will of James Smithson, an Englishman, who bequeathed his fortune in 1826 to the United States to found an institution for the "increase and diffusion of knowledge among men." From the income of the fund a building, known as the Smithsonian Building, was erected on land given by the United States.

The Institution is legally an establishment, having as its members the President of the United States, the Vice President, the Chief Justice, and the President's Cabinet. It is governed by a Board of Regents consisting of the Vice President, the Chief Justice, three members of the Senate, three members of the House of Representatives, and six citizens of the United States appointed by joint resolution of Congress.

The Regents are empowered to accept gifts without action of Congress in furtherance of the purposes of the Institution, and to administer trusts in accord therewith. The Secretary of the Smithsonian Institution is its executive officer and the director of its activities.

The Institution maintains a library, numbering over 1,000,000 volumes, which consists mainly of transactions of learned societies, and scientific periodicals. While the body of the library is deposited in the Library of Congress and accessible to all its readers, a working library is maintained at the Institution.

The Institution has charge of the National Museum, the National Gallery of Art, including the Freer Gallery of Art, the International Exchange Service, the Bureau of American Ethnology, the National Zoological Park, the Astrophysical Observatory, and the United States Regional Bureau for the International Catalogue of Scientific Literature.

The United States National Museum is the depository of the national collections. It is rich in the natural history, geology, paleontology, archaeology and ethnology of America, and has collections illustrating American history, including large war collections illustrative of the part taken by the United States in the recent conflict, as well as many series relating to the arts and the industrial arts. It is an educational and research museum, and issues scientific publications.

The National Museum occupies three special structures, built in 1881, 1911 and 1917, respectively, containing 650,000 square feet of floor space. The amount of the annual appropriations made by Congress for the support of the Museum for the fiscal year 1925 is $584,792.

The buildings are opened to the public 9 A. M. to 4.30 P. M., week days, and, in addition, the Natural History Building at the foot of Tenth Street is opened Sundays, 1.30 P. M. to 4.30 P. M.

The National Gallery of Art contains numerous important art works acquired by the Smithsonian Institution during the first half century of its existence, including a valuable collection of etchings and engravings from George P. Marsh; more recent are the Harriet Lane Johnston bequest comprising numerous portraits and other works by British, Flemish, Dutch, and Italian masters; the Ralph Cross Johnson collection of rare paintings by Italian, English, French, Flemish, and Dutch masters; the William T. Evans collection, comprising 150 examples of the works of contemporary American artists, and numerous collections of minor importance; also the great gift of Charles L. Freer, comprising rich collections of Chinese and Japanese art in every branch, with many paintings and etchings by Whistler, and the famous "Peacock Room," besides important works by Thayer, Dewing, Homer, and Tryon.

The Freer collection is administered as a separate unity of the National Gallery and occupies the building furnished by the donor.

Bureau of American Ethnology, for the study of the American Indian; the *International Exchanges*, for the exchange of governmental and scientific publications between the United States and foreign countries; the *Astrophysical Observatory* for the investigation of radiation phenomena; the *National Zoological Park*, at Washington, containing about 1,500 animals, and the Regional Bureau of the *International Catalogue of Scientific Literature*, for the preparation of a classified index to the current scientific literature of the United States, are also branches of the Institution.

INDEPENDENCE HALL NATIONAL MUSEUM, PHILADELPHIA.

(Data supplied by Wilfred Jordan, the Curator.)

Independence Hall was at first called "The State House of Pennsylvania." It now comprises the main or central building (Independence Hall), two arcades connecting it with two two-story buildings called the Wings or Province Halls, and two separate corner buildings, one Congress Hall, the other Old City Hall, one on the corner of Fifth Street and the other on the corner of Sixth Street, facing on Chestnut Street, Philadelphia. The State House group of buildings was designed and built by Andrew Hamilton, a Philadelphia lawyer, who bought the land, for which he created a trust Congress and City Halls were in Hamilton's original scheme of the State House group, but were not built until after the close of the Revolution. The group of buildings covers a frontage of 396 feet on Chestnut Street.

The original building (Independence Hall) in the group was begun in 1732 and was opened and first put to use in September, 1736, when William Allen, Mayor and prominent merchant of Philadelphia, gave a dinner to the citizens. In October, 1736, the Legislature, of which Benjamin Franklin was clerk, moved into the completed part of the structure, then known as the "East Room." In June, 1753, Pass & Stow placed in position in the State House steeple the Liberty Bell, weighing 2,080 pounds. The State House was practically completed in 1759. Here are some of the historical events that have taken place in Independence Hall:

June 15, 1775, Washington accepted his appointment as General of the Continental Army.

July 4, 1776, Colonies issued the Declaration of Independence.

July 15, 1776, convention to form a new Constitution for Pennsylvania met here.

September 11 and October 4, 1777, American officers captured at the Battles of Brandywine and Germantown were held prisoners in the building by the British.

Congress, which convened in Independence Hall March 4, 1777, left again on September 18, 1777; returned July 2, 1778, and continued to sit there until the close of the Revolution.

July 9, 1778, the Articles of Federation and Union between the States were signed in Declaration Chamber by eight States. The five remaining States signed later, the last, Maryland, on March 1, 1781.

May 14, 1787, the Federal Convention to frame a Constitution for the United States assembled, sitting until September.

December 13, 1787, the Pennsylvania Convention met to ratify the Philadelphia Constitution.

In 1824 Lafayette was given a reception there.

December 6, 1790, the Congress of the United States occupied the County Building, now known as Congress Hall, one of the Independence Hall group, and remained there until the seat of Government was removed to Washington in 1800.

March 4, 1793, George Washington was inaugurated in Congress Hall, at the beginning of his second term as President; and John Adams was inaugurated there March 4, 1797. The House of Representatives occupied the lower floor and the Senate the second floor.

February 7, 1791, the Supreme Court of the United States held its first session on the second floor of the City Building, now known as Old City Hall, one of the Independence Hall group, and stayed there until August 15, 1800. The Supreme Court of Pennsylvania sat on the second floor of the building also. The City Building was used as the municipal headquarters until March 27, 1895.

In 1816 the City of Philadelphia bought the entire property.

There are many historic oil portraits in the National Portrait Gallery, including Washington and other early American public men.

Independence Hall was formally thrown open as a public historical museum July 4, 1876, although parts of this building were used as a museum as early as 1790. Cost of its annual upkeep is $25,000. Its art collection, made up in the main of original pictures of celebrities of Colonial and Revolutionary times, is worth over $500,000. The museum collection consists of furniture, manuscripts, musical instruments, water colors, missiles, maps, coins, currency, weapons, metals, prints, wearing apparel, utensils, and books.

There are no pay days. The National Museum is open to the public daily throughout the year, from 9 A. M. to 4 P. M., Sundays, 1 to 4 P. M., except Christmas and Thanksgiving. The National Museum, Independence Hall group, is located on the south side of Chestnut Street, between Fifth and Sixth Streets, and can be reached from the central hotel district and the railroad stations by trolleys or subway trains. A series of free bulletins is issued, which will be mailed upon request.

ASSOCIATIONS AND SOCIETIES IN THE UNITED STATES.

The year of establishment is in parentheses. The other figures are those of membership. For organizations not in this list, see Index. Some in this list appear elsewhere with more detail.

Abolish War, Assoc. to (1915), 7 Wellington Terrace, Brookline, Mass.; 300; Pres. Rev. Charles F. Dole, D. D., 14 Roanoke Ave., Jamaica Plain, Mass.; Sec., Rev. Henry W. Pinkham.

Accountants, Amer. Inst. of (1887), 135 Cedar St., N. Y. C.; 1,866; Pres., E. E. Gore, 111 West Monroe St., Chicago; Sec., A. P. Richardson, 135 Cedar St., N. Y. C.

Acorn, Colonial Order of (1894), 103 E. 86th St., N. Y. C.; 125; Chan., Schuyler Schieffelin, 113 E. 21st St., N. Y. C.; Recorder, C. Wickliffe Throckmorton.

Actors' Church Alliance (1917), Church of the Transfiguration (Little Church Around the Corner); Hon. Pres., Bishop Manning; Pres., Geo. Arliss; Gen. Sec., Rev. W. E. Bentley.

Actors' Equity Assoc. (1913), 45 W. 47th St., N. Y. C.; 12,000; Pres., John Emerson; Sec., Frank Gillmore.

Actors' Fidelity League (1919), 17 E. 45th St., N. Y. C.; 400; Pres., Henry Miller; Sec., Howard Kyle.

Actors' Fund of America (1882), 701 7th Ave., N. Y. C.; 7,368; Pres., Daniel Frohman; Sec., W. C. Austin.

Actuarial Soc. of America (1889), 256 B'way; 348; Pres., A. B. Wood, Sun Life Assurance Co. of Canada, Montreal; Sec., John S. Thompson.

Actuaries, Amer. Inst. of (1909), 305; Pres., Percy H. Evans, Northwestern Mutual Life Insurance Co., Milwaukee, Wis.; Sec., R. C. McCankie, Equitable Life Insurance Co., Des Moines, Iowa.

Advertising Clubs of the World, Assoc't'd (1904), 383 Madison Ave., N. Y. C.; 31,500; Pres., Lou E. Holland; Sec., Jesse H. Neal.

Advertising Managers, Assoc. of Newspaper Classified (1919); 200; Pres., John L. Irwin, Register-Tribune, Des Moines, Iowa; Sec., At. Miller, Nashville Banner, Nashville, Tenn.

Aeronautic Assoc., Nat'l, of U. S. A., Inc. (1922), Washington, D. C.; 4,200; Pres., F. B. Patterson; Sec., Dudley M. Outcalt, 1623 H St., N. W., Washington, D. C.

Agassiz Assoc, Arcadia (1875), Sound Beach, Conn: Pres., Edward F. Bigelow; Sec., Miss Nellie P. Bigelow.

Albany Inst. and Historical and Art Soc. (1791), 125 Washington Ave., Albany, N. Y.; 750; Pres., Dr. John M. Clarke; Sec., Laurence N. McKinney.

Alsaciens-Lorrains d'Amerique, Assoc.,Generale des (1916), 46 W. 46th St., N. Y. C.; 1,500; Founder, Clement Rueff; Sec., Felix Wildenstein.

American Academy in Rome (1894), 101 Park Ave., N. Y. C.; Pres., William R. Mead; Director, Gorham P. Stevens, Rome, Italy; Sec., Roscoe Guernsey.

American Constitutional League (1917), 27 William St., N. Y. C.; 125; Chairman, Ex. Com., Everett P. Wheeler; Sec., Henry Carr.

American Defense Soc., Inc. (1915), 154 Nassau St., N. Y. C.; 3,200; Chairman, Elon H. Hooker; Sec., C. M. Penfield.

American Federation of Arts (1909), 1741 N. Y. Ave., Washington, D. C.; 6,000; Pres., Robert W. De Forest; Sec., Miss Leila Mechlin.

American Federation of Labor (1881), **A. F. of L.** Bldg., Washington, D. C.; Pres., Samuel Gompers; Sec., Frank Morrison.

American-Irish Historical Soc. (1897), 132 E. 16th St., N. Y. C.; 1,500; Pres.-Gen., John J. Lenehan, 192 B'way, N. Y. C.; Sec., Santiago P. Cahill.

American Merchant Marine Library Assoc. (1921), 82 Beaver St., N. Y. C.; 350; Director, Carl W. Shattuck; Sec., Harrison W. Carver, Engineering Socs. Library, 29 W. 39th St., N. Y. C.

American Oriental Soc. (1788); Pres., Albert T. Clay, Yale University, New Haven, Conn.

American-Scandinavian Foundation (1911), 25 W. 45th St., N. Y. C.; 6,000; Pres., Hamilton Holt; Sec., James Creese.

American University Union (1917), Journalism Bldg., Columbia Univ., N. Y. C.; Ch. Board of Trustees, Dr. H. P. Judson, 26 Jackson Pl., Washington, D. C.; Sec., Prof. J. W. Cunliffe.

American Wars, Nat'l Society of (1897), 314 7th St., N. E., Washington, D.C.; 300; Com.-Gen., Rear Admiral Franklin J. Drake, U. S. N.; Recorder-Gen., Lieut. Milo C. Summers.

American Wars, Soc. of (1897), Army and Navy Club, 112 W. 59th St., N. Y. C.; 261 (in N. Y. C.); Commander, Lieut. Col. William T. Starr, 15 W. 55th St., N. Y. C.; Sec., Clarence R. Manning, 144 E. 74th St., N. Y. C.

Americans, United Order of (1893), 301 Colby-Abbot Bldg., Milwaukee, Wis.; 10,285; Nat. Pres., R. C. Sherrard, 700 No. La Salle St., Chicago, Ill.; Sec., Geo. W. Blann.

Anglers League, Inc., United (1904), City College Club Bldg., 46 E. 50th St., N. Y. C.; 1,000; Pres., G. Christman, 266 Manhattan Ave., B'klyn, N. Y.; Sec., C. A. Sommer, 240 Irving Ave., B'klyn, N. Y.

Anti-Cigarette League of N. Y. State (1913), 209 W. 107th St., N. Y. C.; Pres., Jennie Hobson M. Burnett; Sec., Miss S. Carlen.

Anti-Profanity League (1902), Ware, Mass.; 30,000; Pres., Roland D. Sawyer; Gen. Sec., Richard D. Sawyer.

Antiquarian Soc., Amer. (1812), Worcester, Mass.; 235; Librarian, C. S. Brigham.

Anti-Saloon League of Amer. (1893), Westerville, Ohio; Gen. Supt., Rev. F. S. McBride; Sec., Hon. S. E. Nicholson, LL. D., 532 17th St., N. W., Washington, D. C.

Anti-Saloon League of N. Y. (1899), Suite 701, 370 5th Ave., N. Y. C.; Pres., Bishop A. W. Leonard, LL. D., 202 Morris St., Buffalo, N. Y.; Supt., Arthur J. Davis; Sec., Rev. Frederick L. Fahley, 287 4th Ave., N. Y. C.

Arbitration Soc. of Amer., Inc. (1922), 115 B'way, N. Y. C.; 1,200; Act. Pres., Moses H. Grossman; Exec. Sec., J. W. Slaght.

Archaeological Inst. of Amer. (1879), Washington, D. C.; 2,000; Pres., Prof. R. V. D. Magoffin, N. Y. Univ., N. Y. C.; Sec., Prof. Rollin Tanner.

Archery Assoc. of the U. S., Nat'l (1879), 616 Old South Bldg., Boston, Mass.; 150; Pres., Homer S. Taylor, Box 239, Greenfield, Mass.; Sec., Louis C. Smith.

United Press Assoc. (1907), 63 Park Row, N. Y. C.; Pres., K. A. Bickel; Sec., R. H. Fancher.

United Workmen of North Dakota, Grand Lodge of the Ancient Order of (1895), A. O. U. W. Bldg., Fargo, No. Dak.; 15,636; Grand Master Workman, B. C. Marks, Fargo, N. Dak.; Sec., E. J. Moore.

Universalist Church, Young Peoples' Christian Union of the (1889). 176 Newbury St., Boston, Mass.; 4,500; Pres., Rev. Ellsworth C. Reamon, 8th St., So., and 2d Ave., Minneapolis, Minn.; Sec., Donald M. Sleeper, 352 Boston Ave., Medford Hillside, Mass.

Universalist General Convention (1866), 176 Newbury St., Boston, Mass.; 60,000; Chmn. Board of Trustees, Rev. John Murray Atwood, D. D., Canton, N. Y.; Sec., Rev. Roger F. Etz.

University Extension Assoc., Nat'l State House, Boston, Mass.; 37 universities; Pres., H. G. Ingham, Univ. of Kansas, Lawrence, Kan.; Sec., James A. Moyer, State Dept. of Education, Boston, Mass.

University Professors, Amer. Assoc. of (1915), 222 Charles River Road, Cambridge, Mass.; 5,200; Pres., A. O. Leuschner, Univ. of Cal., Berkeley, Cal.; Sec., Prof. H. W. Tyler.

University Women, Amer Assoc. (1882), 1634 I St. N. W., Wash., D. C.; 20,000; Pres., Dr. Aurelia Henry Reinhardt, Mills College, Cal.; Exec. Sec., Dr. Mina Kerr.

Urban League, Nat'l. (1911), 127 E. 23d St., N. Y. C.; 40; Chairman, L. Hollingsworth Wood, 501 5th Ave., N. Y. C.; Sec., Eugene K. Jones.

Vedanta Soc. of the City of N. Y. (1894), 34 W. 71st St., N. Y. C.; Pres., Swami Bodhananda; Sec., Miss Ada L. Stuart, 504 W. 112th St., N. Y. C.

Veteran Police Assoc., N. Y. (1891), Police Station, 156 Greenwich St., N. Y. C.; 4,000; Pres., Bernard Keleher; Sec., John J. Churchill.

Veterans of Foreign Wars (1899), 616 N. 7th St., Kansas City, Kan.; 100,000; Com.-in-Chief, Brig. Gen. John Dunn, Boston, Mass.; Sec., Rcuel W. Elton.

Veterans of the World War, Disabled Amer. (1920), 2840 Melrose Ave., Cincinnati, Ohio; Nat. Com., Frank J. Irwin; Nat. Adjutant, Raymond A. Lasance.

Veterinary Medical Assoc., Amer. (1863), 735 Book Bldg., Detroit, Mich.; 4,000; Pres., Dr. C. H. Stange, Iowa State College, Ames, Iowa; Sec., Dr. H. Preston Hoskins.

Vocational Education, Nat'l Soc. (1908), Harrisburg, Pa.; 4,300; L. H. Dennis, State Dept. of Public Education, Harrisburg, Pa.

Volunteers of Amer. (1896), 34 West 28th St., N. Y. C.; 10,500; Pres., Gen. Ballington Booth; Sec., J. W. Merrill.

War Mothers, Amer. (1917), 150 Main St., White Plains, N. Y.; 1,200; N. Y. State War Mother, Mrs. R. Emmet Digney; Sec., Mrs. Lydla Broderick, 302 Convent Ave., N. Y. C.; Nat'l War Mother, Mrs. H. H. McCluer, Kansas City, Mo.

Water Color Soc., Amer. (1867), 215 W. 57th St., N. Y. C.; 135; Pres., Elliot Clark; Sec., G. P. Ennis.

Waterways Assoc., N. Y. State (1913), Pres., Henry W. Hill, Mutual Life Bldg., Buffalo, N. Y.; Sec., George Clinton jr., 1012 Prudential Bldg., Buffalo, N. Y.

Weights and Measures, Amer. Inst. of (1917), 115 B'way., N. Y. C.; 600; Pres., W. R. Ingalls; Sec., C. C. Stutz.

West End Assoc. (1884), 31 Nassau St., N. Y. C.; 650; Pres., Wm. D. Gaillard; Sec., A. W. McEwan, 2161 Bathgate Ave., N. Y. C.

Westchester County Children's Assoc., Inc. (1914), Rm. 410, 15 Court St., White Plains, N. Y.; 2,000; Pres., Bd. of Dir., Mrs. Paul R. Reynolds; Sec., Mrs. Edith J. Mitchell.

Wholesale Grocers' Assoc., of the U. S., Nat'l. (1906), 6 Harrison St., N. Y. C.; 1,500; Sec., M. L. Toulme.

Woman Suffrage Alliance, Internat'l (1904), 11 Adams St., W. C., London, England; 32 nat'l. assocs; Pres., Mrs. Marjorie Corbett Ashby; Sec., Mrs. Katharine Bompas. Honorary Pres., Mrs. Carrie Chapman Catt, 171 Madison Ave., N. Y. C.

Woman's Board of Missions (Congregational) (1868), 14 Beacon St., Boston, Mass.; 64,500; Pres., Mrs. Franklin Warner, 30 Ridgeview Ave., White Plains, N. Y.; Sec., Miss Helen B. Calder.

Woman's Christian Temperance Union, Nat'l. (1874), 1730 Chicago Ave., Evanston, Ill.; 750,000; Pres., Miss Anna A. Gordon; Sec., Mrs. Frances P. Parks.

Woman's Party, Nat'l. (1913), Capitol Hill, Washington, D. C.; Nat. Pres., Mrs. O. H. P. Belmont; Sec., Miss Anita Pollitzer.

Women for Home Missions, Council of, 156 5th Ave., N. Y. C.; Pres., Mrs. John Ferguson; Exec. Sec., Miss Florence E. Quinlan.

Women Voters, N. Y. League of (1919), 1625 Grand Central Terminal Bldg., N. Y. C.; State Chairman, Mrs. F. Louis Slade; Sec., Mrs. Edgerton Parsons.

Women's Clubs, General Federation of (1890), 1734 N. St. N. W., Washington, D. C.; 1,410,950; Pres., Mrs. T. G. Winter, 2617 Dean Boulevard, Minneapolis, Minn.; Director of Headquarters, Miss Lida Hafford.

Women's Clubs, N. Y. State Federation of (1894); 400,000; Pres., Mrs. J. H. Booth, Cumberland Ave., Plattsburg, N. Y.; Sec., Mrs. C. H. North, 189 Cornelia St., Plattsburg, N. Y.

Women's Educational and Industrial Union (1877), 264 Boylston St., Boston, Mass.; 5,443; Pres., Miss Margaret McGill; Exec. Sec., Miss Elizabeth W. Schermerhorn.

Women's Nat'l Republican Club (1921), 8 E. 37th St., N. Y. C.; 2,700; Pres., Mrs. Charles H. Sabin; Sec., Mrs. Arthur E. Lott, 11 W. 35th St., N. Y. C.

Women, U. S. A., Nat'l Council of (1888), 3125 Lafayette Ave., St. Louis, Mo.; 10,000,000; Pres., Mrs. Philip N. Moore; Sec., Mrs. Flo J. Miller, Monticello, Ill.

Women Voters, Nat'l League of (1920) 532 Seventeenth St., N. W., Washington, D. C.; Pres., Miss Belle Sherwin; Sec., Miss Elizabeth Hauser, 420 N. State St., Girard, Ohio.

Women's National Democratic Club, Inc. (1917) Hotel Wellington, 7th Ave. and 55th St., N. Y. C.; 1,250; Pres., Lillian R. Sire; Sec., Marion Lawler.

Women's Nat'l Republican Club (1921), 6 E. 37th St., N. Y. C.; 2,750; Pres., Mrs. Charles H. Sabin, 22 E. 47th St., N. Y. C.; Sec., Mrs. Arthur E. Lott.

Woman's Relief Corps, Nat'l (1883), Pres., Mrs. Grace B. Willard, 1401 N. Fairfax Ave., Los Angeles, Cal.; Sec., Mrs. Kate Reed Humphreys, 2321 Buckingham Road, Los Angeles, Cal.

Woodmen Circle, Supreme Forest (1892), W. O. W. Bldg., 14th and Farnam Sts., Omaha, Neb.; 137,207; Sup. Guardian, Mary E. LaRocca, Rm. 311, above address; Sup. Clerk, Dora Alexander, Rm. 411, same address.

Woodmen of the World, Sovereign Camp, (1890), W. O. W. Bldg., Omaha, Neb., 510,834; Pres., W. A. Fraser; Sec., J. T. Yates.

Woodrow Wilson Foundation (1922), 17 E. 42d St., Rm. 1108, N. Y. C.; 100,000; Pres., Hon. Norman H. Davis; Sec., Mrs. Katrina Ely Tiffany.

Wool Manufacturers, Nat'l Association of (1864), 50 State St., Boston, Mass.; Pres., John P. Wood, 521 N. 22d St., Phila., Pa.; Sec., Walter Humphreys

World Agriculture Society (1919) Amherst, Mass.; 3,000; Pres., Dr. Kenyon L. Butterfield, Mich. Agri. Col., East Lansing, Mich.; Sec., Laurence H. Parker.

World's Student Christian Federation (1895), 347 Madison Ave., N. Y. C.; 243,735; Chairman, John R. Mott; Sec., Miss Ruth Rouse.

Yacht Racing Assoc. of L. I. Sound (1895), 25 W. 43d St., N. Y. C.; 28 yacht clubs; Pres., C. D. Mallory, 11 B'way., N. Y. C.; Sec., C. Sherman Hoyt.

Yellowstone Trail Assoc. (1912), 816 Second Ave., So. Minneapolis, Minn.; 8,143; Gen. Man., H. O. Cooley; Sec., B. R. Mandel.

Young Judaea, Nat'l. (1908), 114 5th Ave., N. Y. C.; 20,000; Pres., Moe Turman; Sec., D. Leonard Cohen.

Young Men's Christian Assoc., Internat'l Committee (1866), 347 Madison Ave., N. Y. C.; 988,522; Chmn., James M. Spears, Montclair, N. J.; Gen. Sec., Dr. John R. Mott.

Young Men's Hebrew Assoc. (1900), 92d St. and Lexington Ave., N. Y. C.; 3,000; Pres., Jack Nadel; Sec., E. H. Paul, 52 William St., N. Y. C.

Young Women's Hebrew Assoc. (1903), 31 W. 110th St., N. Y. C.; 6,000; Exec. Dir., Mrs. Ray F. Schwartz; Sec., Mrs. Samuel I. Hyman.

Zionist Organization of Amer. (1920); 114 5th Ave., N. Y. C.; 50,000; Chairman, Louis Lipsky.

Zoologists, Amer. Soc. of (1890), 500; Pres., Prof. Ross G. Harrison, Yale Univ., New Haven, Conn.; Sec., W. C. Allee, Zoology Bldg., Univ. of Chicago, Chicago, Ill.

SOBRIQUETS OR BY-NAMES OF CITIES IN THE UNITED STATES.

Albany—The Capital City.
Atlanta—Gate City of South.
Baltimore—The Monumental City.
Birmingham—City Beautiful.
Boston—Hub, Athens of America.
Brooklyn—The City of Churches.
Buffalo—Queen City of Lake.
Charleston, S. C.—Palmetto City.
Chicago—The Windy City.
Cincinnati—Queen City, Porkopolis.
Cleveland—The Forest City.
Dallas—The City of the Hour.
Dayton—The Gem City.
Denver—The City of the Plains.
Des Moines—City of Certainties.
Detroit—The City of the Straits.
Duluth—The Zenith City of the Unsalted Sea.
Galveston—The Oleander City.
Hannibal, Mo.—The Bluff City.
Hartford—Charter Oak City.
Indianapolis—The Railroad City.
Jacksonville—The Gateway City.
Kansas City, Mo.—Heart of Amer.
Keokuk, Iowa—The Gate City.
Little Rock—The City of Roses.
Los Angeles—City of the Angels.
Louisville—The Falls City.
Lowell—The City of Spindles.
Lynn—The City of Shoes.
Madison, Wis.—The Lake City.
Memphis—The Bluff City.
Milwaukee—Foam City, Cream City.
Minneapolis—City of Lakes.
Nashville—The City of Rocks.
Newark—Newark Knows How.
New Bedford—The Whaling City.
New Haven—The City of Elms.
New Orleans—The Crescent City.
New York—The Empire City, Gotham, The Metropolis.
Omaha—Gate City of West.
Paterson—Silk City, Amer. Lyons.
Philadelphia—The City of Brotherly Love and The Quaker City.
Pittsburgh—The Iron City and The Smoky City.
Portland, Me.—The Forest City.
Portland, Ore.—The Rose City.
Providence—Gateway of Southern New England.
Reading—The Pretzel City.
Rochester—The Flour City.
St. Joseph—The City Worth While.
St. Louis—The Mound City.
St. Paul—Saintly City, Gem City.
Salt Lake—City of the Saints.
San Francisco—Golden Gate City.
Savannah—Forest City of South.
Scranton—The Electric City.
Seattle—The Queen City.
Springfield, Ill.—The Flower City.
Springfield, Mass.—City of Homes.
Syracuse—The Salt City.
Toledo—The Corn City.
Troy—The Collar City.
Washington—The City of Magnificent Distances.
Worcester—Heart of Bay State.

UNITED STATES COAST AND GEODETIC SURVEY.

The Coast and Geodetic Survey of the Department of Commerce is charged with the surveys of the coasts and contiguous waters of the United States and of areas under the jurisdiction thereof; the extension of geodetic surveys in the form of triangulation and precise levelling over the United States and areas under the jurisdiction thereof; and the magnetic survey of the United States and areas under the jurisdiction thereof.

The results obtained are published in annual reports and in special publications; charts upon various scales, including sailing charts, general charts of the coast, harbor charts, outline maps, tide tables and current tables issued annually in advance; coast pilots with sailing directions covering the navigable waters; notice to mariners issued weekly as a joint publication of the Coast and Geodetic Survey and the Bureau of Lighthouses, and containing current information necessary for safe navigation; magnetic charts and publications; catalogues of charts and publications and such other publications as may be required.

STATISTICS AS OF JULY, 1924.

There are about 371,000 square miles of precise triangulation and 3,450 linear miles of precise traverse completed in the United States. Nearly as much again of this precise control work remains to be done before it is brought within fifty miles of every place in the United States.

About 48,000 miles of precise levels have been completed in the United States, and there are about 21,000 miles still to be done to bring the levels within fifty miles of every place in the United States.

A general magnetic survey of the United States has been made, with magnetic observations at over 5,000 stations, including nearly every county seat

The United States of America.

(FEDERAL REPUBLIC.)

	Continental.	*Total.*
AREA, square miles	3,026,789	3,743,510
POPULATION, 1920	105,710,620	117,859,495
POPULATION, 1925, est.	113,493,770 (37.5 to sq. m.)	
WEALTH, 1923 Census, est.	$320,803,862,000	

The United States of America, oldest republic, is bounded on the north by Canada, on the east by the Atlantic Ocean and the Gulf of Mexico, on the south by the Gulf of Mexico and Mexico, and on the west by the Pacific Ocean. It comprises 48 States and the Federal District of Columbia. This is called for convenience in reference Continental United States. Its non-contiguous areas are the Territories of Alaska and Hawaii; Porto Rico, the Philippine Islands, the Virgin Islands of the United States, American Samoa, Guam, Wake and scattered islands in the Pacific; and the Panama Canal Zone, all aggregating 716,721 square miles, which, added to the 3,026,789 square miles of continental United States, give a total of 3,743,510 square miles.

The population of continental United States, Census of 1920, was 105,710,620; of the non-contiguous areas (partly estimated) 12,148,875, the grand total being 117,859,495. The estimate of the Census Bureau of the population of Continental United States for July 1, 1925, is 113,493,770. (See Index for population tables.)

The general topography of continental United States is so varied, and the climate, natural resources and racial elements also, that the country may be said to be several countries articulated in one national body. In the eastern part, excepting on the south, are several mountain ranges of the Appalachian system, rising never to more than 6,000 to 7,000 feet of altitude, and ranging north and south. The Adirondacks, in northern New York State, are declared by the United States Geological Survey to have been the first land that rose from the original chaos in the western world, being therefore, the oldest mountains in the United States.

Sweeping westward from the eastern mountains is a vast, fertile plain, the valley of the Mississippi River, a thousand miles wide and about as long, to where the mountain formation again is found, the Rocky Mountain range, highest in North America, beyond which westwardly is a tableland of mean elevation of 3,000 to 5,000 feet, and still further to the westward are other mountain ranges of lesser altitudes, with a low coast range skirting the shores of the Pacific Ocean.

The United States has seven great rivers—the Hudson, entering the Atlantic at the harbor of New York City in the northeastern corner of the country; the Delaware, entering the Atlantic through Delaware Bay, midway down the coast; the Potomac, entering the Atlantic through Chesapeake Bay, just south from Delaware Bay; the Mississippi, greatest of North American rivers in its relationship to civilization, rising in Minnesota, near to Canada, entering the Gulf of Mexico on the southern side of the country; the Ohio, flowing from the eastern mountains westwardly to join the Mississippi in the east central part of the country; the Missouri, which flows from the northwestern mountains eastwardly to the Mississippi, being confluent with that stream just north of where the Ohio joins it; the Columbia, which rises in British territory, and flows across a vast tableland west of the Rocky Mountains, into the Pacific Ocean one-third of the way down that coast; the Colorado, non-navigable, which rises in the State of Colorado, flows in general course southwestwardly through Utah and Arizona, and between Arizona and California, into the Gulf of California, in Mexico.

Besides these streams, there are many of considerable and navigable size in the areas east from the Rocky Mountains, and the great St. Lawrence River, as the outlet of the Great Lakes on the northern border between the United States and Canada, skirts the northeastern boundary of the United States.

The Great Lakes, Superior, largest inland body of fresh water in the world; Huron, Erie, Michigan, and Ontario, are a striking phase of the geological formation, and carry immense passenger and freight tonnage. The Mississippi, Potomac, Delaware, Hudson and Columbia Rivers are navigable for considerable distances inland from the sea, and the Missouri for light-draught craft quite a distance up from the Mississippi.

Of the lesser rivers, the most important are the Connecticut, Susquehanna, James, Cumberland, Tennessee, Tombigbee, Warrior, Arkansas and Red in the eastern half of the country, and the Sacramento on the Pacific Coast; while the Rio Grande, rising in Colorado, non-navigable, save for 61 miles from its mouth, is the eastern half boundary between the United States and Mexico.

The largest river under the American flag is the Yukon in Alaska, which rises in small lakes in the Dominion of Canada, flows northwestwardly into Alaska, then westwardly and then southwestwardly into Norton Sound, which in turn makes into Bering Sea. It is navigable for more than 2,000 miles inland.

The climate of the United States is of every gradation, from the north temperate, with rather cold winters and pleasant summers, to the sub-tropical, with every variety of flora suitable to so wide a range of latitude. Eastwardly and westwardly, even greater variation is found. For there are regions of normal moisture precipitation in the northeast, of excessive precipitation in the southeast, of normal precipitation in the central tableland regions, and then of varying degrees of aridity and moistness as one proceeds westwardly, until on the coast of Oregon, at Tillamook, is the heaviest average precipitation in the United States—120 inches a year.

The Southwestern United States is marked by several almost deserts, susceptible of reclamation by irrigation, some of which were the beds of great inland salt water seas, at some points the present surface elevation being lower than the surface of the ocean.

The area of continental United States was acquired by various purchases, treaties and in wars, from England, France, Spain and Mexico, and the dependencies from Russia, Spain, Panama, the former Hawaiian Government, and Denmark.

The Thirteen Original States as at present constituted have an area of 892,135 square miles, and were colonies, many with a vast indeterminate hinterland, when the War of the Revolution was fought against England, 1776-83.

NATURAL RESOURCES.

In natural resources, the United States is one of the richest countries in the world. Its coal, oil, timber and precious metals exist in vast natural stores, and practically every base mineral known to civilization is deposited in its areas. The timber resources have been depleted seriously; but the Federal Forest Service has begun reforestation, and has matured plans to make the natural timber lands perpetual by replanting.

Improvement also of the rivers and harbors has proceeded to a large extent, although by no means as extensive as similar development in Europe. The great navigable rivers mentioned heretofore have been treated by the engineers for removal of obstructions in many places, great jetties have been built at the mouths of the Columbia and Mississippi, large terminal facilities provided at many of the ports, and plans are working out for the perfection of all of them according to modern standards. The most important domestic canal is the New York State Barge Canal; many others were permitted to lapse into non-use when railway transport absorbed attention so exclusively in the last half of the last century. The natural conditions, however, would permit of almost illimitable canal development if more artificial waterways are needed.

Originally an agricultural people, the presence of so vast natural stores of minerals and timbers, together with increased "pressure of population on land," has operated to induce great industrial development, until the United States is to-day one of the world's greatest merchants on the high seas, its steel, rubber goods, timber, cotton, machinery, foodstuffs and many other commodities going to the ends of the earth.

The increase of industrial interest has been coincidental with and in large part the cause of the very heavy immigration which came in before the present immigration restriction law was enacted. Many came to work in the mines and factories and in construction of railways and industrial works. Up to the latter part of the last century, the population of the United States was in a majority rural—that is, dwelt on farms or in communities of fewer than 2,500 inhabitants. The rural population, which in 1910 was 54.2 per cent. of the total, was in 1920 48.6 per cent., a relative drop, but the number 51,406,017 was an increase of 1,599,871, or 3.2 per cent.

The Census Bureau, noting in twenty-five States,

especially large in the East, a decline in the number of farms and farm acreage in the decade, found that the most important single reason for this appears to have been a scarcity of farm labor and the relatively high wages paid in manufacturing centres, which frequently induced farmers themselves to leave their farms. There was also a continuation of the tendency, especially in New England, toward the abandonment for agricultural purposes of low grade land, much going to pasture, but large areas being permitted to grow up to brush or forests. In certain parts of the cotton belt the spread of the cotton boll-weevil has interfered so seriously with profitable cotton farming as to result in the reduction both of farms and farm acreage; where the land has been used for other crops less labor has been required. Large areas of farm land have been taken over by development companies for oil wells or mining operations, and the extension of the areas of cities and manufacturing towns has caused a further reduction.

AGRICULTURAL DEVELOPMENT.

The agricultural interests of the country are very large. The Census Bureau reported for 1920 that of the approximate land area of 1,903,215,360 acres, all farm lands contained 955,863,715 acres; improved lands, 503,073,067 acres, or 52.6 per cent. of all the land in the farm lands classification; that the value of all farm property was $77,924,100,338; of land alone, $54,829,563,059; of buildings, $11,486,439,543; of implements, $3,594,772,928; and of livestock, $8,013,324,808; the value of all farm crops in 1919 being $14,755,364,894, against $9,523,514,211 in 1909, the increase having been due largely to very much higher prices.

The number of farms was 6,448,343. Those under 20 acres numbered 796,535; from 20 to 49 acres, 1,503,732; from 50 to 99 acres, 1,474,745; from 100 to 174 acres, 1,449,630; from 175 to 499 acres, 1,006,477; from 500 to 999 acres, 149,819; 1,000 acres and over, 67,405. Owners numbered 3,925,090, and tenants, 2,454,804. White farmers numbered 5,498,454; colored farmers, 949,889, and foreign-born farmers, 581,068.

It is interesting to note that 2,146,362 automobiles were on these farms (being 333 per 1,000 of all farms); also 139,169 motor trucks and 246,083 tractors. These farms were supplied with telephones to the number of 2,498,493 (38.7 per cent. of all the farms being supplied). 10 per cent., or 643,899, had water piped into the house, and 7 per cent., or 452,620, had gas or electric light.

The acreage in 1924 under winter wheat was 36,898,000; spring wheat, 16,920,000; corn, 105,604,000; oats, 41,625,000; barley, 7,558,000; rye, 4,337,000; buckwheat, 794,000; potatoes (white), 3,753,000; potatoes (sweet), 990,000; flax, 3,375,000; rice, 899,000; beans, 1,357,000; grain sorghums, 5,459,000; tobacco, 1,702,000; peanuts, 950,000; hay (tame), 61,020,000; timothy, 10,796,000; clover, 8,355,000; alfalfa, 10,217,000; sugar beets, 917,000; and cotton, 40,403,000.

The value of all farm crops in 1923 was estimated by the Department of Agriculture at $9,953,000,000, and of all animal products at $6,111,000,000, making the total farm production, omitting crops fed to livestock, $12,204,000,000.

The value of mining products in 1923 was given by the United States Geological Survey as $6,018,000,000, an increase of 29 per cent. over 1922 and 45 per cent. over 1921, but a decrease of 14 per cent. from 1920, when prices were at the peak.

The petroleum output for 1923 broke all records, the total approximating 733,000,000 barrels, an increase of 32 per cent. over 1922, double the production in 1918 and 39,000,000 barrels more than the entire world output in 1920. The average daily production reached a maximum of 2,161,000 barrels in November.

The coal ouput for 1923 was 545,000,000 short tons, a figure exceeded only in 1917, 1918 and 1920.

The gold output for 1923 was $51,734,000, and silver, 73,355,000 ounces.

The production of copper in 1923 was 1,467,000,000 pounds, 51 per cent. greater than in 1922.

A new record in the production of pig iron was made in 1923 (38,363,509 long tons, valued at $935,908,540) and steel, 44,943,696 long tons, nearly equalling the record of 1917.

The total value of the products manufactured in the United States returned in the Census of 1921 was $43,653,282,833. (See Index for tables.)

TRADE AND COMMERCE.

Europe is the largest customer of the United States, in 1923 absorbing 50.7 per cent. of our exports, of which the United Kingdom took 21.2 per cent.; Germany, 7.6 per cent.; France, 6.5 per cent.; and Italy, 4 per cent. Latin America took 27.7 per cent.; Canada, 15.5 per cent.; Cuba, 4.6 per cent.; and Japan, 6.4 per cent. Canada sold the United States in 1923, 11 per cent. of our imports; the United Kingdom, 10.7 per cent.; Cuba, 9.9 per cent.; Japan, 9.2 per cent.; the British East Indies, 8.2 per cent.; China, 5.6 per cent.; Germany, 4.3 per cent.; and France, 3.9 per cent.; with Brazil and Mexico closely following.

The trade with Latin America, which reached its peak in 1920, with exports of $1,564,128,856 and imports of $1,807,475,121, declined in 1921 to exports of $793,941,427 and imports of $712,717,841, and declined further in 1922 to exports of $558,368,706 and imports of $813,624,565, under post-war market readjustment. In 1923 exports increased 25 per cent. to $693,803,176; and imports 29 per cent. to $1,049,876,666.

This trade in 1923 showed an increase over 1922 of 29 per cent. in imports ($1,049,876,666); and of 24.6 per cent. in exports ($693,803,176). The total trade ($1,743,679,842) is an increase of 121 per cent. over the fiscal year 1913-14.

The amount of foreign trade in dollars was:

Year. (Fiscal.)	Imports.	Exports.	Excess of Exports.
	Dollars.	*Dollars.*	*Dollars.*
1920-21..	2,556,869,711	6,516,510,033	3,959,640,322
1921-22..	3,073,353,263	3,771,156,489	697,303,226
1922-23..	3,780,958,965	3,956,733,373	175,774,408
1923-24..	3,554,138,268	4,311,283,740	757,145,472

The amount of gold and silver imported and exported during the past three fiscal years was:

	Imports.		Exports.	
	Gold.	Silver.	Gold.	Silver.
	Dollars.	*Dollars.*	*Dollars.*	*Dollars.*
1921-22	468,318,273	70,684,298	27,345,282	62,694,677
1922-23	284,089,550	64,947,025	49,021,975	55,906,956
1923-24	417,025,638	79,939,985	10,206,941	98,785,586

Secretary of Commerce Herbert Hoover estimates that during the calendar year 1923 "current invisible items" of foreign trade; *i.e.*, amounts paid out in foreign countries through tourists, remittances of immigrants, payments for foreign shipping, and various services, make a total of $1,162,000,000, while interest received on money owed, as by foreign investors and by foreign governments, together with payments for use of our ships by foreigners and expenditures of foreigners in the United States, amounted approximately to $792,000,000. Therefore, he estimates the "invisible" balance against the United States at $370,000,000. Foreign investments in the United States during 1923 he places at $394,000,000; and American purchases of foreign securities at $410,000,000.

The United States had on July 1, 1924, a merchant marine of 5,128 vessels of which 3,892 were steam, 1,041 sailing, and 195 motor, with a total tonnage of 15,956,967. In 1923, 88 ships of 172,817 tons were built.

The United States leads in oil-using vessels, having on July 1, 1923, 399 tankers of 2,497,675 tons, and 1,709 steamers fitted for burning oil fuel with a tonnage of 8,798,776 tons, more than half the world total.

There entered and cleared at American ports in 1923-24, a total tonnage of 135,540,540, of which 58,315,530 was American and 77,225,010 was foreign.

The total railroad mileage Jan. 1, 1923, was 250,413, of which Class I. carriers (*i. e.*, whose annual operating revenues exceed $1,000,000) operated 234,976 miles. The capitalization of the Class I. railroads was $17,015,346,711; operating revenue, $6,356,890,737; operating expense, $4,943,928,145; net operating revenue, $977,657,368; dividends declared, $334,545,800; taxes paid, $301,413,784; number of paying passengers carried, 967,409,205; tons of revenue paying freight, 1,840,954,570. The number of employees was 1,745,233, whose average wage was $1,624.18.

POPULATION DISTRIBUTION.

The United States has been known as a melting-pot of the peoples of the earth, its population at first of the ancient races such as the Aztecs, then of the American Indian, and in the first days of settlement by white people from Europe, English predominating. From the beginning immigration has been numerous, and attained a million persons a year up to the beginning of the World War, Chinese and Japanese being rigidly restricted. (See Index for tables.)

In the industrial centres, large numbers of Austrians, Italians, Germans and not a few Britons, with very many Slavs, have settled; and in the agricultural sections Scandinavians are numerous in the North Central States, and Germans from the Great Lakes to the border States.

The 1920 census assigned of the total 105,710,620 of population, native white, 81,108,161; native parentage, 58,421,957; foreign parentage, 15,694,-

539; with 6,991,665 of mixed parentage. Those of foreign parentage and of recently immigrated foreign blood number more than 30,000,000. (See Index for tables.)

The increase in population in the decade 1910-20 was 13,738,354. Twelve States—New York, Pennsylvania, California, Ohio, Michigan, Illinois, Texas, New Jersey, Massachusetts, Oklahoma, North Carolina and Minnesota, in that order—supplied 8,979,722 of that increase, while three—Mississippi, Nevada and Vermont—returned a decrease totalling but 14,494. During this period the urban communities absorbed 7,000,000 of the 9,000,000 increase in native whites of native parentage, and the aggregate population of the sixty-eight cities of over 100,000 inhabitants comprised more than one-quarter of the entire population of the United States.

The Census makes use of nine subdivisions in its classification of occupations. These subdivisions and their importance, in the sense of number of workers in each, at the Census of 1920 are:

Agriculture, forestry, animal husbandry	10,953,158
Extraction of minerals	1,090,223
Manufactures and mechanical industries	12,818,524
Transportation	3,063,582
Trade	4,242,979
Public service (not elsewhere classified)	770,460
Professional service	2,143,889
Domestic and personal service	3,404,892
Clerical	3,126,541
Total	41,614,248

The first three groups, agriculture, mining, and manufactures, represent the basic occupations, and upon the location of these industries depends the location of the other six groups. If manufacturing settles in a particular centre, transportation, trade, public, professional and domestic service and clerical workers distribute themselves accordingly.

DEFENSE.

By gradual increase of power as well as increase of legal authority the President of the United States is the most potent governmental head in the world. Under the Constitution as originally interpreted the President had relatively little initiative but received direction by the Congress in all important matters, especially when they touched foreign affairs. In the last 50 years the balance has changed to a large degree, until the Executive establishment now exercises power little dreamed of when the Republic was established.

The Army of the United States has been greatly reduced by reorganization and on June 30, 1924, numbered 11,436 officers and 121,108 enlisted men out of the 12,000 officers and 125,000 men authorized by act of June 30, 1922. In addition there is a force of 7,115 Philippine Scouts.

The Navy, on Sept. 1, 1924, had a personnel of 8,126 officers and 87,327 men, and had in commission these vessels:

18 battleships; 5 cruisers, 2d line; 8 light cruisers, 1st line; 3 light cruisers, 2d line; 1 aircraft carrier, 2d line; 2 mine layers, 2d line; 103 destroyers, 1st line; 6 light mine layers; 44 submarines, 1st line; 37 submarines, 2d line; 22 Eagle boats; 29 subchasers; 9 gunboats; 6 converted yachts; 6 destroyer tenders; 8 submarine tenders; 2 repair ships; 3 store ships; 1 aircraft tender; 2 colliers; 10 oil tankers; 2 ammunition ships; 5 cargo ships; 2 transports; 2 hospital ships; 30 fleet tugs; 33 mine sweepers; 296 airplanes.

Under construction were: 2 aircraft carriers, 1st line; 2 light cruisers, 1st line; 1 repair ship; 1 destroyer tender; 1 submarine tender; 6 submarines, 1st line; 3 fleet submarines, 1st line; 1 mine laying submarine.

Navy Yards are maintained at: Portsmouth, N. H.; Boston, Mass.; Brooklyn, N. Y.; Philadelphia, Pa.; Washington, D. C.; Norfolk, Va.; Charleston, S. C.; Mare Island, Cal.; Bremerton, Wash.; Pearl Harbor, T. H.

The national wealth of the United States on Dec. 31, 1922, as shown by a survey by the Census Bureau, was $320,863,862,000, an increase of 72.2 per cent. over 1912 ($186,299,664,000). The per capita wealth of the nation increased from $1,950 to $2,918 in ten years, or 49.6 per cent. It is pointed out, however, that the total increase is but little more than the principal indices of price levels. (See Index for tables.)

The volume of paper money in circulation on June 30, 1924, was: United States notes, $342,420,469; Federal Reserve notes, $2,338,851,085 (secured by $383,434,000 in commercial paper and $2,118,093,000 in gold); Federal Reserve bank notes, $10,402,272 and National bank notes, $759,720,728 (both issues secured by United States bonds and other securities held by the Treasury of the United States. Gold certificates in circulation amounted to $1,218,350,659 and silver certificates $408,365,410. Gold in circulation amounted to $705,411,197; silver dollars $76,062,648, and subsidiary silver $269,516,346.

The holdings of gold in the United States as of June 30, 1924, totaled $4,490,716,239, or almost half of the total stock of monetary gold in the world, estimated by the Director of the Mint to be $9,210,007,000.

The money of the United States is accepted at its gold par anywhere in the world. The circulating medium varies with the needs of business, by reason of the operation of the quasi-public Federal Reserve System, which provides a flexible method of expansion and contraction according as conditions change, and a co-ordination of the business credit of the country in a reservoir, precluding, it is held, the possibility of the former periodic panics.

The United States had a gross debt of $26,596,701,684 on Aug. 31, 1919, when the war debt was at its peak. This on June 30, 1924, had been reduced to $21,015,401,508. The Government's ordinary receipts in the fiscal year 1922-23 amounted to $4,007,135,480, and ordinary expenditures to $3,294,627,529, and in 1923-24 ordinary receipts $4,012,044,702 and ordinary expenditures $3,048,677,965.

The resources of the 8,085 national banks on June 30, 1924, amounted to $22,565,919,000; total deposits, $15,009,063,000. The deposits in the 1,700 savings banks totalled over seven billion dollars.

The banking power of the United States represented by the capital surplus, deposits and circulation of its approximately 30,600 banking institutions (including the twelve Federal Reserve Banks, the national banks, the savings banks and about 20,600 State banks, trust companies and private banks) is estimated at about sixty billions of dollars.

The North, with 60.2 per cent. of the total population of the United States in 1920, comprises only 30.9 per cent. of the total area. The corresponding proportions for the South are far less divergent, being 31.3 per cent. for population and 29.8 per cent. for area. For the West, in which only 8.4 per cent. of the total population of the United States was enumerated in 1920, the proportion of the total area is 39.3 per cent. The region east of the Mississippi River, with 70 per cent. of the population in 1920, occupies only 29.1 per cent. of the area of the country, whereas the region west of the Mississippi, with 30 per cent. of the population, comprises 70.9 per cent. of the area.

TERRITORIAL EXPANSION OF THE UNITED STATES.

The area of the original thirteen States (1790) was 892,135 square miles.

DIVISION.	Yr.	Added. Square Miles.	DIVISION.	Yr.	Added. Square Miles.	DIVISION.	Yr.	Added. Square Miles.
Louisiana purchase.	1803	827,987	Gadsden purchase.	1853	29,670	Panama Canal Zone	1904	527
Gained through			Alaska	1867	590,884	Danish West Indies		
treaty with Spain	1819	13,435	Hawaiian Islands	1898	6,449	(now Virgin Isl.)	1917	132
Florida	1819	58,666	Porto Rico	1899	3,435			
Texas	1845	389,166	Guam	1899	210	Total added area	....	2,851,375
Oregon	1846	286,541	Philippine Islands	1899	115,026	Total United States in-		
Mexican cession	1848	529,189	American Samoa	1900	77	cluding original 13 States,		3,743,510

Payments for above were made by the United States as follows: Louisiana purchase, $15,440,000; Gadsden purchase, $10,000,000; Alaska, $7,200,000; Florida, $5,000,000; Hawaiian Islands, public debt assumed to the amount of $4,000,000; Mexican cession, $8,250,000.

The Treaty of Paris, of December 10, 1898, terminating the Spanish-American War, provided for a money payment to Spain (for relinquishing claim to Porto Rico, Guam, and Philippine Islands) of $20,000,000, and a subsequent treaty of November 7, 1900, provided for a further payment of $100,000 for other Philippine Islands.

By the first treaty the Philippine Islands were ceded to the United States, and the later treaty of November 7, 1900, ceded certain outlying islands of the Philippines not included in the first cession.

The United States did not acquire, by the Isthmian Canal Convention of November 18, 1903, any title to territory in the Republic of Panama, but merely a perpetual right of occupation, use, and control of and over a zone of land ten miles in width. For this privilege it paid to the Republic of Panama the sum of $10,000,000, and undertook to pay the sum of $250,000 annually so long as such occupancy continued, such payments beginning on February 26, 1913.

TREATY WITH COLOMBIA.

The United States and the Colombian Congresses ratified, in 1921, a treaty of the United States with Colombia by which Colombia is to receive $25,000,000 (in yearly instalments of $5,000,000) as compensation for the loss of territorial sovereignty over Panama and the Canal Zone. Ratifications of the two countries were exchanged at Bogota, Colombia, on March 1, 1922. The first payment of $5,000,000 to be made six months thereafter.

For the Danish West Indies, consisting of the islands of St. Croix, St. Thomas and St. Jonn, the United States paid $25,000,000, and took possession on March 31, 1917. They then had 32,000 population.

No money payments were made upon the acquisition of the other Territories mentioned in the list.

DIMENSIONS AND AREA OF THE UNITED STATES.

The gross area of the United States is 3,026,789 square miles. The land area amounts to 2,973,774 square miles, and the water area—exclusive of the area in the Great Lakes, the Atlantic, the Pacific, and the Gulf of Mexico, within the three-mile limit—amounts to 53,015 square miles.

The southernmost point of the mainland is Cape Sable, Fla., which is in latitude 25° 07′ and longitude 81° 05′. The extreme southern point of Texas is in latitude 25° 50′, and longitude 97° 24′. Cape Sable is therefore 49 miles further south than the most southern point in Texas.

A small detached land area of northern Minnesota at longitude 95° 09′ extends northward to latitude 49° 23′.

The easternmost point of the United States is West Quoddy Head, near Eastport, Me., in longitude 66° 57′ and latitude 44° 49′; the westernmost point is Cape Alva, Wash., in latitude 48° 10′, which extends into the Pacific Ocean to longitude 124° 45′.

From the southernmost point in Texas due north to the forty-ninth parallel, the boundary between the United States and Canada, the distance is 1,598 miles. From West Quoddy Head due west to the Pacific Ocean the distance is 2,807 miles. The shortest distance from the Atlantic to the Pacific across the United States is between points near Charleston, S. C., and San Diego, Cal., and is 2,152 miles.

The length of the Canadian boundary line from the Atlantic to the Pacific is 3,898 miles. The length of the Mexican boundary from the Gulf to the Pacific is 1,744 miles.

The average elevation of Delaware is only 60 feet above sea level, according to the United States Geological Survey, less than that of any other State in the Union, although its highest point, at Centreville, New Castle County, is 440 feet above sea level, higher than the highest points in Florida, Louisiana and the District of Columbia.

West Virginia was set off from Virginia Dec. 31, 1862; admitted as a State June 19, 1863.

COAST LINE OF THE UNITED STATES.

(By the U. S. Coast and Geodetic Survey.)

General Coast Line—The figures under this heading give the length in statute miles of the general outline of the seacoast. The measurements were made with a unit measure of 30 minutes of latitude on charts as near the scale of 1-1,200,000 as possible. The shore line of bays, sounds and other bodies of water whose entrance width is greater than the unit measure is included to a point where such waters narrow to the width of the unit measure, and the distance across at such point is included. Where the entrance width of such waters is less than the unit measure, the distance across is included, but the shore line inside is not.

Tidal Shore Line, Unit Measure 3 Statute Miles—The figures under this heading give the length in statute miles of the shore line on tidal waters to points where such waters narrow to a width of 3 statute miles. The figures for Louisiana do not include the shore line of Lakes Maurepas and Pontchartrain, and the delta of the Mississippi River was measured as mainland. The measurements were made on charts of 1-200,000 and 1-400,000 scale when available. The table follows.

The Panama Canal Zone—Islands outside the 3 nautical mile zone were not included.

THE AMERICAN'S CREED.

Written by William Tyler Page, Clerk of the U. S. House of Representatives, in 1917, and adopted and promulgated by the Government's Committee on Publication. Accepted by the House of Representatives, on behalf of the American People, April 3, 1918.

I believe in the United States of America as a Government of the people, by the people, for the people; whose just powers are derived from the consent of the governed; a democracy in a republic; a sovereign Nation of many sovereign States; a perfect union, one and inseparable; established upon those principles of freedom, equality, justice and humanity for which American patriots sacrificed their lives and fortunes.

I therefore believe it is my duty to my country to love it; to support its Constitution; to obey its laws; to respect its flag, and to defend it against all enemies.

THE PLEDGE TO THE FLAG.

(Taught in many of the schools and repeated by the pupils daily.)

"I pledge allegiance to the flag of the United States
And to the Republic for which it stands,
One Nation, indivisible,
With liberty and justice for all."

The Pledge to the Flag is attributed to James P. Upham, a Boston publisher, who in 1888 suggested its use in the schools. The idea was adopted by the National Education Association, which persuaded Congress to urge it to the attention of President Harrison, who, by proclamation of July 21, 1892, naming Oct. 12, 1892, as a holiday in commemoration of the 400th anniversary of the landing of Columbus in the New World, suggested the Pledge to the Flag be recited by pupils and that the American flag be raised over every schoolhouse. The flag should be displayed only from sunrise to sunset, or between such hours as may be designated by proper authority. It should be displayed on national and State holidays and on historic and special occasions. The flag should always be hoisted briskly and lowered slowly and ceremoniously.

When carried in a procession the flag of the United States should be either on the marching right, i. e., the flag's own right, or when there is a line of other flags, the flag of the United States may be in front of the centre of that line.

When flags of two or more nations are displayed they should be flown from separate staffs of the same height and the flags should be of approximately equal size. (International usage forbids the display of the flag of one nation above that of another nation in time of peace.)

When displayed over the middle of the street, as between buildings, the flag of the United States should be suspended vertically with the union to the north in an east-and-west street or to the east in a north-and-south street.

When used on a speaker's platform, the flag should be displayed above and behind the speaker. It should never be used to cover the speaker's desk or to drape over the front of the platform. If flown from a staff it should be on the speaker's right.

When flown at half staff, the flag is hoisted to the peak for an instant, and then lowered to the half staff position, but before lowering the flag for the day it is raised again to the peak. By "half staff" is meant hauling the flag down to one-half the distance between the top and bottom of the staff. If local conditions require, divergence from this position is permissible.

On Memorial Day, May 30, the flag is displayed at half staff from sunrise until noon and at full staff from noon until sunset, for the Nation lives and the flag is the symbol of the living Nation.

The States of the Union.

ALABAMA.

Area, square miles . . . . . *51,998* . . . . . *28th in rank*
Population, 1920 . . . . . *2,348,174* . . . . . *15th in rank*
Population, 1925 (est.) . . . . *2,467,190* . . . . . *47.4 to sq. m.*
Wealth, 1923 (Census est.) *$3,002,043,000*

Alabama, one of the States of the Old South, is in the heart of the cotton belt, in the East South Central group, on the Gulf of Mexico, bounded on the north by Tennessee, on the east by Georgia, on the south by the Gulf and Florida, and on the west by Mississippi.

It is level and largely alluvial along the seashore and for a considerable distance inland, rising to hilly or low mountainous elevations in the northeast. Forests originally covered most of the area, but have been materially reduced by non-conservation methods of lumbering. The State is well watered, river navigation being available, notably the Tombigbee and Warrior Rivers together for 400 miles inland, and ocean carriage on the Gulf.

On the Tennessee River rapids at Muscle Shoals are the nitrate fixation plants built by the Federal Government in the World War, but not carried to point of production.

Agriculture is the chief interest, although in the past thirty years the mineral industries have been wonderfully developed, Birmingham being known as "the Pittsburgh of the South." In 1923, 2,784,625 tons of pig iron were produced, the State ranking sixth. Alabama, as one of the 16 cotton States, raises normally about one-fifteenth of the country's cotton on about one-thirteenth of the cotton land areas of the Nation. Corn, white and sweet potatoes, oats, tobacco, sugar, hay and fruits abound.

The Census of 1920 showed the iron and steel industries, in value of products, $121,998,000, was second to agriculture, $304,348,638, and ahead of lumber and timber products, $55,139,000, yellow pine being 91.3 per cent. of the cut, with 1,642,588,000 board feet, the oak cut being 61,189,000. Gum, maple, ash, hickory, cypress and tupelo also supply lumber. Cotton mills numbered, in 1924, 84 with 25,568 looms and 1,447,235 spindles. Coal production is large.

The number of manufacturing establishments in 1919 was 3,654, with $455,592,733 of capital, employing 120,889 persons, and with an output valued at $492,730,895.

Birmingham, the Census Bureau estimates, had 200,785 population on July 1, 1924.

Practically all of the State's foreign commerce passes through Mobile, that Gulf port having been in past years relatively unimportant, but having attained, rapidly, commercial prestige since the mineral industry development began.

Railroad milcage, in 1923, was 5,354.

A feature of Alabama is the high proportion of Negro population. Two of each five persons are black. Alabama is intensely American, there being only about 20,000 foreign-born. In some portions of the State, known as "the black sections," however, the Negro population is about 80 per cent. of the total. The rate of illiteracy, by the 1920 census, was 16.1 per cent. of the total population. Of the 1,038,692 native white, 65,394 were illiterate, or 6.3 per cent.; and of the 674,004 Negroes, 210,690 were illiterate, or 31.3 per cent. Excellent progress, however, is making toward a higher standard, the percentage of illiterates having been reduced from 22.9 in 1910.

A famous agency for this improvement is the Tuskegee Normal and Industrial Institution, founded in 1880 by the late Dr. Booker T. Washington, a Negro acknowledged as leader of his race. The enrolment was 1,736. The enrolment at the University of Alabama, a State endowed and controlled institution, at which only whites matriculate, was 2,050, with 1,315 students in other higher educational institutions.

ARIZONA.

Area, square miles . . . . . *113,956* . . . . . *5th in rank*
Population, 1920 . . . . . *334,162* . . . . . *46th in rank*
Population, 1925 (est.) . . . . . *407,702* . . . . . *3.5 to sq. m.*
Wealth, 1923 (Census est.) *$1,314,291,000*

Whereas Alabama has 47 persons and Massachusetts 499 to the square mile, Arizona, a mountain State, has 3.5—and of the 334,162 of population, there are 60,325 Mexicans, which fact, together with the warm climate and the ease of life there, made Arizona one of the picturesque States in the frontier days. Although then precisely characteristic of "the West," it is now modernized, with every agency of civilization.

It is situated in southwestern United States, west from New Mexico, east from California, and south from Utah and Colorado, and is on the boundary between the United States and Mexico.

Arizona prides itself on being a man-made State. Vast reaches of arid and semi-arid lands, useless before irrigating water was turned on, have been made highly productive. Agriculture has greatly increased, and new irrigation projects promise further enrichment. The topography is broken, being mountainous in portions of every section; the northern plateau is 4,000 to 7,000 feet in altitude, and the southern from 500 to 2,500. On the broad plains and mountain sides livestock graze, and through the valleys the irrigating waters are led. Long staple cotton has been developed as a principal crop, other products being wheat, corn, barley, oats, hay, potatoes and immense quantities of sub-tropical fruits. Dates thrive. Ostrich farming is a feature.

Mining is extremely important. Copper mines in the State are among the greatest in the world, the most famous being the United Verde, owned by former United States Senator W. A. Clark, now a resident of New York. In 1923 the output was 615,493,561 pounds, Montana being second. Gold, silver, lead and zinc are also produced. Manufacturing is unimportant, excepting for the large smelting interests.

Railroad mileage, in 1923, was 2,452.

Apart from the generally picturesque character of the State, tourists are attracted by the Roosevelt Dam, supplying irrigating waters for the Salt River Valley, one of the two greatest dams in the world, and the Grand Canyon of the Colorado River, one of the scenic wonders of the world, 200 miles long and averaging 12 miles wide and one mile deep.

Livestock raising lends both economic value and the element of the picturesque to life in Arizona, the industry having caused the development of many very large ranches, some of which comprise hundreds of thousands of acres, with the "cowboy" an essential factor.

Of the land area of the State, about 72,000,000 acres, 5,802,126 are taken up by 9,975 farms, and of this amount 712,803 acres are improved and 523,648 woodland. Of the farms 6,605 were irrigated (467,565 acres), the capital invested being $33,498,094.

On the lower areas the surface of the earth is low, since they were the bed of a primal sea in which are immense deposits of the several kinds of salts, such as potash, nitrates and others from which in time it is expected that there will be extractions of great mineral value.

Illiteracy among the native whites is low—2.1 per cent.—while among the foreign-born, mostly Mexicans, it is 27.5.

Tucson is the seat of the University of Arizona, and Flagstaff has the Lowell Observatory. Phoenix, the capital and largest city, is the centre of the richest agricultural district, the Salt River Valley.

Arizona has a large population of Indians, 32,989 (1920), mostly Apaches, Navajos, Hopis, on reservations, a number exceeded only in Oklahoma. They occupy 18,653,014 acres, valued at $61,843,402, and with an income of $5,482,039.

ARKANSAS.

Area, square miles . . . . . *53,335* . . . . . *26th in rank*
Population, 1920 . . . . . *1,762,204* . . . . . *25th in rank*
Population, 1925 (est.) . . . *1,852,905* . . . . . *34.7 to sq. m.*
Wealth, 1923 (Census est.) *$2,599,617,000*

Arkansas (pronounced Ar-kan-saw) is of the Old South, situate inland, in the West South Central group, Missouri bounding it on the north, Tennessee and Mississippi on the east, Louisiana on the south, and Oklahoma on the west, and is on the Mississippi River, down which much of its traffic flows. Its topography is mostly level, but in the west rise the mountainous elevations of the Ozarks.

Agriculture is the chief source of wealth. The 1920 census gave $340,813,256 as the value of all crops; lumber and timber products are next with $84,000,000, and there is considerable coal, lead and manganese mining. There are important phosphate deposits, later to become very valuable for land fertilization.

Arkansas produced one-thirteenth of the Nation's cotton on one-thirteenth of the cotton lands, being thus an average for per acre productivity. There were 3,123 manufacturing establishments in 1919, with capital of $138,817,974, employing 58,202 persons and output valued at $200,312,858.

Wheat, corn, oats, potatoes, white and sweet, hay, tobacco and fruits are produced. Roses are grown extensively for the making of perfumes.

The State is richly endowed with forest wealth.

every sort of tree which grows in the temperate zone abounding, with much of the rapidly-disappearing hardwood which forms an important article of Arkansan commerce.

Railroad mileage, in 1923, was 5,032.

The Negro represents one-third of the population, with the inevitable consequent illiteracy of 21.8 per cent. among them, that of the native-born whites being 4.5, and the average for the whole population, 9.4. As in all Southern States, keen effort is exerted to improve this matter, average illiteracy having fallen from 12.6 per cent. in 1910.

Likewise, as in most of the Southern States, the Baptist Church comes first with communicants, the Methodist being second, and Roman Catholic and Presbyterian following in that order.

The Southern custom is followed by providing separate schools for black and white, about 500,000 pupils attending. Besides the State University at Fayetteville, with 1,500 students, there are several church colleges with about 750 students each.

The Hot Springs, a national reservation in the western part of the State, are world famed and support thousands who attend the wants of tourists.

CALIFORNIA.

Area, square miles ..... *158,297* ..... *2d in rank*
Population, 1920 ..... *3,426,861* ..... *8th in rank*
Population, 1925 (est.) ..... *4,021,320* ..... **25.6 to sq. m.*
Wealth, 1923 (Census est.) *$15,031,734,000*

California, in the Pacific group, occupies about one-half of the Pacific coastline of the United States; is bounded on the north by Oregon, on the east by Nevada and Arizona, and on the south by Mexico. It is 1,000 miles long. Its topography is most varied and its climate as well. Every phase of surface character is presented, and the geological peculiarity of the North and South American Continents is here seen—the aged mountain ridge that runs from the Arctic Circle southward through the States into Mexico parallel to and near the seashore. There is much plains land, too, and every kind of soil that marks the temperate and sub-tropical zones, with practically all climates which are found in such regions. The State has no navigable rivers, except the lower Sacramento, but abundant waters in smaller streams enable immense irrigation of lands otherwise virtually useless. California is the leading State in irrigation, its enormous fruit, garden and much of the grain output being attributable largely thereto.

Californians especially pride themselves in the climate, which has such fame as to attract visitors from all corners of the earth; particularly in the winter. For their accommodation many luxurious hotels are maintained. There are thousands of miles of excellent roads and a new tax of two cents a gallon on gasoline is expected to yield $7,500,000 to be devoted to highway improvement. California is second in per capita ownership of motor cars.

Railroad mileage, in 1923, was 8,282.

Agriculture is enormously developed. There are about 100,000,000 acres in the State, and the farms, which include orchards and vineyards, take up 29,365,667 acres, according to the 1920 census, of which 11,878,339 are improved, some highly so, the value of all being $3,431,021,861. There are 4,-219,040 acres, 67,391 farms, now under irrigation.

Literally every product of the temperate and sub-tropical zones is grown there—all cereals, forage crops, vegetables, fruits and nuts. Crops in 1920 were valued at $589,757,377, dairy products, $276,424,216, livestock, $204,378,445, with other large agricultural production.

The State ranks first in canning and preserving, the total value of the product in 1919 being above $200,000,000, giving employment to 22,500 workers.

Mining interests are extensive, in gold, silver, copper, lead and quicksilver.

The stores of petroleum are very large; California produces about the same amount as Texas, and is exceeded only by Oklahoma in output. The product in 1923 was 263,729,000 barrels. A peculiar sight is the oil derricks rising amid the comfortable homes of Los Angeles, and those set in the sea waters below Santa Barbara. The State produces all the borax mined in the United States, 120,320 tons being produced in 1920.

California nearly quadrupled its manufacturing output in the decade 1909-19. The Census of 1919 returned 11,942 manufacturing establishments, with $1,233,480,273 of capital, employing 296,858 persons, and with an output valued at $1,981,204,701.

Enormous shipping is carried on, San Francisco being the chief port, the others being Los Angeles and San Diego.

The forests, in common with all States of the Pacific group, are very extensive, comprising every variety of tree which grows north of the purely tropical zone. Coniferous trees are most numerous. The giant redwood groves are the destination of many tourists. California no longer is an exporter of ordinary lumber, being compelled to buy from Oregon and Washington.

It is a State of romance in history. Acquired from Mexican political control in 1846, gold was discovered in 1848, and in 1849 the most remarkable "gold rush" ever known began, it being said that the gold produced thereafter enabled the United States to withstand so well the economic strain of the Civil War which began in 1861. The gold output in 1923 was $13,465,000; silver $3,025,682.

Illiteracy is low—3.3 per cent. in 1920; it was 3.7 in 1910. Of the 2,075,467 native whites, only 8,747, or 4-10th of 1 per cent., were illiterate, illiteracy among the foreign-born being 10.5.

The Japanese population in 1920 was 71,952, an increase of 30,596 in ten years; and of Chinese, 28,812, a decrease of 7,436.

The Census Bureau estimates that on July 1, 1923, Los Angeles had 666,853 population and San Francisco 548,284. Los Angeles, by repeated annexation of territory, is now the largest city in area of the United States—391.6 square miles.

The State has three universities—Leland Stanford Jr., the University of California, which matriculates about 12,000; and the University of Southern California. There are many colleges.

One of the points of interest is the motion picture colony at Hollywood, a suburb of Los Angeles. The atmosphere is so clear that motion pictures may be taken on about 350 days of the year, while the topography and flora afford most varied "locations." Yosemite Park (national) is a scenic wonder. The retention of the Spanish influence in architecture, the climate and the profusion of vegetation where water flows on the lands attract many tourists.

The United States Department of Agriculture lately has developed cotton growing, which has produced a fibre of the quality of the finest sea island, which, in turn, has given rise to the cotton mill industry.

The Roman Catholic Church leads all religious bodies, the bequeathal to later generations of the work done by the Catholic missionaries who established a string of 26 missions a day's march apart from the Mexican line to upper San Francisco Bay.

COLORADO.

Area, square miles ..... *103,948* ..... *7th in rank*
Population, 1920 ..... *939,629* ..... *33d in rank*
Population, 1925 (est.) ..... *1,019,286* ..... *9.9 to sq. m.*
Wealth, 1923 (Census est.) *$3,329,412,000*

Colorado, one of the mountain States, is bounded on the north by Wyoming and Nebraska, on the east by Nebraska and Kansas, on the south by New Mexico, and on the west by Utah.

Its topography is varied, being plains lands in the east and south, but rising to the elevations of the Rocky Mountain range in the west, some peaks towering to an altitude of 14,000 feet. The Denver & Rio Grande Western Railroad, noted for its scenic beauty, crosses Marshall Pass at an altitude of 10,856 feet, and Tennessee Pass, near Leadville, at 10,240.

Soils vary from arid, when non-watered, to productive. Irrigation is extensive, and has lifted agriculture to first place in the State, ahead of mining and livestock, which come next. The 1920 census showed all crops valued at $181,065,239, even mineral production, $51,217,038, being behind, although the State abounds in mineral wealth, and development is rapid, with petroleum abundant and production great. Minerals produced are gold (second in output in the country), in 1923, $6,525,800; silver, $4,533,879; coal, $31,701,000; copper, zinc, lead, manganese, gypsum; and the State is first in radium output and second in tungsten.

The western ranges abound in forage grasses, on which large numbers of food animals and horses live and produce vast annual wealth.

The climate is warm in summer and cold in winter, but dry, and stimulating. It is said that the sky is absolutely cloudless in Denver (the capital and chief city, 5,183 feet above the sea) on 300 days of the year. These qualities have attracted many persons desiring relief from tuberculosis.

Railway facilities are plentiful, and freight tonnage and tourist travel are heavy. The rapidly improving highways are covered by many trans-continental automobile parties, which, en route, seek the local attractions of mountain and valley, chief among which are the mineral springs at Colorado Springs and everywhere are unusual conformation and coloration. The State has developed a wonderful highway through the reserved State Park, which is scenic and diverse in interest. The Royal Gorge of the Arkansas, through which the Denver & Rio Grande runs, is justly famed.

Railroad mileage, in 1923, was 5,170.

Illiteracy is low at 3.2 per cent. of the whole population in 1920; native white, 1.4 per cent., and foreign-born, 12.4. For a State of 939,629 popula-

tion, there is unusually large provision for education, with 192,000 public school enrolment in 1919, and the State University at Boulder, University of Denver, State Agricultural College at Fort Collins, State Teachers' College at Greeley, the State Normal School at Gunnison, and the State School of Mines at Golden, which has advanced far in mineralogic science.

CONNECTICUT.

Area, square miles . . . . . *4,965* . . . . . *46th in rank*

Population, 1925 (est.) . . . *1,531,255* . . . . . *306 to sq. m.*
Wealth, 1923 (Census est.) *$6,286,445,000*

Connecticut, one of the Original Thirteen States of the Union, is situate in New England; bounded on the south by Long Island Sound, on the east by Rhode Island, on the north by Massachusetts, and on the west by New York. It was settled early in the seventeenth century by the Dutch from New York, then known as New Amsterdam, and by Puritans from Massachusetts at Hartford, in 1635. In 1639 it adopted a written constitution, confirmed by a charter from King Charles II. in 1662, and replaced in 1818 by a State constitution.

The State is now intensely industrial, although earlier it was agricultural. The 1920 census indicated that 62.7 per cent. of the people live in towns of 10,000 or more population, and that, including smaller towns, 85 per cent. live urban lives, practically every town having industries. Connecticut presents an unusual contrast in the presence, especially in the western part, of hundreds of beautiful country homes of New York and other city folk, alongside of towns and villages in which industry flourishes.

Proportioned to population, no State has greater industrial strength or a wider range of manufactures.

Connecticut's surface is broken, there being ridge after ridge, with verdant valleys between. Toward the shores of the Sound, the land is generally flat, but it rises to about 2,000 feet of altitude in the northwestern part, where the Berkshire Hills begin and extend northward into Massachusetts and Vermont. Originally, the entire State was heavily wooded with all trees known to the temperate zone, hardwood and coniferous varieties abounding. Lumbering has reduced the timber supply materially. The water supply is large for industrial uses. The Connecticut River and the Housatonic are the principal streams, their valleys immensely productive. Tobacco is a very great source of wealth, 45,074,000 pounds being grown on 31,000 acres in 1921.

Besides its pre-eminence in manufacturing industry, Connecticut has in the capital, Hartford, also the insurance centre of the United States, with numerous powerful assurance companies covering every modern phase—life, fire, burglar, etc.

Its industrial output in 1920 was valued at $1,392,432,000, or almost exactly $1,000 per capita, in which there was a net of $706,494,000 added to materials used by the process of manufacture, in which 292,672 persons were employed, or considerably more than 20 per cent. of the total population. It was the large growth of industrial interest that brought in many foreigners as factory and other laborers, so that, although originally intensely New England in social composition, its population now is largely mixed.

The range of industrial output covers brass, bronze, copper products, very many kinds of machinery, silk goods, hardware, cutlery, electrical apparatus, rubber goods, woolens, ammunition, tires, hats, boots and shoes, steam fittings of all kinds, typewriters, firearms, needles, pins, paper, clocks, ordnance, knit goods, dyeing, lumber, clothing, engines and scores of other products.

Connecticut in 1919 ranked first among the States in production of felt hats, $23,152,468; fourth in silk, sixth in cotton, and sixth in woolen and worsted goods.

Agriculturally, Connecticut has fallen off from her one-time superiority, the competition of the virgin soils of the Middle West and the Far West causing the abandonment of many farms a generation ago, these farms having been taken over in recent years for country homes. Against the large industrial output values, the 1920 census gave the value of all crops at $44,472,644.

In early days, shipping was important, but is to-day, relatively negligible, excepting for coastwise water-borne traffic. The prevalence of good roads has enabled the development of many motor truck lines, which haul immense quantities of goods and materials to market without utilizing the railway for any part of the haul, while the same good roads have multiplied automobile tourist travel until the State accommodates very heavy vehicular traffic.

Railroad mileage, 1923, was 999.

Before the influx of foreigners, illiteracy was almost nil. It is now 6.2 per cent. for the State; 4-10ths of 1 per cent. for the native whites, and 12.8 for the foreign-born. The whole of New England was shown by the 1920 census to be 4.9 per cent. illiterate, and the United States 6 per cent.

Yale University, at New Haven, founded in 1701, has grown to be a world-famed institution, with 4,000 students. Wesleyan University at Middletown (now a city of 22,129), Trinity College at Hartford, and Connecticut College for Women at New London are also important. About 270,000 are enrolled in the public schools, or about 27 for each 108 of population.

DELAWARE.

Area, square miles . . . . . *2,370* . . . . . *47th in rank*
Population, 1920 . . . . . *223,003* . . . . . *47th in rank*
Population, 1925 (est.) . . . . . *234,720* . . . . . *99.8 to sq. m.*
Wealth, 1923 (Census est.) *$625,765,000*

Delaware, one of the thirteen Original States, next to Rhode Island the smallest, lies in the South Atlantic group, bounded on the north by Pennsylvania, on the east by New Jersey, Delaware Bay, and the Atlantic Ocean, on the south by Maryland, and on the west by Maryland and Pennsylvania. It is 110 miles long with an extreme breadth of 35 miles. The land is low lying, one-twentieth being marshy.

It is essentially agricultural, 85 per cent., 944,511 acres, of the 1,500,000 total State acreage, being in farms, and 653,052 improved, with corn and wheat the chief products, and also much fruit and tomatoes, Delaware being the second State in tomato packing, and famous for its peach crop. Its flat, alluvial soils, practically unbroken, yielded, Census of 1920, $23,058,906, or almost exactly $100 per capita for the 223,000 of population. Oysters and fish are taken extensively.

Relative to the size and population, Delaware has large manufacturing interests. Wilmington, at the northern tip of the State, near Philadelphia, with 119,888 persons, about one-half the population, has most of the industries. Leather and knitting lead. The large parent plant of the duPont powder works is in the valley of the Brandywine.

Wilmington is the chief port, ship traffic passing up the Delaware River. A Government canal connects Delaware and Chesapeake Bays. A concrete motor highway completing a trunk line through the State was built at a cost of nearly $4,000,000 by Gen. T. Coleman duPont as a gift to the State.

Railway mileage, 1923, was 335.

About 38,000 attend the public and other schools, and the percentage of illiteracy for the State was, in the 1920 census, 5.9. Native white, 1.8, and 19.1 for the Negro, who totals 15 per cent. of the whole population. Educational progress is being made as proved by the 1910 illiteracy percentage, 8.1, reduced materially by 1920. Ability to read and write are requisites for voting.

Delaware is the only State to retain the whipping post as a punishment for criminals.

DISTRICT OF COLUMBIA.

Area, square miles . . . . . *70* . . . . . *49th in rank*
Population, 1920 . . . . . *437,571* . . . . . *42d in rank*
Population, 1925 (est.) . . . . . *497,906* . . . . *711.3 to sq. m.*
Wealth, 1923 (Census est.) *$1,697,270,000*

The District of Columbia is the seat of the Federal Government of the United States. Its area was originally 100 square miles taken from the sovereignty of Maryland and Virginia, Virginia's portion south from the Potomac being later ceded back to that State. It lies therefore on the west central edge of Maryland on the Potomac River, opposite Virginia. It is in the South Atlantic group. The District is co-terminus with the City of Washington.

Almost the entire activity is governmental, there being regularly employed therein from 100,000 to 120,000 persons. Industrial interest is mostly output for local consumption, although there has been effort by some to develop Washington, the Capital City, as an economic centre. Navigation is carried on via the Potomac River, which is a branch of Chesapeake Bay. The river was naturally capable of accommodating large vessels, and has been improved in depth and otherwise, so that heavy war or commercial craft may pass. Washington is the chief railway stopping point en route between North and South. The Union Station in Washington is said to be not only one of the most efficient in the world for passenger transportation handling but also one of the finest architecturally ever built. Railroad mileage, 1923, was 36.

The distinctive feature of the city municipally is the fact that the Government is by the Congress directly as to legislation, and by Executive Commissioners, named by the President of the United States, confirmed by the Senate. Each House of the Congress has a Committee on District of Columbia, and taxation current and for improvements is, by and large, borne half by the Congress, half by the people locally.

Physically, the distinctive feature is the excellent

town planning done there by Major Pierre l'Enfant, French engineer, at the instance of George Washington By a peculiar accident, Washington obtained a most excellent physical arrangement, economic and social. Major l'Enfant, drawing on French history, laid out the city with wide diagonal avenues, traversing streets planned on the "gridiron" method. Major l'Enfant's idea was that, in the event of street riots, artillery could rake the city, and piling of barricades would be difficult if the diagonals were made very wide.

The result was a beautiful city with ideally economic traffic outlets in all directions, wide where needed, narrower where wide highways are not necessary. The streets are wonderfully shaded with a luxuriant growth of trees, which have been brought to high perfection by the United States Department of Agriculture, and brought, as well, from almost every country in the world.

There is a generous provision for park space. There is the Mall, running from Capitol Hill toward and around Washington Monument in large park spaces back of the White House and Executive Departments, being designed (under the newer improved plan, for which Charles Moore of Detroit was chiefly responsible), for the accommodation of a group of governmental structures on a scale apparently never before contemplated by any other Government in the world. There are many smaller parks scattered through the city, and little street crossing resting places. Rock Creek Park is one of the finest in the country for natural beauties.

Many wealthy Americans in late years have erected palatial dwellings in Washington, and there are many fine country estates nearby, with desirable suburban centres on all sides. The Census of 1920 returned 204 farms in the District.

Educationally, the District of Columbia is far advanced. The higher institutions are Georgetown University (Catholic), George Washington University, the Catholic University of America, the National Methodist University, Howard University for Negroes, and two normal schools for the training of teachers.

Illiteracy in the District is low at 2.8 for all; native white, 3-10ths of one per cent., Negro, 8.6. The Negro population is 25 per cent. of the total. About 6 per cent. are foreign-born.

FLORIDA.

Area, square miles.....58,666.....21st in rank
Population, 1920.....968,470.....32d in rank
Population, 1925 (est.)....1,090,754.....18.5 to sq. m.
Wealth, 1923 (Census est.).....$2,440,491,000

Florida, a South Atlantic State, reputed to have been discovered by the Spaniard, Ponce de Leon in his search for the "fountain of perpetual youth," is the southeasternmost point of the United States, bounded on the north by Georgia and Alabama, on the east by the Atlantic Ocean, on the south by the Straits of Florida, and on the west by the Gulf of Mexico.

It is one of the three or four most important fruit States, its cultivated lands producing in all $80,256,806 in 1919. Florida is lowest of all Southern States in cotton production. The sub-tropical products prevail in fruits and other land output.

A present and future source of great wealth are the natural deposits of phosphatic rock, whence normally, pre-war, more than 1,000,000 tons were exported for foreign use as land fertilizer, and much was used domestically. It produced $10,685,819 worth in 1919.

Florida is of coral formation, with no high elevations, and in the southern part are vast swamps, the Everglades, which are being drained and provided with roads to make available large potential agricultural wealth.

Less than one per cent. of the area is forested, but from it comes about one-half the national supply of turpentine and resin, known commercially as "naval stores." The value of product in 1919 was $21,508,553. The total output of its 2,582 establishments was valued at $213,326,811; of this 280 tobacco factories produced cigars and cigarets valued at $37,926,000.

The State is penetrated by several rivers, chief of which is the St. John, up which steamers ply for 150 miles. At the mouth lies St. Johns, said to be the oldest white settlement on the continent.

Railroad mileage, 1923, was 5,283.

Florida is the resort of very large numbers of winter tourists, there being a dozen places of that character scattered along both coasts and inland. Coastwise, the vegetation is sub-tropical and in the interior is a coniferous tree-clad, sandy region where citrus fruits have been developed highly.

Three of each eight persons are Negro. The illiteracy reported in the 1920 census was 9.6 per cent., against 13.8 in 1910, indicating remarkable progress in popular education. Native white illiteracy was 2.9, and of Negroes 21.5. Public school enrolment was 196,405, and there are the John B. Stetson University of De Land, the University of Florida at Gainesville, Rollin's College at Winter Park, and the State College for Women at the capital, Tallahassee.

GEORGIA.

Area, square miles.....59,265.....20th in rank
Population, 1920.....2,895,832.....12th in rank
Population, 1925 est.)....3,058,260.....51 to sq. m.
Wealth, 1923 (Census est.).....$3,896,759,000

Georgia, of the South Atlantic group which was one of the Thirteen Original States, is bounded on the north by Tennessee, North Carolina and South Carolina, on the east by South Carolina and the Atlantic, on the south by Florida, and on the west by Alabama.

Agriculture is very important. Of the total of about 40,000,000 acres, 25,441,061 are in farms, or 62.5 per cent.; and more than 13,000,000 actually improved, or about 32 per cent.

All crops, Census of 1920, were valued at $540,613,626, of which $69,720,000 was for cotton in 1,681,907 bales from 4,720,498 acres, Georgia being the second cotton State, only Texas exceeding it. Crops are various—cotton, corn, oats, wheat, sugar cane; corn the most important cereal, with 69,975,000 bushels produced in 1919.

Ten States exceed Georgia's 25,000 acres devoted to tobacco. Georgia comprehends all things grown in the temperate and sub-tropical zones, is improving its methods with enthusiasm, and livestock values are very high.

Manufacturing has, however, passed agriculture in relative importance, the value of the industrial output, Census of 1920, being $693,237,000. Cotton goods, from the lately developed mills, led with $192,186,000, and oil and cake from cottonseed followed with $99,320,000; so that cotton in its several forms is Georgia's chief single interest. The 167 cotton mills operate more than 2,700,000 spindles. The percentage of child labor, 1920, was 17.2 in Atlanta. Water power abounds.

From the extensive forested area $25,836,000 of lumber and timber products were shipped, land fertilizers were valued at $47,480,000, and other industrial concerns include car works shipbuilding, machinery, knit goods, flouring mills, food preparations and others.

The State has important mineral resources, coal, iron, manganese, gold and silver, not yet highly developed, and fisheries of oysters and other shellfish are considerable.

Transportation is highly developed, with abundant rail lines and large ocean shipping in and out from Savannah, chief port. Vessels up to 32 feet draft being accommodated at high tide across the bar, and 26 feet at all times.

Railroad mileage, 1923, was 7,193.

Negro population is 42 per cent. of the total, bringing up the percentage of illiteracy for the whole State to 15.3, that of native white being 5.4 and of Negroes 29.1. Illiteracy percentage in 1910 was 20.7. Of 2,895,832 population, there were, Census of 1920, 570,000 attending school.

The Georgia School of Technology, with 2,000 students, and the University of Georgia are the largest institutions for higher education.

Atlanta, chief city and capital, is accounted one of the progressive cities of the South, and nationally holds high place in banking strength. The population on July 1, 1924, was 227,710.

The lumber cut, mostly pine, exceeds 500,000,000 feet, although production, as in most of the Southern States, is due soon to diminish to negligible quantities for exportation owing to the enormous areas of the originally large forested lands having been cut over.

Okefonokee Swamp, in the southeastern corner, 400,000 acres, is, like the Everglades of South Florida, potentially rich for agriculture when drained.

IDAHO.

Area, square miles.....83,888.....12th in rank
Population, 1920.....431,866.....43d in rank
Population, 1925 (est.).....493,071.....5.85 to sq. m.
Wealth, 1923 (Census est.).....$1,533,961,000

Idaho, of the mountain group, is situate astride the Rockies in the Pacific Coast region, bounded on the north by British Columbia and Montana, on the east by Montana and Wyoming, on the south by Utah and Nevada, and on the west by Oregon and Washington.

Its topography is mountainous, with broad level plateaus. It classes as of the irrigation States

agriculturally, the lands when watered being exceedingly productive, fruit raising having been highly developed. Most of the plains lands which have not been reclaimed by irrigation remain unproductive, with considerable livestock interest thereon. The Rocky Mountains traverse the State, highest elevation being Mount Hyndman, 12,078 feet. The Snake River is the chief stream, is the western boundary of the southern two-thirds of the State, and is navigable for a considerable distance above Lewiston where it makes off into the State of Washington on its way 400 miles to the Pacific Ocean. The climate is dry and stimulating, warm in summer and cold in winter.

Idaho is undeveloped, having large mineral resources, and much land yet to be covered with irrigation waters. The Federal Reclamation Service has already built several important irrigation projects, in addition to many private projects.

Present mineral production is very great, especially in the northern or "Panhandle" section, where the lead output is second only to that of Missouri. Zinc production is sixth (value of both lead and zinc, 1922, $11,005,101) among the States, gold eleventh (1923, $739,300); silver fourth (1923, $6,576,381); and copper (1923, $3,664,079). But all the principal metals are present, and tungsten is a source of interest.

The value of the agricultural yields, Census of 1920, was $126,495,111, there being thirty States that exceed it. Of the total of 60,000,000 acres, there were 42,106 farms, Census of 1920, comprising 8,375,873 acres, of which 3,266,386 were irrigated. Varied crops were raised, wheat, 27,079,000 bushels; oats, 7,740,000; barley, 2,784,000; potatoes, hay, all sorts of vegetables.

The livestock industry is very great, the wool clip alone in 1920 being 21,702,000 pounds; sheep, cattle and horses abounding, cattle numbering 642,000.

Normally, almost a billion feet of lumber are cut. The forest wealth is large, white and yellow pine, larch, white fir and cedar supply activity to many mills. It is claimed that the sawmill at Potlach, Idaho, cutting 750,000 feet daily, is the largest in the world. Idaho pine is famous for ship and yacht masts.

Railroad mileage, 1923, was 2,877.

Only Iowa, with 1.1 percentage of illiteracy shows a better record than Idaho and Oregon with 1.5 each; native white, figures of 1920 census, 3-10 of 1 per cent., foreign-born, 6.5. Educational institutions show an unusually large proportion in school—105,000 of the total State population of 431,866; or one for each four persons. Higher institutions are the University of Idaho at Moscow, the College of Idaho at Caldwell, and State normal schools at Lewiston and Albion.

Forty square miles, 150 miles southwest of Yellowstone Park, of a newly discovered volcanic field with 63 extinct craters and brilliantly colored frozen lava flows, was set aside May 2, 1924 as a National Monument, "Craters of the Moon."

ILLINOIS.

Area, square miles . . . . . .56,665 . . . . . 23d in rank
Population, 1920 . . . . . .6,485,280 . . . . . 3d in rank
Population, 1925 (est.) . . . 6,964,950 . . . . 122.8 to sq. m.
Wealth, 1923 (Census est.) $22,232,794,000

Illinois, the third most populous State of the Union, lies in the East North Central group, its northeastern corner touching Lake Michigan, the Mississippi River flowing along its western boundary line, the Ohio River along its southern end, and is bounded on the north by Wisconsin, on the east by Indiana, on the south by Kentucky and Missouri, and on the west by Missouri and Iowa. It is intensely industrial, agricultural, mining, and water and rail transportation in interest.

Illinois is almost uniformly level, being situate in a glacial moraine, and is alluvial in all parts, with a climate such as prevails in the whole of the Middle West. It is so level that a railway possesses one precisely straight line 100 miles long in which scarcely a dirt cut was necessary—a vast prairie, once largely wooded, now with but 10 per cent. of forest cover. With the exception of Iowa, no other State has so large a proportion of lands susceptible of cultivation.

It is provided with remarkable mileage of riverways, the Mississippi, the Ohio, and the Wabash, which skirts the southeastern corner. The Illinois River is the principal intrastate river. The artificial waterway is the important Chicago Drainage Canal, 40 miles from Chicago on Lake Michigan to Joliet on the Illinois River, a unique engineering device which supplies drainage out from the flat lake-coastal district around the city and the Chicago River, and really reverses the natural tendency to drain into Lake Michigan. Eventually, the canal will be extended by improving the Illinois River to the Mississippi, giving Chicago navigation from "the Lakes to the Gulf" of Mexico.

Traffic on the Great Lakes to and from Chicago (population, 1924, 2,939,605), which is the second most populous city in the country, is attaining immense proportions, in general cargo as well as in ore brought from the Minnesota, Wisconsin and Michigan mines to the great works of the United States Steel Corporation in Gary, Indiana, a suburb of Chicago.

Although second to Texas, which has 16,151 miles Illinois, in 1923, with 12,030 miles of railway has the heaviest railway transport tonnage in the United States, Chicago being the greatest railway centre in the world.

Illinois has 237,181 farms with 31,974,775 acres, and yet the industrial interest of Illinois far exceeds its agricultural. The 1920 census gave the State $864,737,833 value of all crops, and $3,250,000,000 value of manufactured products. Were the products of the Gary works included, as economically they should be, the value would be vastly more; while for the same reason, the immense Standard Oil and other steel working industries of the East Chicago-Indiana, district, should be added. The range of industrial output is great—iron and steel, the greatest meat packing works—the Union Stockyards—in the world, machinery, electrical equipment, implements, furniture, motor cars and railway cars, woodenware, flour, woolen goods, and scores of other things. Between $2,500,000,000 and $3,000,000,000 is invested in manufacturing, the products going to all parts of the world.

The Census of 1919 returned 18,593 manufacturing establishments with a total product valued at $5,425,244,694, and employing 653,114 workers. Of this the slaughtering and meat packing product was valued at $1,284,103,016, and agricultural implements at $128,284,716. In the latter product the State leads.

The City of Chicago had 10,537 establishments with 502,100 workers and a total product valued at $3,657,424,471. The number of animals slaughtered in 1919 was 18,061,773.

Everything appertaining to the temperate zone is produced on Illinois lands—all cereals, vegetables, fruits and livestock. The 1920 census gave Illinois corn production as 301,000,000 bushels, nearly 10 per cent. of the national crop; wheat, 65,675,000; oats, 123,960,000; and immense output of other crops. The Chicago Board of Trade is the principal grain dealing exchange in the country.

Bituminous coal underlies more than half the area of the State, Illinois ranking third in mineral output. The 1922 census assigns coal output values of $168,925,000, with oil and natural gas in generous measure. The other base minerals are found in that belt.

The 1920 census showed 1,116,099 pupils and students in all educational institutions reporting, about one in each six persons. Besides a very extensive public school system, there are 29 colleges and universities, and five State normal schools for training of teachers. The most prominent universities are the University of Illinois at Urbana, 11,083 students; the University of Chicago (endowed for more than $30,000,000 by John D. Rockefeller), 12,745; Northwestern University at Evanston, 8,010; Loyola University at Chicago, 3,000; James Milliken University at Decatur, 1,053.

Illinois shows 3.4 per cent. of illiteracy, Census of 1920, native white, 8-10 of 1 per cent., foreign-born, 11 per cent., and Negro (of whom there has been a remarkable influx induced by the late war demand for labor), 6.7 per cent. Of the 6,485,280 of population, Census of 1920, native-born whites were 5,092,382; foreign-born, 1,206,951; per cent. of native 78.5; foreign, 18.6; Negro, 2.8. Chicago is the chief Polish centre of the country, with a large percentage of Jews and all classes of immigrants.

Tourists find a wealth of art centres in Chicago; such as the Field Museum and the Chicago Museum of Art, with many art schools. Chicago is a great national convention resort; the Auditorium, seating about 8,000, is usually the place of entertainment.

Chicago's park and boulevard system, as planned, is perhaps the most ambitious ever conceived by any city in the world, with three large parks already developed, connected by a wide boulevard along the lake front cutting through the heart of the city, the whole laid out by some of the greatest city planning and landscape architects in the world.

INDIANA.

Area, square miles . . . . . .36,354 . . . . . 37th in rank
Population, 1920 . . . . . .2,930,390 . . . . . 11th in rank
Population, 1925 (est.) . . . 3,060,416 . . . . 84.2 to sq. m.
Wealth, 1923 (Census est.) $8,829,726,000

Indiana, in the East North Central region, touches Lake Michigan at the northwestern corner of the State and is bounded on the north by Michigan, on the east by Ohio and Kentucky, on the south by Kentucky, and on the west by Illinois. The Ohio River, important in navigation, skirts the entire

southern side, and the Wabash River, also susceptible of greater navigation development, about half of the western boundary line. There are 550 miles of riverways navigable.

In general, Indiana occupies a fairly level tableland and was once a glacial moraine. The climate is characteristic of the Middle West, warm in summer and rather cold in winter.

Industry, with $1,901,846,000 output, Census of 1920, exceeds agriculture with $497,229,719 value of all crops, and mining, $59,926,558. The number of manufacturing establishments in 1919 was 7,916, employing 330,145 persons, and with a capital of $1,335,714,103. Farms numbered 205,126.

Transportation is heavy, with 7,197 miles of railways. Immense tonnage moves riverwise on the Ohio and Wabash, and also enormous tonnage enters and leaves the Lake Michigan ports of Whiting, Standard Oil town; Indiana Harbor and Gary (United States Steel Corporation city), in iron ore, steel products, cereals and coal. Electric interurban traffic is the heaviest in the country.

Manufacturing comprehends practically all standard products—steel, machinery, very many motor cars, tinplate, cement, vehicles, flour, glass, oil refining, meat packing, there having been in the past 20 years, as in all Middle Western States, a vast industrial invasion to get nearer ultimate markets and obtain labor. Many Indianans divide their time between farm and factory.

The 1920 census showed the value of all crops to be $497,229,719, with corn leading—169,848,000 bushels—about 5 per cent. of the national crop; oats, 45,072,000; wheat, 24,144,000; and all other temperate zone products, including fruits and livestock, generously represented.

Evansville, on the Ohio River, is the largest hardwood market in the country, selling not only the heavy State cut from hardwood forests of vast value, which formerly covered much of the State, but also handling immense output from Southern forests.

Indiana ranks sixth in coal production, bituminous and cannel—a very fine fuel for fireplaces—with $56,926,558, Census of 1920. There are oil wells also, the State ranking twelfth in production. Many other basic minerals are found.

The increase of industrial interest in the past two decades is the feature of Indiana's later history. In that space of time, the towns along the shore of Lake Michigan have been developed into vast beehives of industry, and Gary especially has become one of the chief steel points, increasing rapidly in population and being known also for its school system which has been copied largely in the East.

Coincidentally, Indiana has developed a remarkable school of fiction and drama writers, among them Booth Tarkington, George Ade, and Meredith Nicholson. In the southern part many mineral springs are found, principally at French Lick, where famous hotels entertain tourists from all parts of the world, and where mineral waters are bottled for domestic and foreign consumption.

Indiana has four educational institutions of fame—De Pauw University at Greencastle, with 1,400 students; Indiana University at Bloomington, 3,700; University of Notre Dame, Catholic, at South Bend, 1,800; Purdue University at Lafayette, 3,113. The public schools enroll 575,000 pupils, illiteracy is low at 2.2 per cent., Census of 1920, native white, 1.3; foreign-born white, 11.8; Negro 9.5; native whites being 91.8 per cent. of the population; foreign-born, 5.9; Negro, 2.2. A racial phase was the influx of many Germans at the time of the German revolutionary movements of the last century, the result being that now from Fort Wayne southward the German population is predominant in many districts numerically and socially. That portion of the population has always been exceedingly thrifty and dependable economically, and has aided much in the late remarkable industrial development.

In the intense industrial district along the lake the foreign-born population predominates, with Slavs of the several European countries very numerous, and in the World War Indiana responded to the first call for volunteers as promptly as any State in the Union, as proved by the records in Washington.

For the last four decades the centre of population of the United States has been in the southern part of Indiana, moving very slowly west.

IOWA.

Area, square miles ..... *56,147* ..... *24th in rank*
Population, 1920 ..... *2,404,021* ..... *16th in rank*
Population, 1925 (est.) ... *2,505,569* ..... *44.6 to sq. m.*
Wealth, 1923 (Census est.) *$10,511,682,000*

Iowa lies in the East North Central part of the Middle West, bounded on the north by Minnesota, on the east by Wisconsin and Illinois, on the south by Missouri, and on the west by Nebraska and South Dakota. The Mississippi River flows along the entire eastern boundary line, and the Missouri River along three-fourths of the western line.

It is very level, only one point of elevation being 500 feet above the mean. Iowa claims the largest proportion of actually arable lands of all States and proves it by the immense agricultural production, soil and climate combining to give it that prestige, the climate being Middle West characteristically.

The value of all crops, Census of 1920, was $890,391,299, exceeded only by Texas with $1,071,542,103 on five times the land area of Iowa. Farm property exceeds $8,000,000,000 in value, its area being 33,474,896 acres of the total of 36,000,000 acres in the State. 14 per cent. of the corn of the country, Census of 1920, was produced in Iowa—444,190,000 bushels—wheat being low with 10,102,000, and potatoes high with 4,128,000 bushels, hay with 4,659,000 tons, and oats with 187,045,705 bushels.

Live stock interests are immense, with all animals raised in the temperate zone abundant, and dairy and poultry outputs likewise enormous.

Fruit interests are confined mostly to the smaller varieties, and garden stuff is heavily cultivated.

The farms number 213,439, averaging 156.8 acres and 134 actually improved. Iowa is the strongest centre of the late agricultural movement which resulted in the rapid development of the American Farm Bureau Federation, the President, James Riley Howard, being an Iowan, and agrarian influence dominates the State. Iowa has the largest ratio of automobiles per capita of all States, the farmer-owner prevailing.

Transportation is highly developed, with railways literally ribbing the State, for vast through, as well as immense local, tonnage. River tonnage on the Mississippi moves in vast volume, with much on the Missouri.

Railroad mileage 1923, was 9,838. Interurban electric service is greatly developed.

Coal underlies about 19,000 square miles, the output, Census of 1920, being 6,300,000 tons, lead being found in the northeastern part, and quarry output heavy.

Manufacturing naturally consumes mostly agricultural products, in preparation of foodstuffs for the market—meat packing, flour, etc., with considerable development also of machinery making to supply the immense nearby markets. More than $500,000,000 is invested in manufacturing, the output, Census of 1920, having been $310,750,000.

Iowa leads all States in literacy. Only 1.1 per cent., Census of 1920, are illiterate, the percentage of native whites being 5-10ths of 1 per cent., of foreign-born white, 4.9, and of Negro, 8.1. The State has a large percentage of native-born whites—89.8.

There are about 600,000 persons at school in Iowa, or one for each four of the population. The public school system is highly advanced, in method and provision for the people of all classes.

The College of Agriculture at Ames is claimed to be the leading institution of that character in the country. It has 4,859 students, and has pursued scientific investigation along all lines that appertain to agrarian interests, with much original research, and development of methods for crop and animal production and care. The University of Iowa at Iowa City has 7,500 matriculated.

A signal enterprise is the utilization of vast electrical power in the Mississippi River at Keokuk, where a remarkable dam has been built.

The diffusion of prosperity is indicated, Census of 1920, by the $391,505,000 deposits in savings banks by 905,970 persons, averaging $432.14 per account, or almost one account for each two and a half persons.

KANSAS.

Area, square miles ..... *82,158* ..... *18th in rank*
Population, 1920 ..... *1,769,257* ..... *24th in rank*
Population, 1925 (est.) ... *1,813,621* ..... *22.1 to sq. m.*
Wealth, 1923 (Census est.) *$6,264,058,000*

Kansas, a West North Central State, in almost the exact geographical centre of the United States, is bounded on the north by Nebraska, on the east by Missouri, on the south by Oklahoma, and on the west by Colorado. It is varied in topography, with prairies extending westward, where elevations of 4,000 feet are found. There is heavy forest cover in the eastern half, much hardwood, black walnut abounding. The climate is severe in winter and warm in summer, but constantly modified by the prevalent winds. The Missouri River skirts the northwestern side for 150 miles, giving navigation to St. Joseph, Atchison, Leavenworth and Kansas City, the only other considerable rivers being the Arkansas and the Kaw.

Railway traffic is mostly east and west, and several of the largest systems have lines, with liberal pro-

vision for branch service, to care for the heavy through traffic and the large State production.

Railroad mileage, 1923, was 9,385.

Kansas is essentially agricultural, although natural mineral wealth adds heavily to production. The Census of 1920 gives $588,923,248 as value of all crops, livestock products not included.

The total acres in the State is 52,581,120, of which by the 1920 census there were 45,425,179 in 165,286 farms, averaging 275 acres each, with a total value of $2,830,063,918 for land and buildings.

For the last twenty years Kansas has averaged 119,256,179 bushels of corn, and 93,881,169 bushels of wheat per year, but in the last ten years these crops have been reversed and the State has averaged 111,532,943 bushels of wheat, and 84,890,994 bushels of corn per year. For the crop of 1923 Kansas sowed more than half its total of plough land to wheat alone, and used more bushels for seed than the total wheat yield of twenty-three other States. There were thirty-seven other States which did not have as many acres in all kinds of crops together as Kansas had in wheat alone. Last year the Kansas wheat crop was more than double that of any other State.

Farming is marked with the most modern of equipment in machinery. Cotton and tobacco are grown to some extent, the climate and soil being such as to enable the further development thereof when economic conditions demand.

In the western reaches of the valley of the Arkansas River irrigation is extensive and becoming more important (45,000 acres under water) as demand for land increases in the whole country. Dairy and poultry products run above $60,000,000 annually.

Cheap and abundant feeds and pasturage, with a mild climate, good water and nearness to market, make Kansas one of the four greatest cattle-producing States in the Union. 50 per cent. of all the cattle received at the Kansas City stockyards come from Kansas, and Kansas City is the second largest livestock market in the world.

Manufacturing, including smelting of ore, refining of oils, meat handling, and milling is very extensive, the 1920 census assigning $913,667,000 as the value of the products of all industries. Slaughtering and meat packing leads with $427,663,000, and flour milling comes next with $206,881,000, and oil refining with $63,786,000, while car building and repairing by the railways adds annually $28,231,000, and butter alone $24,444,000.

The coal fields underlie more than 15,000 square miles, and, Census of 1922, produced 2,995,170 tons, and the oil measures, which are very extensive, yielded 28,250,000 barrels of petroleum. There are zinc, lead and salt.

Kansas has only 1.6 per cent. of illiteracy, that of the native whites being 6-10ths of 1 per cent.; of foreign-born whites, 10.5; and of the Negroes, 8.8; the Kansas colored man having advanced far along the roadway toward normal literacy. The attendance at all educational institutions is more than 400,000, or about one for each four persons.

The State supports the University of Kansas (4,000 students) and Agricultural College at Manhattan. There are four large colleges.

The diffusion of prosperity is to be judged by the fact that agricultural, livestock, dairying, mineral and manufacturing annual production totals about $1,700,000,000, or about $2,180 for each man, woman and child in the State.

KENTUCKY.

Area, square miles.....40,598.....36th in rank
Population, 1920.....2,416,630.....15th in rank
Population, 1925 (est.)...2,488,425.....61.3 to sq. m.
Wealth, 1923 (Census est.).....$3,582,391,000

Kentucky, grouped as East South Central, a border State between the North and South, is bounded on the north by Indiana and Ohio, on the east by West Virginia and Virginia, on the south by Tennessee, and on the west by Indiana and Illinois. The Mississippi River touches the western most tip, and the Appalachian Mountains cross the eastern side, the Ohio River skirting the entire northern boundary. Navigable rivers flow past the State for a total distance of 813 miles. The topography is broken, with many hills dotting the tablelands, of which the famous Blue Grass region in the northern part, east from Louisville, is best known and most productive.

Agriculturally, the State is very productive; $347,338,888 is given by the Census of 1920 as the value of all crops, which included the highest quantity of tobacco of all States, 467,500,000 pounds; and a most varied list of temperate zone products, shading off into those distinctly Southern. The corn crop in 1921 was 82,150,000 bushels.

Livestock interest is important, Kentucky horses having been for long world famed, its thoroughbreds not being excelled anywhere. Other domestic animals abound, and fruits are extensive.

Coal mined in 1922 was 42,134,175 tons, and petroleum lifted, 1923, 8,069,000 barrels.

Forest wealth is great, coniferous and hardwood trees abounding, and normally yielding annually $20,000,000.

Manufacturing engaged, in 1919, $276,535,395 of capital, and the output of its 3,957 establishments was valued at $395,660,417.

Railroad mileage, 1923, was 3,955.

The illiteracy percentage is 8.4, that of native whites being 7, of foreign-born 7.3, and of Negroes 21. The State public school system enrolls about 550,000, and four universities, 5,200.

The distinctive natural phenomenon is the 9,000 square miles in Central Kentucky which is ribbed with underground passages and caves, chief of which is the Mammoth Cave, with its 150 miles of connecting passages.

In the old days before Prohibition, Kentucky was famed for its whiskeys, Bourbon County, at Paris, in the Blue Grass region, having lent its name to the corn liquor of that name formerly made and consumed in the United States.

LOUISIANA.

Area, square miles.....48,506.....30th in rank
Population, 1920.....1,798,509.....22d in rank
Population, 1925 (est.)...1,879,024.....38.7 to sq. m.
Wealth, 1923 (Census est.).....$3,416,860,000

Louisiana, situate in the West South Central region, on the Gulf of Mexico, at the mouth of the Mississippi River, is bounded on the north by Arkansas and Mississippi, on the east by Mississippi State and the Gulf, on the south by the Gulf, and on the west by Texas. It is practically all alluvial built up from the silt brought down by the Mississippi River, which has thrust out a long point into the Gulf, as the southernmost part of the State.

There are no hills of consequence, and much of the lands are lower than the immediate banks of the great river, powerful levees being necessary to protect from constant overflow. As a consequence of the downwash of river sedimentary matter, the lands were naturally highly enriched, and subsequent overflowing of the waters has added food values of the soils, as does the Nile in Egypt.

The western part, immediately next to Texas, shades off toward the drier character of climate and soils, the climate of Louisiana for the greater part being rather moist and very warm in summer, with little of winter cold. It is semi-tropical.

The Sabine River bounds the State on the west, and with the Red River and the Mississippi, Louisiana has 4,794 miles of navigable waterways, much of it being on the large bayous in the south.

The Mississippi River has always largely determined the character of New Orleans, chief city, for there river traffic from earliest days has been extensive, and New Orleans has dominated the State economically. For some years after the Civil War of 1861-5 river traffic fell off, but is now being revived, and is expected to grow to very heavy volume.

New Orleans opened its new industrial canal to navigation on Feb. 6, 1923, followed by formal dedication May 5. It connects the Mississippi River and Lake Ponchartrain to the north, which is not a lake but an arm of the Gulf of Mexico. The Industrial Canal is 5½ miles long, and has been under construction for nearly five years. The lake is now connected with the sea by two channels, one of which it is proposed to deepen to make a ship channel of forty or forty-five foot depth from the city through the lake direct to the Gulf, many miles east of the mouth of the Mississippi River. Such a channel it is believed would be free from silt and currents which have so far hindered ship channels of such depth in the river. The new canal makes available 96,000 acres of potential harbor sites to connect with the great ship locks in addition to the many miles of yet unused river frontage. The canal was paid for by the people of New Orleans with no Federal aid whatever. The city's policy provides for—Public ownership of river harbor front, commercial sites and facilities available to all users on equal terms; Public ownership of inner harbor sites on short term or long term leases and Private ownership of sites on ship laterals of the main canal and Private ownership and unhampered use of industrial facilities thereon.

Railroad mileage, 1923, was 5,065.

Agriculturally, Louisiana is prolific—rice, cotton, sugar cane, corn, sweet potatoes, tobacco, especially fine fruits of all sub-tropical sorts, and nuts are produced largely. The value of all crops, Census of 1920, was $231,506,000. Nearly all the sugar cane and molasses produced in the country comes from Louisiana, the value being $141,852,924, 1919 census. Cotton values the same year were $53,-

250,000. Livestock interests are extensive. It is second in output of lumber.

The State ranks fifth in petroleum output, 1923 census, 24,919,000 barrels. Sulphur also is largely produced. There are more than 6,000 square miles water covered, suitable for the propagation of oysters; the shrimp catch is very valuable, and commercial fishing an important industry. Trappers market muskrat, opossum, raccoon, mink and other furs in great quantities.

Manufacturing industry centres mostly around the use of soil raw materials, the output in 1919 being valued at $676,189,770, from 2,617 establishments with a capital of $462,209,057, and employing 112,523 persons.

Foreign trade through the port of New Orleans is large, 1924 exports equalling $326,283,310, and imports $177,859,368, mainly of cotton and cottonseed, wheat brought down the Mississippi, flour, rice and other products.

There were, in 1923, 355,000 enrolled in the public schools of a population of more than 1,800,000, divided, two-thirds white and one-third Negro. Much of the population retains the original French blood, and considerable numbers the mixture of French and Spanish, which produced the Creoles. About 6,000 attend the colleges and universities, of which Tulane University (2,580 students), and the Louisiana State University (1,250), are the leaders.

New Orleans, the chief city, is a welcome resort for tourists in the winter, having picturesqueness and the flavor of olden times, the annual Mardi Gras being the principal attraction. Much through passenger traffic flows through New Orleans to and from the Pacific Coast, railway and steamer facilities being well supplied.

The population of New Orleans on July 1, 1924, was estimated as 409,534, by the Census Bureau.

MAINE.

Area, square miles ..... 33,040 ..... *38th in rank*
Population, 1920 ..... *768,014* ..... *35th in rank*
Population, 1925 (est.) ..... *782,541* ..... *23.9 to sq. m.*
Wealth, 1923 (Census est.) *$2,006,531,000*

Maine, in New England, northeasternmost State, is bounded on the north by Quebec, Canada, on the east by New Brunswick, Canada, and the Atlantic Ocean, on the south by the Atlantic, and on the west by New Hampshire and Quebec.

It is naturally heavily wooded, mostly with coniferous trees, is of broken topography, rising to mountainous elevations in the northwest, Mount Katahdin, 5,268 feet, the highest, and slopes in broken form toward the coast, which is rugged, tortuous, picturesque and indented with many harbors, with many islands adjacent, and has very extensive natural water power sites, already somewhat developed, but assuring great industrial capacity in the future.

Its waters abound in fish, its forests in wild animals, and it has a climate rather intensely cold in winter, but beneficent in summer. It has more than 1,600 lakes, several more than 100 miles long. The coastline is 278 miles long.

Agriculture, lumbering, manufacturing, quarrying and fisheries are the chief industries.

Of the 20,000,000 total land acres, about one-third is farming area, of which about two-thirds is improved. Potatoes form the leading crop, the 1920 census showing 25,531,000 bushels worth $52,339,000. Hay is a large crop, and all vegetables and considerable small fruits are produced. The value of all crops, 1920 census, was $100,152,324. Livestock and dairy products add to the wealth, the milk production coming in part to supply New York City.

In granite output it ranks third, Vermont and Massachusetts exceeding; it is first in feldspar.

Lumber is the principal manufacturing product, the cut, Census of 1920, being 650,000,000 feet, white pine, spruce for wood pulp, hemlock, balsam, birch, cedar, oak, maple, beech, ash, and basswood or linden. The paper pulp mills produce $70,000,000 annually, and along the rivers are many water power motived textile, tanning, oilcloth, boots and shoes, canning, flour and machinery works. The total value of the manufacturing output, 1919, was $465,822,000, paper and wood pulp leading with $93,917,000, cotton goods next with $56,564,000; boots and shoes, $48,689,000; woolen goods, $42,442,000; lumber, $28,515,000, etc.

Transport by water is mostly coastwise, although there is some foreign. The railroad mileage, 1923, was 2,247.

Maine is distinctively a pleasure resort, summer bringing many thousands of tourists and residents for the season, and the fall many hunters. Luxurious hotels are maintained, and there are many private lodges and summer homes, while many artists go to paint the beauties of the Maine landscape and coastline.

Portland, the chief port, has a large steamer tourist traffic, as well as extensive freight tonnage by water and by rail.

Illiteracy percentage is 3.3, that of native whites 1.6, and of foreign-born 11.1. Public schools enroll about 170,000, and higher educational institutions rank well, notably Bowdoin College, the University of Maine, Colby and Bates.

MARYLAND.

Area, square miles ..... *12,327* ..... *41st in rank*
Population, 1920 ..... *1,449,661* ..... *28th in rank*
Population, 1925 (est.) ..... *1,537,085* ..... *124.7 to sq. m.*
Wealth, 1923 (Census est.) *$3,990,730,000*

Maryland, a South Atlantic border State between the North and South, is bounded on the north by Pennsylvania, on the east by Delaware and the Atlantic Ocean, on the south and west by Virginia and West Virginia. It is penetrated from the south by Chesapeake Bay, a wide arm of the Atlantic, and an important channel of water-borne commerce which has made Baltimore a great seaport. The Potomac River flows along the western boundary line, also important in commerce. The topography is varied, low and flat in the portions toward the ocean, and rising to mountain levels in the western sections, Great Backbone Mountain, 3,400 feet, the highest. The State is distinctly separated by the bay into Eastern and Western shore parts, each having social and industrial individuality. The climate is warm, with mild, humid winters.

The Census of 1920 showed $109,683,574 as the value of the crops, principally corn, tobacco, wheat, oats, hay, fruits of all kinds grown in the south temperate zone, vegetables being produced heavily for the markets of the larger cities as far north as New York. Products are varied and profitable on account of the proximity of big city markets.

Mining is principally of coal, about 3,600,000 tons being the normal output.

Manufacturing output, Census of 1919, was valued at $873,945,000, and ran the gamut of almost all classes. Shipbuilding led with $60,844,000, followed by clothing, $60,414,000, slaughtering and meat packing, $41,439,000, and the iron and steel industry, $19,884,000, which is fast growing to great importance. The census reports showed 60 classifications with more than $1,000,000 of output each, which afford profitable diversification in industry and employment for a versatile working folk. The number of establishments was 4,937, with a total capital of $619,606,983, and employing 165,875 persons.

Transportation is highly developed, water and rail. Railroad mileage, 1923, was 1,448. Baltimore is one of the country's principal ports, and is growing in importance much faster than the Nation's whole volume increases. Water traffic coastwise is very heavy, and several substantial steamer lines also ply between Baltimore and foreign ports. Much of the product of the South comes through Baltimore, and that port gets a large share of the tonnage of the North and West.

Baltimore, on July, 1924, by estimate of the Census Bureau, had a population of 784,938.

The population is 17.9 per cent. Negro, and the percentage of illiteracy for the whole State is 5.6. The swiftness with which educational advantages for the masses is sweeping away illiteracy is shown by the figure of 5.6 for 1920, compared with 7.2 in 1910. In the schools were more than 250,000, and the higher institutions are celebrated. Johns Hopkins University, at Baltimore, is not excelled in any State or country for scholarship and breadth of scientific attainment. To its hospital go patients from all parts of the world to consult eminent specialists. There are other well-known higher institutions, Goucher College one of them.

At Annapolis is the famous United States Naval Academy (see Index therefor).

Along artistic lines there is high development, principal centres being Peabody Institute for Education in Music, the Maryland Institute School of Art and Design, Walter's Art Gallery, and others.

MASSACHUSETTS.

Area, square miles ..... *8,266* ..... *44th in rank*
Population, 1920 ..... *3,852,356* ..... *6th in rank*
Population, 1925 (est.) ..... *4,127,653* ..... *499.1 to sq. m.*
Wealth, 1923 (Census est.) *$12,980,839,000*

Massachusetts, one of the Thirteen Original States, lies in New England, bounded on the north by Vermont and New Hampshire, on the east by Massachusetts Bay and the Atlantic Ocean, on the south by Rhode Island, Connecticut and the Atlantic, and on the west by Rhode Island and New York

The highest elevations are in the Berkshires in the west, about 2,400 feet maximum, and now a great summer resort of wealthy city dwellers.

It was naturally wooded in all portions, but retains only a fraction of the original forest wealth, which consisted of all trees which grow in the temperate zone, coniferous and hardwood.

The State has grown to a first place in industry, manufacturing having been developed very greatly, the 1920 census showing the value of all industrial products to be $4,011,182,000, divided into 100 classes each exceeding $5,000,000 annual output. The per capita industrial output is $1,045. Much of the industrial strength is due to the development of extensive water powers in the State's rivers, but coal operates many.

Massachusetts is the most prominent textile manufacturing centre in the United States; also it ranks first in the production of boots and shoes, the number of pairs turned out in 1919 being 102,389,856, valued at $415,360,600, and 5,620,573 pairs of slippers valued at $11,548,870.

Cotton goods led with $596,667,000; boots and shoes, $442,466,000; worsted goods, $237,443,000; leather tanning and finishing, $129,595,000; foundry and machine shop products, $111,853,000; slaughtering and meat packing, $110,238,000; woolen goods, $105,183,000; and nine classifications exceeding $50,000,000 output, 12 exceeding $25,000,000, and five exceeding $20,000,000. Practically everything manufactured in modern industry is included, excepting in those basic industries in which the cruder raw materials such as ores are needed. The census showed 11,906 establishments worthy being reported, employing 812,906 persons, paying in wages $766,623,337, capitalized for $2,947,108,527, utilizing 1,729,878 horsepower, consuming $2,260,713,026 of raw materials, and adding by the industrial effort $1,750,468,496 to the original value of the materials.

The State has abundant rail and coastwise shipping facilities; there were 2,103 miles of railroads in 1923, and 2,804 of electric lines. From the earliest generations, the New England States have been efficient in ocean-going shipping, and Massachusetts not less than any.

Massachusetts is the second densest populated State. The dense industrial and residential development is indicated by the 94.8 per cent. of urban population, which leaves agriculture, once dominant, reduced to 32,001 farms averaging 77.9 acres, value of all crops in the 1920 census being $53,700,925, taken from farm property valued at $300,471,743. In value, hay was the leading crop, tobacco next with $6,419,000, and potatoes with $6,000,000, others being wheat, corn, oats, rye, buckwheat, apples, maple sugar, and small fruits, cranberries abounding in the lands along the coast.

It is the leading fisheries State of New England, $11,000,000 of catch being reported in 1920. Boston is greatest fishing port in the country.

Mineral products consist chiefly of quarry outputs.

No State is further advanced in primary and higher educational facilities, although, owing to recent heavy influx of industrial foreigners, the percentage of illiteracy is not low at 4.7. Native whites show 4-10ths of 1 per cent., foreigners, 12.8, and Negroes, 6.8.

Of the 3,852,356 of population, 1,077,534 are foreign-born, of which 262,021 are Canadians, 117,037 Italian, 163,171 Irish, 92,034 Russian, and the others from all foreign lands.

Boston, on July 1, 1924, by estimate of the Census Bureau, had a population of 776,783.

Enrolment in the schools was 618,828; normal schools number 11, and the list of higher institutions is long and impressive, the greatest proportioned to population in the country. These include Harvard University, Massachusetts Institute of Technology, the State Agricultural, Amherst, Tufts, Williams, Clark, Worcester Polytechnic, Boston University. Institutions for women include Wellesley, Smith, Radcliffe, an offshoot of Harvard, and Mount Holyoke Colleges; Simmons, Lasell and Auburndale.

The colony in pre-Revolutionary times was the centre of republic-making in the North, perhaps in the country, the Boston Tea Party, which signalized the revolt against "taxation without representation" by the mother country, England, taking place on the Boston waterfront.

As with all New England, the State is a great summer resort, the North Shore above Boston being the resort of summerers and many artists, and the long hooklike Cape Cod and the adjacent islands attract thousands. At Provincetown, at the tip of the Cape, the Mayflower made its first landing, moving next to Plymouth. A monument, dedicated by the late Theodore Roosevelt, stands at Provincetown to commemorate the landing.

MICHIGAN.

Area, square miles ..... *57,980* ..... *22d in rank*
Population, 1920 ..... *3,668,412* ..... *7th in rank*
Population, 1925 (est.) ..... *4,154,625* ..... *71.6 to sq. m.*
Wealth, 1923 (Census est.) *$11,404,861,000*

Michigan, lying along the Canadian border, is divided by Lake Michigan into two parts: the northern peninsula has on the north Lake Superior, and on the south Wisconsin; the southern peninsula has Lake Michigan on the west, Lake Huron, Ontario, Canada, and Lake Erie on the east, and Indiana and Ohio on the south. The interests of the northern peninsula are mostly copper and timber. In the southern there are also minerals and timber, but manufacturing has grown to chief importance.

The State is mostly flat and sandy, with large areas of cut-over timberlands, mostly coniferous, with rugged topography in the north. The State, the Federal Government and large private enterprises are now making great efforts for the reforestation of the land.

No State has greater water boundary lines proportioned to area; transport naturally is great by that means. Rail facilities are abundant, lines having sought the heavy tonnage of the recently developed industry. Railroad lines milcage, 1923, was 8,549, and the great Sault Ste. Marie Ship Canal, between Lakes Huron and Superior, accommodates more tonnage than the Suez Canal or any other like canal. In 1923 the American and Canadian canals together sent through 91,379,658 tons of freight valued at $1,026,045,064, of which much is iron ore from Minnesota and copper from Michigan, vast supplies of grains, flour and timber, and coal and supplies for the Northwest.

Michigan is the automobile centre of the world, about two-thirds of the 2,000,000 cars produced annually being made there. There are 68 motor car factories outputting more than $1,000,000 a year, chief of which are the works of Henry Ford at Detroit, which, according to degree of production at the moment, make up to 1,500,000 a year, besides farm tractors at Dearborn, nearby, and steel and other mills operated by the Fords. Besides the Ford cheap car, Detroit makes some of the finest built in the world.

There are 8,305 manufacturing establishments, capitalized at $2,340,954,312, which represents an increase of 73 per cent. in five years, paying wages of about $800,000,000 a year, using materials worth $2,000,000,000 and employing about 550,000 persons normally. The total value of the product in 1919 was $3,466,188,483. It is the seventh in rank in output. Fifty makers of automobiles, bodies and parts in the State, do an annual business of above $1,000,000.

Michigan leads all other States in output of chemicals, drugs, engines, threshing machines, furniture and refrigerators. Fourteen copper, brass and bronze manufacturers exceed $1,000,000 of annual output. Stove-making is as great as in any State, and there are many other factories, there being 460 concerns that output more than $1,000,000 annually. Michigan nearly a billion feet of lumber.

Production of iron ore in 1923 was 14,065,561 tons; copper, 137,691,306 pounds; coal, 929,390 tons; salt, 2,118,000 tons.

Agriculture adds annually, Census of 1920, $404,347,810 for all crops, potato production the third largest with a $32,000,000 crop. Sugar beet output is heavy, and all temperate zone crops are raised.

In shipbuilding it ranks seventh among the States. Fisheries catch annually 50,000,000 pounds.

There are more than 6,000 smaller lakes, where fishing and summer sports attract many. Apple production is fourth highest, and the State claims leadership in small fruits. Corn yields about $50,000,000.

Educationally, Michigan has its great State University at Ann Arbor, which was first to admit women matriculates, the oldest agricultural college in the country, many normal schools, and a public school system that enrolls 670,000; it has a literacy percentage of 3; native white, 7-10ths of 1 per cent., and foreign-born, 9.9.

Detroit, by the Census of 1920, had 993,739, showing an increase of 527.978—113 per cent.—in the decade. By the Detroit Water Board Census of September, 1924, the population of the city proper is 1,222,500; and the approximate population of Grater Detroit is 1,500,000. It has alarge percentage of foreigners.

Detroit, in 1919, had 2,176 manufacturing establishments with about 176,000 workers and a ,total product valued at $1,234,519,842.

Beautifully situate along many waterways, it bids successfully for metropolitan repute and constantly attracts newcomers from home and abroad. In summer time, the Mackinac Islands, Belle Island, Ausable and St. Mary's River are popular resorts.

MINNESOTA.

Area, square miles . . . . . *84,682* . . . . . *11th in rank*
Population, 1920 . . . . . *2,387,125* . . . . . *17th in rank*
Population, 1925 (est.) . . . *2,563,550* . . . . . *30.2 to sq. m.*
Wealth, 1923 (Census est.) *$8,547,918,000*

Minnesota, of the West North Central, on the Canadian border line, is bounded on the north by Manitoba, Canada on the east by Lake Superior and Wisconsin, on the south by Iowa, and on the west by the Dakotas The Mississippi River rises in Minnesota. It is a State of widely variant natural resources and rapidly developing wealth, is in general a tableland of rolling, timbered, prairies excepting in the western parts, where timber is scarce, and of rugged character in the northeast, where immense deposits of ore, high-grade Bessemer prevailing, supply the steel concerns of Illinois, Pennsylvania and Ohio. Its climate is not excessively warm in summer, and is cold in winter time. There are about 10,000 lakes, many exceedingly beautiful, that abound in fish, and are the resort of pleasure-seekers in the summer.

Agriculturally, the State is rich, with $506,020,233 as the value of all crops reported by the 1920 census; it has 178,478 farms with a total acreage of 30,221,758; a billion feet of lumber cut, mostly white pine; 34,593,000 tons of iron ore, worth $128,377,174, being 61 per cent. of the national production, shipped eastward by steamers on the Great Lakes; manufactures, $1,218,129,735 worth of product in 6,225 establishments, capitalized at $679,386,486, employing more than 147,678 persons, and using raw materials worth $883,989,777. The flouring mills are the principal concerns, leading the United States and the world in annual volume of output, $381,249,000. Iron output in 1923 was 44,556,053 tons.

Industry is considerably diversified, there being 65 lines, the annual output of each of which was reported by the 1920 census as more than $1,000,000, including meat packing, $146,361,000; butter, $88,862,000; lumber, $37,321,000; railway cars and repairs, $35,351,000; linseed oil, $33,238,000. Manufacture of machinery is now an important industry. Minneapolis and St. Paul the chief centres of all industry.

By adaptation, fruits have been made to thrive, until the crop is large of all kinds grown in the north temperate zone; while corn, in earlier years scarcely known, has by the same process been brought to high value.

The 1920 census reported the crop at 118,000,000 bushels; wheat, once the chief crop, 37,710,000; oats, 90,000,000; with generous yields of all other cereals.

Twenty-five years ago Minnesota ranked third in lumber output, but has fallen to eleventh place, although there remains an estimated 21,000,000,000 feet of spruce in the forests, which is very valuable for paper woodpulp in these years of diminishing supply. 80 per cent. of the cut is white pine, which also is rapidly disappearing.

Railroad mileage, 1923, was 8,812.

Minnesota has been especially fortunate in the heavy inflow of those European racial migrations from the northern countries whence come good farmers, Scandinavians in the majority, but with almost as many Germans; both nationalities settled in more or less clannish sections, but have helped to develop the State with great thrift and industry.

In illiteracy the State is among the lowest, only 1.8 per cent. being unable to read and write, against an average of 6 per cent. for the United States. The State claims one of the most efficient systems for popular education, with enrolment of about 550,000 in all institutions out of a population of 2,387,125. The University of Minnesota, upbuilt by its late President, Cyrus Northrop, has close to 10,000 students and ranks among the greatest of the country, with smaller colleges such as Hamline University, St. Thomas, Macalester, Carleton, and a score of others scattered through the State, some supported by church denominations.

The grain trade control in Minneapolis is second only to that of the Chicago Board of Trade; and the water and rail shipping from and to Duluth, at the head of the Great Lakes, on Lake Superior's western end, is immense in ores, coal, cereals, and general freight. The Great Northern Railway Company maintains a fleet that traverses the lakes, and initiates shipments to and from all parts of the world via the lake route.

In the carrying of iron ores, the United States Steel Corporation, which owns mines and railways in the northern ore region, has developed a fleet of monster carriers and a system of prevention of waste time not excelled by any transport agency in the world.

MISSISSIPPI.

Area, square miles . . . . . *46,865* . . . . . *31st in rank*
Population, 1920 . . . . . *1,790,618* . . . . . *23d in rank*
Wealth, 1923 (Census est.) *$2,177,690,000*

Mississippi, one of the States of the East South Central group, is bounded on the north by Tennessee, on the east by Alabama, on the south by Louisiana and the Gulf of Mexico, and on the west by Louisiana and Arkansas; the Mississippi River is the western boundary line. It is hilly but not rugged, and in general slopes downward to the great river and the Gulf shore. The climate and production are sub-tropical. The density of population in 1920 was 38.1 to the square mile.

Agriculture is its chief interest. The 1920 census gave the value of all crops as $336,267,156, corn and cotton the main production. It was the sixth cotton State, producing 885,000 bales worth $173,820,000, with cottonseed by-products worth $28,000,000. Other crops are rice, sugar cane, oats, wheat, hay, peanuts, potatoes, and every character of fruit grown in its zone. Apples, plums, pears, apricots, melons, strawberries, peaches, and grapes grown in the western parts, with oranges, lemons, figs and olives in the Gulf coast sections. Nuts are abundant.

Dairying and fishing yield generously.

Manufacturing rests mostly on an agricultural basis for the utilization of the soil products of the State, the total value, Census of 1920, of industrial products being $197,747,000 for 2,455 establishments, employing 64,452 persons, capitalized at $154,117,000. Lumber and timber products lead with $87,508,000; oil and cake from cottonseed yielding $39,202,000. Cotton mills are not yet extensive.

The forest wealth is very great. Of the total of 33,000,000 acres, about 11,000,000 is forested, yellow pine chiefly. There is much of the fast disappearing hardwood.

Transport is supplied by the rail lines and by the Mississippi River, on which traffic, lessening in the recent era of rapid rail development, is growing again to great relative importance.

Railroad mileage, 1923, was 4,235.

Vicksburg is the chief city, and was the theatre of the famous siege by Gen. Grant, Union commander.

The old plantation life prevails as unchanged as in any Southern State, with spacious mansion houses and large estates, the homes of the old-time aristocracy of the age of the Southern cavalier.

The rate of illiteracy is high—17.2 per cent. on the average—owing to the large number of Negroes, who are 56.2 per cent. of the whole population. Native whites showed, Census of 1920, only 3.6 per cent. illiterate, but the Negroes 29.3. Rapid progress in popular education is being made, the illiteracy percentage in 1910 having been 22.4.

Public school enrolment is about 600,000, more than half of which is colored. A score of higher educational institutions are maintained, the University of Mississippi the leader, and there are several church colleges.

MISSOURI.

Area, square miles . . . . . *69,420* . . . . . *18th in rank*
Population, 1920 . . . . . *3,404,055* . . . . . *9th in rank*
Population, 1925 (est.) . . . *3,466,781* . . . . . *50 to sq. m.*
Wealth, 1923 (Census est.) *$9,981,409,000*

Missouri, a West North Central border State, is bounded on the north by Iowa, on the east by Illinois and Kentucky, on the south by Arkansas, and on the west by Oklahoma, Kansas and Nebraska.

The Mississippi River skirts the entire eastern boundary line for 500 miles, and the Missouri River the northern half of the western line, cutting then through the State to confluence with the Mississippi at St. Louis. In all it has nearly 1,000 miles of navigable waterways.

Its topography is varied—upland table in the north and west, the Ozark Mountains in the centre and south, with low-lying river bottom areas in the extreme southeast. Its climate is a compromise between the north temperate and sub-tropical.

Economically, it partakes of the characteristics of both North and South, is strong agriculturally, timberwise, horticulturally, industrially, and in education. Farms number 263,004 with 34,774,679 acres.

Manufactures exceed agriculture in value of products, reported by the 1920 census as more than $1,594,208,338, all crops being valued at $559,047,854. Manufactures rest chiefly on soil produce as raw materials, the list including meat packing, flour milling, machine-making and foundries, with very large production of boots and shoes, chemicals, tobacco products, paints and varnishes, corncob pipes, and lumber and timber products. The total number of establishments was 8,592, with a capitali-

zation of $938,760,773, and employing 244,939 persons.

Industry centres in St. Louis, principal city, at the junction of the Mississippi and Missouri Rivers, and in Kansas City at the junction of the Kansas and Missouri Rivers on the western border, and is spreading rapidly into other parts, as well as increasing in volume.

St. Louis, in 1919, had 3,205 manufacturing establishments with a total product of $871,700,438, and employing about 115,000 workers. Kansas City with 997 establishments had a total product valued at $192,815,052.

The Census Bureau estimated that on July 1, 1924, the population of St. Louis was 812,698, and of Kansas City, 359,650.

Missouri is second in the production of zinc and lead, the value in 1922 being $21,468,814.

Agriculturally, it is a great State. There is a total of about 38,500,000 acres in all, of which the 1920 census assigns to farms 34,774,000, with more than 24,000,000 improved. The corn crop was 182,000,000 bushels, wheat and oats together more than 76,000,000, tobacco, 3,700,000 pounds. The crop of cotton, mostly in the southeast, was 78,000 bales on 117,000 acres, far above the average per acre production.

In livestock the Missouri mule, which is facetiously said to have won the war, has always been used much locally and exported to all other States and foreign countries.

Railroad mileage, 1923, was 8,059.

With 4.8 per cent. of Negro population, the average of illiteracy for the State is 3 per cent. for all classes; native white percentage, 2; and foreign-born, 9.6.

Although the native-born whites are 88.2 per cent., and foreign-born whites only 7, the influx of Germans in the revolutionary times of their native land in the last century left a large proportion of persons of that blood, especially in St. Louis, to this day, those now being practically all natives. They have been noted for thrift.

The schools enroll about 750,000 of a population of 3,404,055 by the 1920 census. The State University at Columbia, and St. Louis University and Washington University at St. Louis, twelve colleges and seven normal schools are the higher institutions.

St. Louis is the gateway for north and south travel as well as of freight traffic, and many tourists stop there en route. A feature is the famous bridge across the Mississippi, which is said to accommodate more freight cars than any other in the world. River traffic is immense, to and from New Orleans and intermediate points.

MONTANA.

Area, square miles ..... *146,997* ..... *3d in rank*
Population, 1920 ..... *548,889* ..... *39th in rank*
Population, 1925 (est.) ..... *646,806* ..... *4.4 to sq. m.*
Wealth, 1923 (Census est.) *$2,223,189,000*

Montana, a mountain State, is bounded on the north by Canada, on the east by North and South Dakota, on the south by Wyoming and Idaho, and on the west by Idaho.

The Rocky Mountain range crosses the State in the west, with the Bitter Root range at the extreme western side, the country east of the Rockies sloping off into vast plains and smaller valleys between smaller hill elevations. Its rivers of note are the Missouri, up which crude boat navigation has passed for generations; the Yellowstone, Madison and Bitter Root. Of the 50,000,000 acres, the forests of about 30,000,000 acres are, with other areas, ranges for livestock grazing, which is important.

Mining, copper smelting and refining are the leading interests, producing two-thirds of the total industrial values reported in the 1920 census, $195,-624,000; value of all crops being $69,975,000, the wool and sheep of the State ranking third, and cattle bringing in $28,000,000, while dairy and poultry products added about $38,000,000.

Irrigation, by Federal Government and private initiative, has been highly developed, resulting in the production of large quantities of the standard fruits, orchard and small, of the temperate zone, the State, although far north and high in elevation, being especially suited to that activity, largest development being in the Bitter Root, Missouia and Flathead regions. Wheat, oats, flaxseed, barley, rye, corn, hay, potatoes and sugar beets are produced.

Montana has a stumpage of more than 58,000,-000,000 feet of timber, of which much is the increasingly valuable white pine; other kinds are larch, spruce, cedar, Douglas fir, white fir, lodge-pole pine, valuable for telegraph poles, hemlock and yellow pine.

The mineral resources are very great. The 1920 census gave $77,032,000 as the value of coal and metals, excluding manganese, the latter being necessary in all modern steel-making processes. The wide fluctuations of copper, lead and zinc prices in the past few years have rendered the annual mineral output value exceedingly variable. The output value reported in 1920 was about half of 1919.

The State produces the third largest amount of copper, and coal underlies about 20 per cent. of the whole State area. All of the metals and minerals are found in vast abundance, large fortunes having been made by organized mineral industry. Montana smelters utilize ore running so low as slightly under 2 per cent. of actual copper, so highly organized are the appliances.

The State is second in silver output (1923, $11,665,-543) and in zinc; eighth in gold (1923, $1,760,100), and first in semi-precious stones. Considerable oil is produced, and valuable process minerals are graphite, gypsum and tungsten.

A million potential horsepower is available in the waters, of which almost one-third has been developed. Immense reservoirs have been constructed on the Madison and Missouri Rivers to give dependable water supplies.

Railroad mileage, 1923, was 5,040.

Montana is low in illiteracy—2.3 per cent.—that of native whites being only 3-10ths of 1 per cent. Public school enrolment, 1920 census, was 122,000 of a population of 548,000, and there are four well-equipped colleges and normal schools.

Scenically, Montana is not surpassed. Its lofty mountains are rugged and picturesque, and travel by rail or automobile takes one through beautiful and grand places. Glacier National Park, on the line between the United States and Canada, is one of the most wonderful public preserves in the world.

NEBRASKA.

Area, square miles ..... *77,520* ..... *15th in rank*
Population, 1920 ..... *1,296,372* ..... *31st in rank*
Population, 1925 (est.) ..... *1,355,371* ..... *17.5 to sq. m.*
Wealth, 1923 (Census est.) *$5,320,075,000*

Nebraska, a West North Central State, is bounded on the north by South Dakota and Iowa, on the east by Iowa and Missouri, on the south by Kansas and Colorado, and on the west by Colorado and Wyoming.

Typical of the American western plains States, its lands a vast inclined plane, sloping off eastward to the Missouri River bottoms. No point rises more than 5,300 feet above sea level, while the average elevation is about 2,000. Its climate is typically north temperate, its products likewise, including almost every species appropriate to that latitude. In the east, rainfall is sufficient for crops, with little irrigation. In the west, irrigation is resorted to, and grows in importance. The live-stock industry is second to agriculture in primary wealth producing, Nebraska supplying very much of the Nation's meat, and packing a large portion of it in the stockyards at Omaha. In this industry it has taken third rank from New York State, its product in 1919 being valued at $303,848,903.

Of the 55,000,000 acres in the State, 42,225,475 are included by the census in 124,417 farms, with 24,587,000 improved. The corn crop was 184,000,-000 bushels, fourth in rank; wheat, 60,000,000, ranking third, and large quantities of oats, barley, rye, potatoes, buckwheat, flax, cloverseed and sorghum syrup, and sugar beets to some extent. Fruit raising is not extensive.

Nebraska is not rich in mineral wealth. In the west, potash lies in considerable quantity in solvent form in several lakes, from which in the war about 61,000 tons, 45 per cent. of the relatively low United States production, was taken.

Manufactures relate chiefly to the utilization of soil products. The 1920 census gave 2,884 as number of establishments, employing 49,076, and $596,-041,000 as the value of the entire products, of which meat packing led with $303,849,000. Manufactures centre in Omaha, which also is one of the greatest rail traffic centres of the United States, being the true eastern terminus of the Union Pacific system.

Railroad mileage, 1923, was 6,181.

With the University of Nebraska at the head, there are 16 colleges and normal schools.

Percentage of illiteracy is exceedingly low at 1.4, that of native white being 4-10ths of 1 per cent., although the percentage of foreign-born whites is 14.8. More than 300,000 attend the public schools of a population of 1,300,000.

NEVADA.

Area, square miles ..... *110,690* ..... *6th in rank*
Population, 1920 ..... *77,407* ..... *49th in rank*
Wealth, 1923 (Census est.) *$541,716,000*

Nevada, least populous of all States, less even than the District of Columbia, is of the Mountain group in Western United States, bounded on the

north by Oregon and Idaho, on the east by Utah and Arizona, on the south and west by California.

It is mountainous, and minerals yield $48,528,000, Census of 1920, against $13,980,000 as the value of all crops. Much of the land is arid or semi-arid, and irrigation is developing to large importance. The Federal Government has a project to reclaim 160,000 acres, which when complete will add not less than $20,000,000 to the annual crops. Agriculture is not varied, owing hitherto to lack of water, but as irrigation advances, diversification of products proceeds. Live stock interests are relatively large.

With only 77,407 persons indicated by the Census of 1920 (.7 to the square mile), there are 2,357,000 acres in farm areas, with 595,000 improved.

Mineral resources are varied—gold (1921, $3,220,500); and silver, third in rank (1921, $6,908,774) leading. Copper, lead, zinc, iron, quicksilver, tungsten, sulphur, graphite, borax, gypsum and quarry stones are produced also.

The forest area is more than 5,300,000 acres, of which 4,971,335 are set aside as national forests.

Manufacturing output, Census of 1920, was about $20,000,000.

Railroad mileage, 1923, was 2,161.

Illiteracy percentage was 5.9, of which native whites showed only 4-10ths of 1 per cent. Schools for popular education are well provided, with about 15,000 enrolled.

Nevada by law inflicts the death penalty by lethal gas, a spray of liquid hydrocyanic gas being turned into the stone death chamber. It is declared to have proved instantaneous and painless.

NEW HAMPSHIRE.

Area, square miles.....9,341.....43d in rank
Population, 1920.....443,083.....41st in rank
Population, 1925 (est.).....450,171.....48.2 to sq. m.
Wealth, 1923 (Census est.).....$1,347,135,000

New Hampshire, the Granite State of New England, is bounded on the north by Canada, on the east by Maine and the Atlantic Ocean, on the south by Massachusetts, and on the west by Vermont, and was one of the Original Thirteen States.

Its northern parts are rugged, reaching in the White Mountains the highest elevations of the Northeastern United States (Mount Washington, 6,293 feet). Toward the sea, it is more level and agricultural and industrial by utilization of river water power.

With less than half a million people, Census of 1920, value of all crops was $23,509,000, while the value of all industrial products was $407,205,000; cotton goods, $85,986,000; boots and shoes, $73,871,000; paper and wood pulp, $41,826,000; woolens, $31,245,000; with twenty other industries exceeding $1,000,000 in annual output, lumber having $14,992,000; worsteds, $14,699,000.

Railroad mileage, 1923, was 1,239.

New Hampshire has in all 5,779,000 acres, of which in farm lands there are 1,441,111 cultivated. Hay is the chief crop, followed by corn, potatoes, oats, and apples, with relatively large dairy output, milk being shipped to the New York market.

The State has 4.4 per cent. of illiterates; native white having 7-10ths per cent., and foreign-born, 15.4. Public school enrolment was 70,000. Dartmouth College, at Hanover, is the leading educational institution, from which many eminent men have come, among them Daniel Webster. There are four other higher institutions.

The White Mountains are par excellence a summer resort for persons from all parts of the United States. A modern system of automobile highways is maintained, ribbing the mountains.

NEW JERSEY.

Area, square miles.....8,224.....45th in rank
Population, 1920.....3,155,900.....10th in rank
Population, 1925 (est.)...3,506,428.....426.3 to sq. m.
Wealth, 1923 (Census est.).....$11,794,189,000

New Jersey, one of the Original Thirteen States, is in the Middle Atlantic region. It is bounded on the north by New York and Pennsylvania, on the east by the Atlantic Ocean and New York, on the south by the Atlantic and Delaware Bay and on the western side by Pennsylvania. It is mostly low and flat, having hilly development in the northern end, where an extensive State park has been set aside.

New Jersey has extensive water navigation facilities, with Delaware Bay, and the Delaware River along most of its western side, the Atlantic on the east, and the valuable facilities of New York City's harbor and branches on the northeast.

Railroad mileage, 1923, was 2,314.

The State grades sixth in industrial strength, production being exceedingly varied, and, although the greater part is in Newark, it is well diffused in all parts. As a consequence, railway facilities are highly developed, and especially in the northern parts the electric railway lines are unusually extensive. Newark (census estimate July 1, 1924) has now a population of 445,606; Jersey City, 312,-157; and Paterson, 140,637.

Economically and to a degree politically, New Jersey and New York City have common interests. Very many New Jerseyites work or transact business in the greater city, transit facilities being arranged so that access to New York is as facile as to any other part of the city by means of the Hudson and Manhattan tubes.

The output, Census of 1920, of the industries was valued at $2,990,939,000. The 306 silk mills employed 25,046 persons, and output $120,075,000. Oil refining leads all industries, with $328,120,000, followed by explosives, $197,074,000; chemicals, $189,117,000; machinery, $140,119,000; shipbuilding, $123,884,000; woolens and worsteds, $118,-635,000, rubber goods, $98,410,000; wire and wire cloth, $93,350,000; with large productions of pig iron, steel and iron, $66,425,000; cigars and tobaccos, $55,470,000; leather, $44,552,000, and numberless others which employ most varied operators, skilled and unskilled.

The State (1919) had 11,057 manufacturing establishments, employing about 525,000 workers with an output valued at $3,672,064,987.

Its agriculture is affected most vitally by the proximity of the immense markets of the greater city and the fact that 78.7 per cent. of the population is urban. Market gardening has advanced to large magnitude, very many foreigners, especially Italians, having gone out to work in that line. The 1920 census gave $87,484,000 as the value of all crops. The total land area of the State is 5,779,840 acres, with 1,441,000 cultivated. Corn, wheat, oats, potatoes of both kinds, rye, buckwheat, and hay are the chief crops. Fruits are extensively grown, the cranberry marshes supplying about one quart for each of the population of New York City, and the same of strawberries. The peach and apple crops are always important. The dairy output was reported at $19,198,000.

New Jersey produces minerals abundantly—iron ore, and about one-fourth of the Nation's supply of magnetite, zinc and much clay products.

The U. S. Geological Survey has found that the green sand marl belt that extends across the State from near Sandy Hook to Salem, 100 miles long with a width of from one to thirteen miles, contains 256,955,000 tons of potash (K_2O) that could be mined from open pits, enough to supply the needs of the United States for 1,000 years.

The educational institutions are important: Princeton University at Princeton is one of the country's foremost colleges, of which former President Wilson was President. Rutgers College, New Brunswick, and Stevens Institute of Technology at Hoboken are well known, and there are five other colleges of prominence. More than 700,000 are enrolled in the schools, percentage of illiteracy being, Census of 1920, 5.1; native white, 6-10ths of 1 per cent.; foreign-born, 15.3. In Passaic, Bergen, Union and Middlesex Counties the proportion of foreign-born is from 25 to 35 per cent.

Atlantic City, three-fourths of the way down the eastern coast, is one of the great seashore resorts in the country, and Cape May another.

NEW MEXICO.

Area, square miles.....122,634.....4th in rank
Population, 1920.....360,350.....44th in rank
Population, 1925 (est.).....379,074.....3 to sq. m.
Wealth, 1923 (Census est.).....$851,836,000

New Mexico, of the Mountain (southeast) group, is bounded on the north by Colorado, on the east by Texas, on the south by Texas and Mexico, and on the west by Arizona. The Rocky Mountain range marks the north and centre; the eastern parts are of the flatter tableland of which Texas forms also a part, and in the south are bare, sterile, desolate peaks surrounded by arid and semi-arid plains and deserts, of which the mirage is an interesting phenomenon. The central western portion has drainage by the Rio Grande River, and the Pecos River flows through the eastern districts.

The climate is dry, stimulating, with mean annual rainfall of from 12 to 16 inches in different localities, and with 100 degrees of heat infrequent in summer, the mean for the year being about 50.

The population of 360,000 produces agriculturally Census of 1920, $40,619,000; from mineral industries, about $45,000,000; about $20,000,000 of manufactures, and heavily of live stock products.

Copper production in 1923 was 57,521,171 pounds.

A unique feature of tillage is the production

from dry farming, a modern scientific process, causing otherwise dry, almost arid lands to yield. There are more than 945,000 acres included in irrigation projects, with 550,000 actually under water. The 29,845 farms averaged 840 acres, and the chief crops are hay, corn, wheat, oats, barley, rye, kaffir, milo, all the vegetables, potatoes, cotton with 5,000 bales production, broom corn, sugar beets, the fruit industry being extensive.

Railroad mileage, 1923, was 2,959.

New Mexico partakes of the oldtime life of the West so far as does any other State, but is practically of the new day, with all civiiized agencies at hand, even the cowboy passing rapidly away as modern devices multiply.

The population is 21,181 Indian on Government reservations (4,697,224 acres in 1920 with a valuation of $21,916,965, and income of $2,196,417), 13,414 of Mexican parentage, of a total of 360,350.

Many go to the State for wintering, and artists have lately resorted there for the painting of Indian and old Spanish types, and the things that remain from the aged Aztec civilization. Albuquerque, Santa Fe, Las Vegas and other cities are popularly sought by the tourists and artists and writers, who are provided with excellent travel facilities.

Students find deep interest in the history of the areas which once were the bed of a great inland salt sea, in which were deposited all the basic salts found in the ocean waters, and which are expected to yield later rich mineral wealth for fertilization of lands and chemical uses.

NEW YORK.

Area, square miles.....49,204.....29th in rank
Population, 1920.....10,385,277.....1st in rank
Population, 1925 (est.)..11,105,625.....225.6 to sq. m.
Wealth, 1923 (Census est.).....$37,035,262,000

New York, the Empire State, since 1820 the most populous in the Union, is bounded on the north and west by Lake Erie, Ontario, Canada, Lake Ontario and Quebec, Canada; on the east by Vermont, Massachusetts and Connecticut; and on the south by the Atlantic Ocean, New Jersey and Pennsylvania. Its sea front consists of the southern shores of Long Island, Staten Island. and the entrance into New York Harbor, one of the greatest in the world, and the chief port of the United States, into and out from which moves the greater part of the national commerce, foreign and domestic, passenger and freight. Long Island Sound, a wide arm of the Atlantic, which separates Long Island from Connecticut on the north, is navigable for deep sea craft. The Hudson River carries heavy ship tonnage northward from New York Harbor 150 miles to Albany, the capital, and Troy. Large steamers and sailing craft also ply the two Great Lakes, and the St. Lawrence River, which forms part of the northwestern boundary. On the northern part of the eastern boundary line is Lake Champlain, 100 miles long, a historic waterway bearing much commerce and making into the St. Lawrence River at Sorel. New York Harbor also includes the shores of New Jersey, enabling traffic intercourse between the two States.

New York has about 800 miles of navigable ocean, lake and river waterways, the State being penetrated by the New York State Barge Canal (Erie), through which there is capacity for the passage annually of 20,000,000 tons of freight. The canal also connects with Lake Champiain, so that inland tonnage may move between New York City, Buffalo, about 500 miles northwestward on Lake Erie; Oswego, on Lake Ontario, the ports on Lake Champlain northward so far as Rouse's Point at the Canadian border, and on into the St. Lawrence River; besides to several interior New York State points on other minor canal routes.

The Adirondack Mountains (first land to appear in the western world) occupy the northeast part of the State, and are dotted with beautiful lakes and rivers. In the east the Catskill Mountains, made famous by Washington Irving's story of "Rip Van Winkle," line the western bank of the Hudson. Just above New York City the topography of the Hudson's banks takes the form of lofty rock palisades, beautifully conformed and colored, and on the edge of which is a spacious Interstate Park set aside by the States of New York and New Jersey. All of New York is marked with scores of lakes and smaller rivers navigable for pleasure craft. The drainage from the crest west from Utica is in three directions—southeastward into the Atlantic Ocean; northward into Lake Ontario at Oswego, and southward into the rivers that make through Pennsylvania.

The 49,204 square miles of area, equivalent to 31,490,560 acres, contains 1,550 square miles, or 992,000 acres, of inland waterways, leaving a net land surface of 47,654 square miles, or 30,498,560 acres. The chief economic interests are the national and international financial community of New York City, the foreign commerce in New York Harbor, now the heaviest in the world; the large manufacturing, and the rich agricultural resources.

The 1920 census gave $417,046,864 as the value of all farm crops, to which the greater part of the 17.3 per cent. of rural population gave direct or contributary attention. Only California exceeded New York in production of hay and grapes, New York's grapes being from 30,677,555 vines, and the hay weighing 928,874 tons, Kansas coming next.

Literally everything characteristic of the temperate zone is produced in fruits, vegetables, grains and forage crops. New York led all States with 2,778,761 pear trees of bearing age, Michigan being next. In apple trees of bearing age, New York led the country, although Washington, with less trees, harvested more bushels. In acreage of small fruits, New York was second only to Michigan; and only California had larger acreage devoted to vegetables produced for sale. The State was second to Vermont in output of maple sugar, and led all the States excepting Maine in production of potatoes, Minnesota coming third.

Only Pennsylvania led New York in quantity of buckwheat grown; in wool New York with Pennsylvania led all Northeastern States. In the value of dairy products, New York was easily second in the country, with $756,045,942, Wisconsin leading with $858,258,521, while in value of livestock products of farms, New York led the United States, with $225,456,739, Wisconsin following with $213,022,023. In pure-bred sheep on farms, New York was surpassed by only seven States, while in pure-bred cattle New York was second only to Iowa.

In the number of domestic animals of all kinds on farms, New York led the United States, was far down the list in poultry, and was fifth in amount expended for farm labor. The State was sixth in number of farms mortgaged, and in total amount for which mortgages were given, and these things were developed on a total farmiand area which classes the State as nineteenth in the country.

The number of farms in 1920 was 193,195, a decrease of 10.4 per cent. in the decade. The total acreage was 20,632,803, of which 13,158,781 were improved.

Mineral resources are considerable, but in rank the State is below many others. Some iron ore (1923, $3,242,229) is mined in the Lake Champlain region; petroleum (1923, $4,140,000) is produced near the Pennsylvania border, also natural gas. Graphite is produced, also the baser minerals for building and manufacturing purposes. The output of salt in Onondaga County, fringing Lake Ontario (in 1922, 1,960,867 tons), is a large industry.

In manufacturing, commerce and finance, the figures are very large. More than one-half the export and import shipments of the United States pass through the Port of New York, to organize which into an economic and non-wasteful commercial agency the sovereign State of New York has created the Port of New York Authority, to work co-ordinately with a similar body created by the soverign State of New Jersey, to the end that commerce flow be more facile. (See Index for details.)

The number of vessels entering the Port of New York in the fiscal year ending June 30, 1924, was 4,521, of 18,280,975 tons; clearing, 4,719 of 18,858,693 tons. The imports for 1923-24 were valued at $1,667,567,171 and the exports at $1,594,099,139.

Railroad mileage, 1923, was 8,398.

The commerce flowing through the New York State Barge Canals, and through the ports of Buffalo and Oswego, runs into the millions of tons, and includes very heavy haulage of grains grown in the Middle West, destined for European ports.

The number of manufacturing establishments was 49,330 in 1919, with 1,228,130 workers. The total value of the capital investment was $6,012,082,567, and of the product, $8,867,004,906. The State is the third in importance in the textile industry; fourth in slaughtering and meat packing; first in knit goods; first in production of newspaper and wood pulp; fifth in the value of the products of steel (being exceeded by Pennsylvania, Ohio, Indiana and Illinois in that order); sixth in pig iron production (Alabama being fifth to those above named); and first in printing and publishing.

New York State paid $711,231,340, one-fourth of all the Federal internal revenue taxes collected in 1923. In addition a State income tax of $30,866,847 was paid by 1,089,129 persons on taxable incomes amounting to a total of $3,819,225,900.

Total resources of all financial and banking institutions, State and national, those subject to supervision by State and Federal authorities, exceed $13,000,000,000. Especially since the World War, New York financial lines criss-cross the earth. The Federal Reserve Bank of New York City transacts about one-third of the total business done

by the Federal Reserve System of the United States.

In the 148 savings banks of the State 4,311,954 depositors had on July 1, 1924, $3,273,854,200. In New York City 2,873,714 depositors (or every second person in the city) had a total of $2,455,261,923.

Population figures of the 1920 census of New York State show the presence of large representation of every civilized people on the globe, divided: 65.8 per cent. of native parentage; 13.9 of foreign parentage; 8.1 of mixed parentage, and 11.2 of foreign-born. About fifteen times as many Jews as are in Palestine live in the State (the total in New York City being 1,643,000), and almost as many Italians as in Rome. Germans numbered 295,650, and Irish 284,747, with 135,305 English.

New York's Indian population numbered 5,503 in 1920, of which 4,458 live on ten reservations, the largest 50 square miles, being the Allegany reservation in Cattaraugus County; the next largest Cattaraugus, 21,680 acres. The Senecas form the most numerous tribe with 2,485 members. Many of the Indians have attained a high state of civilization, are intelligent and are good business men. Their tribal rights are regulated by treaties and statutes, and their Peacemakers' Courts work satisfactorily.

Estimates of the Census Bureau give the population of the chief cities of the State as of July 1, 1924, as: New York, 6,015,504; Buffalo, 536,718; Rochester, 317,867; Syracuse, 188,060; Albany, 118,527; Yonkers, 109,618, and Utica, 105,315. The State will take a complete census in June, 1925.

The percentage of illiteracy was reported at 5.1; native white, ½ of 1 per cent.; foreign-born, 14.2; Negroes, who have increased rapidly since the late war, 2.9 per cent.

During the school year 1921-22, New York State spent $188,604,972 for education, an increase of 125 per cent. from the sum of $83,682,747 spent in 1917-18. This included capital outlay. The average cost for each pupil in New York State in the five years was: 1917-18, $55.22; 1918-19, $59.69; 1919-20, $67.44; 1920-21, $93.25; 1921-22, $96.69.

Nearly 2,000,000 attend the educational institutions, primary and higher, under control of the Board of Regents of the University of the State of New York (which see), and some of the most famous colleges and universities in the country are in New York State, among them Columbia University, with 32,688 resident students in 1924; the New York University, the College of the City of New York, Cornell University, Syracuse University, the University of Rochester, Hamilton College, Union University, Colgate University, Buffalo University, St. Lawrence University, Hobart College, College of St. Francis, Fordham University, Rensselaer Polytechnic Institute, and scores of special schools which are suited to every requirement in letters, science, engineering, finance, economics, sociology and art. Of the latter there are many of acknowledged merit, New York City being one of the art centres of the world.

At West Point, on the Hudson above New York, is the Military Academy of the United States Army, in a location famed for beauty.

The interests of the Empire State are so varied along other lines that no listing is attempted here. More than 200,000 transient travellers enter the greater city daily, so it is estimated; and to Niagara Falls, near Buffalo, many more than 1,000,000 go each year. The Adirondacks and the Catskills have each summer hundreds of thousands of tourists and campers, the other lakes their tens of thousands. Safe waters on Long Island Sound are used by many yacht clubs, and the ocean beaches daily have large throngs.

(Detailed statistics follow under the classification of New York State; consult Index.)

NORTH CAROLINA.

Area, square miles . . . . . *52,426* . . . . . *27th in rank*
Population, 1920 . . . . . *2,559,123* . . . . . *14th in rank*
Population, 1925 (est.) . . . *2,759,014* . . . . . *52.6 to sq. m.*
Wealth, 1923 (Census est.) *$4,543,110,000*

North Carolina, a South Atlantic State, of the Old South group, is bounded on the north by Virginia, on the east by the Atlantic Ocean, on the south by the Atlantic and South Carolina, and on the west by Tennessee. Physically, it is divisible into three distinct parts—a sloping sandy coastal plain from the low-lying 300-mile sea line on the east, a tableland in the central portion, and a mountainous western one-third running into the Appalachian range, Mt. Mitchell, 6,711 ft., the maximum. The climate grades from sub-tropical in the east, to milder on the tableland, and relatively cool and stimulating in the mountains.

There are many islands off the northern half of the coastline, with Pamlico Sound and its tortuous shores affording many inlets and potential harbors, a favorite resort for hunters. Cape Hatteras, the easternmost point, is feared by mariners as especially stormy and dangerous.

The Census of 1920 gave $943,808,000 as the value of manufactures, cotton goods leading with $318,368,000 (exceeded only by Massachusetts and South Carolina), others being tobacco, cigars and cigarettes, $226,636,000; lumber and timber products, $54,928,000; cottonseed oil cake, $46,995,000; chewing and smoking tobacco, $33,188,000; knit goods, $29,834,000; furniture, $29,725,000; fertilizers, $27,551,000 and 30 others from $24,000,000 down to slightly more than $1,000,000, including in part flour, car building, machinery, vehicles, medicines, clay products, silk goods, in a total of 5,999 establishments employing 175,423 persons, capitalized at $669,000,000, and using materials valued at $526,906,000.

Agriculture's principal crops, Census of 1920, were valued at $503,229,000. Farms numbered 269,763 with 20,021,736 acres, of which 8,198,409 were improved. In cotton production the State ranked second in 1923 with 1,053,402 bales. Cotton mills in 1924 numbered 444, with 84,600 looms and 5,879,000 spindles.

North Carolina is the second tobacco State, producing 310,240,000 pounds; corn, wheat, rye, potatoes and peanuts, 4,756,000 pounds, are large crops, with all others raised suitable to the zone, fruits as well, grapes being especially plentiful.

In minerals, the State is rich, ranking first in production of mica, there being much magnetic iron ore, and some lead, zinc, copper, gold, silver, corundum, tin, feldspar, talc and graphite. A valuable contribution is monazite and zircon, used in making incandescent lamp mantles.

Of the 35,000,000 acres in the State, originally about 11,000,000 were forested, chiefly with yellow pine, of which it is estimated that 15,000,000,000 feet remain on about half a million acres. The annual lumber cut is about 1,200,000,000 feet, the market being largely in the North, considerable coming to New York coastwise in vessels.

Railroad mileage, 1923, was 5,382.

Over 99 per cent. of the population are native born Americans.

The Negro constitutes 31.6 per cent. of the population, Census of 1920, and the State percentage of illiteracy is 13.1, having been 18.5 in 1910. Illiteracy of native whites is 6.8. Public school enrolment is 725,000, with compulsory instruction. The chief higher institutions are the State University, Chapel Hill, and the Agricultural College, West Raleigh. Much effort is expended by the latter to improve tillage methods, with increase of the per acre production as one result.

A striking feature has been the very large migration of residents of the mountains to the cotton mill towns, where they remain as operatives, whole families accepting employment, including children.

Asheville is the chief resort, being popular in the winter, its golf course one of the most famous in the country.

NORTH DAKOTA.

Area, square miles . . . . . *70,837* . . . . . *16th in rank*
Population, 1920 . . . . . *646,872* . . . . . *36th in rank*
Population, 1925 (est.) . . . . *686,424* . . . . . *9.7 to sq. m.*
Wealth, 1923 (Census est.) *$2,467,772,000*

North Dakota, in the West North Central group, formed part of the original territory of Dakota, is bounded on the north by Canada, on the east by Minnesota, on the south by South Dakota, and on the west by Montana. It is drained in the south eastern one-third by the Missouri River, and in the northeast by the Red River, which stream is the line between North Dakota and Minnesota, and the valley of which, an old lake bed, is exceedingly fertile. "Number One Northern Hard" wheat originated there, and is a premium grade of that cereal. The surface in the eastern two-thirds is a vast rolling plain, once with scant rainfall, but now, since cultivation advanced westward, having precipitation enough for the large crops produced.

Agriculture is easily the chief interest, with the value of all crops reported in the 1920 census at $301,782,000, against $57,374,000 for all manufactured products, and that mostly of flour and other grain products consumed locally.

Every cereal and other crop known to the north temperate zone is produced, wheat being the principal crop, 61,540,000 bushels reported in the 1920 census, grown on about 9,000,000 acres, worth $147,696,000; rye, barley and corn being also extensively produced, and the total value of all cereals given at $215,764,000. Hay is raised heavily, more than 4,000,000 tons, worth $56,000,000. On 650,000 acres, 2,972,000 bushels of flaxseed were raised, highest production in the country, value being $13,000,000.

Much of the grain and practically all of the forage crops are for local feeding to livestock, that industry being very important. More than 2,300,000 domestic animals were reported by the 1920 census. In the State were 77,690 farms with an acreage of 36,214,751, of which 24,563,178 were improved.

A vast proportion of the western part is underlain by brown or low-grade coal, which is produced not extensively and only for local domestic consumption, the State depending on the mines of other States for supply.

Railroad mileage, 1923, was 5,281.

North Dakota, with total population of 646,872, Census of 1920, had 131,590 or 27.1 per cent. of foreign-born whites. The percentage of illiteracy is very low at 2.1; native white, 4-10ths of 1 per cent., foreign-born white, 5.6. Foreign-born whites in order of numbers were Norwegian, Canadian, Russian and German.

North Dakota has been the theatre of several advanced social and economic experiments, the State, under the leadership of the Non-Partisan League, entering basic business enterprises including banking, and cooperative grain elevators.

The recreation for outsiders is the big hunting in the west and on the prairies for game birds, the prairie chicken predominant, and the lakes and rivers abounding in geese and ducks.

OHIO.

Area, square miles ..... *41,040* ..... *35th in rank*
Population, 1920 ..... *5,759,394* ..... *4th in rank*
Population, 1925 (est.) ... *6,321,539* ..... *154 to sq. m.*
Wealth, 1923 (Census est.) *$18,489,552,000*

Ohio, an East North Central State, is bounded on the north by Michigan and Lake Erie, on the east by Pennsylvania and West Virginia, on the south by West Virginia and Kentucky, and on the west by Indiana. It has no considerable elevations, being highest in the centre, and sloping in each direction to the lake on the north and to the Ohio River, a great traffic route, on the southern boundary line. Its climate is characteristic of the north temperate zone, with abundant rainfall.

Ohio has navigable waterways for the 430 miles of the Ohio, the 230 miles of lake frontage, and 100 miles up the Muskingum River in the southeast. It sends much tonnage down the Ohio. Rail transport is very heavy in all directions. Railroad mileage, 1923, was 8,872.

Manufacturing, mining and oil are the chief interests. The value of all products of manufacturing alone in 1919 was $5,100,308,728, from 16,125 establishments, employing 882,918 persons, with a total capital investment of $3,748,743,996. The iron and steel ore and reduction and machinery industries lead all others, with 29,649,245 tons of ore received at the Lake Erie port of Cleveland, heaviest handler of ore in the world. Cleveland, Youngstown, Canton, Steubenville and Middletown are the principal iron and steel working points. Manufacturing is very extensive in other lines. Of the 264 industries classified by the Federal Census Ohio has considerable production in all but 46, ranking first in eighteen of them, and second in iron and steel products.

Akron is the world's rubber centre, turning out in 1920 tires worth $545,812,000. Fourteen rubber companies there employ 72,397 persons, 1920 census, and pay wages totalling $142,330,000. The product goes to every country on the globe, as does the machinery made in the State.

The State ranks fourth in mineral wealth extracted, 45,000,000 tons of bituminous having been lifted in 1920 by 50,000 miners who received more than $48,000,000 in wages. Cleveland alone shipped also 22,900,000 tons of coal in 1920.

Oil production is very great, especially in the Lima district, the output in 1923 being 7,085,000 barrels.

The brick and pottery production in 1923 was valued at $71,347,314.

The output of automobiles in the Toledo and Cleveland districts is second only to that of Detroit, mostly of medium or higher grades.

But the agricultural wealth also is great, value of all crops and livestock sold being as reported in the 1920 census $904,400,000, which was exceeded by only four other States. Principal crops are cereals, hay, potatoes, tobacco, vegetables, sugar beets, and all products of the zone. Corn totalled 149,844,000 bushels, oats, 46,000,000; hay, 7,600,000 tons; tobacco, $64,420,000 pounds; and canning of fruits and vegetables was extensive, the fruits being those of the north temperate zone, the 1920 report showing the value of the output more than $19,000,000. Number of farms, 256,695, with acreage of 23,515,888.

Much high-bred livestock is raised, and the meat packing industry is highly developed.

Its mineral wealth includes coal, iron, glass sand, clays, salt, petroleum, natural gas, limestone, sandstone, gypsum, mineral waters, some potash and pyrite.

Standard railway and electric lines total 13,364 miles and include all companies operating in the Middle West.

Illiteracy is low at 2.8 per cent.; native white, 9-10ths of 1 per cent., foreign-born, 12.6, and Negro, 8.1. Foreign-born number 12.5 per cent. of the population, and are in the industrial centres chiefly, although throughout the agricultural districts the German native-born element is numerous, having come when the revolutionary movement broke in Germany in the last century.

The Census Bureau estimates that on July 1, 1924, the population of the chief cities was: Cleveland, 912,502; Cincinnati, 407,835; Toledo 276,359; Columbus, 266,709; and Dayton, 169,236.

The State has very many institutions of higher education, the Ohio State University at Columbus, the capital, leading with 8,600 students, others being Cincinnati University, 4,300; Western Reserve University at Cleveland, 2,330; Ohio Wesleyan University at Delaware, 1,900; Oberlin at Oberlin, 1,675; and eight others with about 4,000 attendance. Public school enrolment is more than 1,000,000.

Ohio is distinguished among the States for the tenseness of its political life. It is regarded as a politically pivotal State, and was the home of the late President Harding, whose newspaper was the Marion Star. It has given the United States five Presidents, all native born, while two others, elected as residents of other States, were born in Ohio.

OKLAHOMA.

Area, square miles ..... *70,057* ..... *17th in rank*
Population, 1920 ..... *2,028,283* ..... *21st in rank*
Population, 1925 (est.) ... *2,238,536* ..... *32 to sq. m.*
Wealth, 1923 (Census est.) *$3,993,534,000*

Oklahoma, in the West South Central group originally set apart for Indian reservations, and formerly known as Indian Territory, is bounded on the north by Kansas, on the east by Arkansas and Missouri, on the south by Texas, and on the west by Texas, a small panhandle strip to the northwest also touching New Mexico. It was the home of these Indian tribes—Cherokees, Crecks, Choctaws, Chickasaws and Seminoles, whose descendants remain as a large part of the present population, numbering 119,255 in 1920, holding 19,551,890 acres with a valuation of $320,496,333 and an income of $39.393,608.

Oklahoma is most a vast plain of rolling, fertile prairies, rising in the west to maximum elevations of 4,000 feet, one being 4,700 feet, with mountains in the south central and southwestern portions. It has a fair share of forested area, yellow pine predominating, with about 200,000,000 feet the normal annual cut, and 4,800,000,000 feet of timber standing. It has a healthful climate, rather warm in summer, with good precipitation for watering the large areas of agricultural lands, that with livestock and immense oil production being the main interests.

The 1920 census gave $522,565,000 as the value of all crops, cotton, 1,006,242 bales, ranking the State fourth; corn, 74,000,000 bushels; wheat, 52,640,000; oats, 49,500,000; and heavy production of other cereals and the basic vegetables with all fruits of the temperate zone abounding.

Dry farming is practised extensively in the western portions, and production of cotton is close to half a bale to the acre, much higher than the average. Farms number 191,988, with acreage of 31,951,934.

Including the refining of oil, Oklahoma's industrial output, Census of 1920, was valued at $401,363,000. Refining led with $150,673,000, flours coming next with $40,844,000. Industry comprehends smelting and refining zinc, the product being $19,518,000; oil cake making, $18,907,000; foundry and machine shop output, $13,510,000; and 25 other lines with more than $500,000 annual output. Manufacturing establishments in 1919 numbered 2,445, employing 38,314 persons, with $277,034,318 capital.

It is only 20 years since oil was discovered in Oklahoma, yet it has risen to the first rank as a producer. The 1923 figures on production were 160,929,000 barrels. Much of the oil land is owned by persons, formerly in moderate circumstances. Indians, wards of the Nation, received $36,659,810 in royalties in 1923 from oil and gas leases on their lands, their oil bonuses ranging from 12½% to 20% on a total production of 53,914,477 barrels. The field is like that of Texas.

Railroad mileage, 1923, was 6,600.

The percentage of illiteracy is 3.8; native whites 2.3; Negroes, 12.4; and foreign-born whites, 14; Negroes being about 10 per cent. of the whole.

The public school enrolment is about 600,000 with several promising higher institutions.

Apart from the romance of the Indian days and the "cowboy," Oklahoma went into history as the theatre of the most exciting "Sooner" rush for new lands ever staged in the United States

when, more than 25 years ago, the Federal Government, after taking large areas from the Indians by treaty, threw them open for settlement, and thousands camped on the boundary line for weeks, rushing across the border when the moment came for admission. The settlement and development into an organized community were remarkably rapid, until now the State has all that appertains to modern life.

OREGON.

Area, square miles ..... *96,699* ..... *9th in rank*
Population, 1920 ..... *783,389* ..... *34th in rank*
Population, 1925 (est.) ..... *846,061* ..... *8.8 to sq. m.*
Wealth, 1923 (Census est.) *$3,419,459,000*

Oregon, of the Pacific (northwest) group, is bounded on the north by Washington, on the east by Idaho, on the south by California and Nevada and on the west by the Pacific Ocean.

It has every character of climate and soil and production known to the temperate zone, the lands ranging from the heavily vegetated coast areas where rainfall is abundant, to the large stretches of semi-arid lands of the southeastern parts, with a touch here and there of almost desert although negligible in extent.

The coast climate is salutary, never very cold, and seldom very hot. That of the eastern portion, east from the Cascade Mountains, is drier and often colder

It has very important navigation facilities—the Columbia River flowing into the Pacific with a width at the mouth of up to 14 miles, the river carrying tonnage along the whole of the 400 miles of its seaward course from the Idaho line; and the Snake, running along the northern half of the eastern boundary, already conveying much traffic and being susceptible of greater development.

Into Oregon pour the products of "The Inland Empire," a region comprising 250,000 square miles in Eastern Oregon, Eastern Washington and Northern Idaho, the Columbia being the waterway outlet, and the railways following the water grades from the Empire through the Columbia River Gorge to Portland, the "Rose City," which is actually on the Willamette River, ten miles from the Columbia, but economically on the Columbia. Portland has very heavy foreign commerce.

The products of that Inland Empire are most varied, as are those of Oregon; which are very large fruit production, immense salmon fisheries, most extensive cereal production, and timber from forests that are the most extensive of any American State, it being estimated that the standing timber is 500,000,000,000 board feet.

The part of Oregon west from the Cascade Mountain range, which has peak elevations up to 12,000 feet, is slashed north and south by the Coast Range, a very aged ridge now eroded to lower levels. The whole of the western one-third of the State has abundant rainfall, although not so much nor so constantly as many believe, the average precipitation at Portland being about that of Chicago or New York. There are such forests as may be found in few parts of the world, immense numbers of trees attaining 20 feet in diameter, while there are vast stretches in which the lumbermen have taken only trees not less than eight feet in diameter and regarded it as cut-over land. The chief varieties are Douglas and white fir, spruce, hemlock, cedar, and larch, west of the Cascades, with yellow pine in the eastern Blue Mountains, another range. Oregon has almost one-half the more than one trillion feet of timber standing in the three Coast States, Oregon, Washington, and California. Some of the trees are more than 300 feet high. In the southwest are found forests of the red woods, with at least 20 other varieties of timber in abundance, some of it excellent for furniture manufacture, which is a considerable industry. The cut of timber is the third in the United States, Washington and Louisiana exceeding. The lumber is shipped to all foreign markets, more than a billion feet comes by the Panama Canal to the Atlantic Coast, and much is distributed by rail to the Middle West.

The fruit industry is among the most important in the country. Especially in apples the world calls for Oregon products, and the varieties of fruit grown include also peaches, pears, prunes—ranked the best known—apricots, plums, etc. Hood River, Medford, The Dalles and other towns are the centres of highly developed fruit raising.

In agriculture, development has been rapid, there being about 1,000,000 acres under water, and more than 2,000,000 included in irrigation projects, Federal and private. The lands not needing irrigation, which are very extensive, produce richly. The 1920 census assigned $131,884,000 as the value of all crops; wheat, about 20,000,000 bushels; more than 2,100,000 tons of alfalfa; hops, 4,788,000 pounds; and more than 8,000,000 bushels of oats. Farms number 50,206, with 13,542,318 acres.

In livestock the State is productive. The wool clip was 16,000,000 pounds, and $17,000,000 was realized from dairy products. The Coast States are especially fine for dairying.

Although undeveloped as yet, there are all the basic minerals in Oregon. Gold, silver and copper are mined, with also stores of lead, oil, quicksilver, chromic iron ore, platinum, and all the clays.

The value of the products of manufactures in the 1920 census was $366,783,000, lumber leading with $85,348,000, flour following with $42,550,000, other industries being shipbuilding, meat packing, canning, there being 20 others with more than $1,000,000 annual output.

The salmon fisheries centring in Astoria, at the mouth of the Columbia, are among the world's third greatest, the pack in 1920 being 481,545 cases.

Railroad mileage, in 1923, was 3,338.

In illiteracy Oregon ranks with Iowa and Idaho as the lowest in the country, the percentage being 1.5, that of native-born 4-10ths of 1 per cent. There are several colleges, the State University at Eugene, the celebrated Agricultural College at Corvallis, with about 4,000 students, Reed Institute at Portland, and others.

Oregon initiated the national movement for direct primaries, the initiative and referendum, and the recall, and adopted Prohibition independently of the national amendment.

Oregon passed a compulsory school law by a vote of 115,506 to 103,685, requiring all children between eight and sixteen to attend the public schools, to take effect September, 1926. The law was declared unconstitutional in 1924 as depriving parents of their rights and teachers of their livelihood and private schools of their property.

Its great Columbia Highway, unexcelled for scenic beauty, running up the river from Portland; Mt. Hood and other lofty mountains, and the unique Crater Lake, are points of tourist interest.

PENNSYLVANIA.

Area, square miles ..... *45,126* ..... *32d in rank*
Population, 1920 ..... *8,720,017* ..... *2d in rank*
Population, 1925 (est.) ..... *9,317,647* ..... *206.5 to sq. m.*
Wealth, 1923 (Census est.) *$38,833,745,000*

Pennsylvania, of the Middle Atlantic group, is bounded on the north by Lake Erie and New York, on the east by New York and New Jersey, on the south by Delaware, Maryland and West Virginia, and on the west by Ohio and Lake Erie.

It is of varied topography, like most Atlantic States, having leveller lands to the east, and rising to higher altitudes to the westward. The Appalachian range traverses the central part from northeast to southwest, a higher mountain region being in the extreme west, and another lower plane running down to the shores of Lake Erie. It has rivers important in navigation—the Ohio, the Susquehanna, the Delaware, the Allegheny and the Monongahela.

Viewed by and large, Pennsylvania may be said to lead all States in mineral and industrial production. Its mineral riches are very great. The 1923 census reported anthracite coal output at 95,440,000 tons; bituminous, 113,148,308 tons; worth together about $843,314,000. The coke output alone was $74,494,560. The natural wealth in iron ore, oil (value in 1923, $25,320,000), once leading the United States, and the quarries is large.

The State has built its industries largely on these basic elements. It produced nearly half the steel of the country, shipping it to all parts of the world. Its production in pig iron in 1923 was 13,898,624 gross tons. Pittsburgh is the centre of the greatest metal production ever attained in one locality. Its supplies of iron ore come mostly from Minnesota, and its operations have made more millionaires than any other single industrial centre in the country. It was there that the late Andrew Carnegie built up his fortune, developing new steel making processes. The perfected tonnage from Pittsburgh is the heaviest, excepting at New York and Chicago. Electrical goods and equipment is made in Pittsburgh in large quantity.

The State leads all Midwest States in cotton goods, is second in silk and wool goods, ranks first in leather output, glazed kid the most important. The census reports, in 1919, 27,973 industrial establishments, employing 1,323,000; paying $1,406,066,138 in wages, $334,763,215 in salaries; using $6,177,729,968 of capital and making products valued at $7,315,702,867.

The principal port is Philadelphia, which receives and sends to all world ports. It was the capital

of the United States, 1790 to 1800. The great Baldwin Locomotive Works is located there, and also extensive electrical equipment manufacturing.

Scranton is the greatest hard coal centre of the country, and makes much steel.

Erie on Lake Erie is the lake port.

Railroad mileage, 1923, was 11,427.

Pennsylvania produced, Census of 1920, more than $500,000,000 of crops. The region around Reading, Lancaster and York, with English names, is the scat of the famous German (Pennsylvania Dutch) agricultural development, not perhaps equalled in any other section of the United States.

Production is varied in all parts of the State; the cereals, forage crops, fruits, and all that the temperate zone raises. The crops are spread evenly through the whole list, with large diversification and consequent steadiness of prosperity. Tobacco raised was 57,900,000 pounds, 1920 census. The State has 202,250 farms, with a total acreage of 17,657,513.

In educational facilities the State ranks high. The principal higher educational institutions are the University of Pennsylvania at Philadelphia, the Pennsylvania State College, the University of Pittsburgh, and the Carnegie Institute of Technology at Pittsburgh, Lafayette College, Lehigh University at Bethlehem, Temple University, Bucknell University, Dickinson College, Alleghany College, Duquesne College, Grove City College, Pennsylvania College, and Swarthmore College, there being three colleges for women at Bryn Mawr, Pittsburgh and Chambersburg, Bryn Mawr having been distinguished especially.

Public school enrolment exceeds 1,600,000, and the rate of illiteracy is 4.6 per cent.; native white, 8-10ths of 1 per cent.; foreign-born, 18.9; Negro, 6.1. Of the total of 8,720,017 persons, the native white population is 80.8 per cent.; foreign, 18.8. In the industrial districts reside the bulk of the foreigners, the Census of 1920 showing in all 1,387,850, of which 120,194 were German, 90,666 Irish, 122,755 Austrian, 222,764 Italian, 161,124 Russian, 171,380 Hungarian, the Slavic strain being numerous. The urban population is 63.3 per cent.

The Census Bureau estimates that on July 1, 1924, the population of the chief cities was: Philadelphia, 1,951,076; Pittsburgh, 625,915; Scranton, 141,451; Reading, 111,812, and Erie (1923), 112,571.

In the past there have been bitter industrial conflicts, which happily have subsided to a large degree. The present era sees industry, mining and agriculture the three interests, with lumbering lately reduced to unimportance, although once a leading activity.

The Legislature in 1923 enacted a law to establish a system of old-age pensions, the maximum rate to be one dollar a day, the applicant to be over sixty, a citizen and resident of the State for over fifteen years. For a preparatory survey $25,000 was appropriated, and it is estimated the full operation of the law may require an expenditure of $10,000,000 yearly.

Under Gifford Pinchot, formerly Chief Forester of the United States, serving as State Forester for several years, a great reforesting movement has begun.

The Pennsylvania State Police, serving mostly the rural districts, have become an establishment of social import.

In the mountains are many popular summer resorts, with many fine country seats developed by the wealthy from old farm estates.

RHODE ISLAND.

Area, square miles . . . . . *1,248* . . . . . *48th in rank*
Population, 1920 . . . . . *604,397* . . . . . *38th in rank*
Population, 1925 (est.) . . . . . *639,401* . . . . . *512.3 to sq. m.*
Wealth, 1923 (Census est.) *$1,924,326,000*

Rhode Island, smallest of States, of the Original Thirteen, and in New England, is bounded on the north and east by Massachusetts, on the south by the Atlantic Ocean and on the west by Connecticut. Only 1,060 square miles of it is land. With 512.3 per square mile, it is the most denscly populated State, exceeds all others in the per capita industrial output; it is 97.5 per cent. urban, and exerts influence out of all proportion to size and numbers.

The 1920 census gave these figures: Number of manufacturing establishments, 2,466, employing 156,012 persons, paying $168,509,358 in wages and salaries, using $415,989,203 of materials, and producing $747,323,000 in all, or $1,245 for each man, woman and child in the State, using $594,337,448 of capital. It ranks fifth in the making of cotton textiles, third in woolens, sixth in silk, has a large list of other industrial activities, mostly calling for rather skilled operatives.

The first cotton spinning works of this country were established in Pawtucket in the eighteenth century, and since then Rhode Island has carried on large textile industry.

Jewelry, rubber goods, electrical equipment, hosiery, knit goods, and many other lines are produced. Providence, Woonsocket, and Pawtucket are the chief centres of industry.

Although so small in all ways, yet the agriculture output by the 2.5 per cent. of rural population, Census of 1920, was $5,340,378, and included about everything produced in the temperate zone.

Rhode Island has but 4,083 farms, with 331,600 acres, having lost 25 per cent. in a decade.

A large traffic, coastwise and foreign, passes through Providence, as well as heavy passenger travel, rail and water. Railroad mileage, 1923, was 211.

Newport, on Narragansett Bay, has been for decades the most famous of America's watering places. Palatial summer homes were built by the socially prominent of the past one or two generations, embellished by every art of architect and landscape gardener.

Providence, the capital, on July 1, 1924, had, according to the Census Bureau estimate, a population of 243,745.

The State enjoys extensive educational facilities, with Brown University and the State Normal School at Providence as the best known. Public school enrolment is 95,000.

The percentage of illiteracy is 6.5; native white, 7-10ths of 1 per cent.; foreign-born, 16.5. Foreign-born are 28.7 per cent. of the population, numbering 173,499—English, 25,782; Scotch, 22,253; Canadian, 36,400; Italian, 32,241.

SOUTH CAROLINA.

Area, square miles . . . . . *30,989* . . . . . *39th in rank*
Population, 1920 . . . . . *1,683,724* . . . . . *26th in rank*
Population, 1925 (est.) . . . *1,779,084* . . . . . *57.4 to sq. m.*
Wealth, 1923 (Census est.) *$2,404,845,000*

South Carolina, in the South Atlantic group, of the Original Thirteen States, is bounded on the north by North Carolina, on the southeast by the Atlantic Ocean, on the southwest by Georgia. Its topography is, like that of North Carolina, mountainous, 4,000 feet the maximum, in the western part, a plateau in the central strip, and low-lying and sandy toward the 200-mile seafront.

The climate westward is comparatively cool, in the central part medium, and nearer the coast subtropical and humid.

The coast is indented with several harbors, Charleston having the most important one, and being a prominent coastwise and foreign shipping port, cotton a principal outgo to Europe.

Agriculture easily leads in production, with $437,121,000 as the value of all crops, Census of 1920; cotton with 2,631,718 bales ranking the State fifth. Of the 192,693 farms of 12,426,675 acres, Negroes cultivated more than half, and owned very many. The sea island cotton grown there is the finest grade produced in the country.

All of the cereals, peanuts, tobacco, in which it ranks fifth, sugar cane, and all the vegetables are produced in profusion. Fruits are abundant, of temperate zone and sub-tropical varieties.

Livestock of higher breeds is an increasingly valuable adjunct.

Naturally, about half the area was forested, yellow pine predominating, with much hardwood, but the lumbering has been so extensive that the forested area is reduced to about 1,000,000 acres, and the cut is diminishing rapidly. About 14,000,000,000 feet of pine remains standing.

In cotton mill spindles, 5,275,000, the State is second only to Massachusetts. Much of the labor in these mills is supplied by mountain families who were induced to migrate to the lower levels by the higher incomes offered, the industrial development having been peculiar to the Southern cotton-mill States in the building of towns owned entirely by the companies. Much child labor is employed.

The State, by the Census of 1919, had $374,537,636 capital invested in 2,004 manufacturing establishments, employing 86,360 persons, to whom was paid $73,078,442 in salaries and wages; and with products valued at $381,452,984.

Railroad mileage, 1923, was 3,765.

About 400,000 are enrolled in the public schools, 200,000 being colored, who form 55.2 per cent. of the population, the State percentage of illiteracy being 18.1 against 25.7 in 1910. That of native whites is 6.5, of foreign-born white, 6.2, and of Negro, 29.3.

The University of South Carolina at Columbia is the leading higher educational institution, Clemson Agricultural College being next. Clemson in 1898 opened the first textile school in the United States, which has achieved much in training technical mill workers and foremen.

SOUTH DAKOTA.

Area, square miles . . . . . *77,615* . . . . . *14th in rank*
Population, 1920 . . . . . *636,547* . . . . . *37th in rank*
Population, 1925 (est.) . . . . . *666,380* . . . . . *8.9 to sq. m.*
Wealth, 1923 (Census est.) *$2,925,963,000*

South Dakota, West North Central, lower portion of the former Territory of Dakota, is bounded on the north by North Dakota, on the east by Minnesota and Iowa, on the south by Nebraska, and on the west by Wyoming and Montana. Its climate is that of the temperate zone northern latitudes, cold in winter and pleasant in summer. Before cultivation of the soil was extensive, it lacked rainfall; but precipitation swept westward as tillage advanced, until it now has normally abundant watering.

Its highest elevations are in the Black Hills in the southwest, the remainder of the State being a vast rolling prairie, falling off to lower levels in the northeast, which drains into the Mississippi River and into the Red River of the North. The major part of the State is drained by the Missouri River, which cleaves the State through the centre north and south. There are several minor drainage basins, feeding the larger rivers, with a succession of fertile valleys, highly productive, and a fair area of forests, yellow pine, spruce and others, 1,100,000 acres being under forest cover.

About 120,000 acres are irrigated, with about 200,000 acres normally in the irrigable sections.

It is claimed that more than 90 per cent. of the total area is arable. Of the 50,000,000 total acreage, 34,636,491 is in farmlands, with about 18,199,250 improved, farms numbering, Census of 1920, 74,637, crops being valued at $321,202,000.

Corn leads with 91,200,000 bushels; wheat, 30,175,000; oats, 53,650,000; barley, 19,250,000, and all the other cereals. Only the hardier fruits are grown.

The Census of 1920 shows livestock shipped valued at $154,631,000; dairy, fruit, poultry and other things, $50,000,000; the total revenues from all sources of wealth produced being $400,000,000, or about $600 per capita.

Mineral wealth is practically all in the Black Hills, where gold mined ranks the State fourth (value in 1923, $6,346,500). Silver, lead, and basic minerals also abound. There is coal in the northwestern parts, not yet accessible to transport.

Railroad mileage, 1923, was 4,276.

The 1920 census reports manufactures to be mostly of soil products, valued at $62,420,000, and population of 84 per cent. rural, 100,628 foreign-born of the total of 636,547, of which 16,000 were Norwegian, and 15,000 German.

Illiteracy is 1.7 per cent.; native white, 4-10ths of 1 per cent. About 100,000 attend the schools.

A feature is the large area in Indian reservations—the Rosebud, Cheyenne River, Pine Ridge, and the Lower Brule. The Indians numbered in 1920, 23,010; they engage in agriculture and livestock husbandry, occupy 6,685,734 acres, valued at $63,265,900. and have an income of $4,331,940.

TENNESSEE.

Area, square miles . . . . . *42,022* . . . . . *34th in rank*
Population, 1920 . . . . . *2,337,885* . . . . . *19th in rank*
Population, 1925 (est.) . . . *2,424,616* . . . . . *57.7 to sq. m.*
Wealth, 1923 (Census est.) *$4,228,251,000*

Tennessee, in the East South Central group, is bounded on the north by Kentucky and Virginia, on the east by North Carolina, on the south by Mississippi, Alabama, Georgia and North Carolina, and on the west by Arkansas and Missouri.

The eastern parts are in the Great Smoky Mountains, the surface sloping toward the west, first to an elevated tableland, then to the bottoms of the Mississippi River, which skirts the western border. It has the Tennessee River, which sweeps into Alabama from the northeast and returns to Tennessee at the northwest corner.

The forests cover about 30,000 square miles, and yield half a billion feet of lumber—oak, yellow pine, gum, yellow poplar, hemlock and chestnut.

The 1920 census showed $318,285,000 as the value of all crops, which include all things grown in the temperate zone, shading off to the almost subtropical in the south. Eight other States exceed its 264.562 bales of cotton produced; its tobacco crop was 112,267,000 pounds, and all cereals and vegetables were grown. There are 252,774 farms, with a total of 19,510,856 acres.

Coal production in 1923 was 4,876,774 tons; iron ore, 266,175 tons; pig iron, 100,000 tons; and copper 18,721,932 pounds.

The Census of 1919 on industry showed 4,589 manufacturing establishments, employing 113,360 persons, engaging $410,203,443 of capital, and producing $556,253,162 in all. The census analysis indicates a rather broad basis laid for future development of industry, the list revealing 56 lines with more than $1,000,000 annual product. Flour leads with $51,913,000, and cottonseed and lumber have their usually large proportions as in all Southern States; but considerable beginnings have been made in the manufacture of dyestuffs, leather tanning, iron and steel furnaces, woolen goods, vehicles, bedding, implements, and cotton goods, product of which was $22,461,000.

Railroad mileage, 1923, was 4,022.

Tennessee is almost wholly American in population—foreign-born whites being 7-10ths of 1 per cent. Negroes are 19.3, and the percentage of illiteracy is 10.3 for the State; native white, 7.3; Negro, 22.4.

Attending school were 630,000 persons. The main higher educational institutions are the University of Chattanooga, University of Tennessee at Knoxville, Fisk University at Nashville, Vanderbilt University at Nashville, Cumberland University at Lebanon and the University of the South at Sewanee.

The Tennessee Mountains, like those of Kentucky, are beautiful, delightful summer resorts. Lookout Mountain, scene of a celebrated battle in the Civil War, is the object of chief interest at Chattanooga.

TEXAS.

Area, square miles . . . . . *265,896* . . . . . *1st in rank*
Population, 1920 . . . . . *4,663,228* . . . . . *5th in rank*
Population, 1925 (est.) . . . *5,097,574* . . . . . *19.2 to sq. m.*
Wealth, 1923 (Census est.) *$9,350,888,000*

Texas, of the West South Central group, up to 1836 part of Mexico, then an independent republic, becoming one of the United States on Dec. 29, 1845, is bounded on the north by New Mexico and Oklahoma, on the east by Oklahoma, Louisiana and the Gulf of Mexico, on the south by the Gulf and Mexico, and on the west by Mexico and New Mexico. It is the largest State, embracing nearly 8 per cent. of the area of the whole country, and is about 800 miles long by about the same wide.

In the western part it is mountainous, the "Staked Plains" lying in the northwest, a great prairie in the central portion, and a lower lying region nearer to the Gulf. Western Texas is mostly without forestation, but in the east naturally there was a large wooded area, nearly 8,000,000 acres, materially reduced by extensive lumbering, the normal annual cut being more than 1,250,000,000 feet, mostly yellow pine.

In all lines Texas produces heavily. It is easily the first cotton State, the 1920 census returning 11,522,537 acres devoted to its culture, 2,971,757 bales the output. Rice was grown on 164,481 acres, yielding 5,306,369 bushels; 122,170 tons of sorghum came from 35,589 acres; 49,093 acres of vegetables were raised, 6,139 acres of small fruits, sugar cane, tobacco, most of the cereals, potatoes, the forage foods, and a large variety of other soil products.

The census reports Texas the only State in which the total of all crops exceeds a billion dollars—$1,071,542,103,—the total return from crops, fruits, livestock, lumber and oil and other minerals being more than $1,500,000,000.

The farmland area was 114,020,621 acres, in 436,033 separate farms, of which 31,227,503 were improved acres, the value of all farm property being more than $4,400,000,000. There are about 2,000,000 acres irrigable, and 600,000 acres irrigated.

The corn crop was 156,920,000 bushels, and there was large production of wheat, oats, etc. Potatoes, white and sweet, yielded 11,500,000 bushels, and so on through the whole list.

The fruit production ranges from the varieties which are grown in the temperate zone to the semi-tropical kinds, and the pecan nut is a large crop.

The 12,000,000 domestic animals bring immense sums annually, the wool clip alone being from 15,000,000 to 20,000,000 pounds, with very heavy returns from cattle, horses, pigs and sheep, which range on the vast mid-western prairies, some of the ranches being of several hundred thousand acres. It leads the country in the cattle breeding industry.

The petroleum output in 1923 was 131,023,000 barrels, valued at $193,580,000; the product of natural gas and natural gas gasoline is valued at about $22,000,000; and refining has become an important interest. Oil is found all the way from the northwest to the southeast on the Gulf, the field there being somewhat concurrent with that of Mexico. In the north and northwest, the formation runs with that of Oklahoma and Kansas, the content being rich.

More than 1,106,000 tons of coal were mined, and asphalt and pottery clay were important products, as also all the base minerals, silver, lead, quicksilver and copper being naturally present and somewhat developed as to production.

In the northwest the bed of a former inland salt sea contains the salts that appear in all sea waters,

and the University of Texas at Austin and the United States Geological Survey have announced the discovery of potash, the work of proving the extent thereof being now in progress.

The 1920 census gave $999,995,796 as the total value of all industrial products, there being 5,724 establishments, employing 130,911 persons, paying $147,907,000 in wages and salaries, and using $701,-170,000 of materials, with $585,776,000 of capital.

The three principal manufacturing industries were petroleum refining, $241,757,000; meat packing, $125,192,000; cottonseed oil and cake, $102,122,000. Flouring mills brought in $73,064,000; lumbering, $47,884,000; with 60 other industries which totaled each more than $500,000 of annual products. Cotton goods manufacture is not proportioned to the immensity of the cotton growing, the number of spindles being 231,876 in 1924.

Texas leads in railroad mileage, having 16,151 miles in 1923, Houston being the most important railway centre, with 17 different lines. Transport is heavy to Galveston, the largest seaport of Texas, on the Gulf, 50 miles from Houston, and to New Orleans, with large tourist travel to and from the Pacific Coast.

The Census Bureau estimates, as of July 1, 1924, the population of the chief cities: San Antonio, 191,398; Dallas, 187,862; Houston (1923), 154,970; and Fort Worth, 148,107.

Public school enrolment is about 1,125,000 for a population of 4,663,228 reported in the 1920 census. The University of Texas at Austin is well known, and has authority in many lines of research, especially in geology. There are a dozen other well established higher institutions.

The percentage of illiteracy was reported at 8.3; native white, 3; Negro, 17.8; foreign-born white, 33.8. The 249,652 Mexicans are the largest body of foreigners, communication across the international boundary line being in peace time constant and extensive.

Texas is a strange mixture of the old West and the progressive new South, the cowboy remaining in the western parts, and the eastern cities taking on modernities, with steady tendency toward the upbuilding of industry.

In the recent troubles with Mexico, there has been much disturbance on the border, but normally now Mexico is a source of wealth and prosperity to Texas. Galveston, the chief port, is expected to develop much vaster commerce than its already large tonnage. Galveston has a wonderful concrete seawall as protection against the fearful tidal wave and hurricane which swept it more than 20 years ago, practically destroying the city.

In San Antonio, close to the border, the Alamo, a fortress defended to the death by the Texas patriots, is the chief point of interest to tourists, and in various places the visitor is shown battlefields on which the Lone Star State won freedom from Mexico.

UTAH.

Area, square miles.....*84,990*.....*10th in rank*
Population, 1920.....*449,396*.....*40th in rank*
Population, 1925 (est.).....*492,478*.....*5.8 to sq. m.*
Wealth, 1923 (Census est.).....*$1,535,477,000*

Utah, of the Mountain group of the Far West, is bounded on the north by Idaho and Wyoming, on the east by Colorado, on the south by Arizona, and on the west by Nevada. It has several mountain ranges, which attain up to 12,000 feet elevation (the highest peak, Kings Mountain, 13,498 feet), of the greater part of the State being a plateau 6,000 feet above sea level. The rivers are useful only for irrigation, more than 1,300,000 acres being under water. The Great Salt Lake, salt being 20 per cent. of the fluid content, is in the northwest part, altitude 4,218 feet, and has no known outlet. The climate is dry, stimulating and wholesome, warm in summer, rather cold in winter, and the sky so clear that no cloud specks it on 300 days a year.

The value of all crops in the Census of 1920 was $57,890,000, of which hay and forage led, with $24,583,000, mostly alfalfa. All the temperate zone cereals are produced. There are 25,662 farms, with 5,050,411 acres.

The fruit production ranges from temperate to sub-tropical zone varieties, which latter grow in the southern tier of counties.

The wool clip in the 1920 census was 11,690,239 pounds.

Mineral resources are most varied, including gold, silver, lead, manganese, copper, gypsum, petroleum, sulphur, zinc, salt and coal, the State ranking third in copper. The total value of mineral output given in 1920 was $45,169,328. Coal was mined, 5,800,-000 tons.

Production of uranium and vanadium, especially valuable, is the second in the Union.

Semi-precious stones are taken in large quantities, and a high grade of marble and onyx for building is quarried.

The manufactures consist mostly of smelting and refining of lead and copper, and the making of beet sugar, sugar beets being raised worth $10,048 611, for 930,427 tons. Manufactures are mostly in Salt Lake City and Ogden. The number of establishments, Census of 1919, was given as 1,159, capital, $143,366,000, wages paid, $21,396,000, and value of all products, $156,804,000. The population is 48 per cent. urban.

Railroad mileage, 1923, was 2,145.

Illiteracy is low, at 1.9 per cent.; native white three-tenths of 1 per cent., foreign-born 6.3, there being 56,455 of foreign birth, English most numerous. About 100,000 attend the schools, and higher educational institutions are becoming numerous and well established.

The distinguishing feature is the Mormon Church, the Latter Day Saints, as they call themselves, numbering three-fourths of all church membership. The Mormons came originally to Utah from the Midwest, being driven out by persecution, and journeyed to the territory when it was almost completely a wilderness, subduing it and building a social formation based on the domination of the Mormon Apostles and Bishops, with close interrelationship between church and government, the tithing system being adopted.

Salt Lake City, the capital, has several celebrated structures built by the church, among them the great Tabernacle and the Temple.

The "Great American Desert" lies in the northwestern corner of Utah, reaching over into Nevada.

VERMONT.

Area, square miles.....*9,564*.....*42d in rank*
Population, 1920.....*352,428*.....*45th in rank*
Wealth, 1923 (Census est.).....*$842,040,000*

Vermont, a New England State, is bounded on the north by Canada, on the east by New Hampshire, on the south by Massachusetts, and on the west by New York. Lake Champlain, more than 100 miles long, marks the western boundary line. The Green and Latonic Mountains cross the State. The climate, like its topography, is rugged and characteristic of the north. Population is 36.8 to the square mile.

The 1920 census gives $47,999,600 as the value of all crops, and $168,159,000 as the value of all manufactures. Vermont has the largest value of dairy products per capita in the Union, the value being returned as $27,152,954, and it leads all States in the production of maple sugar. Agricultural production takes a wide range, including even tobacco, and covers all the cereals suitable to the zone, with considerable fruits, apples predominating. There are 29,075 farms, with 4,235,811 acres.

Known as "The Green Mountain State," its chief mineral wealth is in its quarries, leading all States in output of granite (value, 1919, $3,563,734), marble (value, 1919, $2,108,872), asbestos and talc, its granites and marbles having gained Nation-wide markets, some of the most celebrated buildings having been erected with them.

Railroad mileage, 1923, was 1,060.

Vermont is a popular resort in the summertime for persons from all Eastern cities, the mountain scenery being beautiful, and a system of roads being now in process of building up to modern standards. The shores of Lake Champlain, for 100 miles, afford excellent boating, and the area of the State teems with historic interest, having been the theatre of many battles in the former wars.

The illiteracy percentage is 3; native white 1.5, and foreign-born 11.3 Of the total population of 352,428 reported in the 1920 census, foreign-born numbered, 44,526; Canadians, 24,868.

The University of Vermont, Middlebury College and Norwich University are the leading institutions of learning.

VIRGINIA.

Area, square miles.....*42,627*.....*33d in rank*
Population, 1920.....*2,309,187*.....*20th in rank*
Population, 1925 (est.).....*2,449,443*.....*57.4 to sq. m.*
Wealth, 1923 (Census est.).....*$4,391,570,000*

Virginia, one of the South Atlantic, and one of the Thirteen Original States, is bounded on the north by West Virginia and Maryland, on the east by Maryland and the Atlantic Ocean, on the south by North Carolina, and on the west by West Virginia and Kentucky. Part of its original territory was taken in 1863, during the Civil War, to form West Virginia. On its eastern side, the great waterway, Chesapeake Bay, cleaves the State, cutting off a small portion between which and the main portion is the entrance past the Capes to the bay, and there are many rivers which flow into the bay.

with navigation up the James, the York, the Rappahannock and the Potomac.

The topography is varied, beginning with the low lying lands along the coast, known as Tidewater Virginia, rising to an extensive tableland in the central part, and finding mountain elevations up to 5,700 feet in the west. In the northwestern corner is the rich Shenandoah Valley. The Potomac River bounds the State on the north, making off from the bay. The mountains are the Alleghanies, the Shenandoahs and the Blue Ridge. The climate is as varied as the topography, characteristic in each portion, cool in the higher elevations and rather warm in the lower.

Fundamentally, Virginia is agricultural, its manufacturing being based on utilization of the soil products and some of the minerals, with which the State is well endowed.

The 1920 census gives $292,824,260 as the value of all crops, Virginia being the third State in tobacco production, with 102,391,226 pounds, the culture of the plant having been first done by whites at Jamestown 300 years ago. The temperate zone grains, vegetables and fruits are grown in profusion. The corn crop was reported as 44,800,000 bushels, with peanuts, 5,282,000 bushels, the third largest in the Union. There are 186,242 farms of 18,561,112 acres.

Livestock husbandry has been in late years emphasized especially, effort being exerted to bring in pure blood strains. Much of the progress in this line is due to the incoming of many Northerners, who have taken over rural estates to obtain the social advantage of the delightful country life of the Old Dominion State, which was of the flower of the old time era of the cavaliers.

Richmond, the capital, has become an important manufacturing city and its population on July 1, 1924, is estimated by the Census Bureau as 183,723.

The manufactures had an output in 1919 valued at $643,511,621, from 5,603 establishments, with a capital of $463,644,498, employing 139,178 persons.

Cotton goods especially are becoming great in volume, the mills having about 600,000 spindles, Virginia using much more raw cotton than it produces. The lumber cut averages about 800,000,000 feet, and is unusually varied, including yellow pine, oak, gum, hemlock, cypress, chestnut, yellow poplar, cedar, tupelo, basswood, hickory and walnut.

The tobacco and cigarette factories send their finished product across the earth, besides which large quantities of tobacco are sent to England and other European countries for manufacture there into cigarettes, cigars and smoking tobacco.

Manufacturing also comprehends extensive canning of fruits and vegetables, leather, coke, sawmill machinery, woodenware, pig iron, clothing, implements, silk and knit goods.

Mineral output includes coal, the State ranking ninth, with 9,500,000 tons; iron ore output, these figures from the 1920 census, being 320,000 tons, with all the basic crude minerals also produced, including large supplies of building minerals, and with salt, copper, lead and zinc produced. The mineral output averages about $50,000,000 for 35 kinds mined.

Railroad mileage, in 1923, was 4,695.

In Hampton Roads the United States maintains a great navy yard, as the principal rendezvous of the navy, utilizing the James River as a chief anchorage.

In Newport News, on the James River, an extensive shipbuilding plant constructs vessels of many types, including warships of heaviest tonnage.

Norfolk has large shipping interests, and is one of the principal centres for the manufacture and distribution of land fertilizers.

Fortress Monroe, on the peninsula between the James River and Chesapeake Bay, has strong, modern fortifications, commanding the waterways.

Near the fortress, large hotels, maintained for many years on Government-owned lands, have been mined for instant blowing up in the event of war, to remove obstruction to the range of the big guns.

The illiteracy percentage is 11.2, Census of 1920; native white, 5.9; foreign-born 7.1; and Negro 23.5. The Negro constitutes 29.9 per cent. of the population, having fallen from 32.6 per cent. in 1910. As to illiteracy, no State offers a wider range of gradations, the older families showing very low percentage, and the mountain regions very high.

In higher educational institutions, Virginia ranks among the foremost States, having such well-known establishments as the University of Virginia, founded by Thomas Jefferson, at Charlottesville, from which many men famous in history have been graduated; Washington and Lee University at Lexington; William and Mary College, the second oldest in the country, at Williamsburg; Virginia Polytechnic at Blacksburg; Virginia Military Institute at Lexington; Hampden-Sidney College at Hampden-Sidney, and Hampton Normal School at Hampton, the first well developed school for Negroes established in the South. More than 500,000 attend the public schools.

The "Old Dominion," first in population of the States until 1820, prides itself on its Revolutionary heroes, its five Federal Presidents, and its social prestige. It was the theatre of the decisive campaign in which the Civil War ended with the surrender at Appomattox of Gen. Robert E. Lee, head of the Confederate armies.

WASHINGTON.

Area, square miles . . . . . *69,127* . . . . . *19th in rank*
Population, 1920 . . . . . *1,356,621* . . . . . *30th in rank*
Population, 1925 (est.) . . . *1,478,214* . . . . . *22.9 to sq. m.*
Wealth, 1923 (Census est.) *$5,122,405,000*

Washington, of the Pacific (Northwest) group, is bounded on the north by British Columbia, on the east by Idaho, on the south by Oregon, and on the west by the Pacific Ocean. It has the Columbia River as southern boundary line for 300 miles from the west, and many streams of importance, mostly for irrigation uses, with the Snake River in its eastern reaches. In the northwestern third of the State the great Puget Sound, with tortuous shores and innumerable harbors, on which Seattle, Tacoma, Everett, Olympia and other important cities are situated, is a great commercial centre. It is the nearest American gateway to the ports of Asia; handles the bulk of the shipping to and from Alaska and has a heavy trade coastwise via the Panama Canal.

The seaborne trade of Seattle in 1923 was: Foreign, imports, $265,422,619; exports, $58,934,584; domestic, imports, $204,852,499; exports, $117,803,564. It is the principal landing port of the Northern Pacific fisheries, 45,240,000 pounds (83 per cent. being salmon and halibut) were landed in 1923. It is the terminus of the cable to Seward, Alaska.

Seattle claims to be the healthiest city in the United States. Its population on Jan. 1, 1924, was estimated at 349,526.

The Cascade Mountains cut the western third from the State's area, with the usual lower mountain range nearer to the ocean shores. A dozen peaks, snow-capped, rise in the west. Mt. Rainier or Mt. Tacoma (according to which city you may be in at the moment) is a beautiful attraction with its 14,408 feet of height, now a national park, and the Olympic range in the northwest is surpassingly beautiful.

Standing timber is about 330,000,000,000 feet; Douglas fir, yellow pine, white pine, spruce, larch, cedar and other trees abound. Normally, the State cuts more than 4,000,000,000 feet, leading all the States, and shipping the product all over the world, much coming to the North Atlantic States, via the Panama Canal, and going by rail to the Central West, while Washington shingles are used throughout the whole northern half of the country.

The trees are magnificent, like those of Oregon, and with that State Washington leads all others in amount of timber remaining.

Agriculture is developing rapidly. All crops reported in the 1920 census were valued at $227,212,000, and included all the cereals, vegetables, forage crops, and the fruit production is famous, the irrigated sections all the way from the south to the very border of Canada being prolific and yielding products demanded in all Eastern fruit markets. Every variety known to the temperate zone is produced; the fruit and nut crop, 1920 census, was worth $51,662,000, apples alone being worth $38,823,000. There are 66,288 farms of 13,244,720 acres.

The geology is the same as that of Oregon—arid and semi-arid lands in the east, interspersed with fertile portions, and west of the Cascades the rainfall ranges from 20 to 80 inches with a resultant profusion of vegetation.

The State has one-sixth of the potential hydroelectric power of the country.

East of the Cascades most of the wheat is grown, the crop being 41,837,000 bushels, with many sheep, cattle and horses. "Horse Heaven" is located on the banks of the Columbia in Eastern Washington. The wool clip runs above 5,000,000 pounds. The livestock interest is mostly in the east, where the great ranges are, with mild winters in the valleys, with winter grazing.

The 1920 figures on manufactures showed 4,918, establishments, employing 150,479 persons, with $574,235,000 of capital, outputting $809,622,000 of products, lumber and timber leading with $220,512,000, steel shipbuilding next with $140,980,000, flour milling with $81,141,000, and meat packing with $34,398,000; wooden shipbuilding and boat building yielding $25,539,000. Forty-five other lines had more than $900,000 of annual production.

All the basic minerals are present, coal output in 1923 being 2,950,000 tons.

Railroad mileage, 1923, was 5,479.

In illiteracy, the State has a percentage of 1.7; native white, 3-10ths of 1 per cent.; foreign-born, 4.7. Foreign-born number 250,055, being 18.4 per

cent. of the population, of which Japanese and Chinese are numerous.

About 300,000 attend the public schools, and the University of Washington at Seattle, and the State College at Pullman, for science and agriculture, with several well established colleges, provide ample higher educational facilities.

The shores of Puget Sound are very popular as summer resorts, with many hotels and cottage colonies, while steamer tourist travel to the Orient and to and from Alaska is extensive.

WEST VIRGINIA.

Area, square miles.....24,170.....40th in rank
Population, 1920.....1,463,701.....27th in rank
Population, 1925 (est.)...1,601,730.....66.2 to sq. m.
Wealth, 1923 (Census est.).....$4,677,919,000

West Virginia, of the South Atlantic group, was set off during the Civil War from Virginia. It is bounded on the north by Ohio and Pennsylvania, on the east by Pennsylvania, Maryland and Virginia, on the south by Virginia and Kentucky, and on the west by Kentucky and Ohio.

It is essentially mountainous, the Appalachian range having several spurs therein. Its western parts drain into the Ohio River, and its eastern portions down the Potomac River to the Atlantic Ocean. The mountains are in the east. The climate is moderate, and between the north and south extremes.

Mining is the leading activity, the State ranking second in the production of coal, with 100,100,000 tons output in 1923.

Some of the finest steaming coal in the world is produced, especially the Pocahontas. It ranks first in output of natural gas, gaining about $80,000,000 in 1922 therefrom. In petroleum output it ranks eighth. All of the base minerals are present in abundant supply, and the total mineral output runs above $200,000,000. It is in West Virginia that for years industrial disturbances have upset production and affected political and social conditions, being now the subject of Federal inquiry that final settlement may be effected amicably.

West Virginia produces more hardwood than any other State, excepting Arkansas, and has vast timber wealth, including yellow poplar, birch, ash, oak, spruce, hemlock and walnut.

Its agriculture is not so important, total value of all crops reported in the 1920 census being $96,537,000, the leading crops being corn, hay, tobacco, potatoes, and fruits of all kinds suitable to the zone. Farms number 87,289, with 9,569,790 acres.

The State ranks sixth in the steel works and rolling mill industry and among the first in the production of glass and glassware. In 1919 the number of manufacturing establishments was 2,785, with a capitalization of $339,189,678, employing 93,688 persons, with products valued at $471,970,877.

Its transport by water is abundantly served with the Ohio River on the west. Railroad mileage, 1923, was 4,047.

Its illiteracy percentage is 6.4; native white, 4.6; Negro, 15.3; and foreign-born, 24. Negroes are 5.9 per cent. of the population, and foreign-born 4.2. Public school enrolment was reported at 360,000, and there are many colleges, church denominational schools being numerous; industrial schools also.

In recent years many Northerners have gone to the State to take country homes in the mountains. White Sulphur Springs in the eastern part is one of the most celebrated pleasure resorts, popular socially, and with a famous golf course.

WISCONSIN.

Area, square miles.....56,066.....25th in rank
Population, 1920.....2,632,067.....13th in rank
Population, 1925 (est.)...2,801,908.....50 to sq. m.
Wealth, 1923 (Census est.).....$7,866,081,000

Wisconsin, of the East North Central group, is bounded on the north by Lakes Superior and Michigan, on the east by Michigan and Lake Michigan, on the south by Illinois and Iowa, and on the west by Iowa and Minnesota. The Mississippi River forms the southern half of the western boundary line. It has the characteristic climate of the northern tier of States, cold in winter and pleasant in summer, dry and stimulating.

The value of the total manufactured product at about $1,000,000,000 exceeds that of all crops reported in the 1920 census at $445,347,868, although its agricultural activities are vitally important and thorough, a large proportion of foreigners from thrifty countries having attained high grade tillage. The mineral production also is large.

Railroad mileage, 1923, was 7,472.

Everything grown in the north temperate zone is produced, in grains, vegetables and fruits, agriculture being especially well diversified—corn, wheat, rye, barley, hay, flaxseed, potatoes, sugar beets, with considerable quantities of tobacco for cigar wrappers, hops, peas, sorghum and maple syrup. More peas are canned than in any other State, and more hemp raised. The grape production is very large, and the output also of cranberries, apples, cherries and plums. Wisconsin was, in 1919, the leading State in the combined value of the butter, cheese and condensed milk industries, the total being nearly $222,000,000. There are 189,295 farms, with a total of 22,148,223 acres.

Wisconsin has increased rapidly in importance as a manufacturing State. The number of establishments in 1919 was 10,393, with 317,899 persons engaged, a capital of $1,361,729,196, and an output valued at $1,846,984,307.

Manufactures include the most lumber cut in the Great Lakes region. The State has the most creameries of any State, refines much beet sugar, makes much woodwork and implement products, considerable pig iron output, ranks fifth in zinc production, fourth in iron ore output, the valuable hematite kind chiefly, and the fisheries on the lakes are highly productive, the whitefish being highly valued.

The story of Wisconsin forests, as of all of the Lake States, is tragic. Naturally, almost the entire State was covered with pine, hemlock, and the invaluable hardwoods. Lumbering proceeded without regard to conservation, until more than 8,000,000,000 feet were cut annually; production on account of the exhaustion of the supply then falling off, until the 1920 census reported the cut as 1,275,000,000 feet, with an estimated stand remaining of about 2,500,000,000 feet. There are therefore enormous areas of now useless cut-over forest lands, with comparatively scattered timber tracts left.

Superior, at the head of Lake Superior, opposite Duluth, is the main terminus of the Great Northern Railway, and has great ore, lumber, wheat and coal dockage, with considerable manufacturing of iron products.

Of the 2,632,067 population shown by the 1920 census, the number of foreign-born was 460,128, or 17.5 per cent., Germans numbering 151,250. Milwaukee, on July 1, 1924, by Census Bureau estimate, had 492,087 population.

The percentage of illiteracy was 2.4, against 3.2 in 1910. The native white illiteracy in 1920 was 7-10ths of 1 per cent.; foreign-born, 8.4; Negro, 4.1.

The University of Wisconsin at Madison is especially far advanced in sociologic research, domestic science and the practical arts. The 1920 matriculation was 10,155, including the summer school; and a correspondence course is conducted by which 15,554 persons are instructed. There are besides many colleges and smaller schools.

Wisconsin has been and is the scene of intense political battles and advanced social experiments, of which Robert Marion La Follette has been the leader, as Governor and United States Senator.

The Great Lakes shores contain many pleasure resorts, while the smaller lakes of the State are also popular with summerers, fishing being prime, and hunting in the fall.

WYOMING.

Area, square miles.....97,914.....8th in rank
Population, 1920.....194,402.....48th in rank
Population, 1925 (est.).....231,842.....2.2 to sq. m.
Wealth, 1923 (Census est.).....$976,239,000

Wyoming, a Mountain Group State, is bounded on the north by Montana, on the east by North Dakota and Nebraska, on the south by Colorado and Utah, and on the west by Utah, Idaho and Montana. It is a lofty region, its mean elevation about 6,000 feet—a broad plateau traversed by the Rocky Mountains, highest point of which is Mt. Gannett, 13,785 feet. Topography is varied.

Its waters flow in all directions, drainage by the Green River to the southwest, by the Yellowstone and Snake Rivers to the northwest, by the Big Horn to the north, and by the North Platte, Sweetwater and Laramie Rivers to the southeast, none of them navigable. The river waters are however valuable for irrigation, more than 1,200,000 acres being actually under irrigation, and an area of nearly 2,700,000 acres being included in irrigation projects which are under construction.

The climate is that of the rarefied air of high elevations, and is salutary, with severe winters and pleasant summers, moisture precipitation being low at about 12 inches mean annually.

With less than 200,000 population reported in the 1920 census more than $50,000,000 was assigned as the value of all crops, hay the leader, mostly alfalfa, and corn, potatoes, oats, wheat, rye and barley also produced.

Stock raising is the most important industry, sheep husbandry being the second in rank in the United States, the wool clip reported at 33,000,000 pounds. Farms number 15,748, with 11,809,351 acres.

Mineral resources are extensive, coal production,

1923, 8,200,000 tons; copper of considerable quantity, and petroleum, 44,785,000 barrels. Petroleum stores are known to be very great. Gold, silver, iron ore, platinum ore and all the base minerals abound, with vast development assured for the future.

Manufactures are practically all for home consumption.

Railroad mileage, 1923, was 1,959.

The 1920 census reported the percentage of illiteracy as 2.1; native white, 3-10ths of 1 per cent.; foreign-born, 9. There were 25,255 foreign-born, mostly from Europe.

The 1920 school enrolment was 47,553. The University of Wyoming at Laramie had 913 students.

The Yellowstone National Park in the northwest corner is one of the world's most famous resorts for the tourist; its giant geysers, waterfalls and high coloration of the rugged gnarled rocks attract heavy travel from all parts of the country and from foreign lands.

The ranch life retains much of the old time flavor of the West, and many Easterners go there to enjoy it. The annual cowboy roundup at Cheyenne attracts many.

ALASKA, TERRITORY OF

AREA, 590,884 square miles (including the Aleutian Islands).

POPULATION, Census of 1920, 55,036 (27,883 whites, 27,153 Indians and Eskimos). Males, 34,539; females, 20,497. 1924 (est.), 60,000.

CAPITAL, Juneau, population, 1920, 3,058.

Governor, Scott C. Bone. 1921-24, appointed June, 1921.

Consuls maintained at Juneau by Norway; at Nome by Russia (Consul General) and Sweden; at Skagway by Great Britain.

Alaska occupies the northwestern part of the North American Continent. It is bounded on the north by the Arctic Ocean, on the west by the Arctic and Bering Sea, on the south by the North Pacific Ocean and on the east by Canada. From the southwestern corner the Aleutian Islands stretch out westward, 1,200 miles to longitude 172° E, Cape Wrangell, facing Siberia. Bering Strait, 54 miles wide, separates the mainland of Alaska from Asia. The "Panhandle" runs southeast 600 miles along the Pacific to Dixon Inlet, and includes all the islands, the boundary with Canada along the mountain crests being fixed by arbitration in 1903, international survey completed, 1913.

Alaska, then sparsely colonized by Russian trappers and Indian traders, was bought from Russia by Secretary W. H. Seward, by the treaty of March 30, 1867, for $7,200,000. It was made a Territory by the act of Aug. 24, 1912, which gave it a Legislature elected by direct vote and a Governor, appointed for four years by the President. Congress reserves the right to legislation on certain subjects.

Alaska is mountainous with high plateaus; the coast range extends through the southern part, the chief peaks being Mt. St. Elias (alt. 18,024 ft.), Mt. Wrangell (14,005 ft.) and further inland Mt. McKinley (20,300 ft.), the highest peak on the North American Continent. There are more than twenty active volcanoes, notably Mt. Katmai now with the "valley of 10,000 smokes" a national monument. Mt. Katmai which had been dormant, suddenly blew the top of its head off June 6, 1912—one of the greatest eruptions in history. The mountains and the Sitka district are densely timbered, mainly coniferous, but the islands are treeless. The most notable glaciers are the Muir, Malaspina and Seward. The Yukon is the chief river, 3,000 miles long, navigable for about 2,400 miles. The length of the coast line is about 4,750 miles, including islands 26,364 miles. There are many excellent harbors, one, Dutch Harbor, Unalaska Island, being of great naval importance.

Attu, the last of Aleutians, the volcanic, mountainous, treeless islands that stretch in a 1,200-mile arc to the Asiatic coast, is the westernmost point of the American Continent, in the same longitude as New Zealand, and 2,700 miles from Washington State. In summer the sun is just setting in Attu when it is rising in Maine.

There is great diversity in climate. In the interior a temperature of 60° below zero in winter is not unusual, with a temperature of 90° in the summer, but on the coast owing to the Japanese current the thermometer rarely falls below zero in the winter with a maximum of about 80° in the summer. Rain there is abundant. All the hardier vegetables and the cereals, except corn, thrive during the short summer with its long hours of sunlight. Of the 378,165,760 acres, the Census of 1920 reported 90,652 in 364 farms, 5,836 acres only being under cultivation. In the country tributary to the Government railroad it is estimated that 1,296,000 are suitable for farming without costly drainage. There are 65,000,000 acres suitable for grazing.

Alaska has vast forests along the coasts, of which 20,580,000 acres are in forest reservations.

Reindeer were introduced from Lapland and from Siberia to insure the support of the Eskimos by the Government, which brought in 1,200 head between 1892 and 1902. These increased under careful handling to 22,107 in 1910, 92,933 in 1920 (valued at $2,238,562) and (estimated) 300,000 in 1923 (valued at $7,500,000). Reindeer meat amounting to 256,449 pounds, valued at $61,865, was exported to the United States in 1920; 104,347 pounds, valued at $18,534, in 1921, and 195,829 pounds, valued at $37,596 in 1923-24.

Fur farming also is on the increase, especially of foxes; the export of fox skins in 1919-20 sold at St. Louis auction for $79,404 and that of 1920-21 for $109,398.

The killing of seals on the Pribilof Islands having been brought under control in 1910 and pelagic sealing prohibited by treaty in 1911, the seal herds have increased from 215,000 to 604,962 in 1922. 1919-20, 30,198 dressed sealskins, valued at $1,509,600, were shipped to the United States. The shipment for 1920-21 was 24,889, valued at $995,660; for 1921-22, 26,293, valued at $1,005,175, and for 1922-23, 30,172, valued at $924,340.

Fishing is an important industry; in 1920 788 vessels were engaged in it. The total number of salmon taken in Alaska in 1920 was 65,080,539; in 1921, 37,905,591, and in 1922, 72,370,400. The total investment in the salmon cannery industry in 1920 was $62,550,727; in 1921, $33,246,292, and in 1922, $45,207,557. The salmon pack for three years was:

	1920.	1921.	1922.
Cases....	4,429,463	2,596,826	4,501,562
Value...	$35,602,800	$19,632,744	$29,787,193

The amount of salmon sold as cured, smoked, pickled, frozen or fresh, in 1922, was 16,409,572 pounds, valued at $1,750,611. The halibut fisheries in 1922 produced 11,075,237 pounds, valued at $1,034,967, and the total value of all the fisheries in 1922 was $36,170,948; from an investment of $54,590,302, with 21,974 persons employed.

Since the discovery of gold at Juneau in 1880 (the great Klondike rush through Skagway into Canadian territory and the Upper Yukon began in 1896) up to January, 1921, Alaska has produced $320,000,000 of gold, nearly two-thirds of it from placer mines. Copper ($127,000,000) and other metals produced bring the total yield up to $460,000,000. The U. S. Geological Survey estimates the value of the placer gold reserve to be at least $360,000,000, this in addition to gold in veins that could not be estimated. There are large coal deposits, which are not yet fully developed. The coal by U. S. Navy has been found equal in steaming value to Pocahontas coal.

Oil of high grade is found and has been developed to a limited extent in the Katalla field on Controller Bay.

The value of the mineral output in 1922 was $19,506,365; in 1921, $17,004,124, and in 1920, $23,303,751. Of this in 1922 the production of gold was $7,422,367; copper, $10,525,655; silver, $729,945, and coal, $430,639.

Congress in 1914 authorized the building for a railroad not to exceed 1,000 miles in length. The line is in operation from Seward to Fairbanks, 467 miles; with spurs to coal mines that brings the total up to 543 miles. The cost at wartime prices exceeded $56,000,000. The complete system was put in operation in 1923. The total operating expenses during the seven years since operation began in part up to Jan. 1, 1923, amounted to $9,536,294; total operating revenues were $2,481,070; total deficit, $7,055,224.

The territory, on Dec. 30, 1922, had three national banks with a total capital of $150,000; surplus, $80,000; undivided profits, $50,268, and resources, $2,471,055; and fifteen territorial banks with a total capital of $630,000; surplus, $198,078; undivided profits, $173,485, and resources, $7,137,098. Total resources of the eighteen banks, $9,608,152.

The receipts and expenses of the territory for the last three years were:

1921....	Receipts,	$563,474	Expenditures,	$680,312
1922....	Receipts,	625,476	Expenditures,	606,465
1923....	Receipts,	752,811	Expenditures,	822,245

Alaska's commerce with the United States for the last five fiscal years, ending June 30, was:

Fiscal Year.	Exports to U. S.	Imports from U. S.	Gold Shipments.
1919-20....	$66,498,871	$33,998,462	$8,793,085
1920-21....	54,126,718	27,333,972	7,072,114
1921-22....	36,775,870	23,625,161	6,881,020
1922-23....	52,984,275	29,981,604	7,496,319
1923-24....	54,938,171	31,719,251	6,181,530

There entered the ports of Alaska in 1922, 1,241 vessels in the foreign trade and 839 in the coastwise trade.

HAWAII, TERRITORY OF.

AREA, 6,449 square miles (Hawaii, 4,016 square miles; Oahu, 598; Maui, 728; Kauai, 547; Molokai, 261; Lanai, 140; Niihau, 73; Kahoolawe, 44; Molokini, 2.7).

POPULATION, Census of 1920, 255,912 (estimated for July 1, 1923. 298.500).

CAPITAL, Honolulu, population (Census of 1920), $3,327; other city, Hilo, 10,431.

Governor, Wallace R. Farrington (1921-24) assumed office, July 5, 1921.

Consuls are maintained at Honolulu by Belgium, Brazil, Chili, China, Denmark, France, Great Britain, Italy, Japan (Consul General), Mexico The Netherlands, Norway, Panama, Peru, Portugal, Russia, Spain, and Sweden.

The Hawaiian Islands—the crossroads of the Pacific—are twenty in number, of which nine are inhabited, lying in the North Pacific Ocean in longitude 154° 40′—160° 130′ west, latitude 12° 16′—18° 55′ north, and more than 2,000 miles from the nearest mainland. The group extends for 390 miles from northwest to southeast. San Francisco is distant 2,089 miles; Panama, 4,640; Auckland, N. Z., 3,800; Manila, 4,350; Hongkong, 4,950; and Yokohama, 3,440.

The islands are mountainous and volcanic in origin, filled with extinct craters, Haleakala on Maui being the largest in the world. On the island of Hawaii is Mauna Kea (altitude 13,823 feet), quiescent, and Mauna Loa (altitude 13,765 feet), active. Sixteen miles east of the latter is the largest active volcano in the world, Kilauea (altitude 4,400 feet) with its "pit of eternal fire."

Kilauea's Lake of Living Fire drained out in August, 1923, as a result of subterranean disturbances, the surface of the lake of liquid lava having dropped 600 feet below the rim. In May, 1922, as a result of similar disturbances, the Lake of Living Fire disappeared, but in September of the same year the crater began to fill again. In May of this year the surface of the lake had risen to within 150 feet of the rim. The most remarkable recovery was on May 12, when the surface of the lake rose thirty feet in one day, making a total volume of molten lava poured out by the scores of fountains of over 2,000,000 cubic yards in one day. The area of the lake on that day was over forty-five acres, or nearly eighteen city blocks.

The islands are clothed with luxuriant tropical vegetation; with abundant rainfall and cooled by the prevailing northeast trade winds, the climate is perpetual summer without enervating heat. The higher elevations of the mountains are covered with forests, and 820,000 acres are set apart as a forest reserve. The soil is very fertile and all tropical and sub-tropical fruits and vegetables are grown. The farms number (1920) 5,284, valued at $151,-129,085, with 2,702,245 acres, of which 435,242 were improved and 599,531 in woodlands. Of the 5,284 farmers 892 were white (627 owners), 679 Hawaiian (546 owners), 3,098 Japanese (188 owners, 11 managers, and 2,899 tenants), and 560 Chinese (56 owners, 7 managers, and 497 tenants). In 1919 29,571,845 pounds of rice were produced and 19,-883,650 pounds of coffee; 86 farms reported (1920) 1,407 breadfruit trees that produced a crop of 101,268 breadfruit. Banana cultivation has been pushed, 160,953 bunches being produced in 1919.

The total area of public lands is 1,604,395 acres, of which 70,700 are agricultural, 625,193 pasture, and 557,339 forest reserves.

The largest industry of the islands is the growing of sugar cane and the production of raw sugar. The value of the sugar produced in 1919 was $80,-236,000, from 123,165 acres. The yield per acre is larger than any other country; about five tons of sugar per acre on an average; irrigated land yielding 70 per cent. more than unirrigated. The employees on the sugar plantations, about 45,000 in number, of many nationalities, receive house, fuel, water and medical attendance free and are paid a basic monthly wage and a bonus, which varies with the price of sugar. In 1920 the minimum basic wage was $20, and the bonus, extraordinarily large, was 276 per cent. of the wage. For 1921 the bonus was $30. Much welfare work is done.

The 1923 sugar output was 545,606 short tons, and for 1924, 678,000 tons.

Hawaii's sugar exports to the United States for four years were as follows:

Fiscal Year.	Pounds.	Value.
1920-21.....	977,738,902	$93,631,635
1921-22.....	1,191,624,620	45,108,885
1922-23.....	1,195,078,906	69,585,641
1923-24.....	1,171,388,032	74,520,948

The second largest industry is the growing and canning of pineapples. The product increased 1,094 per cent. in the 1909-1919 decade, and in 1920 143,473,536 two-pound cans valued at approximately $31,000,000 were produced. About 46,000 acres are under cultivation. Hawaii's shipments of canned pineapple for three years are valued at $29,-745,818 for 1920-21; $18,737,405 for 1921-22; $22,-321,588 for 1922-23; and $28,247,410 for 1923-24.

Hawaii's imports from the United States were chiefly iron and steel manufactures, mineral oil, breadstuffs, meat and dairy products, lumber, textiles, etc., fertilizers, automobiles, rubber goods, leather and paper.

Honolulu, on the Island of Oahu, is the capital and chief commercial city and port of the islands. It has a fine natural harbor, which needs improvement and development. Its needs have been neglected by Congress, which alone can appropriate the money for them. Since its organization as a Territory it has paid in the United States Treasury $105,698,000, during which period it has received from the Federal Government $17,045,657, exclusive of the army and navy expenditures. Internal revenue payments in 1922 ($15,505,462) were larger than those of nineteen States. The Territory does not receive for local appropriations one cent of the money collected in customs and internal revenue. Customs receipts 1922-23 were $1,500,653.

The wharves of Hawaii have been maintained and improved by direct taxation and public improvement loans paid by citizens of the Territory amounting to millions of dollars. Since 1901 the Territory has expended $25,000,000 in the construction of main highways.

Gov. Farrington, in his message to the Legislature, Feb. 21, 1923, said: "Hawaii's fate in general appropriations made by the United States Congress has forced upon our attention a new and most unfortunate misunderstanding of Hawaii's status as a Territory, an integral part of the United States entitled to participate in benefits, since we bear all the burdens of a State, through taxation and other obligations to the Federal Government. The eventual destiny of Hawaii is to enter the family of States with the full rights of Statehood. Hawaii's history as an independent nation previous to its voluntary annexation to the United States, the high standards of our administration, our financial integrity and governmental stability are unanswerable arguments in support of our claim to this high station."

The Legislature of the Territory in 1923 passed an act called the Hawaiian Bill of Rights renewing historical details of the admission of the Republic of Hawaii by annexation as an integral part of the United States and asserting its rights as such.

Congress after a hearing passed an act (Public Law 35—Sixty-eighth Congress) declaring the Territory of Hawaii, beginning July 1, 1924, entitled to share in appropriations under the Federal Highway Act, the Sheppard-Towner Maternity Act, the Vocational Education Act and the Vocational Rehabilitation Act under the same terms and conditions as any of the several States, and also extending the Federal Farm Loan Act to the Territory.

The Federal Government maintains its largest army post on the islands with quarters for a division of 30,000 men at Schofield Barracks and the subsidiary forts. The Navy Department has a large base at Pearl Harbor with drydock, opened Aug. 31, 1919. There are also a large aviation field and a powerful radio station.

Hawaii has an excellent system of roads, and in Honolulu much concrete construction is used. These it has built and maintained without Federal aid notwithstanding the heavy use of the roads for Federal military and naval purposes in Oahu. Had the Federal Highway Road Act of Nov. 9, 1921, included the Territory of Hawaii on an equal basis with the States, Hawaii would have received $1,750,000 for this work. The islands have approximately 350 miles of steam railroads, besides about 625 miles on the sugar plantations. In the fiscal year 1922-23, 927 ships with a tonnage of 6,580,557 entered the ports of the islands.

The native population of Hawaii at the time of the discovery has been estimated at about 200,000.

With civilization it has dwindled and the race seems destined to disappear through intermarriage with other stocks rather than by deaths. Of the total population of 255,912 reported by the Census of 1920, there were, Hawaiian, 23,723; part-Hawaiian, 18,027; Portuguese, 27,002; Porto Rican, 5,602; Spanish, 2,430; other Caucasian, mostly American, 19,708; Japanese, 109,274; Chinese, 23,507; Filipino, 21,031; Korean, 4,950; Negro, 348.

Hawaii came under the influence of American missionaries in 1820, and a large proportion of the natives embraced the Christian faith. The impetus given to education was great, and elementary education has always been free. The language in general use in the schools is English. The Japanese have many so-called Buddhist schools, which their children attend in addition to the American schools. Of the 48,730 children in the public schools (1923) 16,548 attend also these alien language schools; of this number 16,178 are American born and potential citizens. The Legislature in 1921 passed a law providing for State supervision of these schools, and plans are in progress to introduce the Japanese language as a study in the public schools.

The school plants, both public and private, are of very high order. The University of Hawaii is State supported. The Bishop Museum at Honolulu is a scientific institution of the first order devoted especially to the preservation of the life of the native Hawaiians and to the study of the ethnology of Polynesia.

Pan-Pacific conferences on vital matters have been promoted during the last three years with great success; and the islands are yearly welcoming increasing numbers of tourists (12,000 in 1923), being well favored with steamship communication.

The Hawaiian Islands were discovered by Capt. Cook in 1778, and there he met his death on his second visit in 1779. King Kamehameha brought the islands under one rule in 1791. The rule of his dynasty, which became a constitutional monarchy in 1840, ended when a revolution drove Queen Liliuokalani from the throne in 1893. An attempt to secure annexation to the United States failing, a republic was proclaimed, July 4, 1894. On the outbreak of the Spanish-American War Hawaii was annexed to the United States by a joint resolution of Congress, July 7, 1898, and created a Territory by the act of April 30, 1900.

The chief executive officer of the Territory of Hawaii is the Governor, who is appointed by the President with the approval of the Senate for a four-year term, and who must be a resident of the islands in order to be eligible for appointment. The Territorial Secretary is appointed in the same manner, but the heads of the Territorial departments are appointed by the Governor, with the approval of the Territorial Senate.

The Legislature of Hawaii consists of the Senate of 15 members, elected for four-year terms; and the House of Representatives, of 30 members, elected for two-year terms. The Delegate to Congress is elected every two years, and has floor privileges in the House, but no vote.

The judiciary consists of a Supreme Court, four Circuit Courts and numerous District Courts. The Justices of the Supreme Court and Circuit Courts are appointed by the President, with the approval of the United States Senate.

Hawaii's commerce with the United States is as follows:

Fiscal Year.	Exports to U. S.	Imports From U. S.
1919-20	$142,246,003	$59,261,621
1920-21	127,692,879	77,324,114
1921-22	68,335,073	51,581,621
1922-23	96,159,742	60,795,799
1923-24	107,043,812	71,011,469

The revenue of the Territory is derived from real and personal taxation, etc. For the fiscal year 1921-22 the receipts were $11,353,811, expenditures, $13,157,109, with a cash surplus of $1,333,286.

The revenue for 1922-23 was $12,996,542; the expenditures, $13,533,920; surplus, $796,008. The General Appropriation Bill for 1923-25 totaled $7,123,265,000; the Loan Fund Bill, chiefly for wharf and harbor improvements and new buildings, $5,489,000.

The total outstanding bonded debt on June 30, 1923, was $14,515,000. The net assessed value of real and personal property for 1923 was $293,-104,297.

Commercial bank deposits, Jan. 1, 1923, amounted to $31,616,207; and savings deposits to $21,765,732

THE CAPITOL AT WASHINGTON.

The Capitol is situated in latitude 38° 53′ 20″.4 north and longitude 77° 00′ 35″.7 west from Greenwich. It fronts east, and stands on a plateau eighty-eight feet above the level of the Potomac. The entire length of the building from north to south is 751 feet 4 inches, and its greatest dimension from east to west 350 feet. The area covered by the building is 153,112 square feet. The dome of the original central building was constructed of wood, covered with copper. This was replaced in 1856 by the present structure of cast iron. It was completed in 1865. The entire weight of iron used is 8,909,200 pounds. The dome is crowned by a bronze Statue of Freedom, which is 19 feet 6 inches high and weighs 14,985 pounds. It was modelled by Crawford. The height of the dome above the base line of the east front is 287 feet 5 inches. The height from the top of the balustrade of the building is 217 feet 11 inches. The greatest diameter at the base is 135 feet 5 inches.

The rotunda is 97 feet 6 inches in diameter, and its height from the floor to the top of the canopy is 180 feet 3 inches. The Senate Chamber is 113 feet 3 inches in length by 80 feet 3 inches in width, and 36 feet in height. The galleries will accommodate 1,000 persons. The Representatives' Hall is 139 feet in length by 93 feet in width, and 36 feet in height. The cornerstone of the north wing of the original building was laid September 18, 1793, by President Washington with Masonic ceremonies. The foundation of the centre was laid March 24, 1818. The cornerstone of the extensions was laid July 4, 1851, by President Fillmore. The room now occupied by the Supreme Court was, until 1859, occupied as the Senate Chamber. Previous to that time the court occupied the room immediately beneath, now used as a law library.

THE WHITE HOUSE.

The site was selected by President Washington and Major Pierre Charles L'Enfant when they laid out Washington, 1791; architect, James Hoban of Dublin; plans chosen by competition closed July 15, 1792. Cornerstone laid October 13, 1792. First occupation—President and Mrs. John Adams, November, 1800. Burned by British in 1814. Mr. Hoban superintended the restoration. First White House appropriation from the U. S. Treasury, April 24, 1800, $15,000, for furniture. The first appropriation for repairs, $15,000, March 3, 1807. Congress appropriated $8,137 for enlarging "the offices west of the President's House," 1819. South Portico finished 1823; cost $19,000. East Room finished and furnished by appropriation made in 1826. North Portico added; cost $24,769.25, 1829. Original plans always followed. First heated by gas, 1848; system of heating and ventilation installed, 1853.

A thorough overhauling and restoration was made under direction of New York architects, McKim, Mead & White, during incumbency of President Roosevelt June 20-September 29, 1902. Congress appropriated in all $475,445; the architects returning an unexpended balance of $7,906.10.

The principal apartments in the White House are officially designated: the East Room, Red Room, Blue Room, Green Room, State Dining Room, Family Dining Room, and Usher's Lobby. There are a Family Floor, a main stairway, and a private staircase and elevators.

The dimensions of the White House, in 1840, were length or frontage, 170 feet; depth or width, 86 feet. The mansion was built of gray sandstone, which was painted white after the fire, hence the name "the White House." Architect Hoban had modelled the structure after the palace of the Duke of Leinster. The original cost was defrayed out of the sale of lands donated by Maryland and Virginia.

The President's Office Building is located at the West of the White House. It was built and occupied in 1902, and was enlarged later. The building contains the President's Room, the Cabinet Room, a room for the President's Secretary, a telegraph room, a press room, and rooms for the clerical force.

Dependencies of the United States.

THE PHILIPPINE ISLANDS.

AREA, 115,026 square miles.

POPULATION, Census of 1918, 10,350,640.

CAPITAL, Manila (Luzon), pop. 1918, 285,306 (summer capital Baguio, pop. 5,462); other cities, Cebu, pop. 65,300; Albay (Luzon), pop. 53,105; Iloilo (Panay), pop. 47,808; Batangas (Luzon), pop. 41,182; Ormoc (Leyte), pop. 38,247; Laoag (Ilocos Norte), 38,294; Baybay (Leyte), pop. 36,934.

Governor General, Major Gen. Leonard Wood; assumed office Oct. 15, 1921.

Consuls General maintained at Manila by China, Great Britain, Japan, Mexico, The Netherlands and Spain. *Consuls* maintained at Manila by Argentina, Belgium, Brazil, Chili, Denmark, France, Germany, Italy, Liberia, Mexico, Nicaragua, Norway, Peru, Portugal, Russia, Sweden and Switzerland; at Cebu and at Iloilo by Great Britain, The Netherlands, Norway and Spain.

The Philippine Islands, the largest island group in the Malay Archipelago, were discovered by Magellan in 1521 and conquered by Spain in 1542; they were ceded to the United States by the Treaty of Paris (Dec. 10, 1898), following the Spanish-American War. Admiral Dewey had destroyed the Spanish fleet in Manila Bay, May 1, 1898, and Major Gen. Wesley Merritt had captured the City of Manila on Aug. 13, 1898.

The land area of the islands lies between 21° 10′ and 4° 40′ north latitude and between 116° 40′ and 126° 34′ east longitude. There are 7,083 islands extending 1,152 statute miles from north to south and 682 miles from east to west. Of this number 462 have an area of 1 square mile or over; 2,441 are named and 4,642 unnamed. The largest, Luzon, contains 40,814 square miles, and Mindanao, the next, 36,906. Panay has 4,448; Cebu, 1,695; Palawan, 4,500; Mindoro, 3,794; Bohol, 1,534; Masbate, 1,255. Between and about lie the other groups, including the Sulu or Jolo Islands in the south, the Babuyanes and Batanes in the north, the Catanduanes in the east, Culion in the west. Population by the Census of 1918 was 10,350,640, of which all but about 72,000 were Filipinos. There were 5,776 Americans, 43,802 Chinese, 7,806 Japanese, 3,945 Spanish, 1,148 Britons, 286 Germans, 182 French, 125 Swiss. In Manila in 1918 there were 3,124 Americans. The census returned 879,811 who could read Spanish. About 4,000,000 read or understand English. Spanish is by Filipino law an official language until 1930. The death rate in 1923 was 17.5 per thousand.

The archipelago has a coast line of 11,444 statute miles, which exceeds that of the entire United States. There are 21 fine harbors and 8 landlocked straits, the principal being Manila, Subic, Batangas, Tayabas and Hondagua, Iligan, Illana, Nasipit, Sibuguey, Sarangani Bays; the Gulfs of Lingayen, Ragay, Lagonoy and Davao, and the San Bernardino, San Juanico, Surigao and Basilan Straits and the Verde Passage. Manila Bay, with an area of 770 square miles and a circumference of 120, is the finest in the entire Far East. It is a roadstead in all parts of which vessels can anchor, but a breakwater has been constructed for vessels to shelter behind in bad weather. Manila, Cebu, Iloilo, Zamboanga and Jolo are the ports of entry.

The extensive mountain system of the Philippines belongs to the succession of volcanic ranges of the Pacific system of the world's surface. There are 20 more or less active volcanoes. Mount Apo (Apo means master), 9,610 feet, in Mindanao; Mayan Volcano, 7,943 feet, in Albay; Taal, 984 feet, in Batangas; Canlaon, 7,995 feet, in Negros; Banajao, or Majayjay, 7,144 feet, are the most famous of these. Other high mountains are Pulog, 9,580 feet; Halcon, 8,481 feet; Malingdang, 8,560 feet; Santo Tomas, 7,400 feet.

Nearly all the principal islands have important river systems. In Luzon are the Rio Grande de Cagayan, 220 miles long, which drains 16,000 square miles of territory; the Rio Grande de Pampanga, emptying into Manila Bay through a dozen mouths; the Agno, the Abra, Bued, and the more familiar Pasig. The Rio Grande de Mindanao, 330 miles long, is the largest in the islands, and the Agusan, also in Mindanao, the third in size. Mindoro has 60 rivers and Samar 26.

November, December, January and February are the temperate months. The mean average temperature at this season is about 77° to 79° Fahrenheit. In April, May and June, the hot months, the mean average is between 83° and 84°. In the other months it is about 80°. The nights are seldom unpleasantly hot even in the hot season, and a temperature of 100° is a rarity in Manila. The mountain regions of the north are cool as September in the temperate zone. There are two seasons, the rainy and the dry. The rains are heaviest in July, August and September; lightest in February and March. The lowest average rainfall for the last twelve years for the whole archipelago was 60.73 inches in the driest region, the highest 125.68 in the wettest. Manila's average was 75.46.

The preamble of the Jones Act, passed by the United States Congress and approved Aug. 29, 1916, declared that "it has always been the purpose of the people of the United States to withdraw their sovereignty over the Philippine Islands and to recognize their independence as soon as a stable government can be established therein." On assuming office in March, 1921, President Harding sent Major Gen. Leonard Wood, and W. Cameron Forbes (Governor General 1909-13) to the Philippines to make a complete survey of conditions. In their report they recommended among other things "that the present general status of the Philippine Islands continue until the people have had time to absorb and thoroughly master the powers already in their hands" and "that under no circumstances should the American Government permit to be established in the Philippine Islands a situation which would leave the United States in a position of responsibility without authority."

Following friction that had developed between the Legislative Assembly and the Governor General, President Coolidge on Feb. 21, 1924, in a letter to Manuel Roxas, Speaker of the House and Chairman of the Commission on Independence, upheld the administration of Gen. Wood and said: "It is not possible to consider the extension of a larger measure of autonomy to the Filipino people until they shall have demonstrated a readiness and capacity to co-operate fully and effectively with the American Government and authorities."

The Jones Act of 1916 abolished the Philippine Commission under which the islands had been governed under the act of July 1, 1902. It substituted as the Upper House of the Legislature a Senate composed of 24 members, and instead of the Assembly, a House of Representatives of 91 members, elected triennially. The Governor General, who remains as the head of the Islands, is appointed by the President. All the Cabinet heads, except the Secretary of Public Instruction, are Filipinos. Senators are elected for six years. Two Resident Commissioners to the United States are elected by the Legislature.

The Philippine Archipelago is divided into 48 provinces, 11 special provinces and 2 chartered cities. The chief executive of a regular province is the Provincial Governor, who is an elective official. He, together with two other elective members, form the provincial board which constitutes the legislative branch of the provincial government. In the special provinces, with the exception of Mindoro, Palawan and Batanes, the Provincial Governors are appointed officials.

Of the 24 Senators only two—those from the Twelfth District, which is composed of the Mountain Province, the City of Baguio, the Province of Nueva Vizcaya and the Department of Mindanao and Sulu—are appointed by the Governor General; all the others are elected by popular vote; as are also the 91 Representatives, excepting the nine who represent the Mountain Province, the Province of Nueva Vizcaya and the Departments of Mindanao and Sulu.

Filipinos have been admitted to the civil service in increasing numbers. On July 1, 1920, there were 20 Americans and 30 Filipinos acting as chiefs or assistant chiefs, and 760 Americans and 12,074 Filipinos connected with the Government.

The government of the towns is practically autonomous, the officials being elected by the qualified voters of the municipality and serving for three years. The officials consist of a President, Vice President, and Councillors, the latter varying in number according to population. Local municipal government has been instituted in about 873 municipalities and 312 municipal districts.

The administration of justice in the Philippines is intrusted to the Supreme Courts, the Courts of First Instance, the Municipal Court of the City of Manila and the Courts of the Justices of the Peace.

There are 99 school districts in the islands. Among the special Government institutions are the Normal School, the School of Arts and Trades, the Nautical School, and the Central Luzon Agricultural School. There are provincial trade schools and ships. In 1922, in the public schools, there were 1,070,255 pupils in the 7,659 public schools with 352 American

and 13,829 Filipino teachers. There are 384 private schools with 30,050 pupils and 1,229 teachers. The State supported University of the Philippines in 1921-22 had 4,718 students and the Dominican University of Santo Tomas (founded 1611) 701. The dominant religion is Roman Catholic.

The 1919 crop values of the islands were: Rice, $94,300,000; cocoanuts and products of, $37,200,000; sugar and products of, $37,200,000; abaca (hemp); $32 500,000; corn and products of, $18,800,000; tobacco leaf, $8,700,000; other and total, $230,800,000. Fruits and vegetables are not included in the above. Cocoanuts and tobacco are valuable products. In 1923 there were 700,000 cattle and 1,541,000 water buffalo (carabaos). Virgin forests cover 40,000 square miles. There are 73,000,000 acres of public lands.

Experts of the U. S. Department of Agriculture reported in May, 1924, that vast tracts of land are well adapted to the cultivation of rubber.

Under the act of 1919 any citizen of the Philippine Islands or of the United States over the age of 18 years, or the head of a family who does not own more than 59 acres of land in the Philippines may enter a homestead of not exceeding 59 acres of agricultural land of the public domain. Total homestead fee, $10. Any citizen of lawful age of the Philippine Islands or of the United States, and any corporation or association of which at least 61 per centum of the capital stock or of any interest in said capital stock belongs wholly to citizens of the Philippine Islands or of the United States, may purchase any tract of public agricultural land of not to exceed 247 acres in the case of an individual and 2,530 acres as a corporation or association.

During 1922, 899 foreign vessels with a tonnage of 3,031,828 entered the ports of the islands.

There were, in 1923, 778 miles of railroads, and 6,296 miles of public roads. The Manila Railroad Company has been taken over from the British owners by the Government and the line of the Philippine Railroad Company is about to be taken over. Silver, lead, zinc, copper, iron, coal, petroleum, asbestos and manganese are mined, as well as clay, marble, salt, etc. The islands are rich in mineral resources, but these are as yet undeveloped. The production exceeds $3,000,000 a year.

The output of gold in the Philippines in 1922 was $1,269,032, and from 1907 to 1922, inclusive, $14,053,935.

The revenue in 1923 was $44,810,539, and the expenditure $38,793,989. The budget for 1925 submitted to the Legislature in July provided for expenditures of 67,000,000 pesos.

The total foreign trade for the islands for the first seven months of 1924 amounted to 290,408,000 pesos as compared with 250,888,000 for the same period in 1923, the favorable trade balance being 46,152,000 pesos.

PORTO RICO.

AREA, 3,435 square miles.

POPULATION, Census of 1922, 1,346,623, 392.14 to square mile.

CAPITAL, San Juan, population, 71,443; other cities, Ponce, 41,962; Mayaguez, 19,124.

Governor, Horace M. Towner of Iowa; assumed office April 6, 1923.

Consuls maintained at San Juan by Argentina, Belgium, Brazil, Chili, Colombia, Cuba, Denmark, Dominican Republic (C. G.), France, Great Britain, Guatemala, Haiti, Honduras, Italy, The Netherlands, Norway, Panama, Peru, Portugal, Spain, Sweden, Uruguay and Venezuela.

Porto Rico is the fourth largest of the Greater Antilles, with the Atlantic Ocean on the north and the Caribbean Sea on the south. Santo Domingo is about 45 miles to the west, and St. Thomas 40 miles to the east. The Island of Culebra, population 839, and Vieques, population 11,651, to the east, form part of the territory. It is 95 miles long (from east to west) and 35 miles wide, with a coast line of about 345 miles. The best harbors are at San Juan and Ponce. Through the middle of the island, from east to west, runs a range of mountains with an altitude of 1,500 to 3,750 feet, cultivable to the summits. The soil is extremely fertile and largely under cultivation. The lower lands to the north are well watered, but irrigation is needed in the south; an extensive system has been constructed by the Government. Sugar, pineapples, oranges, grapefruit, tobacco and coffee are the chief exports. Sugar production under modern methods increased from 35,000 tons in 1899 to 490,000 tons in 1921, and 408,385 tons in 1922. Stock raising is an important industry. Valuable salt deposits are worked. Mineral production is underdeveloped. The climate is the most healthful of the Western Hemisphere in the tropics.

Porto Rico was discovered and named by Columbus in 1493. Ponce de Leon conquered it for Spain in 1509-11. It was conquered by Major Gen. Miles in the Spanish-American War and ceded to the United States by the Treaty of Paris, Dec. 10, 1898. It is administered under the Foraker act, April 12, 1900, as amended July 15, 1909, and as extensively altered by the Jones act, March 2, 1917, which extended American citizenship to all Porto Ricans, and granted manhood suffrage. The Governor is appointed by the President. The Legislature—a Senate of 19 members and a House of Representatives of 39—is elected for four years by direct vote. There are six executive departments: Justice, Finance, Interior, Education, Agriculture and Labor, and Health. The President appoints, upon confirmation by the Senate, the Attorney General and Commissioner of Education. The Governor, subject to confirmation by the Insular Senate, appoints the four remaining department heads. The Justices of the Supreme Court are appointed by the President by and with the advice and consent of the Senate. The six heads of departments form the Executive Council. The island elects a Resident Commissioner at Washington with a voice but no vote in the House of Representatives, for a term of four years.

The distribution of the population according to color in the Census of 1920 was: White, 948,709; black, 49,246; mulatto. 301,816; all others, 38. Education has been compulsory and free since 1899, when the percentage of illiteracy was 83; in 1920 it was 55. In 1899 8 per cent. of the children between five and seventeen attended school. In 1920 this had increased to 45 per cent.; and 206,533 were being instructed in English and Spanish. All the

natives speak Spanish. The Roman Catholic religion is dominant.

A commission from the Rockefeller Foundation reported that 90 per cent. of the people of the island was infected with uncinariasis (hookworm). The insular Commissioner of Health, himself a Porto Rican, wrote in 1920: "More than 70 per cent. of our population are in the country, badly housed and fed, ill in health, and ignorant of the first principles of hygiene." A great improvement, however, has been made in economic and social conditions during the last decade.

In 1921-22 there entered the ports 2,592 vessels, tonnage 6,907,646. The island has 339 miles of railroads.

The receipts for the fiscal year 1921-22 were $12,080,331, and expenditures $12,535,140. The debt was $11,895,000, and the assessed value of property $303,200,578. The budget for 1923-24 was balanced at $12,459,704.

The year 1899 is calendar; 1900 covers January 1 to June 30; 1901 and succeeding years are fiscal. Imports from the United States in 1899 included coin and bullion.

VIRGIN ISLANDS OF THE U. S.

AREA, 132 square miles.

POPULATION, Census 1917, 26,051 (St. Croix 14,901, St. Thomas 10,191, and St. John 959). White, 1,922; black, 19,523; mulatto, 4,563.

CAPITAL, St. Thomas (Island of St. Thomas), population, 7,747.

Governor, Capt. Philip Williams, U. S. N. *Aide*, Lieut.-Com. E. S. Stone, U. S. N.

Consuls maintained at St. Thomas by Belgium, Brazil, Chili, Colombia, Cuba, Denmark, Dominican Republic, France, Great Britain, Haiti, Italy, Mexico, Netherlands, Norway, Panama, Peru, Portugal, Spain, Sweden, Uruguay and Venezuela.

The Virgin Islands of the United States, formerly the Danish West Indies, were bought for $25,000,000 by the United States from Denmark, in a treaty proclaimed Jan. 25, 1917. The group consists of three islands, St. Thomas, St. Croix and St. John, with about fifty smaller ones, mostly uninhabited.

Columbus discovered this group on his second voyage, 1494, and, it is said, amazed at the number, feared that he would not have enough saints' names to go around, so he put them under the sacred patronage of the eleven thousand martyred virgins of St. Ursula.

St. Thomas Island has the principal harbor of the Virgin group—St. Thomas Harbor—on which the town of St. Thomas, formerly known as Charlotte Amalie, is situated. It is about forty miles east of Fajardo, the nearest port on the Island of Porto Rico, and seventy miles from San Juan, the principal city and port of Porto Rico. St. Thomas lies south, 20° east and 1,442 miles distant from New York City. Although St. Croix is a considerable distance from other islands of the group, all may be encompassed within a circle whose radius is twenty-five miles. The language is English.

Under the Act of Congress of March 3, 1917, all military, civil and judicial powers necessary to govern the islands were vested in a Governor, to be exercised in such manner as the President shall direct. The Governor is appointed by the President of the United States, by and with the advice and consent of the Senate. The Danish Code of Laws, dated April 6, 1906, commonly known as the Colonial Law of 1906, remains in force so far as compatible.

The islands comprise two municipalities, that of St. Thomas and St. John, with a legislative council, called the Colonial Council, of eleven members elected by popular vote and four appointed by the Governor; and that of St. Croix, with a membership of thirteen and five respectively.

St. Thomas has one of the finest harbors in the West Indies and is an important coaling and oil fueling station. The Naval Station, St. Thomas, under the command of the Governor, who is also Commandant of the Naval Station, has a powerful radio equipment. There is also a Naval Radio Station on the Island of St. Croix.

Education is compulsory.

Trade with the United States was:

THE CANAL ZONE.

AREA, 441½ square miles, including land and water.

POPULATION, Census of 1924, 27,145.

Governor, Col. Meriwether L. Walker, U. S. A., assumed office Oct. 15, 1924.

The Canal Zone is a strip of land extending five miles on either side of the axis of the Panama Canal but not including the cities of Panama or Colon, which remain in the Republic of Panama. The port at the Caribbean entrance, formerly a part of Colon, is Cristobal; and that at the Pacific entrance Balboa, while to the east of Panama is the residential town of Ancon, with hotel and hospital.

The strip of land was granted to the United States by Panama by the treaty of Feb. 26, 1904, the compensation being $10,000,000, with annual payments of $250,000 in addition.

The Canal Zone is a military reservation and is administered by the War Department; is fortified and occupied by a garrison in addition to the civilian employees of the Canal and railroad.

The civil population of the Canal Zone by census of June 30, 1924, was 27,143, of whom 7,805 were American (men, 2,368; women, 2,636; children, 2,801). Of these, 2,037 men and 327 women were employed by the Panama Canal and railroad. The other employees numbered 4,275, chiefly British West Indian Negroes. This is an increase of 2,175 over the 24,968 list in 1923, and 3,472 over the 23,671 listed in 1922. The increase was due principally to the addition of the Alhajuela area and the increased occupation of farming land under license. No private individuals are allowed to acquire land.

The United States is negotiating for 500 hectares (1,235.5 acres) on the island of Taboga in addition for defense purposes.

Barro Colorado, an island in the Gatun Lake (area 164 square miles created by the Gatun dam), has been turned over to scientists as a tropical biological laboratory.

AMERICAN SAMOA.

AREA, 57.9 square miles.

POPULATION, 1920, 8,324, including 266 Americans of the U. S. Naval Service.

CAPITAL, Pago Pago (Isl. of Tutuila), population, 8,056.

Governor, Capt. E. S. Kellogg, U. S. N. *Aide and Capt. of Yard*, Com. P. I. Wilson, U. S. N.

American Samoa, composed of the Islands of Tutuila, Aunuu, Ofu, Olosenga and Tau, and the uninhabited coral atoll of Rose Island, became a possession of the United States by virtue of the tripartite treaty with Great Britain and Germany in November, 1899, accepted by the United States Feb. 13, 1900. The census of January, 1920, gives it a native population of 8,068. Pago Pago is the most valuable harbor in the South Pacific and possibly in the entire Pacific Ocean. It was ceded in 1872 by the native King to the United States for a naval and coaling station. American Samoa is extremely valuable in its relation to the expansion of American trade in the Pacific.

American Samoa is 4,160 miles from San Francisco, 2,263 miles from Hawaii, 1,580 miles from Auckland, 2,354 miles from Sydney and 4,200 miles from Manila. The natives can all read and write and are all Christians of different denominations. They are of the highest type of the Polynesian race and are greatly on the increase due to the laws forbidding foreigners buying their land.

Under the tripartite treaty of 1899 the United States owns Tutuila and the other islands of the Samoan group east of 171 degrees of longitude west of Greenwich. The Samoan Islands west of that meridian belonged to Germany until the World War. Under the 1919 peace treaty they were taken over by Great Britain and are administered by New Zealand.

All of the land on the islands is privately owned. Under the American Commandant-Governor there is a native Governor in each of the three political divisions. The native Governors appoint the County Chiefs, who appoint the Village Chiefs. American Samoa has an area of 57.9 square miles. The chief product of the soil is cocoanut (the dried kernel is called copra). Other fruits are grown, but not exported.

Trade with the United States was:

Imports 1920-21	$307,873
" 1921-22	161,073
" 1922-23	220,989

GUAM.

AREA, 210 square miles.

POPULATION, 1920, 13,275, of which 12,216 were natives.

CAPITAL, Agana; population (est.), 9,000.

Governor, Capt. Henry B. Price, U. S. N. *Aide and Capt. of Yard*, Com. A. W. Brown, U. S. N.

The Island of Guam, the largest of the Marianas, was ceded to the United States by Spain by Article 2 of the Treaty of Paris, Dec. 10, 1898. It lies between latitudes 13° 13′ and 13° 39′ north and longitudes 144° 37′ and 144° 58′ east. It is 30 miles long and 4 to 8½ miles wide. Distance from Manila, 1,506 miles; from San Francisco, 5,053 miles. The inhabitants call themselves Chamorros, but the present generation are a mixed race, with the Malay strain predominating. Their language, a Polynesian tongue, is also called Chamorro. About 10 per cent. speak English. Instruction in the English language is compulsory in the public schools.

The total population, July 1, 1918, exclusive of officers and enlisted men of the navy and Marine Corps and their families, was 14,344, of whom 14,124 were classed as "natives." Of the foreign-born population only 69 were Americans. Influenza in two months of that year carried off 858. Death rate per thousand was 17.6; birth rate, 47.2. Guam is under the Navy Department, as a naval station. The Governor is a naval officer, designated by the President. A marine barracks, naval hospital and station ship are maintained. The Commercial Pacific Cable Company has a cable station in Guam, and cables from Manila, Yokohama, Midway and Yap Islands are landed here. There is a powerful Government radio station here. The port of entry is Apra, which is closed to foreign vessels, except by permit from the United States Government. Apra is commodious, but unimproved.

Imports in 1922 amounted to $424,411 from the United States and $171,709 from foreign countries, total $596,120; and exports to $49,426 to the United States and $13,505 to foreign countries, total $62,931.

WAKE AND THE MIDWAY ISLANDS.

The United States flag was hoisted over Wake Island on July 4, 1898, by Gen. F. V. Greene, commanding Second Detachment Philippine expedition. It is a small island in the direct route from Hawaii to Hongkong, about 2,000 miles from the first and 3,000 miles from the second.

The Midway Islands, owned by the United States, are a group in the North Pacific, northwest of the Hawaiian Islands. A relay cable station of the Commercial Cable Company is established there.

UNITED STATES AND LATIN-AMERICAN COMMERCE.

In this table Latin America includes Mexico, Central America, Cuba, Dominican Republic, Hayti, and South America.

Year Ending June 30.	Imports From Latin America.	Pct. of Total	Exports to Latin America.	Pct. of Total	Year Ending June 30.	Imports From Latin America.	Pct. of Total	Exports to Latin America.	Pct. of Total

ORIGIN OF THE NAMES OF THE STATES AND TERRITORIES.

ALABAMA—Alibama was the Indian name of a tribe in Southern Alabama—a Mushhogean tribe of the Creek Confederacy. Alibamu is from the Choctaw words alba aya mule, meaning "I open or clear the thicket."

ALASKA—From "Al-ay-es-ka," a native Eskimo or Innuit word, meaning Great Country.

ARIZONA—From Ariconac, "Few Springs." Papago name of a ranch in Sonora.

ARKANSAS—Algonkin name of the Quapaw Indians.

CALIFORNIA—Origin uncertain; may be from Spanish "Calida formax," a hot furnace.

COLORADO—Spanish, meaning red.

COLUMBIA, DISTRICT OF—A poetical adoption of the name of Columbus; applied to the territory in 1791 by the Federal Commissioners who laid it out.

CONNECTICUT—Indian, "Quonecktacut," Long River or River of Pines.

DELAWARE—Named after Lord De La War, of England, Governor of Virginia, who entered the Bay in 1610.

FLORIDA—Spanish words, "Pascua Florida," Feast of Flowers (Palm Sunday), on which day it is said to have been named, in 1512, by Juan Ponce de Leon.

GEORGIA—Named after King George II of England.

HAWAII—English spelling of Owhyhee, where Capt. Cook was killed by the natives in 1779.

IDAHO—Indian words, "Edah hoe," Light on the Mountains.

ILLINOIS—Indian word, by some translated "The River of Men. A form of the word Iliniwek. "Ilini" meant "man," "iw" meant "is," and "ek," was a plural signification.

INDIANA—Named after Indians, State of Indians.

IOWA—The Ioways, or Aiaouez, or Ainouas were a Sioux tribe. The word means "sleepy ones." They called themselves "Pahoja," gray snow.

KANSAS—Name of a tribe of the Sioux.

KENTUCKY—From Wyandot (Iroquoian) name "Ken-tah-teh," meaning to-morrow, or Land of To-morrow.

LOUISIANA—Named by the Mississippi River navigator Robert de la Salle, in 1682, after King Louis XIV. of France.

MAINE—From Maine, an ancient province of France, south of Normandy, owned by Queen Henrietta Maria of England, wife of King Charles I.

MARYLAND—Named in honor of the foregoing. Queen Henrietta Marie.

MASSACHUSETTS—An Algonkin Indian name from Massadchu-es-et, meaning "great-hill-small place," indicating a place at or about the big little hills.

MICHIGAN—The Mishigamaw or Mishawiguma were Indians. The word means "big lake" and was applied to Lake Michigan. "Michi" meant "great," and "gama" meant "water."

MINNESOTA—Sioux word for skyblue water.

MISSISSIPPI—Indian words "Sipu," Algonquin word for river; "Maesi," fish—Fish-River.

MISSOURI—The Missouri were Sioux of that name.

MONTANA—Spanish for mountainous; used now by Peruvians as a name for their Andean districts.

NEBRASKA—An Omaha Indian name for the "wide river," Platte.

NEVADA—A Spanish word, meaning "snow clad."

NEW HAMPSHIRE—Named, in 1629, after the County of Hampshire, England, by the patentee, Capt. John Mason of the Plymouth Council.

NEW JERSEY—In 1664 the Duke of York, of England, granted to Lord John Berkeley and Sir George Carteret a patent or deed to the present boundaries to be called Neva Caesaria, or New Jersey. Caesarea, or Caesaria, was the ancient name of the Island of Jersey of which Carteret had been administrator.

NEW MEXICO—Mexico is a word derived from the Aztec word "mexitli," title of their national war god.

NEW YORK—So called in honor of the Duke of York (1664), who got the patent from his brother, King Charles II. of England, and sent an expedition and took possession of New Netherlands.

NORTH CAROLINA—The Carolinas were originally named, it is said, in honor of King Charles IX. of France by Jean Ribault, whose expedition (1562) was financed by Admiral Coligny. "Carolus" is the Latin word for Charles. In 1663, King Charles II. granted a patent to the land under the name of Carolina.

NORTH DAKOTA—"Dakota" means "alliance of friends," and is a Sioux Indian word. Koda in Santee dialect and Kola in Teton dialect are the root words.

OHIO—Iroquois name, denoting great.

OKLAHOMA—Choctaw word for "red people."

OREGON—The Oregon State Librarian, Cornelia Marvin, says various origins of the name have been suggested as follows: *Origanum*, a wild sage found on the coast; *Orejon*, or Oregones, a Spanish name for big-eared (Indian) men; Orgon, a river in Chinese Tartary; *Oyer-un-gen*, a Shoshone Indian word for "place of plenty;" *Aura agua*, Spanish word meaning gently falling waters; *Ouragan*, a French word for hurricanes; *Wau-re-gan*, an Algonkin word for "beautiful water."

PENNSYLVANIA—Penn-sylvania, from Penn; and Sylva, Latin word for grove or woods. Groves of Penn; so called in honor of William Penn, who, in 1681, got a deed for the State from King Charles II. of England, in settlement of a debt which the British Government owed Penn's father. William called the country Sylvania, and the King prefixed it with "Penn."

PHILIPPINES—Spanish, "Islas Filipinas," discovered in 1521 by Magellan, whom the natives killed in a skirmish; named in honor of King Philip II. of Spain by a colonizing expedition from Mexico.

PORTO RICO—From the Spanish "Puerto Rico," Rich Port.

RHODE ISLAND—"Isles of Rhodes" was the name, chosen by the General Court of the colony, in 1644. The name of one of the islands had been Aquedneck. The name of Providence Plantations then gradually lapsed.

SOUTH CAROLINA—(See North Carolina).

SOUTH DAKOTA—(See North Dakota).

TENNESSEE—Called, from 1784 to 1788, the State of Franklin. "Tennessee" is an Anglicized Indian word—Ten-asse, said to mean "a curved spoon."

TEXAS—According to Elizabeth H. West, State Librarian at Austin, "Texas is an Indian word meaning Friends or Allies. So far as I know, it has not an Aztec origin. It applied, originally, in the Indian usage to the Indian tribes about the early Spanish missions around Eastern Texas; and later to tribes ranging as far west as the Rio Grande, to designate a large number of tribes who were ordinarily allied against the Apaches."

UTAH—Named after the Utes, an Indian tribe.

VERMONT—From Verd and Mont, two French words meaning Green Mountains. The name is said to have been bestowed by Samuel de Champlain when he saw from the lake, later called after him, green hills to the East.

VIRGINIA—Named in honor of Elizabeth, daughter of Henry VIII., sometimes called by her courtiers the "Virgin Queen" of England. The name was bestowed by one of the courtiers, Sir Walter Raleigh, who fitted out the expedition of discovery in 1584.

WASHINGTON—Named after George Washington. When the bill creating the Territory of Columbia was introduced in the 32nd Congress, second session, the name was changed in the bill to Washington because of the existence of the District of Columbia.

WEST VIRGINIA—(See Virginia).

WISCONSIN—An Indian name which, according to Reuben Gold Thwaites, was originally spelled "Ouiscousin" by the French missionaries and in old French-American documents; also was spelled "Misconsing," "Ouisconching," "Ouiskensing." The Yankee settlers spelled it "Wiskonsan," then "Wiskonsin;" but Congress changed it to "Wisconsin."

WYOMING—(By the State Historian, Eunice G. Anderson)—What we would determine to be the most authentic publication upon the derivatives of the name of our State gives the following: "The word Wyoming was taken from Wyoming Valley, Pennsylvania, rendered famous from Campbell's beautiful poem, 'Gertrude of Wyoming.' The word means 'mountains and valleys alternating.' Or, as we construed it, 'Here God has bent down the backs of His mountains for man to make his habitations.'" This is given by Gen. Freeman.

MOTTOES OF THE STATES OF THE UNION.

The motto of the **United States**, adopted by act of Congress, June 20, 1782, is: E Pluribus Unum (Many in One).

The mottoes of the States of the Union are as follows, the date following the name of the State, where given, being that of its adoption:

Alabama—Dec. 29, 1868, Here We Rest.
Arizona—1863, Ditat Deus (God Enriches).
Arkansas—May 3, 1864, Regnat Populus (The People Rule).
California—Eureka (I Have Found It).
Colorado—1861, Nil Sine Numine (Nothing Without God).
Connecticut—Oct., 1842, Qui Transtulit Sustinet (He Who Transplanted Still Sustains).
Delaware—Liberty and Independence.
District of Columbia—Justitia Omnibus (Justice to All).
Florida—1846, In God We Trust.
Georgia—Dec. 5, 1799, Wisdom, Justice, Moderation.
Idaho—March 5, 1886, Esto Perpetua (May It Last Forever).
Illinois—Aug. 26, 1818, State Sovereignty—National Union.
Iowa—Feb. 25, 1847, Our Liberties We Prize, and Our Rights We Maintain.
Kansas—Jan. 29, 1861, Ad Astra per Aspera (To the Stars Through Difficulties).
Kentucky—Dec. 20, 1792, United We Stand, Divided We Fall.
Louisiana—Union, Justice, and Confidence.
Maine—Jan. 9, 1820, Dirigo (I direct).
Maryland—Aug. 12, 1648, Fatti Maschii Parole Femine (Manly Deeds and Womanly Words). Scuto Bonae Voluntatis Tuae Coronasti nos (With the Shield of Thy Good-Will Thou Hast Covered Us).
Massachusetts—Dec. 13, 1780, Ense Petit Placidam sub Libertate Quietem (With the Sword She Seeks Quiet Peace Under Liberty).
Michigan—1835, Si Quaeris Peninsulam Amoenam Circumspice (If Thou Seekest a Beautiful Peninsula, Behold It Here).
Minnesota—1858, Etoile du Nord (The Star of the North).
Mississippi—Feb. 7, 1894, Virtute et Armis (By Valor and Arms).
Missouri—Jan. 11, 1822, Salus Populi Supreme Lex Esto (Welfare of People Is the Supreme Law).
Montana—May 24, 1864, Oro y Plata (Gold and Silver).
Nebraska—March 1, 1867, Equality Before the Law.
Nevada—Feb. 24, 1866, All for Our Country.
New Jersey—Oct. 3, 1776, Liberty and Prosperity.
New Mexico—Sept. 9, 1850, Crescit Eundo (It Grows as It Goes).
New York—1809, Excelsior (Higher).
North Carolina—1893, Esse Quam Videri (To Be Rather Than to Seem).
North Dakota—Liberty and Union, One and Inseparable Now and Forever.
Ohio—April 6, 1866, Imperium in Imperio (An Empire Within an Empire).
Oklahoma—Labor Omnia Vincit (Labor Conquers All Things).
Oregon—1857, The Union.
Pennsylvania—March 2, 1809, Virtue, Liberty, and Independence.
Rhode Island—1864, Hope.
South Carolina—Dum Spiro, Spero (While I Breathe I Hope).
South Dakota—Under God the People Rule.
Tennessee—1797, Agriculture, Commerce.
Utah—Industry.
Vermont—Sept., 1866, Freedom and Unity.
Virginia—Oct., 1779, Sic Semper Tyrannis (Thus Always to Tyrants).
Washington—1853, Ai-ki (By and By).
West Virginia—Sept. 26, 1863, Montani Semper Liberi (Mountaineers Always Freemen).
Wisconsin—Forward.
Wyoming—1868, Cedant Arma Togae (Let Arms Yield to the Gown).
Indiana, New Hampshire, and **Texas** have no motto.

New York State Statistics.

The Almanac presents in the following pages tables and other detailed data relating to the State of New York.

GEOLOGICAL HISTORY OF NEW YORK STATE.

(By John M. Clarke, State Geologist.)

THE geological history of New York can be traced back to the Precambrian era, the oldest recognizable in the rocks of the earth.

These earliest rocks, the Grenville metamorphosed sediments (gneisses, marble, etc.) are, however, not the oldest which ever existed in the State.

The Grenville rocks are exposed in the Adirondacks and the Hudson Highlands. They prove that in Grenville time Northern, Eastern, and probably Southwestern New York was under the sea.

After the deposition of the Grenville sediments igneous activity took place on a large scale and huge masses of molten rock (granite, anorthosite, gabbro, syenite) were pushed into the sediments from below.

Some time after the whole Adirondack region was subjected to enormous pressure and intensely folded, and then the great mass of Grenville sediments was upraised well above the sea.

At the beginning of Cambrian time, when organic life becomes first recognizable in the State, only the eastern margin was submerged, but toward the end (Potsdam time) the sea covered the whole region except the central and northwestern Adirondacks.

At the close of Cambrian time Northern New York was, however, above sea level.

In the long Ordovician period, during which the Beekmantown, Chazy, Black River limestones and the Utica, Frankfort and Lorraine shales and sandstones were deposited, the State was most of the time submerged under the Ordovician sea, except for the Adirondack island.

Toward the end of that period, however, the Green and Taconic Mountains arose along the eastern border of the State and practically all of Northern, Central, Eastern and Northeastern New York became dry land.

In the following Silurian period were deposited the Medina and Oneida sandstone and conglomerate, the Clinton shale, sandstone, limestone and iron ore, the Rochester shale, the Lockport and Guelph dolomites, the Salina shales, salt and waterlime, etc.

During the early part of this period the sea had spread over only Central and Western New York, while during the late Silurian it had extended over practically all the State west and east of the Adirondack region.

The strata of the next or Devonian era comprise the whole Catskilli and southwestern plateau provinces and cover more than a third of the State. These rocks abound in fossils and show that the sea continued to cover at least the southern half of the State.

The sea of the Carboniferous period hardly came over the boundary of the State from Pennsylvania.

At the end of Paleozoic time New York, except for a small area at the mouth of the Hudson, was raised during the Appalachian revolution well above the sea, never to be invaded again until the end of the glacial period.

During the long Mesozoic period New York was dry land; in Triassic time considerable volcanic activity prevailed in Southeastern New York, when sheets of lava (the trap of the Palisades) were forced into nonmarine Triassic beds.

During the next, or Jurassic, period the State was above the sea and actively eroded, but in the following Cretaceous period Staten and Long Islands disappeared under the sea.

At the end of this period the State, which had been eroded nearly to a plain, was uplifted 2,000-3,000 feet.

After this time in the Tertiary period the present drainage and relief of the State were developed in its major features.

Finally came the glacial period, which enriched the State with thousands of lakes and waterfalls.

It ended with the Champlain subsidence, during which the sea came for the last time into New York—namely, into the Champlain Basin and the Hudson Valley.

A recent elevation has again drained these regions.

The Hudson River is one of the most ancient rivers of the continent and flows over rocks which have been frequently and heavily faulted.

The fault blocks seem to have reached their equilibrium, but if subjected to new strains may settle down to new adjustments and cause earthquake disturbances.

DISTANCES IN NEW YORK STATE.

THE NEW YORK STATE FOREST PRESERVE.

New York State's Forest Preserve was established by an act of the Legislature in 1885. It includes large areas in the two great forested sections of the State, the Adirondack and Catskill Mountains.

The State has an actual investment of nearly $14,000,000 in the Forest Preserve, of which $11,000,000 has been spent for direct payment of lands purchased or appropriated and $3,000,000 for land taken on tax sales.

The area of the Forest Preserve in both the Adirondack and Catskill Mountains on Jan. 1, 1924, aggregated 1,994,028 acres.

Jurisdiction over the Forest Preserve is exercised by the Conservation Commission, which has charge also of the State Reservation at Saratoga Springs, the State-owned islands in Lake George, the St. Lawrence Reservation, the Cuba Reservation and the John Brown Farm in the town of North Elba, Essex County.

The commission has charge of the fighting of forest fires upon both public and privately owned land in the large forested regions. Sixty steel observation towers are maintained upon the tops of the highest mountains throughout the Adirondacks and Catskills and in the forested regions of Long Island; all are connected by telephone with the Forest Rangers. Observers are on duty from April to November.

Reforesting of State lands and raising of trees for reforestation of private land is done by the commission. Three forest tree nurseries are maintained, with a maximum capacity of 80,000,000 trees; with an inventory on June 1, 1924, of 40,000,000 trees and an annual output of 10,000,000 trees, which will be increased to 17,500,000 trees by 1926 when seed now planted becomes planting stock. About 10,000 acres are reforested each year.

Trees are sold to private landowners at cost of production, and furnished to municipalities and State institutions free.

Lumbering operations on much of the land within the park lines led to a referendum vote in 1916 for authorization of a bond issue for $7,500,000 for purchase of additional land for the Forest Preserve. The proposition was passed and this money has been spent, the State now owning the tops of forty of forty-two of the highest mountains.

It is estimated that the Forest Preserve is worth, if placed on the market, $75,000,000.

Chief among the large animals are deer and bear.

Beaver, which had become extinct, were introduced to the Adirondacks in 1905 and have since spread over other sections of the woods. They have also been introduced in the Catskills.

In 1915, through co-operation with the Benevolent and Protective Order of Elks, a carload of elk from Yellowstone Park was liberated in the Adirondacks. Among other common animals there, many of which furnish fur, are: Fox, mink, otter, marten, weasel, fisher, coon, skunk and muskrat.

The commission maintains three game bird farms for propagation of Mongolian ringnecked pheasants. From these farms there are distributed annually throughout the covers of the State 15,000 live birds and more than 100,000 pheasant eggs.

The lakes and streams which are annually stocked by the Conservation Commission contain brook trout, lake trout, rainbow trout, brown trout, largemouth and smallmouth black bass, great northern pike, pickerel, perch, bullheads and many of the coarser fishes.

The commission operates twelve hatcheries from which were distributed (in 1923) 764,025,090 fish of the varieties named above, and whitefish, lake herring, muskallonge, tomcod and flat fish.

The amount of game taken by licensed hunters in the State in 1921 as reported to the Conservation Commission on the stubs of hunting licenses totaled 1,676,844 and included:

Cottontail rabbits, 626,005; muskrats, 192,348; skunks, 155,027; ducks, 180,721; gray squirrels, 132,839; grouse or partridge, 104,865; pheasants, 77,381; snowshoe rabbits, 46,986; woodcock, 23,870; raccoons, 19,517; jack rabbits, 21,147; red foxes, 12,410; fox squirrels, 7,529; black squirrels, 11,067; greater yellowlegs, 5,588; fishers, 186; bears, 161; Wilson or jacksnipe, 9,847; quail, 6,078; mink, 11,255; deer, 9,065; coots, 4,876; gray foxes, 2,576; rails, 2,734; lesser yellowlegs, 4,145; black-bellied plover, 1,424; geese, 3,276; golden plover, 1,273; gallinules, 551; opossum, 597; bobcats, 226; sable or marten, 186; otters, 221; brant, 867.

THE PALISADES INTERSTATE PARK.

The Palisades Interstate Park comprises 36,000 acres (1,000 acres in the State of New Jersey and 35,000 acres in New York State). The park embraces the Palisades cliffs and runs for twelve miles on the west bank of the Hudson River from Fort Lee, N. J., to Palisades, N. Y. The Harriman Park, which is the highlands region of the Palisades system, runs from Bear Mountain, N. Y., five miles south of West Point, for fifteen miles to Tuxedo, N. Y. The commission also owns the State Rifle Range at Blauvelt, N. Y., and the Hook Mountain quarries. In the creation of the Palisades Park the State of New York has appropriated in money and lands $7,695,617. New Jersey has appropriated $1,404,441, including $500,000 for the Henry Hudson Drive. In addition, the commission has received private contributions of $7,990,972 in money and lands. All these contributions and appropriations, together with value of land donations, aggregate $17,091,030

In the Palisades section of the park the commission maintains pavilions for picnic parties, bath houses and beaches; motor boat basin for small pleasure craft; week-end camps for working boys; hundreds of individual camps are established here under permit. In the Harriman Park and Bear Mountain section of the Palisades system there is maintained by the commission the Bear Mountain Inn, which is a restaurant, built by private funds and operated by the Commissioners for the sale of food at reasonable prices; a lawn plateau for baseball, tennis, running meets and other organized athletic sports; a large grove on the side of Hessian Lake for picnic parties; benches and tables being scattered through this area, and swings for the children; the free use of rowboats is permitted for a limited period on Hessian Lake; sightseeing automobiles take visitors into the park.

The first five-mile section of the Henry Hudson Drive, paid for by the State of New Jersey at a cost of $443,107, was opened Oct. 29, 1921. It extends from Englewood to the top of the Hudson cliffs, overlooking Alpine.

George W. Perkins was the President of the New York commission for nearly twenty years, until his death in 1920. The officers of the commission are: New York State—J. Du Pratt White, President; Franklin W. Hopkins, Vice President; George W. Perkins jr., Secretary; Edward L. Partridge, Treasurer; New Jersey—Richard V. Lindabury, President; Edward L. Partridge, Vice President; George W. Perkins jr., Secretary; Frederick C. Sutro, Treasurer.

NEW YORK STATE MUSEUM.

The State Museum is likewise known as the Department of Science of the University of the State of New York, and as such is under the administrative control of that university. The collections of the museum are arranged on a floor space of about 100,000 square feet on the upper floors of the State Education Building at Albany. The collections are open free on every week day, 9 A. M. to 5 P. M., and on Sundays, October 1 to May 1, 2 to 5 P. M. The Legislature grants $55,000 a year for maintenance.

Hall of Minerals—The general collection of about 5,000 specimens is supplemented by a collection of minerals rom New York State, probably the best in existence.

Hall of Geology—The collections here illustrate the rock structure and the mineral wealth of the State.

Hall of Fossils—This hall includes vertebrates and invertebrates.

Hall of Zoology—The animal life of New York is exhibited in this hall, the larger mammals in habitat groups and the smaller mammals, birds, fishes, reptiles and mollusks in extensive series of well-mounted specimens. The collection of birds' eggs is one of the largest in America. This section also contains a representative gathering of insects. The section of Botany maintains an herbarium of 100,000 specimens of New York plants.

Halls of Archaeology and Ethnology—These contain six large groups representing the customs and habits of the Iroquois Indians in their natural state.

The museum owns:

1—The Clark Reservation near Syracuse, a tract of 104 acres characterized by its abandoned cataracts and gorges produced by post glacial waters; 2—Stark's Knob Reservation, or Volcano, near Schuylerville; 3—The Lester Park, or Cryptozoon Ledge, in Greenfield, west of Saratoga Springs; 4—Squaw Island in Canandaigua Lake; 5—Chittenango Falls Park, north of Cazenovia.

THE NEW YORK STATE CANAL SYSTEM.

(Communicated by Royal K. Fuller, Commissioner of Canals and Waterways.)

The canal system of the State consists of the Erie Canal; the Champlain Canal; the Oswego Canal; the Cayuga-Seneca Canal; Cayuga Lake Inlet, at Ithaca; the Black River Canal; the Glens Falls Feeder, and the lakes, reservoirs, feeders, harbor basins and terminal docks connected therewith. The Shinnecock-Peconic Canal, located in the County of Suffolk, on Long Island, connecting the waters of Shinnecock and Peconic Bays, is officially a part of the canal system.

What is commonly known as the Barge Canal includes the improved Erie, Champlain, Oswego and Cayuga-Seneca Canals. These waterways were enlarged and constructed under bond issues approved by the people in 1903, 1909 and 1915. They took the place of the old canals which had been in existence since 1825.

The Erie Barge Canal is the main waterway and extends across the State from Troy to Buffalo. Officially, the route commences at Congress Street, Troy, and follows the line of the Hudson River to Waterford, where the westward turn is made. From Waterford the line of the Mohawk River, canalized, is generally followed to a point beyond Little Falls. Westerly from this point the new channel follows the route of the old canal in part, but passes the northerly outskirts of the City of Utica on a new line, thence to the south of Rome and then into and across Oneida Lake. Passing out of Oneida Lake the Oneida River is used to its junction with the Seneca River at Three River Point; thence through the Seneca River to and through the Clyde River to a point east of Lyons; thence following the old canal, deepened and enlarged, to a point beyond Pittsford. Here the channel leaves the old route, crossing the Genesee River about a mile south of Rochester on a pool created by the construction of a dam, joining line of the old canal a few miles westerly, and continuing thence in the former channel, deepened and widened, to and through Tonawanda Creek, where the Niagara River is entered and followed to Lake Erie, at Buffalo.

The Cayuga-Seneca Barge Canal extends in a southerly direction from the Erie Barge Canal at a point near Montezuma. The Cayuga branch follows the valley of the Seneca River to Cayuga Lake; thence through Cayuga Lake to the Cayuga Lake Inlet at Ithaca. The Seneca branch follows the Seneca River in a westerly direction from the Cayuga branch near the foot of Cayuga Lake, and connects with Seneca Lake near Geneva; thence through Seneca Lake to Watkins, with an extension to Montour Falls.

The width of the Barge Canal channel varies according to the section traversed. Through canalized rivers and lakes the channel is at least 200 feet wide. Through rock cuts and land lines a minimum bottom width of 94 feet has been provided, and through earth sections the minimum width of the bottom of the channel is 75 feet. The locks of the Barge Canal are uniform in size. The inside dimensions of the lock chambers are 310 feet in length and 45 feet in width and are capable of passing a barge 300 feet long, and, say, 43 feet wide. A depth of water of 12 feet over the mitre sills has been provided. Clearance under fixed bridges spanning the channel is 15½ feet at high water. The mileage is as follows:

Erie Barge Canal (Waterford to Tonawanda), 339; Oswego Barge Canal (from Lake Ontario to Three River Point), 24; Cayuga-Seneca Barge Canal (from junction with the Erie Barge Canal to Ithaca and Watkins, including Cayuga and Seneca Lakes), 92; Champlain Barge Canal, 60; canal harbors at Utica, Syracuse and Rochester, 10. Total canal mileage, 525.

Hudson River (between Troy and Fort Edward), 37; Mohawk River, 112; Oswego, Oneida and Seneca Rivers for their entire length, 99; Oneida Lake, 21; Cayuga Lake, 38; Seneca Lake, 35; Clyde River, 19; Tonawanda River, 11; Syracuse Harbor, Onondaga Lake outlet, 7; Rochester Harbor, Genesee River, 2; Utica Harbor and a short section of the Mohawk River, 1. Total mileage in canalized rivers and lakes, 382.

Practically all the municipalities along the Barge Canal system have been provided with docks and warehouse equipment. In the City of New York there are eight terminals as follows:

At Piers 5 and 6, East River, and at the foot of West 53d Street, on the Hudson River, in Manhattan; at Mott Haven (138th Street, East River) in the Bronx; on the East River, at the foot of North Jane Street, Long Island City; at Flushing and at the foot of Broadway, Hallett's Cove, Queens; and at the foot of Columbia Street, Gowanus Bay; at Dupont Street, Greenpoint, Brooklyn.

A grain elevator of 2,000,000 bushels' capacity, providing every modern facility for the handling of grain transported by canal, has been erected by the State at the Gowanus Bay Terminal.

The building of a similar structure has been begun by the State at Oswego, on Lake Ontario.

Bond issue of 1903 for improvement of Erie, Oswego and Champlain Canals, $101,000,000; supplemental bond issue of 1915, $27,000,000; miscellaneous appropriations, $5,338,794; bond issue of 1909 for improvement of Cayuga and Seneca Canal, $7,000,000; additional appropriations in 1918, $350,000; miscellaneous appropriations, $1,071,858; bond issue of 1911 for constructing terminals and providing freight handling facilities, $19,800,000; miscellaneous appropriations, $2,838,122; appropriations for grain elevators at Brooklyn and Oswego, $2,725,000. Total, $167,123,774.

The canals are owned by the State and are under the jurisdiction of the Superintendent of Public Works for management, maintenance, repair and operation, under the supervision of the Commissioner of Canals and Waterways. Navigation is free, no tolls whatever being charged. The main office of the Superintendent of Public Works is in the Capitol at Albany. Branch offices are at Pier 6, East River, N. Y. City, and in Syracuse, Rochester, Buffalo and Utica.

COMMERCE BOTH WAYS ON NEW YORK STATE CANALS.

According to the Ice Trade Journal, about 24,000,000 tons of natural ice are cut and used each year in the United States.

Daily Capacity of Artificial Ice Plants in New York City. Manhattan, 8,230 tons; Bronx, 1,600 tons; Brooklyn, 7,675 tons; Queens, 2,200 tons; Richmond, 300 tons; total for city, 20,005 tons.

In 1921, according to the Census Bureau, 31,419,000 tons of artificial ice were manufactured in the United States. It was valued at $161,428,000. Of the total production, 28,404,000 tons were what is known as can ice, and 1,264,000 tons were plate ice. Cold storage receipts totalled $4,494,000. There were in 1921, in this country, 4,531 ice machines, with a daily capacity of 231,000 tons.

Number of ice plants, 3,002; wage earners, 24,351; wages in the year, $32,980,000.

In 1919, when the total production of artificial ice was 25,292,846 short tons, 15,848,566 tons were made from distilled water, the rest from rain water. Of the total output (tons), New York State contributed 3,214,659; Pennsylvania, 2,513,490; Illinois, 2,194,093; Ohio, 1,551,814; Texas, 1,537,828; California, 1,492,981; Missouri, 1,320,000.

Of the materials used, ammonia cost $2,658,658 (9,499,809 lbs.).

ELECTRIC RAILWAYS IN NEW YORK STATE.

There were in 1922 in New York State, according to the United States Census Bureau, 4,854 miles of electric railways on which were operated 18,737 cars. Employees numbered 53,918, and their salaries and wages in the year were $83,774,920. Passengers carried numbered 3,314,046,358.

Revenues from railway operations were $181,635,733, and the operating expenses were $131,425,717. Taxes amounting to $12,507,361, and interest and other deductions ate up all the profits and left the roads with a net deficit of $4,476,987 as against a surplus of $11,550,619 in 1917.

THE DAIRY INDUSTRY IN NEW YORK STATE.

(Data by the State Dept. of Farms and Markets.)

There are in New York State 1,678,000 dairy cows, of which 250,000 are under 2 years old.

Of the 190,000 farms of the State there are about 31,000 farms on which no cows are kept. Probably most of these places, while classed as farms by the census because they have three acres or more, are really country or suburban homes, small truck gardens, etc. Another 59,000 farms have an average of only about two cows each. The other 100,000 farms have what may be called commercial dairies. Taken as a whole, those in this group have an average of nearly 13 cows each, but probably less than half of them have more than 10 cows. Of all the cows in the State about one-third are in herds of 10 or less; one-third are in herds of 11 to 20; and one-third are in herds of 21 cows or more.

The average production of milk per cow in a year is slightly over 5,000 pounds. The total production of milk from 1,415,000 cows in 1922 was about 7,173,000,000 pounds, of which 6,148,000,000 pounds was sold. In addition, nearly 5 per cent. of the milk produced was marketed as butter, and 2½ per cent. was fed to calves and marketed as veal.

About 3,000,000,000 pounds of milk was marketed as fluid milk, cream, or ice cream; about 600,000,000 pounds was used for butter; 600,000,000 pounds for condensed and evaporated milk; and 600,000,000 pounds for American cheese. Most of the remaining 200,000,000 was used for cheese other than American, including 4,130,000 pounds of Limburger.

Production of butter totaled 50,000,000 pounds in 1922; cheese, 77,000,000 pounds. Over 90,000,000 pounds of fluid cream were sold. Production of condensed and evaporated milk was over 294,000,000 pounds. Ice cream production was 20,713,000 gallons. More than 10 pounds of milk are required to make 1 pound of cheese.

New York City received 2,277,808,000 pounds of fluid milk in 1922.

It is estimated that the farmers of the State received about $104,000,000 for the milk and cream delivered at the plants. In addition to this, milk worth $19,000,000 at wholesale prices was sold at retail or to retail dealers, and $6,000,000 worth of home-made butter was sold. The milk kept at home for family use and that fed to young calves was worth about $15,000,000 more.

Milk is by far the most important source of income to New York farmers.

The dairy plants in 1922 sold milk products valued, at wholesale, at $169,000,000, of which butter represented $12,220,000; cream, $23,424,000; and fluid milk, $69,752,000.

The railroad freight on a 40-quart can of milk ranges from 23.5 to 65.5 cents, according to distance shipped.

The railroads got in 1922 about $11,500,000 in freight charges on milk and cream originating in New York State.

The approximate land area of the State is 30,498,560 acres, of which 67.7 per cent. is in farm, as against 72.2 per cent. in 1910.

The per cent. of farm land improved was 63.8 per cent. in 1920 as compared with 67.4 per cent. in 1910.

The average size of a farm was 106.8 acres in 1920, and 102.2 acres in 1910.

The average amount of improved land on a farm was 68.1 acres in 1920, and 68.8 acres in 1910.

The land in farm was valued at $793,335,558 in 1920, and $707,747,828 in 1910.

Farm buildings were valued at $631,726,182 in 1920, and $476,998,001 in 1910.

The average value of a farm was $9,879 in 1920, and $6,732 in 1910. It was $3,811 in 1850, $5,047 in 1880, and $4,718 in 1900.

The average value of land in a farm was $4,106 in 1920, and $3,283 in 1910.

The average value of buildings on a farm was $3,270 in 1920, and $2,212 in 1910.

Native includes farmers with country of birth not reported, as follows: For 1920, 2,892; for 1910; 681.

The average value of farm land per acre was $24.34 in 1900, $32.13 in 1910, and $38.45 in 1920.

The number of farms of various sizes in 1920 (1910 figures in parentheses) was as follows: under 10 acres, 13,720 (18,655); 10 to 19 acres, 12,820 (15,533); 20 to 49 acres, 27,267 (31,047); 50 to 99 acres, 50,784 (56,821); 100 to 499 acres, 87,390 (92,194); 500 to 999 acres, 999 (1,104); 1000 acres and over, 215 (243).

The amount of reported mortgage debt on farms in 1920 was $145,533,268, as against $97,309,848 in 1910.

MINERALS AND MINING IN NEW YORK STATE.

The mineral products of New York State are valued at more than $50,000,000 a year. Though the Commonwealth lands yield no gold or silver, there is much iron, which has been mined for 150 years.

The ores are widely distributed, including magnetite in the Adirondacks and southeastern highlands; hematite in Central New York, represented by the Clinton beds; and limonite and siderite in Dutchess and Columbia Counties.

Mine operations are in progress at present in Essex, Clinton, St. Lawrence, Orange, Oneida, and Wayne Counties. The output of ore is worth over $7,000,000 a year.

Zinc is mined in St. Lawrence County, and to a lesser extent in Orange, Sullivan and Delaware Counties, the total output exceeding $1,000,000 a year.

There are no coal beds, but $6,000,000 of petroleum and natural gas are produced yearly. The oil comes from Allegany, Cattaraugus and Steuben Counties.

Limestone and clay beds yield 5,000,000 barrels yearly of cement.

Talc and pyrite are mined in St. Lawrence County.

Gypsum is mined in Erie, Genesee, and Monroe Counties.

New York possesses the largest salt mines in the country and its production is equivalent to about one-third of all the salt consumed in the United States.

Salt making is one of the oldest branches of the mineral industry, carried on continuously since about 1790, when the Onondaga salt springs were first utilized by the white settlers in Central New York.

The brine salt industry in that section is no longer important, the discovery of the rock salt beds in Onondaga, Genesee, Wyoming, Livingston, Tompkins, and Schuyler Counties in the latter decades of the last century having opened the way to the exploitation of these resources.

Livingston County produces all the rock salt, which is obtained by underground mining through shafts over 1,000 feet in vertical depth.

Elsewhere, the salt is brought to the surface in the form of brines by drilled wells into which fresh waters are introduced and then pumped back after saturation.

The salt beds underlie several thousand square miles, constituting one of the great natural resources of the State.

INDUSTRIAL COUNCIL, NEW YORK STATE LABOR DEPARTMENT.

Gov. Smith on June 13, 1924, announced the following appointments of members of the Industrial Council to the State Labor Department, created pursuant to Chapter 464 of the Laws of 1924:

Representing the interests of the employees:

John Halkett of Brooklyn, Chairman of Board of Building Trades Unions Representatives of New York City;

Thomas J. Curtis of the Bronx, Vice President, New York State Federation of Labor;

Jeremiah Ryan of Binghamton, Secretary of Central Labor Union of Binghamton;

John M. O'Hanlon of Troy, Secretary and Treasurer of New York State Federation of Labor;

Mrs. Sarah A. Conboy of Brooklyn, International Secretary-Treasurer of United Textile Workers.

Representing the interests of the employers:

Maxwell S. Wheeler of Buffalo, head of legal department, Larkin Company;

Frederick H. Swan of Rochester, Vice President, Robeson Rochester Corporation;

Charles M. Winchester of Albany, President, J. B. Lyon Printing Company;

Michael Friedsam of New York City, President, B. Altman Company;

William F. Kenny of Brooklyn, building contractor.

The Industrial Commissioner and Chairman of the Industrial Board of the Labor Department act as Chairman and Vice Chairman respectively of the Industrial Council.

In making the appointments, Gov. Smith said:

"I believe that a council composed of representatives of employers and labor can be of real service, not alone in connection with many important administrative problems confronting the Labor Department, but in the formulation and consideration of legislation affecting working conditions.

"Under the present law the Council is not only to consider all matters submitted to it by the Industrial Commissioner and advise him with respect thereto, but in addition the Council is given a power that it did not have under the former law, and that is on its own initiative to recommend to the Commissioner such changes of administration as, after consideration, may be deemed important and necessary.

"Through the Council both employers and labor will have continuous and direct contact with the Labor Department and with the officials in charge of its administration."

ILLITERACY, NEW YORK STATE.

According to the census of 1920 there were, then, 425,022 *illiterate persons* 10 years of age and over in the State of New York, "illiterate" meaning unable to write. Of this number 16,150 were *native whites* of native parentage, 12,256 were of *foreign or mixed parentage*, and 389,603 were of *foreign birth*. The number of illiterate *Negroes* was 5,032. In the total population 10 years of age and over the *percentage of illiteracy* was 5.1, which showed a diminution since 1910, when it was 5.5.

There is less illiteracy in the rural districts of the State than in the cities, the percentage being 2.9 for the rural population and 5.5 for the urban.

By counties the percentage of illiteracy ranges from 8.4 in Clinton County to 0.7 in Allegany County.

Manhattan.....	140,810	7.5	135,358				

The percentage of illiteracy in the total population of New York City 10 years of age and over is 6.2, which shows a slight decrease since 1910, when it was 6.7. For the native white the percentage is 0.3, for the foreign-born white, 13.8, and for the Negro, 2.1.

That the younger generation in the City of New York is much less illiterate than the older is indicated by the fact that while 6.5 per cent. of the males and 9.4 per cent. of the females 21 years of age and over are illiterate, the percentage of illiteracy in the population 16 to 20 years of age is but 1.0.

WOMEN'S WORK AND WAGES IN NEW YORK STATE.

(From data compiled by the State Department of Labor.)

One woman out of every four in New York State works for wages.

There are twice as many gainfully occupied women in New York State as in any other State in the Union.

In the last ten years the number of women gainfully employed has increased 9 per cent.

There are 1,135,948 women who contribute to the economic life of the State.

Within certain limitations earnings determine the food they eat, the clothes they wear.

Earnings and hours to a considerable extent determine the health of the body, and determine also the contribution which this group of citizens is able to make toward a better social order.

The payroll records (February-April, 1923) of 359 factories with 30,237 women, and of 208 mercantile establishments with 28,823 women, form the basis of this study.

As nearly as can be estimated, from the most recent census figures, the study covers about 16 per cent. of the establishments, in the four manufacturing industries—confectionery, paper boxes, shirts and collars, and tobacco, and 62 per cent. of the women employees.

43 per cent. of the women mercantile employees are included in the study.

Forty-eight hours or less was the scheduled work week of over one-half (56 per cent.) of the women in the five industries. This schedule was in effect for 74 per cent. of the women in New York City and 30 per cent. of the women up-State.

The actual hours worked varied considerably from the scheduled, but those establishments with scheduled hours of forty-eight or less had, in general, more stable employment—showed a greater proportion of full time work—than establishments with the longer scheduled week.

A higher rate of pay for full time work in establishments with scheduled hours of forty-eight or less, than for full time work in establishments with longer hours, was the decided tendency both in New York City and up-State.

Median weekly earnings of women in the four factory industries were $15.25. They were $16.25 in New York City and $14.25 up-State. Median weekly earnings of women in the mercantile industry were $16.25. They were $17.25 in New York City and $12.25 up-State.

Median weekly earnings of women in the four factory industries who worked *full time* were $16.25. They were $18.25 in New York City and $15.25 up-State. Median weekly earnings of women in the mercantile industry who worked *full time* were $16.25. They were $18.25 in New York City and $12.75 up-State.

From 1913 to 1923 the rise in median earnings in New York State, in the four factory industries combined, had been from $6.25 in 1913 to $11.75 in 1918 to $15.25 in 1923. In the mercantile industry the rise throughout the State had been from $7.25 in 1913 to $11.75 in 1918 to $16.25 in 1923.

In New York State in 1923 more than one-quarter of the women in the four factory industries and almost one-fifth of those in the mercantile industry *earned less than $12,* approximately half the women—57 per cent. in the four factory industries and 49 per cent. in the mercantile establishments—EARNED LESS THAN $16; *$25 or more* were the earnings of 7 per cent. of the factory and 13 per cent. of the mercantile employees.

The maximum yearly wages, based on the 1923 payrolls submitted to the State Labor Department's Bureau of Women in Industry were:

Confectionery, in New York City, $793; outside New York City, $741.

Paper boxes, in New York City, $871; outside, $767.

Shirts and collars, in New York City, $1,001; outside, $793.

Tobacco, in New York City, $1,066; outside, $793.

Mercantile, in New York City, $949; outside, $663.

Child labor in New York State—In 1920, out of 532,343 males in the State, 10 to 15 years of age, 29,382 were at work; of 527,292 females, 10 to 15 years of age, 20,464 were at work. Counting both sexes, the percentage of children at work was 4.7.

Of the males, 18,341, and of the females, 14,042 work in New York City.

Working children, 14 to 18 years of age, must attend continuation schools.

INDUSTRIAL FATALITIES IN NEW YORK STATE.

There were 1,780 deaths claims filed with the New York State Labor Department's Bureau of Workmen's Compensation during the year beginning October, 1923, and ending September, 1924. Of this number 1,058 were in the New York City District, 231 in the Buffalo District, 212 in the Albany District, 155 in the Syracuse District and 124 in the Rochester District.

In almost all of these it was claimed that the death resulted from injuries arising out of and in the course of employment and such disease or infection as may naturally and unavoidably follow therefrom.

NEW YORK CITY DISTRICT.

The New York City District reported 1,058 claims out of the total of 1,780 filed for the entire State.

The industry classification shows that metals, food and wood manufacturing caused more deaths than the other manufacturing industries. Among the non-manufacturing industries the order of numerical importance as regards fatal injuries to workers was as follows: construction, transportation, service, trade.

The cause classification for this district shows that falls were responsible for 245 deaths. Falls from ladders, scaffolds and other elevations took 125 of this number of lives. Of special importance as a cause of death is the plant housekeeping cause of falls on level surfaces due to obstructions and defective surfaces. By the expenditure of a comparative small sum of money, and the exercise of proper care in enforcing safe practices, it is probable that some of these 42 lives could have been saved. All of the falls from windows reported for the State occurred in New York City. Almost all of the 16 employees who lost their lives in this manner were window-cleaners.

BEAR MOUNTAIN-HUDSON RIVER BRIDGE.

The only highway bridge across the Hudson River south of Albany is the one 3½ miles north of Peekskill, which extends from Anthony's Nose on the east side of the river to Bear Mountain Park on the west shore.

The span was opened to public traffic on November 27, 1924. It had been dedicated the day before with the unveiling of a bronze tablet by Mrs. E. H. Harriman, widow of the railroad magnate.

The last rivet in the suspended span was driven Oct. 8, 1924, by former Gov. Benjamin B. Odell of Newburgh.

Total length, 2,252 ft.; length of span, 1,632 ft.; diameter of cables, 17 in.

Width of roadway, 38 ft.; width of each sidewalk, 5 ft.; number of wires in each cable, 7,252; height of towers, 350 ft.; clear height above river, 155 ft.; steel in bridge, 12,552 tons.

The suspended span is the longest in the world.

On the east side of the Hudson, the bridge is approached from the Albany Post Road by diverging at Annsville over the road leading toward the State encampment, thence over approximately 3½ miles of road which the bridge corporation constructed, this being a modern concrete highway.

This new highway constitutes an interesting piece of work, having, for the most part, been blasted out of solid rock in such a manner as to avoid accidents on the main tracks of the New York Central Railroad, almost directly below.

On the west side of the river, the bridge connects almost directly with the road leading from New York to the Storm King Highway.

The capacity of the bridge has been estimated to be 5,000 cars per hour.

E. Roland Harriman is President of the Bear Mountain-Hudson River Bridge Company.

PLAYGROUNDS IN NEW YORK STATE.

The cities of New York State have practically doubled the number of their playgrounds and recreation centres and the amount of their annual public recreation investment during the last ten years, according to the returns to a questionnaire on recreation compiled by the Playground and Recreation Association of America.

A total of 480 playgrounds and community centres in 1913 has been increased to 858, making this State first in the Union in number. Massachusetts is second with 706 centres, and Pennsylvania third with 687.

In 1913 only thirty-three cities in the State reported playground facilities under leadership. In 1923 fifty-three cities reported progressive recreation programs. There are still forty-three cities with 5,000 population or more which do not report playground systems.

The annual investment in recreation has increased from $602,353.53 to $1,074,959.19.

New York cities which have taken up the development of recreation as a community asset include: Albany, Auburn, Ballston Spa, Batavia, Binghamton, Buffalo, Chatham, Cohoes, Corning, Cortland, Coxsackie, Dunkirk, East Hampton, Elmira, Geneva, Glens Falls, Gloversville, Herkimer, Hornell, Hudson Falls, Ithaca, Jamestown, Lackawanna, Lockport, Mechanicville, Mount Vernon, Newburgh, New Rochelle.

New York City, Niagara Falls, Olean, Oneonta, Ossining, Oswego, Port Chester, Poughkeepsie, Rensselaer, Rhinecliff, Rome, St. Johnsville, Salamanca, Saratoga Springs, Solvay, Syracuse, Tarrytown, Troy, Tuckahoe, Utica, Wappingers Falls, Watertown, White Plains and Yonkers.

A county Recreation Commission is promoting recreation throughout Westchester County.

POPULATION AND AREA OF NEW YORK STATE, BY COUNTIES.

In computing the increase from 1890 to 1900 for certain counties the population of Indian reservations in 1900 has been deducted as follows: Cattaraugus, 1,982; Chautauqua, 31; Erie, 1,305; Franklin, 1,253; Genesee, 346; Niagara, 337; Onondaga, 530.

County.	When Formed.	Land Area Sq. M.	Population 1920.	Pop. Per Sq. M. 1920.	Population 1910.	Population 1900.	Population 1890.	Population 1880.	Population 1870.

Each tribe has an attorney, appointed by the Governor of the State.

POPULATION OF NEW YORK STATE BY STATE OF BIRTH.

(U. S. Census figures as of January 1, 1920.)

Of the 10,385,227 inhabitants of New York, 6,634,469 or 63.9 per cent., were natives of that State; 925, 383, or 8.9 per cent., were natives of other States or of the outlying possessions; and 2,825,375, or 27.2 per cent., were born in foreign countries.

The percentage of native Americans in the total population of the State increased from 69.8 in 1910 to 72.8 in 1920, and the percentage foreign born decreased from 30.2 to 27.2. The percentage of natives of New York increased during the same period from 62 to 63.9, and the percentage born in other States and the outlying possessions increased from 7.9 to 8.9.

Divorce figures for Hamilton County are included in Fulton. For other counties, where there are no figures, there were no reports.

Divorces in New York State in 1906 numbered 2,069; in 1896 there were 1,270.

ABSENCE FOR 5 YEARS NOW A GROUND FOR DIVORCE.

The New York Legislature, by a law approved March 25, 1922, amended the Act relating to domestic relations by adding this section, which took effect immediately:

Dissolution of marriage on ground of absence—A party to a marriage may present to the Supreme Court a duly verified petition showing that the husband or wife of such party has absented himself or herself for five successive years then last past without being known to such party to be living during that time; that such party believes such husband or wife to be dead; and that a diligent search has been made to discover evidence showing that such husband or wife is living, and no such evidence has been found.

The court shall thereupon by order require notice of the presentation and object of such petition to be published in the same manner as required for the publication of a summons in an action in the Supreme Court where service of such summons is made by publication; such notice shall be directed to the husband or wife who has so absented himself or herself and shall state the time and place of the hearing upon such petition, which time shall be not less than twenty days after the completion of the publication of such notice; and if the court, after the filing of proof of the proper publication of said notice and after a hearing and proof taken, is satisfied of the truth of all the allegations contained in the petition, it may make an order dissolving such marriage.

NEW LAW ON ANNULMENT.

The New York State Legislature, in 1923, passed an act, signed by the Governor May 21 and in immediate effect, amending the Marriage Law as follows:

Section 1. The Civil Practice Act is hereby amended by adding a new section at the end of article sixty-seven, to be section eleven hundred and forty-six-a, to read as follows:

§ 1146-a. *Conditions attached to maintenance of action to annul a marriage.* An action to annul a marriage may be maintained in either of the following cases:

1. Where both parties are residents of the State when the action is commenced.

2. Where the parties were married within the State and the plaintiff is a resident thereof when the action is commenced.

3. Where the parties, having been married without the State have become residents of the State, and have continued to be residents thereof at least one year; and the plaintiff is such a resident when the action is commenced.

§ 2. This act shall take effect immediately.

N. Y. STATE AND CITY INSTITUTIONS FOR MENTAL DEFECTIVES.

State Agricultural and Industrial School, at Industry, Monroe County (595), originally the Western House of Refuge for Juvenile Delinquents. For boys only.

State Training School for Girls, at Hudson, Columbia County (380), originally the House of Refuge for Women.

The two above named institutions have local boards of managers but are under the supervision of the State Board of Charities. Some of the inmates were not committed as delinquents.

State Schools for Mental Defectives—These are located: At Syracuse, Onondaga County, for boys and girls; at Newark, Wayne County, for girls and for child-bearing women; and at Rome, Oneida County, for boys and girls.

The three institutions contain about 4,726 inmates. They have local boards of managers, but are under the supervision of the State Board of Charities. Some of the inmates were not committed as delinquents.

Letchworth Village, at Thiells, Rockland County (1,642). This is an institution for feebleminded boys and girls, and not for delinquents. There is a local board of managers, but the colony is under the supervision of the State Board of Charities.

Craig Colony for Epileptics, at Sonyea, Livingston County (1,573). This institution has no provision for the care of delinquents. It is under the State Board of Charities, but has its own board of managers.

NEW YORK CITY CHILDREN'S HOSPITAL.

The **Children's Hospital**, on Randall's Island (1,260), has capacity for nearly 1,800 inmates, mental defectives, idiots, and epileptics. There is no provision for the care of delinquents.

The institution is owned by the City of New York, and is under the supervision of the Department of Public Welfare. It is the only municipal institution in the State for the care of the mentally defective.

BIRTHS, DEATHS, MARRIAGES IN NEW YORK STATE SINCE 1900.

Note—The death rate is per 100,000 population.

EXPECTATION OF LIFE AMONG THE FOREIGN-BORN IN NEW YORK STATE.

From a study of the 1910 mortality figures for the State of New York, Louis I. Dublin, statistician for one of the large life insurance companies, reaches the following conclusions:

1. The several races that make up the foreign-born population of New York are variable as to their natural vigor as measured by their mortality rates or by the life tables.

2. With the exception of the Russians, who are for the most part Jews, the expectation of life of the foreign-born is less than for the native-born of native parentage.

3. Of the foreign-born, Russians have the best expectation, followed in order by the Italian, the English, Scotch and Welsh, the Germans, and the Irish. The last have a particularly low expectation.

4. With the exception of the Russians and Italians, the mortality is higher among these races living in New York State than in their native country.

5. This condition may be due to the difficulties of adjustment to new conditions of life or to the poorer quality of the immigrants as compared with their own people who stay at home or to a combination of both these factors.

MOTOR VEHICLES IN NEW YORK STATE.

(Data by State Tax Commission, cover to April 1, 1924. Figures for City of New York are in parentheses.)

Passenger cars, 756,732 (215,832); omnibuses, 26,127 (14,668); commercial cars, 173,035 (69,745); trailers, 2,109 (1,039); dealers', 4,370; total cars, including exempts—968,942 (301,284).

Total license fees on cars, $15,478,846.41 ($6,024,319.69).

Exempt cars, 6,569 (2,577).

Chauffeurs, 16,334 (9,685); chauffeurs' fees, $79,188 ($50,361).

Operators, 11,018 (10,210); operators' fees, $37,036 ($35,284).

Miscellaneous fees, $42,453.25 ($21,785.50).

Total automobile receipts, $15,637,523.55 ($6,131,750.19).

Motorcycles, including exempts, 10,134 (4,532); total motorcycle fees, $47,052.50 ($20,193)

Grand total receipts from motor vehicles, $15,684,576.16 ($6,151,943.19).

Of the passenger autos in New York City, 24,238 are in the Bronx; 81,680 in Brooklyn; 56,730 in Manhattan; 45,026 in Queens; 8,158 in Richmond.

Of the total fees on cars, the Bronx contributed $549,295.42; Brooklyn, $2,057,584.08; Manhattan, $2,338,652.41; Queens, $905,745.78; Richmond, $173,046.

THE INSANE IN NEW YORK STATE.

(Data by Horatio M. Pollock statistician, N. Y. State Hospital Commission.)

State hospital column includes alms houses and county asylums in 1890.

Of the 41,302 patients in the State hospitals, 24,324 have dementia praecox, and 4,175 are of the manic-depressive type; 1,504 are paranoics; 1,473 are alcoholics; 1,432 have general paralysis; 1,273 are senile; 1,146 are epileptics; 797 have hardening of the brain arteries; and 47 lost their minds through use of drugs and other exogenous toxins.

Of the 6,900 patients admitted for the first time to the State hospitals for the insane in the year ended June 30, 1923, seven came from Japan; 3,809 were native born in the United States; 513 were from Ireland; 437 from Italy; 365 from Germany; 344 from Russia; 263 from Poland; 196 from Austria; 140 from England; 98 from Canada; 80 from Hungary; 12 from China; and the rest from many other countries.

The number of aliens in the State hospitals for the insane has grown from 9,241 in 1912, to 10,440 in 1923, but the percentage of aliens among the inmates has decreased from 29.2 in 1912, to 25.3 in 1923.

The insane aliens deported from New York State in 1923 totaled 395; insane non-residents deported, 583.

Admissions, including readmissions in 1923, to the State hospitals for the insane numbered 4,473 males and 4,299 females; new criminal insane totaled 200 males and 23 females; deaths in the State hospitals for the insane in 1923 totaled 2,045 males and 1,910 females; recoveries numbered 837 males and 988 females.

EXPENDITURES FOR NEW YORK STATE HOSPITALS FOR THE INSANE.

YEAR.	Maintenance.	Additions and Improvements.	YEAR.	Maintenance.	Additions and Improvements.

1920	11,561,468	1,489,557			

CARE OF THE INSANE IN NEW YORK STATE.

The insane in the State are under the care of the *State Hospital Commission*, composed of three members, appointed by the Governor, and which has jurisdiction over all State and private institutions for the care of the insane. Headquarters is at Albany, with a branch in the Flatiron Building, Fifth Ave. and 23d St., New York City, which looks after the deportation of alien and non-resident cases.

STATE HOSPITALS.

The State Hospitals for the insane are located at *Binghamton*, in Broome County; at *Brooklyn*, in Kings County; at *Buffalo*, in Erie County; at *Central Islip*, in Suffolk County, L. I.; at *Gowanda*, in Cattaraugus County; at *Poughkeepsie*, in Dutchess County; at *Kings Park*, in Suffolk County, L. I.; at *Ward's Island*, in N. Y. County; at *Middletown*, in Orange County; at *Rochester*, in Monroe County; at *Ogdensburg*, in St. Lawrence County; at *Utica*, in Oneida County; at *Wingdale*, in Dutchess County. and at *Willard*, in Seneca County.

The hospitals at Gowanda and Middletown are homoeopathic.

Each hospital is governed by its own board of managers, appointed by the Governor, but the chief executive officer at each institution is the superintendent, who is appointed by the State Hospital Commission. He appoints all officers and employees.

SOME STATES SHIRK BURDEN.

It is the belief of public officials that a large number of mildly insane persons, several thousands at least, are outside the public and private institutions, and are cared for in private families by relatives and friends. These outside cases are non-violent for the most part.

The State of New York is burdened with the care of a considerable number of inmates in its hospitals for the insane who belong in other States which refuse to accept them.

Many of the States have an arrangement by which they exchange patients one State with another, according to the legal residence of the patients.

NEW YORK STATE CHARITABLE INSTITUTIONS.

(Figures in parentheses show number of inmates.)

These institutions have their own boards of trustees or managers, appointed by the Governor, but they are all under the supervision of the State Board of Charities.

State School for the Blind, at Batavia, Genesee County (180). This school receives "blind persons of suitable age and capacity for instruction" from all sections of the State except New York City and the neighboring counties.

The institution is under the supervision of the State Department of Education as well as the State Board of Charities.

Thomas Indian School, at Iroquois, Erie County (187). It was transferred from private control to the State in 1875 and receives destitute and orphan Indian children for the most part from the several reservations within the State.

State Hospital for Orthopedic Children, at West Haverstraw, Rockland County (160). Established 1900.

State Hospital for the Treatment of Incipient Pulmonary Tuberculosis, at Raybrook, Essex County (325). The work is limited, as far as possible to the treatment of adult cases.

State Soldiers and Sailors' Home, at Bath, Steuben County (600). There is capacity for 1,400 inmates. Congress allows the home $100 a year for the support of survivors of the Civil and Spanish Wars.

State Woman's Relief Corps Home, at Oxford, Chenango County (220). The institution is open to both men and women.

CONVICTIONS FOR CRIME IN NEW YORK STATE.

The figures in the foregoing table relate only to Courts of Record, and do not include Magistrate's Courts or Courts of Special Sessions. The data are compiled annually by the Secretary of State.

Pardons, respites and commutations proceed from the Governor.

For statistics of prior years (1840-1899) consult 1923 or 1922 ALMANAC.

Convictions in the Courts of Record in 1923 included 424 females.

HOMICIDE CONVICTIONS IN NEW YORK STATE.

(In years ending October 31.)

	1923	1922	1921	1920	1919	1918	1917	1916	1915	1914	1913	1912	1911	1910

Murder, second degree	36	47	38	30	35	30	30	32	36	28	33	33	25	26
Manslaughter, first degree	40	75	62	52	70	63	44	57	59	50	60	42	50	49
Manslaughter, second degree	48	20	34	27	44	40	25	26	25	39	30	22	18	22
Electrocutions	16	17	11	16	2	8	6	14	10	11	13	22	14	12

Convictions in Courts of Record in 1923 included 207 for forgery and 11 for perjury.

Convictions in *Courts of Special Sessions* in 1923 totaled 61,169, and included 3,223 women. Of the convictions, 15,601 were for intoxication, 3,446 for petit larceny, and 1 for violation of the liquor tax law.

Appropriations by the Legislature for penal administration in New York State in 1923 totaled $3,582,505, and the total for the past ten years was $28,482,330.

NEW YORK STATE PENAL INSTITUTIONS.

(Figures in parentheses show number of inmates.)

State Prisons—*Auburn*, at Auburn, Cayuga County (1,233 men, 86 women); *Clinton*, at Dannemora, Clinton County (1,454); *Great Meadow*, at Comstock, Washington County (691); *Sing Sing*, at Ossining, Westchester County (1,312).

State Institutions for Criminal Insane—*Matteawan State Hospital*, at Beacon, Dutchess County (962); *Dannemora State Hospital*, at Dannemora, Clinton County (551).

The State prisons and the State hospitals for criminal insane are under management and control of the *Superintendent of State Prisons*, who is appointed by the Governor for a term of five years and who has his office at Albany.

He is a member ex-officio of the *Board of Parole for State Prisons*, which consists of two other members, appointed by the Governor for a term of five years each.

He is not a member of the State Probation Commission, whose only ex-officio member is the State Commissioner of Education.

The State Commission of Prisons, consisting of seven members, appointed by the Governor and serving four years each, visit and inspect the State prisons.

DEFECTIVE DELINQUENTS.

State Institution for Defective Delinquents, at Napanoch, Ulster County (320). This was formerly the Eastern New York Reformatory and received the overflow from Elmira, but on July 1, 1921, it ceased to be a reformatory and became an institution for criminals of low grade mentality who are regarded by the alienists as offering practically no hope for reformation. Thus the inmates of Napanoch may stay there for life, unless they improve.

The institution at Napanoch is under the control and supervision of the *State Commission for Mental Defectives*, which has its headquarters at Albany, and consists of three members, appointed by the Governor, including the Secretary of the State Board of Charities and the Fiscal Supervisor of State Charities.

REFORMATORIES.

State Reformatories—*Elmira Reformatory*, at Elmira, Chemung County (1,110) *State Reformatory for Women*, at Bedford Hills, Westchester County (254 adults, 31 infants); *State Training School for Women*, at Albion, Orleans County (187 adults, 12 infants).

The Elmira Reformatory receives, from the courts, sentenced male criminals not under sixteen nor over thirty years of age who are convicted of or who plead guilty to a felony for the first time in their lives. Men of those ages cannot be sent to Elmira for crimes of lesser degree than a felony, nor for second-offense felonies. The latter go either to a State prison or to a State hospital for the criminal insane.

The reformatory at Albion formerly was known as the Western House of Refuge for Women.

The reformatories are under the visitation and inspection of the State Board of Charities, whose members are appointed by the Governor, but each institution has its own separate board of managers or trustees, who also are appointed by the Governor.

THE HOUSE OF REFUGE.

The House of Refuge, on Randall's Island, New York City, is a private corporation, but is under the supervision of the State Board of Charities. The corporation is known as the Society for the Reformation of Juvenile Delinquents in the City of New York.

The institution receives boys under eighteen years of age. It has a capacity of 1,000, but usually has about 500 inmates, not all of whom are from New York City.

WEALTH, DEBT AND TAXATION IN NEW YORK STATE.

Deaths of New York men in the U. S. Navy or the Marine Corps totalled 1,406, of whom 717 were from New York City. Grand total of deaths, including nurses, 14,093.

UNIVERSITY OF THE STATE OF NEW YORK.

(Revised by the State Department of Education.)

The list of Regents is elsewhere. They elect the *President of the University and State Commissioner of Education*—Frank P. Graves; *Deputy Commissioner and Counsel*—Frank B. Gilbert; *Assistant Commissioner for Higher Education and Director of Professional Education*—Augustus S. Downing; *Assistant Commissioner for Secondary Education*—James Sullivan; *Assistant Commissioner for Elementary Education*—George M. Wiley; *Director State Library*—James I. Wyer; *Director of Science and State Museum*—John M. Clarke; *Directors of Divisions: Administration*—Lloyd L. Cheney; *Vocational and Extension Education*—Lewis A. Wilson; *Archives and History*—A. C. Flick; *Attendance*—James D. Sullivan; *Library Extension*—William R. Watson; *Examinations and Inspection*—Avery W. Skinner; *School Buildings and Grounds*—Frank H. Wood; *Law*—Irwin Esmond; *Visual Instruction*—Alfred W. Abrams; *Finance*—Clark W. Halliday; and *Secretary to the President of the University*—Mrs. N. Frances Steers.

The educational system of the State of New York is under the control of the Board of Regents, consisting of twelve members, one from each of the nine judicial districts of the State and three others at large, each member being elected for a term of twelve years at a joint session of the two Houses of the Legislature held in the second week of February of each year.

The powers exercised by the Board of Regents may be increased, modified or diminished by the Legislature, but the number of its members may not be reduced below nine nor may the Legislature fail to provide for the maintenance and support of the system of free schools wherein all of the children of the State may be educated. Under legislative enactment the Board of Regents adapts educational policy to varying needs, and indicates and provides a continuity of training. It accumulates books and manuscripts, supervises the public archives, collects valuable natural objects, and may carry on educational, historical and scientific research work directly on behalf of the State; grants all educational charters in the State, confers honorary degrees, conducts examinations, and awards certificates, diplomas and degrees; admits to certain professions and occupations, and regulates the certification of public accountants and nurses. It apportions State educational funds. It fosters all forms of cultural work.

Though it does not exercise a complete monopoly of education, for private institutions exist subject to no public authority, which do good work, it is the policy of the State to bring all chartered educational institutions into the university and, while allowing them virtually complete self-government in internal administration, to hold them accountable for the proper performance of their duties. These chartered institutions are subject to the inspection of the Regents, who may require annual reports of them.

PUBLIC SCHOOLS IN THE EMPIRE STATE.

(Data by the New York State Department of Education.)

Beginning with 1917 vocational schools are included in above data.

The cost per pupil of public school education increased from $45.32 in 1910 to $113.97 in 1921.

The figures in the table covering cost of maintaining schools include, 1917 and since, vocational, training, and evening schools, and bond payments. Excluding these items, the cost of maintenance in 1921 was $165,132,722, of which the State contributed $34,425,000 among the local committees.

The average daily attendance is about one-half the total number of children of school age (5 to 18 years).

The total value of schools—(1900) $81,768,495; (1915) $202,716,947; (1920) $273,981,500; (1923) $398,510,758.

THE NEW YORK STATE NAUTICAL SCHOOL.

The New York State Nautical School, the oldest nautical school in the United States, was established in 1874, shortly after the passage of the Act of Congress of June 24, for the purpose of educating young men as officers in the United States Merchant Marine. The school is under the general supervision of the Commissioner of Education and is managed by a Board of Governors selected from several maritime associations and chambers of commerce and appointed by the Governor of the State.

The students are instructed in dead-reckoning, the methods of finding the latitude and longitude by the sun, moon, planets and stars, the duties of a seaman, theoretical and practical marine engineering; have practice in a vessel under both sail and steam in steering, heaving the lead, in handling boats both under oars and sail; the purpose of the school being to fit young men to become officers in the American Merchant Marine.

Applicants for admission must at the time of their examination be between the ages of 17 and 20 years; must be of normal size, of sound constitution, and free from all physical defects, must pass a strict physical examination, must produce testimonials of character, must pass a satisfactory mental examination, must be residents of New York State and have either a parent or guardian, who is a citizen of the State of New York, to sign the necessary papers and they must have an inclination for a seafaring life and enter the school of their own free will, having the desire and intent on to follow the sea as a profession.

Examinations, both mental and physical, are conducted on board the school ship. Two years are required to complete the course and to obtain a diploma and certificate of graduation. The school year begins about Nov. 1, and is divided into the winter term, from Nov. 1 to May 1, during which the school ship Newport is moored alongside a pier in New York City, and the time is devoted to both theoretical and practical instruction; at the beginning of the summer term, from May 1 to Oct. 1, the Newport sails from New York for the cruise and the entire time is devoted to practical work.

The Newport on the summer cruise usually touches at Azores Islands, Southampton, Plymouth, Falmouth and Gravesend, England; Cherbourg, France; Queenstown and Belfast, Ireland, Copenhagen, Denmark, Amsterdam and other North Sea ports; Gibraltar, and the Madeira Islands, returning to Long Island Sound about the last of August.

An entrance fee of $50 is required, and certain articles must be purchased on board at time of entrance costing approximately $45. In addition to these sums a further sum of $35 is required as a clothing deposit, from which may be deducted the value of any articles subsequently issued during the course. A dress uniform and cap are issued to each cadet, which become the property of the cadet on graduating.

Thirty-six cadets received, late in 1924, certificates of graduation—twenty-seven in the deck department and nine in engineering.

Any further information can be obtained from the Superintendent, school ship Newport, care of Postmaster, New York, or the Secretary, Board of Governors, Room No. 2730, 17 Battery Place, New York City.

GOVERNORS OF THE STATE OF NEW YORK.

(The Official List, from the Legislative Manual.)

First Dutch Period.

Adriaen Jorisszen Tienpoint, Director.....1623
Cornelis Jacobzen Mey, Director.....1624
William Verhulst, Director.....1625
Peter Minuit, Director Gen.....May 4, 1626
Bastiaen Jansz Krol, Director Gen...March 1632
Wouter Van Twiller, Director Gen...April 1633
William Kieft, Director Gen.....March 28, 1638
Petrus Stuyvesant, Director Gen....May 11. 1647

NOTES TO THE FIRST DUTCH PERIOD.

Under Dutch rule the powers of government, civil and ecclesiastical, were vested in the Director of the West India Company and his Council.

Krol had been Director and Commissary at Fort Orange.

First English Period.

Richard Nicolls, Gov.....Sept.(N.S.) 8, 1664
Francis Lovelace, Gov.....August 17, 1668

Second Dutch Period.

Cornelis Evertse & War Council.Aug.(N.S.) 12, 1673
Anthony Colve, Gov. Gen.....Sept.(N.S.) 19, 1673

Second English Period (Early Colonial).

Edmond Andros, Gov.....Nov (N.S.) 10, 1674
Anthony Brockholls, Lieut.-Gov.November 16, 1677
Sir Edmond Andros, Gov.....August 7. 1678
Anthony Brockholls, Gov.....Jan. (N.S.) 13, 1681
Thomas Dongan, Gov.....August 27, 1683
Sir Edmond Andros, Gov.....August 11, 1688
Francis Nicholson, Lieut.-Gov...October 9, 1688
Jacob Leisler, Lieut.-Gov.....June 3, 1689
Henry Sloughter, Gov.....March 19, 1691
Richard Ingoldesby, Commander-in-Chief.....July 26, 1691
Benjamin Fletcher, Gov.....August 30, 1692
Earl of Bellomont, Gov.....April 2, 1698
John Nanfan, Lieut.-Gov.....May 16, 1699
Earl of Bellomont, Gov.....July 24, 1700
Provincial Council...March 5 to May 19, 1701
John Nanfan, Lieut.-Gov.....May 19, 1701
Lord Cornbury, Gov.....May 3, 1702
Lord Lovelace, Gov.....December 18, 1708
Peter Schuyler, Pres. of Council.May 6, 1709
Richard Ingoldesby, Lieut.-Gov.May 9, 1709
Gerardus Beekman, Pres. of Council.....April 10, 1710
Robert Hunter, Gov.....June 14, 1710
Peter Schuyler, Pres. of Council.July 21, 1719
William Burnet, Gov.....September 17, 1720
John Montgomerie, Gov.....April 15, 1728
Rip Van Dam, Pres. of Council..July 1, 1731
William Cosby, Gov.....August 1, 1732
George Clarke, Pres. of Council..March 10, 1736
George Clarke, Lieut.-Gov.....October 30, 1736
George Clinton, Gov.....September 22, 1743

NOTES TO THE SECOND ENGLISH PERIOD.

Andros was Governor of New England, New York and New Jersey.

The Earl of Bellomont died March 5, 1701.

Before 1709 the administration of government, when the offices of Governor and Lieutenant-Governor were vacant, was vested in the Council, the right to preside being lodged in the eldest Councilor.

From 1702 to 1738 New York and New Jersey had a joint executive, and Lord Cornbury was the first joint incumbent.

John West, seventh Lord De La Warr was appointed Governor in June, 1737, and resigned the title in September, 1737; but he never came to this country or qualified for the office.

Third English Period (Pre-Revolutionary).

Sir Danvers Osborne, Gov.....October 10, 1753
James De Lancey, Lieut.-Gov...October 12, 1753
Sir Charles Hardy, Gov.....September 3, 1755
James De Lancey, Lieut.-Gov...June 3, 1757
Cadwallader Colden, Pres. of Council.....August 4, 1760
Cadwallader Colden, Lieut.-Gov.August 8, 1761
Robert Monckton, Gov.....October 26, 1761
Cadwallader Colden, Lieut.-Gov.November 18, 1761
Robert Monckton, Gov.....June 14, 1762
Cadwallader Colden, Lieut.-Gov.June 28, 1763
Sir Henry Moore, Gov.....November 13, 1765
Cadwallader Colden, Lieut.-Gov.September 12, 1769
Earl of Dunmore, Gov.....October 19, 1770
William Tryon, Gov.....July 9, 1771
Cadwallader Colden, Lieut.-Gov.April 7, 1774
William Tryon, Gov.....June 26, 177[illegible]
James Robertson, Gov.....March 23, 1780
Andrew Elliott, Lieut.-Gov.....April 17, 1783

NOTES ON THE THIRD ENGLISH PERIOD.

Sir Danvers Osborne received his appointment as Governor of New York (in England), on August 1, 1753. He then sailed for America, arriving at the port of New York on October 7, 1753. He published his Commission as Governor and took the oath of office on October 10, 1753 (Wednesday).

On Friday, October 12, 1753, at 7 o'clock in the morning he was found in the garden of Mr. Murray, at whose house he was staying, strangled in his handkerchief, having committed suicide in a fit of insanity.

The above information is contained in a letter written by Lieut.-Gov. James De Lancey to the Lords of Trade, dated October 15, 1753.

Robertson and Elliott were Military Governors during the Revolutionary War, but were not recognized by the State of New York.

Government by the Provincial Congress.

Peter Van Brugh Livingston....May 23, 1775
Nathaniel Woodhull, Pres. *pro tem.*August 28, 1775
Abraham Yates jr., Pres. *pro tem.*November 2, 1775
Nathaniel Woodhull.....December 6, 1775
John Haring, Pres. *pro tem*.....December 16, 1775
Nathaniel Woodhull.....February 12, 1776
John Haring, Pres. *pro tem*.....June 19, 1776

NOTES ON THE STATE PERIOD.

The Constitution of 1777 did not specify the time when the Governor should enter on the duties of his office. Gov. Clinton was declared elected July 9, and qualified on July 30. On the thirteenth day of February, 1787, an act was passed for regulating elections, which provided that the Governor and Lieutenant-Governor should enter on the

duties of their respective offices on the 1st of July after their election.

Taylor (1817) was Lieutenant-Governor and became acting Governor.

The Constitution of 1821 provided that the Governor and Lieutenant-Governor should, after the year 1823, take office on Jan. 1.

Pitcher (1828) was Lieutenant-Governor and became acting Governor.

Throop (1829) was Lieutenant-Governor and became Governor upon the resignation of Van Buren. He was elected, November, 1830, for a full term.

Cleveland (1882) resigned Jan. 6, 1885, to become President of the United States, and Hill, the Lieutenant-Governor, succeeded him as Governor, and was elected Nov. 6, 1885, for a full term.

Hughes (1906) resigned as Governor, Oct. 6, 1910, to become a Justice of the Supreme Court of the United States, and was succeeded as Governor by Lieutenant-Governor Horace White.

Glynn (1913) was Lieutenant-Governor and became Governor, Oct. 17, 1913, when Sulzer, who was impeached, was removed from office.

POWERS AND DUTIES OF THE GOVERNOR.

(From the Legislative Manual.)

The executive power is vested in the Governor in accordance with the provisions of the Constitution and of the statutes.

The Governor is Commander-in-Chief of the military and naval forces of the State.

He acts as ex-officio member of various boards and commissions.

He is required to communicate by message to the Legislature at every session the condition of the State, and to recommend such matters to it as he may judge expedient.

He may convene the Legislature, or the Senate only, on extraordinary occasions.

The Governor shall cause to be kept in the Executive Chamber journals of the daily transactions of his office, files of all official records, together with statements of all applications for pardon, commutation or other executive clemency, and of his action thereon.

He is required to transact all necessary business with the officers of government, civil and military.

He shall expedite all such measures as may be resolved upon by the Legislature, and shall take care that the laws are faithfully executed.

The power to veto any bill passed by the Legislature is vested in the Governor.

The term of office of the Governor is two years, and he receives an annual salary of $10,000, and the use of a furnished executive residence.

He is authorized to appoint a counsel, a secretary, a military secretary, and such clerks and other assistants as may be necessary.

The Privy Seal is the Arms of the State surrounded by the inscription "State of New York—Executive Privy Seal."

UNITED STATES SENATORS FROM NEW YORK STATE, 1789-1922.

The Empire State was not represented in the first session of the first Congress, which began at New York City, April 6, 1789, and adjourned Sept. 29, 1789. The second session began at New York City Jan. 4, 1790.

A Senator of the United States must be at least 30 years of age, an inhabitant of the State, and nine years a United States citizen.

Names in *Italics* in the above table are those of Senators who were appointed by the Governor in recess of the Legislature and whose successors were chosen at the next session of that body

Senators were chosen by the Legislature prior to 1914; since then, by popular vote, at a general election.

Senators who resigned before their terms expired were: King, Laurance, Schuyler (2d term), Hobart, North, Watson, Armstrong (2d term), Clinton, Bailey, Armstrong (4th term), King (2d term), King (3d term), Van Buren (2d term), Marcy, Tallmadge (2d term), Wright (3d term), Conkling (3d term), Platt (1st term).

STATE INSTITUTIONS FOR DEAF MUTES.

The several institutions for deaf mute children receive $490 a year per capita from the State for such pupils above twelve years of age as may receive appointments from the Commissioner of Education. Pupils between five and twelve years of age are received as county pupils at the annual charge to counties of $490, upon the order of an overseer of the poor or a county supervisor. As a rule the grounds and buildings of these institutions belong exclusively to private corporations, who appoint the superintendent or principal.

N. Y. Instit. for the Instruct. of the Deaf and Dumb (opened May 20, 1818), New York.

Le Couteulx St. Mary's Instit. for the Improv. Instr. of Deaf Mutes (opened November, 1862), Buffalo.

Instit. for the Improv. Instr. of Deaf Mutes (opened March 1, 1867), New York.

St. Joseph's Instit. for Improv. Instr. of Deaf Mutes: Fem. Dept. (opened 1870), Westchester; Fem. Branch (opened 1874), Brooklyn; Male Dept. (opened 1875), Westchester.

Central N. Y. Instit. for Deaf Mutes (opened March 22, 1875), Rome.

Western N. Y. Instit. for Deaf Mutes (opened October 4, 1876), Rochester.

Northern N. Y. Instit. for Deaf Mutes (opened September 10, 1884), Malone.

CHIEF NEW YORK STATE LEGISLATION OF 1924.

Appropriations—Total, $158,122,187—Toward Roosevelt Memorial Building to be erected as part of the American Museum of Natural History. Central Park West, New York City, $250,000 (total cost not to exceed $2,500,000); for bridges across Arthur Kill between Howland Hook, Staten Island, and Elizabeth, New Jersey, $50,000, and across Arthur Kill, between Tottenville, Staten Island, and Perth Amboy, N. J., $50,000; for construction of tunnel under Hudson River between New York and New Jersey, $3,500,000; for evening classes for teachers of foreign born adults, $5,000; for construction of buildings for wards of State, $12,500,000; for fire prevention in State hospitals and charitable institutions, $1,000,000; for Salt Water Bays Commission, $120,000; for Delaware River Commission, $25,000; for construction of highway bridge at Poughkeepsie, $450,000; for enlarging State Military Camp grounds at Peekskill, $40,000; establishing a course of study in marketing at Cornell University, $45,000; for payment of claims for destruction of tubercular cattle by State, $3,000,000; expenses of Bureau of Housing and Regional Planning, $62,360; for expenses of commission to investigate number, distribution and condition of crippled children, $25,000; for additional land for State Orthopedic Hospital for Children, $18,000.

Baby Adoption—Before an order for adoption of a baby can be signed by the Judge, a careful investigation must be made into all the facts surrounding the proposed adoption by the Court or by some one designated by the Court; a six months' probationary period of residence in the family of the proposed foster parent is also required, which requirement, however, may be waived in the discretion of the Judge making the order.

Bank Taxes—Penalty of $100 a day for delay in payment of bank tax and moneyed capital tax struck out; provides in lieu thereof penalty of 5 per cent. of gross amount of tax and an additional sum equal to 7 per cent. of tax from date when due until paid—effective as of Dec. 31, 1923 (no penalty to be retroactively increased).

Banks—Private bankers, in cities of 300,000 or more, must invest $100,000 in their business or lose their licenses.

Bonus for War Service—Awards $10 for each month of service to all soldiers, sailors, marines and members of the Army and Navy Nurse Corps who entered the service in the war as residents of New York State, the maximum payment to be $150. Paid from proceeds of $45,000,000 bond issue.

Bread—Made compulsory for bakers to stamp the weight on each loaf of bread.

Bureau of Fine Arts—To establish in Department of Architecture a Bureau of Fine Arts, in charge of a commission of nine members, viz.: the State Architect, Superintendent of Public Works, Chairman of Council of Parks, one painter, one sculptor, one architect, one landscape architect and two lay members; $10,000 appropriated for expenses.

Business Corporations—Provides "entire net income" shall include all dividends received on stocks and all interest received from Federal, State, municipal or other bonds, and without deduction for taxes paid on either profits or net income and without deduction of any specific amount allowed by any taxing authority.

Children Under 16, Medical or Surgical Care of—Whenever it shall appear to a public officer or board charged with the relief of the poor that a child under sixteen years of age is in need of medical or surgical care, an order may be made, subject to the consent of the parent or guardian, for the treatment of such child in its home, a hospital or other institution, and the expense thereof, when approved by the officer or board issuing such order, shall be a charge upon the county or the proper subdivision thereof; but persons legally responsible for the support of such child shall be liable to pay a part or all of the expenses of such treatment.

Children's Courts—Established six Justices, term 10 years, each to receive $12,000. To have exclusive original jurisdiction in all cases involving children under 16. In taking children's testimony court may, in discretion, dispense with formality of oath. Present Children's Court abolished; records, appropriations, officers and employees transferred to new Court.

Civil Service—No regular officer or employee holding position in competitive class shall be removed except on notice and for stated reasons.

Corporate Tax Dates Changed—Franchise tax upon insurance corporations, May 1 (instead of June 1). Additional franchise taxes upon transportation or transmission corporations, and upon elevated or surface railroads, Aug. 15 (instead of Aug. 1). Tax upon foreign bankers and foreign investors, March 1 (instead of Feb. 1). License tax payable by foreign corporations due and payable immediately after the close of the first year of carrying on business in this State.

Penalty imposed of not more than $5,000 for failure to make required annual or special reports, and $1,000 against any officer of a corporation making any fraudulent return or statement with intent to defeat or evade payment of taxes.

Drug Stores—Made a misdemeanor to run a place as a drug store unless duly authorized and registered by State Board of Pharmacy.

Educational—Regents required to prescribe courses of instruction in history and meaning of provisions of United States Constitution to be maintained and followed in all schools of the State, public and private.

Commissioner of Education required to prepare for use of public schools of State a program providing for a salute to the flag, for instruction in its correct use and display, and for other patriotic exercises.

Equal Pay—In the employment of public school teachers, discrimination in pay based on sex is forbidden.

Teachers' Retirement—The amount to be contributed by employers to the teachers' retirement fund shall be based upon the salaries of all teachers whether members of the retirement system or not.

Estates by Entirety Inheritance Tax—Surviving tenant of tenancy by entirety taxable only on one-half of value of property transferred by will or under intestate laws of the State.

Farmers—Non-profit co-operative marketing associations by farmers authorized.

Fort Crailo, gift to State by Mrs. Susan Delancey Van Rensselaer Strong, of Philadelphia, preservation provided for with bronze tablet reciting: "Supposed to be the oldest building in the United States and to have been erected in 1642 as a Manor House and place of defence known as Fort Crailo." "Yankee Doodle" first sung there. In City of Rensselaer.

Fraudulent concealment or disposition of property covered by lease or hired made misdemeanor.

Grade Crossings—Railroads of the State are required to maintain flagmen and gates on all grade crossings, or provide some other safeguard.

Hotel Keepers are liable up to $500 for loss or damage to merchandise samples or merchandise for sale. Liability for damage to or loss of wearing apparel or other personal property limited to $500, unless such due to fault or negligence of hotel keeper, and to $100 if left for storage unless a greater value is stated in written receipt. A reasonable charge may be made for such storage.

Hotels and Restaurants liable up to $75 for property deposited in parcel or check rooms for which a claim check is issued and for which no fee is charged.

Investment Companies in places having not more than 25,000 population or in county in which there is no first or second class city, dealing in real estate bonds and mortgages, may have a capital stock of not less than $50,000.

Labor Laws—*Industrial Council Restored.* Ten members appointed by Governor, five to represent employees and five to represent employers; Commissioner and Chairman of Industrial Board to be added members of Council and to act as Chairman and Vice Chairman, respectively; among other things Council to consider matters submitted by Industrial Commissioner and advise him and on own initiative recommend changes in administration.

Provisions of Labor Law extended to restaurants—viz., as to cleanliness, safety, drinking water, wash rooms, ventilation and employment in basements of children and females.

No male between sixteen and eighteen years of age to be employed in factory before 6 A. M. (instead of 4 A. M.). No male between sixteen and eighteen years of age shall be employed in or in connection with any mercantile establishment more than six days or fifty-four hours in any week; more than nine hours in any day except when for the purpose of making a shorter week; or between 12 midnight and 6 A. M. Week before Christmas is excepted and two days in each month for purpose of stock-taking.

These provisions do not apply to newspaper deliveries.

Landlord and Tenant—Application of *emergency rent laws* of 1920, 1921, and 1923 extended to Feb. 15, 1926, and made applicable to tenancies made subsequent to September, 1920, and to villages in Westchester County until Feb. 15, 1926.

Landlord failing to turn over deposits made as advance security, when terms of letting complied with, made guilty of misdemeanor.

Summary Proceedings—If precept contains a notice

that demand is made in the petition for rent in arrears, and precept is served at least five days before return day, the court may determine amount of rent due and give judgment therefor.

Libel Suits—Consolidation of actions brought for same alleged libel provided for, jury being authorized to apportion damages, if any, among the defendants.

Permitting defendant to prove for benefit of jury that person suing had recovered previously from another defendant for the same alleged libel.

New York City special legislation classified at end of article.

Port Authority—Given power to conduct investigations, inquiries, or hearings, to compel attendance of witnesses and production of papers, books or documents by subpoena.

Prison-Made Goods—Superintendent of Purchase shall designate one of his deputies to have charge of sale, distribution and marketing of prison-made goods—he to have power to confer with prison industries and parole board, and to visit and solicit orders from municipalities, political subdivisions of State and municipalities.

A modern industrial system established in State prisons, industrial record of prisoners to be given weight in determining parole, provides a reasonable wage for work actually done.

Railroad Employees—Persons employed in operating railroad trains cannot act as railroad policemen.

Real Estate Brokers—No person entitled to a license as real estate broker unless he is a citizen or has declared his intention of becoming a citizen. Tax Commission may revoke license if such person does not become a citizen within five years. Commission may require proof that applicant has fair knowledge of English language, a fair understanding of legal effect of deeds, mortgages and contracts, and of obligations between principal and agent. *Sign* must be conspicuously displayed on outside of building in which business is conducted, except office, apartment or hotel buildings.

Santiago Monument Commission—Appropriated for expenses of Commission of ten members to select a site near Santiago battlefield in Cuba and to erect a monument to memory of Seventy-first New York Volunteers Infantry in Spanish-American War, $10,000.

Savings and Loan Associations—Board of Directors, when so authorized by by-laws, may elect officers and fill vacancies until next annual meeting of shareholders. Cost of plot and building for transaction of business of savings and loan associations to 25 per cent. of guaranty fund; Superintendent of Banks' approval of estimated cost and plans required.

State Building Fund—Proposed constitutional amendment to provide a fund of $70,000,000 raised by bond issue to be used as a State Building Fund (if passed by next Legislature and approved by the voters, it will commit the State for a period of ten years to the policy of building permanent structures from bond issue money instead of from current revenues).

State Parks—Provides for bond issue of $15,000,000 bonds for extension and improvement of existing State parks and the establishment of new State parks. Approved by electors Nov. 4.

A second bill appropriates in all $850,000 for development, improvement and extension of certain parks within the State.

Taxes—*Personal income tax* for 1923 reduced 25 per cent.; married persons living together not required to make return unless income is $2,500 or more (instead of $2,000).

Direct State tax reduced to 1½ mills from 2 mills.

Tax Exemption—Made applicable to buildings construction of which is commenced by April 1, 1925.

Voting Machines—All knobs on vacant spaces in voting machines to be locked so that voter will not be able to vote in the blank spaces. The office of Voting Machine Commissioners abolished, their powers and duties being transferred to the Secretary of State.

Warehouse Receipts—Warehousemen liable to holders of warehouse receipts issued by them for damages resulting from non-existence of goods described or their failure to correspond with description.

Negotiable warehouse receipts may be negotiated by any person having possession, however acquired; its validity is not impaired by fact that owner was deprived of possession by loss, theft, fraud, accident or mistake, if person having same paid value therefor in good faith without notice.

NEW YORK CITY HOME RULE ACT OF 1924.

The Home Rule Enabling Act framed to carry out the provisions of the Home Rule Amendment to the Constitution of New York State was passed unanimously during the closing hours of the Legislature and signed by Gov. Smith on April 24, as Chapter 363 of the Laws of 1924. It was drafted by the State Home Rule Commission of which five members were named by the Governor, five by Speaker Machold (R.) of the Assembly and five by Majority Leader J. J. Walker (D.) of the Senate. James J. Hoey of New York was chairman.

Under the provisions of this Act the power to enact local laws in New York City is conferred upon a bi-cameral body known as the "Municipal Assembly," consisting of the Board of Estimate and Apportionment and the Board of Aldermen. All local laws enacted must receive a majority affirmative vote of both branches of the legislative body. A city officer having a vote in both such branches is entitled to vote on local laws only in Board of Estimate.

Public hearings must be held before the Mayor upon all local laws prior to their approval by him. Measures vetoed by the Mayor may be reconsidered by the Municipal Assembly within thirty days and repassed over the Mayor's veto only by a two-thirds vote: but on such reconsideration the Mayor is not entitled to vote.

Local laws neither approved by the Mayor nor returned within thirty days become law.

With respect to the power of cities to adopt and amend local laws, Section 11 of the Act provides as follows:

1. The local legislative body of a city shall have power to adopt and amend local laws in relation to the property, affairs or government of the city relating to the powers, duties qualifications, number, mode of selection and removal, terms of office and compensation of all officers and employees of the city, the transaction of its business, the incurring of its obligations, the presentation, ascertainment and discharge of claims against it, the acquisition, care, management and use of its streets and property, the wages or salaries, the hours of work or labor, and the protection, welfare and safety of persons employed by any contractor or sub-contractor performing work, labor or services for it, the government and regulation of the conduct of its inhabitants and the protection of their property, safety and health.

2. The legislative body may delegate power to carry into effect any local law and punish violations.

Until specifically modified or repealed by the local legislative body existing local laws would remain in force.

No local law shall supersede any provision of an act of the legislature relating to the property, affairs or government of cities which provision in terms and in effect applies alike to all cities, nor any provision of an act of the legislature which provision relates to matters other than the property, affairs or government of cities, whether in terms and in effect applying alike to all cities or not, nor any provision of an act of the legislature enacted pursuant to article twelve of the constitution on an emergency message from the governor and by the concurrent action of two-thirds of the members of the legislature.

The Act prescribes that each new law must be submitted to a referendum and receive a majority vote, if it

1. Abolishes a branch of the local legislative body, or changes the form or composition of such body, or changes the voting power of any member thereof;

2. Changes the veto power of the mayor;

3. Changes the law of succession to the mayoralty;

4. Abolishes an elective office, or changes the method of removing an elective officer, or changes the term of or reduces the salary of an elective officer during his term of office;

5. Abolishes, transfers or curtails any power of an elective city officer, except for the purpose of transferring the powers or duties of one branch of the local legislative body to the other, or to some other local authority;

6. Creates a new elective office;

7 Changes a provision of law relating to public utility franchises;

8. Changes a provision of law relating to the alienation or leasing of city property;

9. Changes a provision of law relating to the membership or terms of office of the civil service commission of the city;

10. Reduces the salary of a city officer or employee which has been fixed by a state statute, and approved by the vote of the qualified electors of such city;

11. Provides a new charter for such city.

Within sixty days after the adoption by the local legislative body, upon the petition of 15 per cent. of

the voters, a local law must be submitted to a referendum at the next general election if it dispenses with a provision of law requiring a public notice or hearing as a condition precedent to official action, or changes a provision of law relating to public bidding, purchases or contracts; assessments for taxation or special assessments of property for improvements, or the exercise of the power of condemnation; or relating to the authorization of city bonds; or the auditing of the city's accounts; or relating to the maintenance or administration of a pension fund of the police or fire department.

The local legislative body, fifteen days prior to an election at which any local law is to voted upon by the people, may reconsider its action thereon and repeal such local law, whereupon the proposition for its approval shall not be submitted to the voters.

The local legislative body is empowered to adopt a local law providing for the submission to the electors at a general city election or at a special city election of the question: "Shall there be a Commission to draft a new City charter?" The Municipal Assembly shall fix the make up of such commission which must draft a new Charter within the limitations prescribed for local laws which the City may adopt. This Charter becomes effective when approved by the affirmative vote of a majority of the qualified electors voting thereon at a special City election held on not less than ninety days' notice.

The Municipal Assembly shall pass no law if it

1. Removes or raises any limitation of law on the amount in which the city may become indebted, or on the amount to be raised in any one year by tax for city purposes, or for any city purpose;

2. Removes restriction of law as to issuing bonds or other evidences of debt;

3. Applies to or affects the maintenance, support or administration of the educational system in such city, or a teachers' pension or retirement system in such city;

4. Changes the number or term of office of the members of the county board of supervisors chosen as such in such city under the official title of supervisors;

5. Applies to or affects any provision of the labor law or the workmen's compensation law.

6. Changes any provision of the tenement house law;

7. Applies to or affects existing powers of the State Comptroller in relation to auditing or examining municipal accounts or prescribing forms of municipal accounting;

8. Applies to or affects any provision of law providing for regulation or elimination of railroad crossings at grade or terminal facilities within the city;

9. Applies to or affects any provision of law relating to the property, affairs or government of a county or counties.

The powers and rights of cities are not curtailed unless by express provision. The Act does not restrict legislative power to regulate matters of State concern as distinguished from matters relating to the property, affairs, or governing of cities. The courts are directed to construe the Act liberally and the powers which it grants are in addition to all other powers granted to cities by other laws.

NEW YORK CITY HOME RULE TRANSIT LAW.

The Home Rule Transit Law for New York, approved May 2, and now Chapter 573 of the Laws of 1924, went into effect on July 1, 1924.

The new law adds Article 8 to the Public Service Commission Law, providing for the establishment of a Board of Transportation in New York City, consisting of three members, all residents of the city, to be appointed by the Mayor for six-year terms, at salaries to be fixed by the Board of Estimate and Apportionment. All salaries and expenses of the Board are to be borne by the City. The Mayor is given power to remove, after a hearing, members of the Board for inefficiency, misconduct in office, or neglect of duty.

The power of supervision and regulation of existing rapid transit lines and the administration of the dual subway contracts, and the authority to adopt a plan of readjustment of existing lines, is retained by the Transit Commission, but the new Board is given jurisdiction in the construction of the incompleted parts of the dual system and any additions or extensions.

Upon adoption of any route and general plan of construction of any rapid transit railroad the Board of Transportation shall file in the office of the Board of Estimate on submission of such route and general plan of construction for approval, a statement signed by at least two members of the Board and countersigned by its chief engineer, showing in detail the estimated cost of construction and equipment of such railroad and the estimated time required for the completion of construction and equipment, together with an estimate by years of the prospective results of operation over a term of ten years from the beginning of operation thereof.

With respect to municipal operation the act provides that if the Board shall undertake municipal operation of any road the rate of fare shall be five cents for the first three years; that if the aggregate revenues from such operation during the third year are insufficient to pay operating expenses, expenses of maintenance and repairs, contributions to a depreciation fund, interest actually payable by city on debt incurred, and contributions to sinking fund to amortize and retire the debt incurred, the Board must within sixty days readjust the rate of fare so as to produce an annual income sufficient to make such payments.

The act authorizes the Board of Estimate to provide the necessary working capital with which to begin municipal operation and also to provide funds to meet any deficit in operating revenues during the three year initial period.

The Board must maintain a system of accounts showing the cost of all property used in operation, the source of funds used in acquiring such property, the operating revenue and other income, maintenance expenses, interest, amortization, depreciation and all other charges against earnings. Revenue derived from all sources of income must be held separate and apart from all other funds, as an operating fund.

The Board must render an itemized report each month to the Board of Estimate, showing the result of municipal operation.

Provision is made for transferring to the new Board such records of the Transit Commission, and employees and equipment as are necessary.

"L" railroad removal—City of New York authorized to acquire through condemnation proceedings the right to remove the (Sixth Avenue) elevated railroad from Trinity Place, Murray Street, West Broadway, Third Street, Sixth Avenue and 53d Street, and from Sixth Avenue between 53d and 59th Streets.

OTHER NEW YORK CITY SPECIAL LEGISLATION.

Beaches, Protection of Public—State authorized to convey to City certain land under water in Atlantic Ocean from westernmost point of Coney Island to westerly boundary line of Beach Second Street, Far Rockaway. (Repeals Chapter 864, Laws of 1923.)

Board of Education, claims against—Heretofore certified as invalid but, after hearing, found equitable for city to pay or compromise; discretionary power given Board of Estimate to inquire into, hear and determine.

Hospitals, and Garbage and Rubbish Disposal Plants—Use of proceeds from sale of City Corporate stock and serial bonds permitted for alterations, additions, improvements, erection and equipment.

Insanity—In cases where a person accused of crime or misdemeanor is suspected of being insane and does not ask for a hearing, the power of a Judge to appoint a commission in lunacy is taken away; such person must be sent to Bellevue Hospital or Kings County Hospital for observation by trained alienists of the staff. Their report, submitted to the Judge involved, is final as far as the discretion of the Judge is concerned. Either he must then commit the accused to an institution or try him, as sane, for the crime of which he is accused.

Newtown Creek Improvement—Commissioners of Land Office authorized to convey to City all right, title and interest of State in and to certain lands under water in Newtown Creek in order to carry out improvements to navigation provided for in Laws of 1919.

Salary Increases—Manhattan District Attorney from $15,000 to $20,000; Commissioners of Jurors in Brooklyn and Manhattan, to $8,000; Surrogate of Bronx County to equal that paid to New York County Surrogate; Bronx County District Attorney, to $15,000; official interpreters in First Judicial District to $4,000; Commissioners of Jurors, Richmond and Bronx Counties, $8,000.

Surrogate's Court (in New York County) fees increased. Fee for filing a will for safe keeping pursuant to Section 30 of the Decedent Estate Law, fixed at $5.

Zoning Law—Violations made misdemeanors punishable by fine or imprisonment or both.

NEW YORK STATE LEGISLATURE.

(Assembles every year on first Wednesday in January.)

SENATE.

MAYORS OF THE CITY OF NEW YORK.

Before the Revolution the Mayor was appointed by the Governor of the Province; and from 1784 to 1820 by the Appointing Board of the State of New York, of which the Governor was the chief member. From 1820 to the amendment of the Charter, in 1830, the Mayor was appointed by the Common Council. In 1898 the term of the first Mayor of Greater New York (Van Wyck) began.

Government of the City of New York.

(As of November 30, 1924.)

Mayor (City Hall)—John F. Hylan ($25,000). *Assistant to the Mayor*—Joseph Haag ($9,000). *Secretary*—John F. Sinnott ($7,000). *Executive Secretary*—Augustin Kelly ($5,300). *Assistant Secretary*—Francis W. Rokus ($5,300). *Chief Clerk*—J. J. Glennon ($4,500).

The Mayor is elected for four years, and is Chairman, *ex-officio*, of the Armory Board, the Municipal Art Commission, the Banking Commission, the Board of City Record, the Board of Estimate and Apportionment (three votes), and the Sinking Fund Commission.

(See also New York City Home Rule Act, and New York City Home Rule Transit Law; consult the Index for page references.)

He is a member, *ex-officio*, of the Charter Revision Commission and of the Boards of Managers or trustees of the American Museum of Natural History, the Brooklyn Institute of Arts and Sciences, the Brooklyn Public Library, the Metropolitan Museum of Art, the New York Public Library, the New York Botanical Garden, the New York Zoological Society, and the Queens Borough Public Library.

The Mayor is removable by the Governor only on charges after a hearing. In case of his death, resignation or removal, the order of succession (pending next general election in November of that year) is: President of the Board of Aldermen, Vice Chairman of the Board of Aldermen, Chairman of the Finance Committee of the Board of Aldermen.

Accounts—Commissioner of.

(Municipal Building, Manhattan.)

Commissioner—David Hirshfield ($10,000). *Deputies*—H. Klein ($5,500) and W. D. Loudoun ($5,500).

Board of Aldermen.

(City Hall.)

President—Murray Hulbert, D., ($15,000). *City Clerk*—Michael J. Cruise ($10,000).

The President of the Board of Aldermen is elected for four years, and is a member, *ex-officio*, of the Armory Board, the Board of Estimate and Apportionment (three votes), the Sinking Fund Commission, and the New York and Queens Public Libraries.

He is removable by the Governor on charges after a hearing. The order of succession is Vice Chairman, Chairman of the Finance Committee.

The City Clerk, term six years, is appointed by the Board of Aldermen, and is removable on charges by a two-thirds vote of the board.

Members ($3,500 each), by Aldermanic Districts.

Manhattan—1, M. F. Tanahey, D.; 2, M. Graubard, A.; 3, E. J. Sullivan, D.; 4, Jos. W. Stand, D.; 5, C. A. McManus, D.; 6, F. J. Dotzler, R.; 7, W. F. Quinn, R.; 8, L. J. Wronker, D.; 9, D. J. Mahon, D.; 10, L. F. Cardani, R.; 11, T. O'Reilly, D.; 12, W. T. Collins, D.; 13, P. S. Dowd, D.; 14, J. R. O'Leary, D.; 15, B. M. Falconer, R.; 16, E. Cassidy, D.; 17, W. Solomon, D.; 18, T. J. Sullivan, D.; 19, M. J. Healy, D.; 20, E. T. Kelly, D.; 21, J. W. Smith, D.; 22, J. B. Henrich, D.; 23, J. R. Smith, D.; 24, C. J. McGillick, D.

Bronx—25, E. W. Curley, D.; 26, A. G. Halberstadt, D.; 27, J. M. Fitzpatrick, D.; 28, W. P. Sullivan, D.; 29, P. Donovan, D.; 30, E. J. Walsh, D.; 31, R. Hannoch, D.; 32, A. J. Williams, D.

Brooklyn—33, P. J. McCann, D.; 34, F. D. McGarey, D.; 35, J. W. Sullivan, D.; 36, F. A. Cunningham, D.; 37, J. J. Molen, D.; 38, G. J. Joyce, D.; 39, T. J. Cox, D.; 40, C. W. Dunn, D.; 41, J. F. Kiernan, D.; 42, W. L. Weber, D.; 43, J. J. Campbell, D.; 44, J. J. Keller, R.; 45, J. B. Allen, D.; 46, Howard Fenn, D.; 47, G. W. Friel, D.; 48, John Wirth, R.; 49, Harry Meyer, R.; 50, Isaac Frank, D.; 51, J. J. McCusker, D.; 52, P. J. McGuinness, D.; 53, G. Hilkemeier, D.; 54, S. A. Rudd, D.; 55, L. J. Zettler, D.; 56, J. J. Morris, D.

Queens—75, J. J. Lenihan, D.; 58, G. U. Harvey, R.; 59, J. M. Murtha, D.; 60, F. J. Schmitz, D.; 61, B. Schwab, D.; 62, S. J. Burden, D.

Richmond—63, J. J. Corcoran, D.; 64, R. E. Kaltonmeier, D.; 65, E. J. Atwell, D.

The Aldermen are elected for two years. A member is removable by a majority of the board, which elects his successor, of the same political party, to serve the balance of the year, the place being filled at the November election.

An Alderman must be a United States citizen and a resident of the city, but he need not live in the district he represents.

Borough Officers.

(City Hall, Manhattan; others, Borough Halls.)

Manhattan—*President of the Borough*—Julius Miller ($15,000); *Commissioner of Public Works*—Joseph Johnson ($10,000); *Assistant Commissioner of Public Works*—James J. Meyer: *Secretary*—Solomon Goldenkranz; *Acting Chief Clerk*—Joseph A. Boylan; *Auditor*—Andrew S. Corbett; *Chief Engineer*—T. F. Keller; *Acting Supt. of Docks*—L. H. Harrison.

Education—Department of.
(Manhattan, Park Ave. and 59th St.; Brooklyn, 131 Lvingston St.; Plaza 5580.)

President—Geo. J. Ryan, of Queens. *Vice President*—M. S. Stern, Manhattan. *Other members of the Board*—Mrs. Margaret McAleenan, Manhattan; William J Weber, Bronx; Dr. J. A. Ferguson, Arthur S. Somers, Brooklyn; Ralph R. McKee, S. I. *Secretary*—Jos. Miller jr. *Assistant Secretaries*—Chas. Herr and Elizabeth V. Bennett. *Chief Clerk*—Thomas A. Dillon. *Supt. of School Buildings*—William H. Gompert. *Supt. of School Supplies*—Patrick Jones. *Supt. of Schools*—William J. O'Shea. *Auditor*—Frederick D. Chambers. *Director of Attendance*—John W. Davis; *Supt. of Plant Operation*—R. W. Rodman.

The Board of Education consists of seven members appointed for seven years each by the Mayor, and removable by the Mayor on charges after a hearing. They serve without pay.

The President of the Board is a member, *ex-officio*, of the Teachers' Retirement Board, the Boards of Trustees of Hunter and City Colleges, and the Board of Managers of the New York Botanical Garden.

There are forty-eight *Local School Boards*, with five members in each, serving five years each (no salary), and appointed by the respective Borough Presidents. They look after the schools in a detailed way, subject to the Board of Education.

The *Board of Superintendents* consists of the Superintendent of Schools and a number of Associate Superintendents.

The Superintendent of Schools is the chief executive officer of the Department of Education. He and his associates are appointed for six years by the Board of Education.

The Board of Superintendents has a force of *District Superintendents* which covers the city by districts. They are appointed to serve permanently.

Elections—Board of.
(General and Manhattan, Municipal Building; Bronx, 442 East 149th St.; Brooklyn, 26 Court St.; Queens, 10 Astoria Ave., L. I. City; Richmond, Borough Hall, New Brighton.

President—John R. Voorhis. *Other members*—James Kane, Jacob A. Livingston. Members' salary, each, $8.000. *Secretary*—Chas. E Heydt. *Chief Clerk*—S. Howard Cohen. *Dep. Chief Clerk*—Geo. W. Conklin.

The members of the Board of Elections are appointed for two years by the Board of Aldermen. It is, by law, a bi-partisan body.

Estimate—Board of.
Headquarters—Municipal Building. Consists of Mayor, with three votes; Comptroller, three votes; Pres. Board of Aldermen, three votes; Pres. Borough of Manhattan, two votes; Pres. Borough of Brooklyn, two votes; Presidents Boroughs of Bronx, Queens and Richmond, one vote each. *Secretary*—Peter J. McGowan.

The Board of Estimate prepares the yearly city budget for the Board of Aldermen, which can reduce, but not increase, the budget. The Board of Estimate has power to grant franchises and also to issue bonds for public improvements.

Finance—Department of.
Headquarters—Municipal Building.

City Comptroller—Charles L. Craig ($25,000). *Deputy Comptrollers*—Charles F. Kerrigan, Arthur J. Philbin and Frank J. Prial ($10,000 each). *Secretary to the Department*—Philip D. Hoyt ($7,500). *Chief Auditor*—David E. Kemlo ($6,500). *Chief Accountant*—Duncan MacInnis ($8,000). *Chief Clerk*—Valentine F. Keller ($4,100). *Receiver of Taxes*—Eugene F. McLaughlin ($5,500). *Collector of Assessments and Arrears*—John J. Ryan ($5,300). *Collector of City Revenue*—Katharine C. Gallagher ($4,500). *Receivers of Taxes, Offices*—Manhattan, Municipal Building; Bronx, 177th St. and Arthur Ave.; Brooklyn, 503 Fulton St.; Queens, 5 Court Square, L. I. City; Richmond, Borough Hall, St. George. *Assessments and Arrears Offices*—Same as Receivers of Taxes.

City Chamberlain—Philip Berolzheimer ($12,000), Municipal Building.

The City Comptroller is, *ex-officio*, a member of the Armory Board, the Banking Commission, the Charter Revision Commission, the Board of City Record, the Board of Estimate and Apportionment (three votes) Municipal Assembly, Board of Estimate branch; the Board of Trustees of Hunter College, the Teachers' Retirement Board, Chairman Board of Revision of Assessments, the Sinking Fund Commission, and of the trustees of the American Museum of Natural History, the Metropolitan Museum of Art, and the New York, Brooklyn and Queens Public Libraries.

The Comptroller is removable by the Governor on charges after a hearing. His successor, appointed by the Mayor, serves until end of the year, a new successor being meantime voted for in November.

The City Chamberlain is, *ex-officio*, a member of the Banking Commission and the Sinking Fund Commission.

Fire Department.
(Manhattan, Munic. Bldg.; Brooklyn, 365 Jay St.)

Commissioner—Thomas J. Drennan ($10,000). *Deputies*—Manhattan, Bronx and Richmond, Joseph M. Hannon; Brooklyn, Wm. F. Thompson. *Fire Chief*—John Kenlon. *Deputy Chief*—Brooklyn and Queens, John O'Hara. *Chief Fire Marshal*—Thomas P. Brophy. *Deputy Fire Marshal*—John P. Prial, *Secretary to the Department*—James A. Mackey.

Health—Department of.
(Manhattan, 505 Pearl St., general headquarters; Bronx, 464 E. Tremont Ave.; Brooklyn, Willoughby and Fleet Sts.; Queens, 440 Fulton St., Jamaica; Richmond, 514 Bay St., Stapleton.)

The figures from 1898 include the five boroughs. Number of fires from 1866 to 1897, inclusive, 72,891; total loss from 1866 to 1897, inclusive, $128,116,733; average annual loss per fire, from 1866 to 1897 inclusive, $1,757.65.

FIRES IN LONDON.

The annual report of the London Fire Brigade for 1922 shows that there were in that year 4,820 fires, involving 89 deaths and property loss of $3,549,000.

In London there are very few frame structures, most of the houses, stores, lofts and other buildings being of stone or brick, or other non-inflammable materials.

In the City of New York there are several thousand frame houses, stores and stables.

WOODROW WILSON FOUNDATION.

The awarding of the Nobel Peace Prize in 1920 to Woodrow Wilson gave Mrs. Charles E. Simonson and Mrs. Charles L. Tiffany, both of New York, the idea that a similar foundation should be established in this country in recognition of the national and international services of Mr. Wilson, twice President of the United States, who "furthered the cause of human freedom and was instrumental in pointing out effective methods for the co-operation of the liberal forces of mankind throughout the world."

The Foundation was actually established Dec. 23, 1920, at Mrs. Tiffany's home in New York. At a meeting held March 15, 1921, at the Hotel Biltmore, the organization of the Foundation was completed.

The first appeal for funds was made Jan. 16, 1922, and at a meeting held in New York City on Dec. 27, 1922, when the permanent organization of the Foundation was accomplished, it was announced that the contributions to the proposed $1,000,000 fund at that time amounted to over $800,000.

The fund was turned over on the date mentioned to the trustees of the Foundation, and on the following day (Dec. 28), the former President's sixty-sixth birthday, a committee was sent to Washington to notify Mr. Wilson of the actual creation of the Foundation in his honor.

Lord Robert Cecil was awarded, late in 1924, the first annual prize of $25,000 offered by the Foundation, for his efforts toward international peace.

An award from the income of the Foundation will be made from time to time by a nationally constituted committee to the individual or group that has rendered within a specified period meritorious service to democracy, public welfare, liberal thought or peace through justice.

The personnel of the Board of Trustees which has charge of the administration of the Foundation is: Edwin A. Alderman, President of the University of Virginia; Gen. Tasker H. Bliss, former Chief of Staff, U. S. Army, Washington, D. C.; Nornam H. Davis, New York; Samuel Gompers, Washington, D. C.; Hamilton Holt, New York; Ernest M Hopkins, President of Dartmouth College; Dr. William J. Mayo, Rochester, Monn.; Henry Morgenthau, New York; George W. Norris, Philadelphia; Franklin D. Roosevelt, New York; Prof. William B. Scott, Princeton, N. J.; May Ladd Simonson, Staten Island, N. Y.; Katrina Ely Tiffany, New York; William Allen White, Emporia, Kan.; Mary E. Woolley, President Mount Holyoke College.

Officers: Norman H. Davis, President; Tasker H. Bliss, Vice President; Mary E. Woolley, Vice President; Katrina Ely Tiffany, Secretary; Katherine C. Blackburn, Assistant Secretary; Central Union Trust Company of New York, Treasurer.

The Jury of Award for 1924-1925 consists of: Dr. Charles W. Eliot, Chairman; Florence E. Allen, James R. Angell, Mrs. Dorothy Canfield Fisher, Raymond B. Fosdick, David F. Houston, Thomas W. Lamont, Henry Noble MacCracken, Ida M. Tarbell.

The National Headquarters of the Foundation are at 17 E. 42d Street, New York City.

PRINCIPAL CLUBS IN NEW YORK CITY.

(The date of organization is in parentheses; other figures, where given, are of membership.)

Aldine (1888), 200 Fifth Ave.; 750; Pres., Geo. V. Taylor; Sec., Ralph Goddard.

Alpha Delta Phi (1832), 136 W. 44th St., N. Y. C.; Pres., Dr. Rush Rhees; Sec., W. Earl Smith.

Arkwright (1893), 320 Broadway, N. Y. C.; 1,000; Pres., S. H. Brice; Sec., Owen Coogan.

Army and Navy Club of America (1885), 112 Central Park South; 3,000; Pres., Col. F. O. Brown; Sec., Lieut. Col. L. A. Sigaud.

Authors' (1882), Carnegie Hall, 56th St. at Seventh Ave., N. Y. C.; 267; Sec., Ernest Ingersoll.

Automobile Club of America (1899), 12 E. 53d St., N. Y. C.; 4,700; Pres., Arthur Woods; Sec., Elmer Thompson.

Bankers' (1915), 120 Broadway; 3,200; Pres., Albert H. Wiggin; Sec., Alfred C. Andrews.

Barnard (1894), Carnegie Bldg.; 500; Pres., Walter L. Bogert; Sec., Miss Louise Tibbetts, Hotel Chelsea, W. 23d St., N. Y. C.

Brook (1903), 7 E. 40th St., N. Y. C.; 350, Pres., Percy R. Pyne, 2d; Sec., Frederic S. Allen.

Brooklyn Engineers' (1896), 117 Remsen St., B'klyn, N. Y.; 500; Sec., Joseph Strachan.

Caledonian (1856), 846 Seventh Ave., N. Y. C.; 675; Chief, Wm. Vance; Sec., Murdoch MacPherson.

Calumet (1879), 12 W. 56th St., N. Y. C.; 375; Sec., E. Pierpont Hicks.

Camera (1896), 121 W. 68th St., N. Y. C.; 240; Pres., J. H. McKinley; Sec., W. N. Capen.

Catholic (1871), 120 Central Park South, N. Y. C.; 1,600; Pres., Martin Conboy; Sec., John E. Dounelly.

Century Association (1847), 7 W. 43d St.; 1,300; Pres., Elihu Root; Sec., A. D. Noyes.

Chemists' (1898), 50 E. 41st St., N. Y. C.; 1,496; Pres., F. J. Metzger; Sec., H. G. Sidebottom.

City (1892), 55 W. 44th St., N. Y. C.; 2,000; Pres., Nelson S. Spencer; Sec., Wm. F. Howes.

City Athletic (1908), 50 W. 54th St., N. Y. C.; 832; Pres., S. R. Guggenheim; Sec., Carl W. Stern.

Clergy (1915), 200 Fifth Ave.; 500; Sec., Walter Laidlaw.

Colony (1903), 564 Park Ave., N. Y. C.; 2,008; Pres., Mrs. Seymour L. Cromwell; Sec., Mrs. Courtlandt D. Barnes.

Columbia University (1901), 4 W. 43d St.; 2,300; Pres., M. L Cornell; Sec., W. K. Watkins.

Cornell (1889), 245 Madison Ave., N. Y. C.; 2,000; Pres., R. H. Shreve; Sec., J. Dugald White.

Crescent Athletic (1886), cor. Clinton and Pierrepont Sts., B'klyn, N. Y.; 2,400; Pres., Hon. James C. Cropsey; Sec., Augustin S. Hart.

Delta Kappa Epsilon (1916), 30 W. 44th St., N. Y. C., 2,000; Pres., James J. Lee; Sec., E. C. Huntington.

Engineers' (1888), 32 W. 40th St., N. Y. C.; 2,400; Pres., Alfred W. Kiddle: Sec., Samuel W. Trawick.

Friars' (1904), 110 W. 48th St.; 1,800, Abbot, George M. Cohan, Sec., J. Frank Stephens.

Green Room Club (1902), 19 W. 48th St., N. Y. C.; 370, "Prompter," S. Jay Kaufman; Sec., Hamilton Smith.

Grolier (1884), 47 E. 60th St., N. Y. C.; 459; Pres., William B. Osgood Field; Sec., Walter Gilliss.

Hamilton (1882), 146 Remsen St., B'klyn, N. Y.; 600, Sec., Rufus D. W. Ewing.

Hardware (1892), 253 Broadway, N. Y. C.; 700; Pres., Julian W. Curtiss; Sec., Linus Keating.

Harmonie (1852), 4 E. 60th St., N. Y. C.; 850; Sec., Sidney Rossman.

Harvard (1865), 27 W. 44th St., N. Y. C.; 5,800; Pres., Thomas W. Slocum; Sec., John Elliott.

Interfraternity clubs, 22 E. 38th St.; in this building these Greek Letter Clubs have established themselves with club rooms or offices—Alpha Tau Omega, Chi Phi, Chi Psi, Delta Chi, Delta Phi, Delta Tau Delta, Delta Upsilon, Kappa Alpha (Southern), Phi Delta Theta, Phi Kappa Sigma, Phi Sigma Kappa, Pi Kappa Alpha, Sigma Alpha Epsilon, Sigma Chi, Sigma Phi and Theta Xi.

Jockey (1894), 70 W. 40th St.; 50; Chairman, August Belmont; Sec., H. K. Knapp.

Knickerbocker (1871), 2 E. 62d St.; 2,900; Pres., W. Butler Duncan; Sec., R. L. Redmond.

Lambs' (1874), 130 W. 44th St., N. Y. C.; 1,600; Shepherd, Thomas Meighan; Sec., Gene Buck.

Lawyers' (1887), 115 Broadway, N. Y. C.; 1,400; Pres., Robert C. Morris; Sec., Richard G. Babcock.

Lotos (1870), 110 W. 57th St., N. Y. C.; 1,625; Pres., Dr. Nicholas Murray Butler; Sec., James F. Allen.

Machinery (1907), Hudson Terminal, 50 Church St.; 1,300; Pres., W. P. Bowman; Sec., E. A. Stillman.

Manhattan (1865), 32 E. 26th St., N. Y. C.; 1,037; Pres., Joseph Rowan; Sec., Albert Tilt.

Masonic (1894), 28 W. 30th St., N. Y. C.; 600; Pres., W. H. Miller; Sec., G. W. Gale.

Manhattan Single Tax (1889), 226 W. 47th St.; 400; Pres., James R. Brown; Sec., Howard Underhill.

Metropolis (1879), 105 W. 57th St., N. Y. C.; 725; Pres., D. Emil Klein; Sec., Irving S. Dorf.

Metropolitan (1891), 1 E. 60th St., N. Y. C.; 1,200; Pres., Frank K. Sturgis; Sec., Percy R. Pyne.

Montauk (1889), 25 Eighth Ave., B'klyn, N. Y.; 600; Pres., Wm. H English; Sec., Arthur E. Beggs.

National Arts (1898), 15 Gramercy Park; 1,700; Pres., John G. Agar; Sec., John Clyde Oswald.

National Democratic (1891), 233 Madison Ave., N. Y. C.; 1,400; Pres., Thomas E. Ruch; Sec., Francis J. MacIntyre.

National Republican (1886), 54 W. 40th St.; 2,000; Pres., Wm. M. Calder; Sec., James P. Callender.

Navy Club of N. Y. (1917), 93 Park Ave., N. Y. C.; Mgr., L. L. Holmes; Sec., Mott B. Schmidt.

New York Yacht (1844), 37 W. 44th St.; 2,000; Commodore, George Nichols; Sec., G. A. Cormack.

Newspaper (1922), 133 W. 41st St., N. Y. C.; 1,100; Pres., Gene Fowler; Sec., Dr. W. E. Aughinbaugh.

New York (1845), 20 W. 40th St., N. Y. C.; 600; Pres., Anthony W. Morse; Sec., John J. Crawford.

New York Athletic (1868), 58 W. 59th St., N. Y. C.; 7,500; Pres., Arthur Teele; Sec., William L. Miller.

Nippon (1905), 161 W. 93d St., N. Y. C.; 330; Pres., H. Kashiwagi; Sec., A. M. Kashiwa.

Pen and Brush, 16 E. 10th St.; Pres., Miss Ida M. Tarbell.

Pennsylvania (1879), 35 W. 50th St., N. Y. C.; 762; Pres., William L. Saunders; Sec., Luther Martin jr.

Phi Gamma Delta (1886), 44 W. 44th St.; 800; Pres., H. W. Schaefer; Sec., W. M. Stevenson.

Players' (1888), 16 Gramercy Park, N. Y. C.; 885; Sec., Louis Evan Shipman.

Press (1872), 21 Spruce St., N. Y. C.; 900; Pres., Gavin D. High; Sec., Caleb H. Redfern.

Princeton (1899), 39 E. 39th St., N. Y. C.; 2,900; Pres., Walter E. Hope; Sec., S. G. Etherington.

Progress (1864), 1 W. 88th St., N. Y. C.; 600; Pres., Louis M. Hart; Sec., Louis Gans.

Racquet and Tennis (1875), 370 Park Ave.; 2,100; Pres., H. K. Knapp; Sec., Sherman Day.

Railroad (1872), Room 314, 26 Cortlandt St., N. Y. C.; 2,000; Sec., Harry D. Vought.

Reform (1888), 9 So. William St.; about 500; Pres., Bert Hanson; Sec., Robert Burns.

St. Nicholas (1876), 7 W. 44th St.; 400; Pres., F. B. Warfield; Sec., H. E. Atterbury.

Salmagundi (1871), 47 Fifth Ave., N. Y. C.; 900, Pres., W. Granville Smith; Sec., Alfred Lockwood Brown.

Soldiers and Sailors' (1921), 261 Madison Ave., N. Y. C.; Pres., Mrs. Francis Rogers; Sec., Miss Martha R. White.

Turn Verein (1850), 85th St. and Lexington Ave., N. Y. C.; 680; Speaker, Bernard B. Weiler; Sec., William Daniel.

Union (1836), Fifth Ave. and 51st St.; 1,435; Pres., J. Frederic Tams; Sec., Charles K. Beekman.

Union League (1863), 1 E. 39th St., N. Y. C.; 1,800; Sec., Lloyd Paul Stryker.

University (1865), Fifth Ave. and 54th St., N. Y. C.; 4,200; Pres., H. Hobart Porter; Sec., M. C. Fleming.

Uptown (1911), 17 E. 42d St. N. Y. C.; 770; Pres., John H. Towle; Sec., John G. Livingston.

Vatel (1913), 104 W. 47th St.; 1,600; Pres., Charles Scotto; Sec., Raymond Bachman.

West Side (1887), 270 W. 84th St.; 300; Pres., C. D. Edinburg; Sec., G. F. MacNaughton.

Whitehall (1912), Whitehall Bldg., N. Y. C.; 1,070; Pres., James Barber; Sec., F. M. Sanders.

Williams (1913), 24 E. 39th St.; 1,650; Pres., E. Dimon Bird; Sec., Merrill N. Gates.

Women's City (1915), 22 Park Ave., N. Y. C.; 2,500; Pres., Mrs. H. Edward Dreier; Sec., Miss Mary W. Dewson.

Women's University (1891) 106 E. 52d St., N. Y. C.; 1,100; Pres., Mrs. William L. Colt; Sec., Mrs. Earle K. Williams.

Yale (1899), 50 Vanderbilt Ave., N. Y. C.; 5,300; Pres., John W. Dixon; Sec., Livingston Platt.

POST OFFICES IN NEW YORK CITY.

The New York General Post Office, with jurisdiction over Manhattan and the Bronx, covers the two city blocks, 31st Street to 33rd Street, Eighth Avenue to Ninth Avenue. The main entrance is on Eighth Avenue. *Postmaster*—Edward M. Morgan. *Assistant Postmaster*—John J. Kiely. *Secretary to the Postmaster*—A. H Harbinson. In this building are located the Postal Inspectors, Railway Mail Service, and all the general offices.

The Pneumatic Tube Service was re-established on October 1, 1922. There are double and single lines connecting practically all the stations of the New York Post Office, and double lines connecting City Hall Station of this office with the Post Office at Brooklyn, New York.

There are nearly 28 miles of pneumatic tubes in operation, performing almost continuous service throughout the entire day. About 5,000,000 letters are transported daily in this way.

There are about 5,500,000 letters mailed from this city, and about 3,500,000 letters received here daily, making a total of 9,000,000 letters handled each day, or about 2,700,000,000 per annum.

Letter carriers in the employ of the N. Y. Post Office, as of Aug. 1, 1924, numbered 4,165.

The receipts of the N. Y. Post Office, by calendar years, have been as follows

YEAR.	Receipts.	YEAR.	Receipts.	YEAR.	Receipts.	YEAR.	Receipts.
1900	$ 9,869,689.69	1906	$17,820,884.98	1912	$25,747,233.00	1918	$41,408,226.27
1901	11,022,927.01	1907	18,850,290.90	1913	30,002,303.09	1919	46,110,885.65
1902	12,423,831.96	1908	18,808,782.20	1914	29,488,518.02	1920	53,300,868.45
1903	13,583,023.77	1909	21,173,756.65	1915	30,127,062.01	1921	52,275,935.48
1904	14,691,916.89	1910	23,116,455.52	1916	33,617,540.88	1922	56,016,592.84
1905	16,251,187.20	1911	24,190,109.65	1917	36,100,575.24	1923	60,863,119.64

The receipts of the N. Y. Post Office year ended June 30, 1924, totaled $61,701,232.92, as compared with $52,371,419.53 at Chicago, $16,708,412.75 at Philadelphia, $13,986,068.59 at Boston.

The old General Post Office, now called the City Hall Station, covers the triangular block bounded by Broadway, Park Row and Mail Street.

The Hudson Terminal Station, No. 30 Church Street, was re-established February 12, 1923.

The Grand Central Station, Lexington Avenue and 45th Street, handles the mail over the N. Y. Central and New Haven Railroads, in addition to local business in that district.

The Foreign Section is located in the Varick Street Station, between Beach and Laight Streets. There the foreign mails are handled.

There are forty-six "stations" or branches of the N. Y. Post Office not including those at Pelham and Pelham Manor.

The **Brooklyn General Post Office** covers the block bounded by Adams and Washington, Tillary and Johnson Streets. *Postmaster*, Albert B. W. Firmin; *Assistant Postmaster*, Peter J. Cleary. There are 1,700 letter carriers.

The receipts of the Brooklyn office in the calendar year 1923 were $6,981,668.19. There are 26 carrier stations.

TRANSIT TIME OF LETTER MAILS FROM NEW YORK CITY.

Barclay St. and Park Pl.; (17) Park Pl.; (18) Murray St.; (19) Warren St.; (20) Chambers St.; (21) Duane St.; (22) Jay St.; (23) Harrison St.; (24) Franklin St.; (25) North Moore St.; (26) Beach St.; (27) Hubert St.; (28) Laight St.; (29) Vestry St.; (31) Watts St.; (32) Canal St.; (33) Canal St.; (34) bet. Canal and Spring Sts.; (35) Spring St.; (36) bet. Spring and Charlton Sts.; (37) Charlton St.; (38) King St.; (39) West Houston St.; (40) Clarkson St.; (41) Leroy St.; (42) Morton St.; (44) Christopher St.; (45) West 10th St.; (46) Charles St.; (47) Perry St.; (48) West 11th St.; (49) Bank St.; (50) bet. Bethune and West 12th Sts.; (51) Jane St.; (52) Gansevoort St.; *4 Gansevoort Market piers*, at Grace St., Hewitt Ave. and Low Ave.; (53) Bloomfield St.; (54) West 13th St.; (56) West 14th St.; (57) West 15th St.; (58) bet. 16th and 17th Sts.; (59) West 18th St.; (60) bet. 19th and 20th Sts.; (61) West 21st St.; (62) West 22d St.; (63) West 23d St.; (64) West 24th St.; (65) West 25th St.; (66) West 26th St.; (67) West 27th St.; (68) West 28th St.; (69) West 29th St.; (70) West 30th St.; (71) West 31st St.; (72) West 32d St.; (73) West 33d St.; (74) West 34th St.; (75) West 35th St.; (76) West 36th St.; (77) West 37th St.; (78) West 38th St.; (79) West 39th St.; (80) West 40th St.; (81) West 41st St.; (83) West 43d St.; (84) West 44th St.; (86) West 46th St.; (87) West 47th St.; (88) West 48th St.; (89) West 49th St.; (91) West 51st St.; (92) West 52d St.; (94) West 54th St.; (95) West 55th St.; (96) West 56th St.; (97) West 57th St.; (98) West 58th St.; (99) West 59th St.; (B) West 63d St.; (D) West 64th St.; (E) West 65th St.; (F) West 66th St.; (G) bet. West 67th and 68th Sts.; (I) West 70th St.

The commercial piers on the Hudson, in Manhattan, north of 70th St., *all of which are city-owned*, but are not numbered, are at the following streets: West 79th, West 80th, West 95th, West 96th, 2 at West 97th; West 131st; West 132d; West 133d; West 134th; West 135th; West 153th; West 156th; West 157th, and West 158th Sts. The city's new pier at Dyckman St., is now open.

PIERS ON THE EAST RIVER.

Manhattan—EAST RIVER, (4) Broad St.; (*7 and 8*) Coenties Slip; (9) bet. Coenties Slip and Old Slip. (10) Old Slip; (11) Gouverneur Lane; (*12 and 13*) Wall St.; (14) Maiden Lane; (*15 and 16*) Burling Slip; (17) Fulton St.; (18) Beekman St.; (*19 and 20*) Peck Slip; (21) Dover St.; (*Pier at Roosevelt St.*); (22) James Slip; (25) Oliver St.; (*26 and 27*) Catharine St.; (28) bet. Catharine and Market Sts.; (29) Market St.; (*31 and 32*) Pike St.; (33) bet. Pike and Rutgers Sts.; (34) Rutgers St.; (35) bet. Rutgers and Jefferson Sts.; (35½) Jefferson St.; (36) bet. Jefferson and Clinton Sts.; (37) Clinton St.; (38) bet. Clinton and Montgomery Sts.; (39) Montgomery St.; (40) bet. Montgomery and Gouverneur Sts.; (41) Gouverneur St.; (*42-45*) bet. Gouverneur and Jackson Sts.; (*Old 55*) bet. Cherry and Grand Sts.; (*Old 56*) Broome St.; (*Old 57*) south of Delancey St.; (50) Rivington St.; (51) bet. Rivington and Stanton Sts.; (52) Stanton St.; (56) East 4th St.; (57) East 5th St.; (58) East 6th St.; (59) East 7th St.; (60) East 8th St.; (61) East 9th St.; (62) East 10th St.; (63) East 11th St.; (64) East 12th St.; (65) East 13th St.; (66) East 18th St.; (67) East 19th St.; (68) East 20th St.; (69) East 21st St.; (70) East 22d St.; (73) East 25th St.; (74) East 26th St.; (77) East 29th St.; (78) East 30th St.; (79) East 31st St.; (80) East 32d St.; (81) East 33d St.; (84) north of East 34th St.; (85) East 35th St.; (86) East 36th St.; (87) East 37th St.; (88) East 38th St.; (89) East 39th St.; (95) East 45th St.; (96) East 46th St.; (97) East 47th St.; (99) East 49th St.

North of East 49th St., Manhattan, on the East River, there are unnumbered piers, *all city-owned*, at the following streets: East 53d, East 60th, East 61st, East 62d, East 86th, East 90th, East 91st, East 94th, East 95th, East 96th, East 99th, and East 100th Sts.

Harlem River Piers—MANHATTAN SIDE, *East 102d St., East 103d St., East 104th St., East 107th St., East 108th St., East 109th St., East 110th St., East 112th St., East 116th St., bet. 116th and 117th Sts. East 117th St., East 118th St., East 119th St., East 120th St., East 126th St.*, south of East 128th St., East 128th St., 209th St., BRONX SIDE at *Fordham road.*

Bronx—EAST RIVER, all unnumbered, *East 132d St., East 136th St., East 138th St.*, 2 north of East 141st St.; west of Dupont St.; east of Dupont St., west of Truxton St.; east of Truxton St.; *at Tiffany St.*

PIERS IN BROOKLYN.

Brooklyn—SOUTH OF FULTON ST., on East River, *Fulton S.*; (4-12) on Furman St.; (15) Montague St.; (16-17-18) Joralemon St.; (22) Pacific St.; (24) Amity St.; (26) bet. Warren and Congress Sts.; (27) bet. Baltic and Warren Sts.; (29) Harrison St.; (30) bet. Irving and Sedgwick Sts.; (32) De-Graw St.; (33-35) India Wharf; (36-38) Pioneer St.; (30) Coffey St.; (40 and 43) Vandyke St.; (41) Beard St.; (44) bet. Conover and Ferris Sts.; (45) Conover St.; (46) bet. Conover and Van Brunt Sts.; (47) Richards St.; (47A) bet. Richards and Van Brunt Sts.; (48B) bet. Richards and Dwight Sts.; (1-3) Erie Basin; *at 27th St. and 25th St.; at 27th St.; at 30th St.; at 31st St.; at 32d St.; at 35th St.; at 36th St.*; Bush Terminal Piers, 39th to 50th Sts.; U. S. Government Piers, 57th to 62d St. at 64th St.; *at Bay Ridge Ave.*

Brooklyn—NORTH OF FULTON ST., (2 and 3) Dock St.; (1) south of Main St.; *at Main St.*; at Jay St.; 3 terminal piers from Jay to Gold Sts.; *at Gold St.*; at Hudson Ave.; *5 piers at Wallabout Market Basin; at South 5th, 3d, 2d, and 1st Sts.*; at North 1st St.; at North 3d St. and 4th St.; bet. North 4th and 5th Sts.; at North 6th, 7th, 8th and 9th Sts.; bet. North 9th and 10th Sts.; at North 10th and 11th Sts.; bet. North 11th and 12th Sts.; at North 12th St.

There are other private commercial piers at Quay, Oak, Milton, Kent, Java, India, Huron, Greene, Freeman and Eagle Sts. The *pier at Noble St.* is city-owned, as is that at *Whale Creek*, and at *Flatbush Ave.*

Queens Borough—All privately owned. Pigeon St., Flushing St.; 3d, 4th, 5th, 7th and 8th Sts.; Nott Ave., Jamaica Ave.; Whitestone Landing.

Staten Island—Piers 1 to 21, extending from Tompkinsville to Clifton, are privately owned, excepting *Piers 6-18*, inclusive, city owned. So are B. & O. R. R. piers 1 to 8, bet. St. George and New Brighton; also the Nicholas Ave. pier at Port Richmond. The city owns the *Harbor Road Pier*, Mariners' Harbor, and the *pier at Rossville.* The piers at Holland Hook and at Tottenville are privately owned.

The *city has built at Stapleton 12 piers*, 1,000 to 1,184 feet long, and 125 to 207 feet wide, four covered with two-story sheds, and eight with one-story sheds. One of the piers, *No. 7*, is reserved by the city for open wharfage, or general commercial use. The others, eleven in number, have been rented by the city for a term of years to various ocean steamship companies, the rent being fixed at 7½ per cent. a year on the construction cost, which was $20,000,000 for the 12 piers. They were commenced in 1920; and they furnish 26,000 linear feet of wharfage, and 1,800,000 square feet of pier space.

Piers A and New No. 1, at the Battery, North River, are the only stone piers in the city. The new city-owned pier at Roosevelt St., East River, Manhattan, is of concrete, and the city-owned pier at Barren Island, Jamaica Bay, rests on concrete piling.

THE PORT OF NEW YORK AUTHORITY.

(Headquarters, No. 11 Broadway, N Y. City.)

By chapter 154 of the Laws of New York and chapter 151 of the Laws of New Jersey, 1921, Commissioners from New York and New Jersey were authorized to sign the compact between the two States for the creation of the Port of New York District and the Port of New York Authority. This treaty, ratified by Congress and approved by the President, says:

"The Port Authority shall constitute a body, both corporate and politic, with full power and authority to purchase, construct, lease and, or, operate any terminal or transportation facility within said district; and to make charges for the use thereof; and for any of such purposes to own, hold, lease and, or, operate real or personal property, to borrow money and secure the same by bonds or by mortgages upon any property held or to be held by it."

The compact became effective May 6, 1921.

The six Commissioners, as of Oct. 15, 1924, were: New Jersey—*Chairman of the Joint Commission*, DeWitt Van Buskirk, Bayonne (1924); Julian A. Gregory, Orange (1928).

New York—Herbert K. Twitchell, Brooklyn (1929); Otto B. Shulof (1928); and John F. Galvin, N. Y. City (1926).

Chief Engineer, W. W. Drinker; *Consulting Engineer*, Gen. George W. Goethals; *Counsel*, Julius H. Cohen; *Secretary*, William Leary; *Assistant Secretary*, C. A. Ruhlman.

The Port Authority was authorized to recommend a comprehensive plan for the development of the Port of New York and such plan was approved by the Legislature of New Jersey on Feb. 20, 1922; of New York on Feb. 21, 1922; and by Congress in June, 1922. President Harding on July 1, 1922, signed the Congressional resolution.

Thus the Port Authority is the recognized agency of the two States and the Federal Government in developing the Port of New York.

The Port Authority seeks to co-ordinate and extend facilities on fundamental principles:

1—Terminal operations, so far as practicable, should be unified.

2—There should be consolidation of shipments at proper classification points so as to reduce duplication of effort and expenses.

3—There should be the most direct routing of all commodities, to avoid congestion and long truck hauls.

4—Terminals should be union stations, so far as practicable.

5—Existing facilities should so far as practicable, be adapted as integral parts of the new system.

6—Freight from all railroads should be brought to all parts of the port wherever practicable without cars breaking bulk, and this necessitates tunnel connection between New Jersey and Long Island, and tunnel or bridge connections between other parts of the port.

7—Improvement of channels.

8—Highways for motor truck traffic, laid out to permit efficient interrelation between terminals, piers and industrial establishments not equipped with railroad sidings; these highways to connect with existing or projected bridges, tunnels and ferries.

9—Definite methods for prompt temporary relief.

In 1924, New York State conferred upon the Port Authority the power of subpoena, in addition to the authorization to hold public hearings.

The Legislatures of the States authorized, in 1924, the building of bridges between Perth Amboy, New Jersey, and Tottenville, Staten Island, and between Elizabeth, New Jersey, and Howland Hook, Staten Island, voting $200,000 for preliminary surveys, the work thereafter to be financed by issue of Port Authority bonds, secured by tolls.

Agreement was reached with the carriers entering the port district, at a cost to them of $500,000, for effectuation of Belt Line 13, from Edgewater to Bayonne, in New Jersey; hearings were held with respect to the opening of the all-rail route into Long Island from the West, via Hell Gate Bridge, and the amplifying of facilities at the Long Island City floatbridges.

THE NEW YORK-NEW JERSEY VEHICULAR TUNNEL.

(Renamed Holland Tunnel, in memory of Chief Engineer Clifford M. Holland, who died Oct. 27, 1924.)

New York State Bridge and Tunnel Commission—Commissioners: Gen. George R. Dyer, Chairman; E. W. Bloomingdale, McDougall Hawkes, A. J. Shamberg, N. Y. City Commissioner of Plant and Structures, ex-officio; N. Y. State Engineer, ex-officio; Paul Windels, Counsel: Morris M. Frohlich, Secretary.

New Jersey Interstate Bridge and Tunnel Commission—Commissioners: Theodore Boettger, Chairman; Weller H. Noyes, Robert S. Sinclair, John F. Boyle, Thomas J. S. Barlow, John B. Kates, Isaac Ferris, Frank L. Suplee, Robert Carey, Counsel; John C. McEnroe, Secretary.

The States of New York and New Jersey enacted legislation providing for the construction, maintenance and operation of a tunnel, to be paid for by each State in equal parts, and directed the Commissions to enter into a treaty or contract to that end. The treaty was executed in final form on Dec. 30, 1919, and has been consented to by a resolution of Congress, approved by the President.

On Jan. 6, 1920, Chief Engineer Clifford M. Holland recommended the construction of twin tubes of 29 feet 6 inches external diameter, of cast-iron rings lined with concrete, providing for a 20-foot roadway in each which would be capable of caring for two lines of traffic, the north tube for westbound traffic and the south tube for eastbound. The tunnels recommended provide a narrow sidewalk for pedestrians, ventilation ducts and service conduits.

The Commission unanimously approved the recommendation of the Chief Engineer, and contract drawings and specifications were ordered prepared, and on Oct. 12, 1920, ground was broken at Canal Street Park on contract No. 1 for the construction of the ventilation shafts on Manhattan Island. These have been completed and form the working chambers for the under-river structure from the New York side.

The two (2) shields from the Manhattan side boring westward pass through this shaft as the threading of an eye of a needle. On the New Jersey side there are two (2) river ventilating shafts, one for each tube. The New Jersey river shaft caissons were partially erected at the same plant in Staten Island and are now sunk to grade.

The two (2) shields being driven from the Manhattan side of the river were erected in the shafts at Canal Street and Spring Street, respectively, and were driven out under these streets across West Street through the bulkhead and under the river through the shaft at the end of Pier 35.

The two (2) shields being driven eastward from New Jersey were erected in the land shafts, passed out under the river, through the river shafts and across the river to the rock near the New York pierhead line.

These two shields came so close together on Oct. 29, 1924, that a blast cleared away what rock was left, and then a workman crawled through the hole, uniting the two sections of the tunnel.

The shield in the south tunnel in New Jersey, driven westward under the Erie Railroad yards, has been erected in the south land shaft and has been driven westward a distance of 881 feet, finishing that section. The sixth shield was erected in the North New Jersey land shaft and is being driven outward underneath the Erie Railroad yard. This calls for a section 787 feet long and air vents will be completed here during December, 1924. 12,500 feet of tunnel have been built under the protection of these shields, completing approximately 95% of the tunnel. The time set for the completion of contracts 3 and 4 is May, 1925.

The actual work of boring the tunnel began on Oct. 26, 1922.

The Manhattan entrance is from a plaza on Broome Street, from Hudson to Varick Streets, and the exit is on the south side of Canal Street at Varick and Vestry Streets. The Jersey City entrance is from a plaza at 12th and Provost Streets, and the exit at 14th and Provost Streets.

The entire cost of construction, approximately $40,000,000, can be amortized on the estimated traffic at rate of tolls equal to the present ferry rates in about eleven years.

THE TUNNEL IN BRIEF.

Total length of proposed tunnels, 9,250 feet.

Outside diameter of circular subsurface tubes, 29 feet 6 inches.

Construction material, cast-iron rings lined with concrete.

Elevation of top of tube, 60 feet below mean low tide.

Maximum gradients on approaches at each end, 3½ per cent.

Width of roadway in each tunnel, 20 feet.

Ventilation—blower and exhaust fans at 4 shafts—2 on each side of river.

Estimated annual traffic on completion (both directions), 5,610,000 vehicles.

Total estimated annual capacity of tunnel (both directions), 15,800,000 vehicles.

THE HARBOR OF NEW YORK.

(Data by courtesy of the Chief of Engineers, U. S. Army.)

New York Bay is the principal entrance to New York City. It is divided into two parts, the Lower Bay and the Upper Bay, by the Narrows, a passage about five-eighths of a mile wide at its narrowest part. The entrance to the Lower Bay is between Sandy Hook on the south and Rockaway Point on the north and is about seven miles wide. The Upper Bay extends from the Narrows to the Battery. The principal entrance channels to the harbor of New York are the Ambrose Channel and the Main Ship-Bayside-Gedney Channel.

Ambrose Channel, which is the newer and more important channel, was completed April 17, 1914. It has a comparatively straight course in a northwesterly and then northerly direction from deep water in the ocean through the Lower Bay. It is 38,000 feet in length and 2,000 feet in width, and has a depth of 40 feet at mean low water. The mean range of tide is about 4.5 feet.

Main Ship-Bayside-Gedney Channel is the route formerly used by deep-draught vessels. It extends westward past Sandy Hook and then northward through the Lower Bay. It has a depth of 30 feet at mean low water and a nominal width of 1,000 feet, which has decreased in places to 500 feet; the natural channel of 40 feet depth and over varies in width from about 1,500 to about 3,000 feet. This channel is being straightened and widened in its narrowest section between Robbins Reef and Governor's Island by dredging. The widened channel will have a least depth of 40 feet and uniform width of 2,000 feet. Within the harbor there are several channels connecting the different sections. Bay Ridge, Red Hook and Buttermilk Channels lie in Gowanus Bay along the Brooklyn shore of the Upper Bay and form an easterly channel that extends from the Narrows to East River and is separated from the Main Ship Channel by a broad shoal off Gowanus Bay and by Governor's Island. By means of these channels the extensive terminals of the Bush Terminal Co. and of the New York Dock Co., as well as the municipal terminals in South Brooklyn, are directly accessible for large ships and have easy communication with the other sections of the inner harbor.

Bay Ridge Channel has a minimum depth of 35 feet at mean low water for its full width of 1,200 feet, and a through controlling depth of 38 feet for a middle width of about 800 feet. Red Hook Channel has a minimum depth of 35 feet at mean low water for its full width of 1,200 feet and a through controlling depth of 38 feet for a width of 800 feet except at its junction with Buttermilk Channel, where it is but 600 feet wide. The combined length of these channels is about 4.5 miles and the mean range of tide is about 4½ feet. Buttermilk Channel has a controlling depth of 28 feet at mean low water through a channel 800 feet wide. The mean range of tides is about 4.5 feet.

ABOUT MANHATTAN ISLAND.

Rivers, Creeks and Bays.—The Hudson (North) River empties into Upper New York Bay at the Battery, the southernmost point of Manhattan Island. The width of the river between established pierhead lines is 3,000 feet at the Battery and gradually decreases to 2,750 feet between Castle Point, N. J., and West 14th Street, New York City, and 2,725 feet opposite West 59th Street. A channel with a least depth of 40 feet at mean low water is available through the Hudson River on the New York side of the river up to Fort Washington Point and thence generally along the eastern shore to the northern boundary of the city. Along the Jersey City waterfront a channel connecting with deep water in the Upper Bay is 30 feet deep at mean low water and 800 feet wide. The depth along the Hoboken waterfront is 40 feet at mean low water for the entire width of the river. Above this along the Weehawken-Edgewater waterfront the channel is 26 feet deep at mean low water and 550 feet wide, connecting with the channel of 40 feet depth in about midstream opposite West 145th Street, New York City. The mean range of tide at the Battery is 4.4 feet.

The East River is a tidal strait about 16 miles long and from 600 to 4,000 feet wide, exclusive of bays and estuaries, and extends from the Battery in New York City to Throgs Neck at the head of Long Island Sound. The river separates the Boroughs of Manhattan and the Bronx from the Boroughs of Queens and Brooklyn.

Between the Battery and Governor's Island a channel of navigable width has been deepened to 34 feet at mean low water. The channel of 30 feet depth is about 600 feet wide. Thence to the Navy Yard the channel of 40 feet depth is 600 to 1,000 feet wide; thence to Long Island Sound there is a channel 30 feet deep at mean low water with least width of 550 feet, except at Hell Gate, where the safe depth is limited to 26 feet. A project is under way for deepening the entire channel to 40 feet from the Upper Bay to the Navy Yard and thence 35 feet to Long Island Sound. The mean range of tide in the East River is 4.4 feet at the Battery, 4 feet at the Brooklyn Navy Yard and 6.6 feet at the east entrance to Hell Gate.

Harlem River and Spuyten Duyvil Creek together form a waterway about 8 miles in length, which extends from the East River to the Hudson River and separates the Borough of Manhattan from the Borough of the Bronx. The East River entrance to the Harlem River is about 8¼ miles by water northeast of the Battery, and the Hudson River entrance to Spuyten Duyvil Creek is about 13½ miles by water north of the Battery. The improved channel in Harlem River has a width of 150 to 400 feet and a depth of 15 feet at mean low water, except at Macombs Dam Bridge, where ledge rock through the west draw limits the depth to 12 feet at mean low water and through the east draw to 11 feet at mean low water for a width of about 100 feet.

Bronx River is a short and narrow stream that empties into a shallow bay or estuary on the East River at Hunts Point, about 11 miles northeast of the Battery. The navigable portion of the river consists of a channel extending from its mouth to a dam at East 177th Street. This channel is about 2½ miles long and from about 50 to 300 feet wide and has a depth of 10 feet at mean low water and a width of 100 feet in the lower section extending from the East River up to Watson Avenue, about 1,000 feet below Westchester Avenue Bridge. Above this to the gas works at East 173d Street the channel is 50 feet wide and 4 feet deep at mean low water. The mean range of tide in the Bronx River is about 7 feet in the estuary and 6 feet at the dam.

Westchester Creek is a small stream lying wholly within the limits of the City of New York. This stream extends northward from an estuary in the north shore of East River about 14 miles northeast of the Battery. The estuary is about 1 mile long and from 500 to 3,000 feet wide. The channel is 8 feet deep at mean low water and 100 feet wide across the estuary, thence reducing in width to 80 feet, and in the upper portion above Unionport it is 60 feet wide. The mean range of tides is 6.8 feet.

Eastchester Creek is a shallow stream that empties into East Chester Bay on the north shore of Long Island Sound about 12 miles west of the Connecticut State line and about 21 miles northeast of the Battery. The lower two miles of the navigable portion of this stream lie wholly within the limits of the City of New York. The available depth in the channel is 5 feet at mean low water or 12 feet at mean high water up to the head of the improvement, about 300 feet above Fulton Avenue.

Flushing Bay is on the north shore of Long Island, about 12 miles from the Battery. The bay is about 1 mile wide and 2 miles long. Flushing Creek, which flows into the head of the bay, is a tidal stream navigable for a distance of about 3.5 miles from its mouth. The length of channel under improvement extends from the East River through the bay and up the creek to the upper Long Island railroad bridge, about five-eighths of a mile above the highway bridge at Jackson Avenue, Flushing, a total length of about 3 miles. The available mean low water depth up to the bridge at Jackson Avenue is 8 feet; above this to the upper railroad bridge it is 7 feet. The mean range of the tide is about 7.1 feet.

ON THE BROOKLYN SIDE.

Newtown Creek is the inlet of the East River that separates for a distance of about 4 miles the Boroughs of Queens and Brooklyn. Newtown Creek has a width of 150 feet and a mean low water depth of 20 feet up to Hooson Avenue, 1,000 feet above Meeker Avenue Bridge; above this to Metropolitan Avenue the depth is 14 feet and width 125 feet. A channel 20 feet deep has been dredged in Dutch Kills, a tributary entering the creek from the north about one-half mile above Vernon Avenue Bridge. The total length of navigable channel in the creek is about 5 miles, and in the Kills about one-half mile. The mean range of tide is about 4 feet.

Wallabout Channel is a channel in Wallabout Bay, an inlet of the East River adjacent to the United States Navy Yard in Brooklyn. The channel consists of a waterway extending in a half circle around the inside of the island known as

Cob Dock and is divided into two parts by a stone causeway connecting the mainland with Cob Dock. The eastern section of the channel is about 2,000 feet long and from 250 to 350 feet wide, and has a depth of about 20 feet at mean low water. At the head of Wallabout Channel are two bodies of navigable water, Kent Avenue Basin and Wallabout Basin, which are 2,200 feet long and 1,300 feet long respectively.

Jamaica Bay is situated on the south shore of Long Island and lies wholly within the limits of the City of New York. It is about 8 miles long and 4 miles wide, and covers an area of approximately 32 square miles. The bay contains numerous small low-lying islands, which reduce the water surface area to about 18½ square miles. The bay is connected with the ocean by a shifting channel over a bar at Rockaway Inlet. A channel has been dredged through this bar 600 feet wide and 28 feet deep at mean low water, which depth reduces to 23 feet along the sides of this dredged channel. Under a joint project for improvement by the Federal Government and the City of New York a channel 500 feet wide and 18 feet deep at mean low water has been dredged from deep water at Barren Island up to Paerdegat Basin, a length of about 13,500 feet. The mean tidal range is 4.5 feet. The United States is to provide and maintain the entrance channel and to reimburse the city for dredging the main channel in the bay, while the city is to dredge the other channels within the bay, bulkhead the shores of the bay, and fill in behind the bulkheads.

The New Jersey Portion of the Harbor.—Newark Bay is a large estuary extending from the confluence of the Passaic and Hackensack Rivers south to Staten Island, a distance of about 6 miles. It is about 1½ miles wide. At Staten Island the bay is connected on the east with Kill van Kull, and on the west with Arthur Kill. The channel in the bay has been dredged by the United States 20 feet deep at mean low water and 300 feet wide. The City of Newark has dredged a channel following the U. S. channel from the lower end of the bay and extending to Port Newark Terminal 30 feet deep and 200 feet wide. The United States is now dredging a channel through the bay 30 feet deep, 1,800 feet wide at the entrance, narrowing to 400 feet a short distance above the Central Railroad of New Jersey bridge, thence continuing that width to the confluence of the Passaic and Hackensack River channels. The mean range of tide is 5 feet.

Passaic River is a tidal stream which is navigable for vessels drawing 6 feet of water as far as the City of Passaic, 16 miles above its mouth. In the lower portion of the river the depth of the navigable channel is 20 feet to within 800 feet of the Jackson Street bridge at Newark; thence 16 feet deep to the Montclair and Greenwood Lake railroad bridge; thence 6 feet deep to Passaic.

Hackensack River is a tidal stream which merges with the Passaic River at the head of Newark Bay; it is navigable to New Milford, 20½ miles from its mouth. At mean low water 16 feet can be carried to the Public Service Power Station at Marion, Jersey City, thence 12 feet to the highway bridge at Little Ferry, 10 feet through the bridge, thence from 10 to 12 feet to the New York Susquehanna Railroad bridge in Hackensack, and thence quite shoal to New Milford.

THE STATEN ISLAND KILLS.

Arthur Kill separates Staten Island from New Jersey. It is about 12 miles long. This channel, together with Kill van Kull, forms Staten Island Sound, and, with the lower end of Newark Bay, forms the inland waterway between New York and New Jersey, the boundary between the two States following the centre of the waterway. Vessels drawing 19 feet can be taken at mean low water into Newark Bay via Lower New York Bay, Raritan Bay and Arthur Kill. Vessels drawing 23 feet at mean low water can be taken through Upper New York Bay, Kill van Kull and Arthur Kill to Perth Amboy, N. J. A channel 30 feet deep at mean low water and 200 feet wide is now under construction from Kill van Kull to Perth Amboy, passing south of Shooters Island. This channel will eventually be widened to 400 feet.

Kill van Kull, a connecting waterway about 3 miles in length, lies along the northern shore of Staten Island and extends from the lower end of Newark Bay to Upper New York Bay. A channel 30 feet deep at mean low water and a minimum width of 400 feet has been constructed by dredging and rock removal through Kill van Kull from Upper New York Bay to the entrance to Newark Bay.

Raritan Bay lies at the southern end of Staten Island and forms the western portion of Lower New York Bay. Its greatest length from north to south is about 5 miles, and from east to west about 7 miles. The Raritan River empties into the bay at its western end, and the Arthur Kill extends northward from its western end. Vessels enter the bay by way of the Main Ship-Bayside-Gedney Channel, but a draught of not more than 19 feet at mean low water can be carried through the dredged channels at the head of the bay. A channel 30 feet deep at mean low water and 200 feet wide is now under construction from deep water northwest of Sandy Hook to Perth Amboy. This channel will eventually be widened to 400 feet.

THE RARITAN RIVER.

Raritan River empties into Raritan Bay at Perth Amboy. At mean low water vessels with a draught of 14 feet can be carried to the Washington Canal at Sayreville, a distance of 6.7 miles; thence 8 feet to New Brunswick, a distance of about 5.3 miles.

Elizabeth River is a small stream that empties into the Arthur Kill near its junction with Newark Bay. The navigable channel in the lower river has a depth of 7 feet at mean high water for 1½ miles.

THE STATUE OF LIBERTY.

The Statue of Liberty on Bedloe's Island, New York Harbor, was first proposed soon after the Franco-German War by a group of prominent Frenchmen, who commissioned one of their number, Frederic August Bartholdi, sculptor (born 1833, died 1904), to do the work. The U. S. Congress, Feb. 22, 1877, authorized President Hayes to set apart a site on the island, which Bartholdi, on a visit, had suggested. A committee was formed in 1874 to raise funds. In France, 180 cities, 40 general councils, many societies, and thousands of people contributed. In the United States, by the aid of The World, $300,000 was raised for the pedestal. The statue cost about $700,000, making the total about $1,000,000.

The head of the Statue was completed for the Paris Exposition, in 1878; the forearm had been sent to America and shown at the Centennial Exposition, Philadelphia, in 1876. Thence it was transferred to Madison Square, New York City, where it remained until 1886. On Oct. 24, 1881, the anniversary of the Battle of Yorktown, all the pieces of the framework and base were put in place at Paris, Levi P. Morton, the American Ambassador, driving the first rivet. The Statue was finished in 1883; on July 4, 1884, M. De Lesseps, President of the French Committee, officially presented the Statue to Ambassador Morton; on Aug. 5, 1884, the cornerstone of the pedestal was laid on Bedloe's Island; late in June, 1885, the French vessel, Isere, from Rouen, France, landed the Statue at New York in 210 packing cases; the work of putting the parts together was begun in May, 1886, and the Statue was unveiled on Oct. 28, 1886.

DIMENSIONS OF THE STATUE.

	Ft.	In.		Ft.	In.
Height from base to torch	151	1	Distance across the eye	2	6
Foundation of pedestal to torch	305	6	Length of nose	4	6
Heel to top of head	111	6	Right arm, length	42	0
Length of hand	16	5	Right arm, greatest thickness	12	0
Index finger	8	0	Thickness of waist	35	0
Circumference at second joint	3	6	Width of mouth	3	0
Size of finger nail	13x10 in.		Tablet, length	23	7
Head from chin to cranium	17	3	Tablet, width	13	7
Head, thickness from ear to ear	10	0	Tablet, thickness	2	0

The statue weighs 450,000 pounds (225 tons); the bronze alone weighs 200,000 pounds, and is 3-16 of an inch thick; 40 persons can stand in the head, and 12 in the torch; number of steps in statue, from pedestal to head, 154; number of rounds in ladder in uplifted right arm, 54.

The pedestal of the statue is 89 feet in height and 62 feet square at the base.

Totals on entrances and clearances do not include vessels that reached and left the United States via other domestic ports.

Above data cover entire port district, including Newark and Perth Amboy.

The direct water front of Greater New York extends a distance of more than 3,000,000 linear feet, or approximately 578.4 miles, of which 43.2 miles is in Manhattan; 70.8 in the Bronx; 201.5 in Brooklyn; 196.8 in Queens; and 57.1 in Richmond. The port water front on the New Jersey side extends 192.93 miles—grand total, 771.33 miles.

PUBLIC MARKETS IN NEW YORK CITY.

(Under the supervision of the Municipal Department of Public Markets.)

MANHATTAN.

Retail—*Delancey Street* under the Williamsburg Bridge, between Ridge and Columbia Sts. *Harlem*, under the Third Ave. bridge termina , at 129th St.; *Jefferson*, in the building at 6th and Greenwich Aves., and W. 10th St.; *Queensboro Bridge*, at 1st Ave., and E. 59th St.; *Union Square*, 4th Ave. and 17th St.; *Washington*, at Fulton and Washington Sts.

Wholesale—*Gansevoort* (for farmers and gardeners only), at Gansevoort and West Sts.; *Peck Slip*, between South and Water Sts.; *West Washington*, at 9th Ave. and Gansevoort St.

THE BRONX.

Terminal Market (52 acres), under construction (November, 1924), is located on a plot adjacent to the waterfront, on the Bronx side of the Harlem River, immediately south of Macomb's Dam Bridge.

The receiving, classification and distribution yards, which will be operated in connection with the terminal market, will have direct connection with railroad tracks and carfloats.

BROOKLYN.

Wholesale—*Eighth Ward*, at 2d Ave., and 39th St.; *Wallabout*, at Flushing and Clinton Aves. There is also, at this market, an open square exclusively for farmers and gardeners.

QUEENS.

Wholesale—*Jamaica*, on Archer Ave., near the Long Island R. R. Station.

There are approximately 200 companies operating ships into and out of the Port of New York, says a Chamber of Commerce bulletin. Over 5,000 vessels annually enter and clear the port in foreign commerce, and possibly nearly as many more in coastwise service. The tonnage of foreign vessels entering the port in 1920 was 17,404,188, which was over 27 per cent. of the total tonnage entering the United States.

The area of the port is 175 square miles.

TOTAL WATER-BORNE COMMERCE OF PORT OF NEW YORK IN 1923.

The net volume of water-borne tonnage in 1923 at the Port of New York was 127,557,853 short tons (according to an official estimate of the Board of Engineers, U. S. Army), as compared with 86,629,554 short tons in 1922.

The estimate covers localities within the area under the jurisdiction of "The Port of New York Authority," which extends along Long Island Sound to Port Chester Harbor, and takes in the upper and lower Bay, the North, East, Harlem and Bronx Rivers, Newark Bay, and as far south as Keyport and the Raritan River.

The estimated value of the 1923 net tonnage cargoes in the Port of New York was approximately $11,000,000,000.

The 1923 net volume of tonnage, in short tons, by class, was as follows:

Foreign—imports, 10,855,747; exports, 10,174,880.
Coastwise—receipts, 22,442,160; shipments, 9,922,474.
Internal—receipts, 8,160,981; shipments, 1,775,624.
Intraport receipts and shipments—53,748,171.
Local traffic—10,477,816.

The Board of Engineers got the net volume of tonnage estimate by eliminating the cargoes in transit (123,927,561 short tons), and adding one-half of the intraport traffic to the foreign, coastwise, internal, and local traffic. The above figures, therefore for intraport traffic (53,748,171) represent but one-half of that traffic, which was 107,496,342 short tons.

Of the total port tonnage, the East River handled 54,072,036 short tons.

The Hudson River traffic, in short tons, was: Lower section, 10,636,178; channel (N. Y. and N. J.), 55,101,449.

Bay Ridge and Red Hook Channel handled 12,-15 ,089 short tons.

The Upper Bay (N. Y. and N. J.), handled 67,153,-053 short tons.

GRAIN RECEIPTS AT NEW YORK, IN 1923.

Other receipts in 1923 were—Buckwheat, 153,000 bu.; beans, 32,389 sacks; oatmeal, 46,625 bbls.; corn meal, 74,330 sacks; hay, 91,355 tons; flaxseed, 10,091,180 bu.; hops, 12,903 bales; alcohol, 1,059 bbls.; and large quantities of feed and other kinds of produce.

TUNNELS IN OPERATION IN AND ABOUT NEW YORK CITY.

PENNSYLVANIA RAILROAD SYSTEM—Tunnels under Hudson River extend from Pennsylvania Railroad Station, New York, to Weehawken, N. J. There is no station at Weehawken; the electric trains from the Pennsylvania Station run to Manhattan Transfer, near Newark, N. J., without a stop. Work started April 1, 1904; completed in 1910. Two tubes of cast iron rings, 23 feet outside diameter and 21 feet 2 inches inside diameter; subaqueous portion 6,118 feet long.

Manhattan crosstown tunnels from the Pennsylvania Railroad Station, mentioned above, across New York under 32d and 33d Sts. to First Ave. Started July, 1905, completed in 1910. There are two tunnels, each with two tracks. The tunnels are built of concrete with the crown about 60 feet below the surface of the street.

East River tunnels connect with the crosstown tunnels and extend under the East River to Long Island City. Started September, 1904; completed in 1910. Four separate tubes with rings 23 feet outside diameter, each tube from the Manhattan shaft to the Long Island City shaft, 3,900 feet long.

HUDSON AND MANHATTAN RAILROAD SYSTEM—North tunnels under the Hudson River from Jersey City to Morton St., New York. Started November, 1874; the first in New York, officially opened February 25, 1908. Two single track tubes, with a minimum inside diameter of 15 feet 3 inches, and approximately 5,700 feet long.

Up-town tunnels connect with north tunnels at Morton St. and extend to Christopher St. thence to Sixth Ave. and up Sixth Ave. to 33d St. Started March, 1904, completed in 1910. Section from Morton to 12th St. shield construction, remainder cut and cover.

South tunnels under Hudson River from Jersey City to the Church St. Terminal Building (Cortlandt, Church and Fulton Sts.), New York. Started May, 1905; opened for traffic July, 1909. Two tubes about 5,950 feet long, with cast iron rings, 16 feet 7 inches outside diameter and 15 feet 3 inches inside diameter.

Tunnels (consisting of two single track tubes) extend from the Hoboken terminal of the Lackawanna Railroad to Washington St., Jersey City, with connections to the north tunnels and to the Erie Railroad Station. At Washington St. a branch runs to the Pennsylvania Railroad Station at Jersey City, where connections are made with the south tunnels. West from Washington St. to a point east of Summit Ave. is a double track concrete tunnel with a centre wall dividing the tracks. Work started March, 1905; completed in July, 1911.

BELMONT TUNNEL under the East River from 42d St., New York, to Long Island City. Subaqueous portion two single track tubes with cast-iron rings 16 feet 10 inches outside diameter, and a clear inside diameter of 15 feet 6 inches. Through rock a horseshoe shaped concrete section is used and in other places a rectangular double track cross section with reinforced concrete lining. Construction started by New York and Long Island Railroad, July 12, 1905; practically completed January 1, 1908.

RAPID TRANSIT TUNNEL under the East River from the Battery, New York to Joralemon St., Brooklyn, connecting the New York and Brooklyn subways. Started April, 1903; trains running January 9, 1908. Two tubes, 6,784 feet long, with a finished inside diameter of 15 feet 6 inches.

CLARK STREET TUBE—These twin-tubes underneath the East River, connecting the Interborough-Seventh Avenue subway in Mannattan with the Fulton Street-Flatbush Avenue subway of the Interborough in Brooklyn, were completed and put in operation the Summer of 1919. They are 5,047 feet long; outside diameter of 17 feet 6 inches; inside diameter 15 feet.

WEST SHORE RAILROAD TUNNEL, WEEHAWKEN, NEW JERSEY—Commenced in 1881, and completed twenty-three months later, at a cost of $525,000. It is double-tracked and the original length was 3,983 feet. A steel and concrete portal, constructed in 1907 at the east increased its length to 4,273 feet. One-fourth of the tunnel is bricklined, the remaining portion, unlined. The normal section is 27 feet in width and 19 feet high. 80,500 cubic yards of rock were removed, and five vertical shafts were utilized, giving ten working faces, and average progress of 173 linear feet per month was maintained. The average expenditure per linear foot of lined section was $200, and of unlined section, $110, and equivalent of $7.00 per cubic yard of excavation. The tunnel is a tangent, with the exception of the extended portion of the east end, previously mentioned, at which point the freight and passenger tracks divide. There is a grade of 0.30% toward the east, and 0.34% toward the west, from approximately the centre of the tunnel.

BERGEN CUT of Erie Railroad through Bergen Hill, Jersey City, parallel to the present tunnel, which is 4,700 feet long. The Bergen cut was started March, 1906, and completed July 1, 1910. It has five four-track tunnels, with open cuts between the tunnels, making a total length of 4,300 feet. Tunnel sections 58 feet wide at the bottom and 21 feet high.

LACKAWANNA RAILROAD TUNNEL, through Bergen Hill, Jersey City. Started February 28, 1906; completed February 14, 1909. Parallel to and 24 feet away from old tunnel and of the same length; viz., 4,283 feet. New tunnel is double tracked, lined with concrete, having inside dimensions 23 feet high by 30 feet wide.

BROOKLYN-MANHATTAN TRACTION CO.—Whitehall St., Manhattan, to Montague St., Brooklyn. Length between bulkhead lines 3,900 feet, inside minimum diameter 15 feet, outside minimum diameter 17 feet 2 inches; work begun July, 1914, tunnel opened, Aug. 4, 1920.

Sixtieth Street Tunnel, from Manhattan to Long Island City, length between bulkheads 2,580 feet, minimum diameter inside 15 feet, maximum diameter outside 18 feet; work begun August, 1916, tunnel opened Aug. 4, 1920.

Fourteenth Street-Eastern, from Manhattan to Williamsburg. Length between bulkheads 3,050 feet, minimum diameter inside 15 feet, maximum diameter outside 18 feet; work begun February, 1916, tunnel opened June 30, 1924.

FERRIES IN NEW YORK CITY.

MUNICIPAL.

Astoria—From E. 92d St. and Ave. A, Manhattan, to Astoria Ave. and Mill St., Astoria, Queens.

Atlantic Ave.—From South St., Manhattan, to Atlantic Ave. and Furman St., Brooklyn.

College Point—From foot of Sound View Ave., Clason's Point, Bronx, to 1st Ave., College Point, Queens.

Grand St.—From Grand and East Sts., Manhattan, to Broadway and Kent Ave., Brooklyn.

Hamilton Ave.—From South St., South Ferry, Manhattan, to Hamilton Ave. and Sackett St., Brooklyn.

St. George-Staten Island—From Whitehall St., South Ferry, Manhattan, and from 39th St., South Brooklyn, to St. George, Staten Island.

39th St. Brooklyn—From South St., South Ferry, Manhattan, to foot of 39th St., Brooklyn.

PRIVATELY OWNED.

Hudson River—Liberty St., to Communipaw, J. C. (Central R. R. of N. J.); Cortlandt St. to Exchange Pl., J. C. (Penn. R. R.); Cortlandt St. to Weehawken (West Shore R. R.); Barclay St. to Newark St., Hoboken (Lackawanna R. R.); Chambers St. to Pavonia Ave., J. C. (Erie R. R.); Desbrosses St. to Exchange Pl., J. C. (Penn. R. R.); Christopher St. to Newark St., Hoboken (Lackawanna R. R.); W. 23d St. to 14th St., Hoboken (Lackawanna R. R.); W. 23d St. to Newark St.-Hoboken (Lackawanna R. R.); W. 23d St. to Com, munipaw, J. C. (Central R. R. of N. J.); W. 23d St. to Pavonia Ave., J. C. (Erie R. R.); W. 42d St. to Weehawken (West Shore R. R.); W. 42d St. to West New York (West Shore R. R.); W. 130th St. to Edgewater, N. J.; Dyckman St. to Englewood Landing, N. J. (Palisades Park).

East River—E. 34th St. to L. I. City (L. I. R. R.).

Staten Island (non-municipal)—St. George, S. I. to 69th St., Bay Ridge, B'klyn.; Port Richmond, S. I., to Bayonne, N. J.; Holland Hook, S. I., to Elizabethport, N. J.; Linoleumville, S. I., to Carteret, N. J.; Tottenville, S. I., to Perth Amboy, N. J.

Crossing New York Bay—Battery Park to Governor's Island (U. S. Army); Battery Park to Ellis Island (U. S Dept. of Commerce); Battery Park to Liberty Island.

Departmental Ferries—E. 16th St. to Hart's Island (Dept. of Health); E. 26th St. to Blackwell's (Welfare) Isl., Riker's Isl., and Hart's Isl. (Dept. of Correction); E. 26th St. to Blackwell's Isl. and Randall's Isl. (Dept. of Pub. Welfare); E. 86th St. to Blackwell's Isl. (Dept. of Pub. Welfare); E. 116th St. to Ward's Isl. (N. Y. State Hosp. Bd.); E. 125th St. to Randall's Isl. (Children's Hosp.) (Dept. of Pub. Welfare); E. 125th St. to Randall's Isl. (House of Refuge), N. Y. State Reformatory; E. 132d St. to No Brother Isl. (Dept. of Health); Fordham St., City Island, to Hart's Island (Depts. of Correction and Public Welfare).

NEW YORK CITY'S BIG BRIDGES.

Hell Gate Arch	93.0	240.0	Arch.		Traffic	began on March 9, 1917.		26,000

The length of each single wire in cables is 3,579 feet on the Brooklyn Bridge; 3,223 feet 6 inches on the Manhattan Bridge; and 2,985 feet on the Williamsburg Bridge.

The total length of wires in the four cables is 14,361 miles on the Brooklyn Bridge; 23,132 miles on the Manhattan Bridge; and 17,404 miles on the Williamsburg Bridge.

The number of wires in each cable is 5,290 on the Brooklyn Bridge; 9,472 on the Manhattan Bridge; and 7,696 on the Williamsburg Bridge.

The Willis Ave. bridge was opened for traffic on Aug. 22, 1901; the Madison Ave. bridge, on July 18, 1910; the 145th St. bridge, on Aug. 24, 1905; Macomb's Dam bridge, May 1, 1895; University Heights bridge, Jan. 8, 1908; Harlem Ship Canal bridge, Jan. 1, 1895.

TRAFFIC ON THE BIG EAST RIVER BRIDGES.

(Summary of count for 24 hours in both directions, on a day in December, 1923.)

The 1922 figures are in parentheses.

Bridge.	Cars.	Car Passengers.	Vehicles, Including Autos.	Pedestrians.	Total No. of Persons.
Brooklyn	9,490 (9,418)	142,882 (144,846)	1,341 (1,739)	3,474 (3,280)	148,064 (150,211)
Manhattan	4,567 (4,222)	338,189 (281,364)	43,449 (37,668)	1,085 (1,046)	420,815 (353,791)
Williamsburg	8,516 (10,250)	446,653 (437,804)	26,299 (22,870)	1,520 (1,457)	497,053 (481,435)
Queensboro	2,640 (2,689)	86,305 (72,228)	29,335 (28,094)	1,090 (1,366)	146,052 (131,215)
Third Avenue	271 (290)	774 (919)	7,065 (6,759)	2,846 (3,315)	15,149 (14,821)

Count of total persons in one day on other bridges—Harlem River, Willis Ave., 57,843; Madison Ave., 78,991; 145th St., 51,073; Macomb's Dam, 44,488; Washington, 63,625; Ship Canal, 54,028; Bronx; Westchester Ave., 26,750; Pelham, 8,420; Brooklyn: Hamilton Ave., 41,647; Ninth St., 33,144; Third St., 9,043; Union St., 11,929; Washington Ave., 33,255; Harway Ave., 10,194; Third Ave. (Gowanus), 15,343; Metropolitan Ave., 36,378; Vernon Ave., 68,485; Greenpoint Ave., 17,357; Meeker Ave., 18,052; Grand St., 15,017; Queens: Borden Ave., 15,049; Flushing, 35,390.

Viaducts (Manhattan)—155th St., over Eighth Ave., 44,488; Riverside Drive-129th to 135th St., 56,331; Park Ave., 40th to 42d St., 57,573.

Total 24-hour count, both ways, on the 47 municipal bridges and viaducts—Cars, 41,779; car passengers, 1,322,758; vehicles, 373,233; vehicle passengers, 771,751; pedestrians, 120,148. Total persons crossing bridges and viaducts, 2,214,657.

HIGH BRIDGE OVER THE HARLEM CHANGED.

The City of New York began in 1924 the reconstruction of High Bridge, the historic landmark spanning the Harlem River from West 174th Street, Manhattan, to West 170th Street, the Bronx.

High Bridge was built in 1848 as part of the old Croton Aqueduct and as such has a water carrying capacity of 90,000,000 gallons of water per day.

In 1921 the Federal Government ordered the removal of the river piers which obstructed navigation and in compliance with this order four masonry piers will be removed and a steel arch of 420 feet span and 103 feet rise will serve in their place, thus leaving an unobstructed waterway from bulkhead to bulkhead.

A depth of fifteen feet of water is provided at low water.

The estimated cost of remodeling the bridge is $1,000,000.

The new steel arch, a cantilever, will be sprung from rock to rock, and will eliminate any danger of the future settling of High Bridge.

SUBWAY AND "L" LINES IN NEW YORK CITY.

The first elevated railway in N. Y. City opened April 30, 1878; the first subway was opened Oct. 27, 1904. The contract had been awarded on Jan. 15, 1900, and work had been begun on March 24, 1900.

The New York State Legislature in 1921 (act signed May 12) authorized the construction of a subway between Brooklyn and Staten Island, to be used for both freight and passengers.

There are three subway systems and two elevated railroad systems in the City of New York devoted to local passenger rapid transit.

There is also a fourth system, that of the Pennsylvania Railroad, which, by means of twin tubes extending under Manhattan at 33d Street, connects the Pennsylvania Terminal at Seventh Avenue with Long Island City, enabling through all-rail passenger and freight traffic between New England and the South and West.

Of the three local subway systems in the city, only one, that of the Hudson and Manhattan Railway Company, is altogether under ground. The others run on elevated structures in the outlying parts.

HUDSON TUBES.

There are two sets of these tubes under the Hudson River, one connecting Montgomery Street, Jersey City, with the Hudson Terminal Station at Fulton-Cortlandt-Church Streets, Manhattan; the other connecting the Hudson tubes in Jersey City-Hoboken with Christopher Street, Manhattan.

The main trunk-line tubes of the system run from Montgomery Street, Jersey City, to Park Place, Newark, emerging to the surface on Jersey City Heights, and connecting on the meadows with the Pennsylvania Railroad, at a surface station called Manhattan Transfer.

In New Jersey, one set of tubes parallels the Hudson River, linking up the Pennsylvania, Erie, and Lackawanna railroad passenger stations, so that travelers may go to or from their stations, to or from downtown or uptown Manhattan.

In Manhattan, the Hudson tubes connect Christopher Street with Broadway and 33d Street by way of Sixth Avenue.

NEW LAWS; NEW COMMISSIONS.

Prior to 1919 the Public Service Commission for the First District had two principal functions: (a) the regulation of street railroad companies, gas, electric and steam companies; and (b) the initiation for the City of New York and supervision of construction of rapid transit lines.

In 1919 the law was changed separating the rapid transit work from the regulatory work. This was done by the creation of a new commission, known as the Transit Construction Commissioner, to whom all rapid transit jurisdiction was transferred; and the creation of a single-headed Public Service Commission for the First District upon which the regulatory powers over street railroads, gas, electric and steam companies were continued.

In 1921, on Gov. Miller's recommendation this legislation was repealed and a new commission created, known as the Transit Commission, which was given all regulatory powers over street railroads and also all powers to initiate and supervise the construction of rapid transit railroads, together with certain enlarged powers for readjusting the entire transit situation in New York and providing a plan for the consolidation of all the transit lines.

Under the 1921 law, the regulatory power over gas, electric and steam companies was conferred upon the Public Service Commission, and no regulatory power left with the Transit Commission, except that over transportation companies.

In 1924, the Legislature, on the recommendation of Gov. Smith, made a further change in the law and enacted Chapter 573 above mentioned. This chapter took away from the Transit Commission the power to initiate and supervise the construction of rapid transit railroads, and conferred the same upon the Board of Transportation, to be appointed by the Mayor of New York.

This board was appointed by the Mayor, and consists of John H. Delaney, Chairman; Daniel L. Ryan and William A. De Ford. It went into office July 1, 1924, and took over the engineering staff of the Transit Commission.

This left with the Transit Commission not only the regulatory power over street railroads but also the power to administrate the rapid transit contracts existing between the City of New York and the Interborough Rapid Transit Company and the New York Rapid Transit Corporation.

While the Board of Transportation has sole power over the laying out and construction of rapid transit railroads, the Transit Commission still retains the power of administration of the dual system contracts.

INTERBOROUGH SUBWAYS.

There are two of these systems, the east side and the west side, with cross connections in Manhattan and also in Brooklyn and Queens, so that for one five-cent fare passengers may go to or from the eastern part of Brooklyn to the northern parts of Manhattan, the Bronx and Queens.

The west side system starts on an elevated structure at Livonia and New Lots Avenues, East New York (Brooklyn), goes on Livonia Avenue to Saratoga Avenue, then turns into the Eastern Parkway, where it becomes a subway. It runs through the Eastern Parkway to Flatbush Avenue, at Eighth Avenue, thence down Flatbush Avenue to Fulton Street, through Fulton Street to Clark Street, through Clark Street and under the East River to William Street, Manhattan; through William Street to Fulton Street; thence west to West Broadway; to Hudson Street; to Seventh Avenue; to Broadway; to St. Nicholas Avenue; to Amsterdam Avenue; to Broadway, to 242d Street, at Van Cortlandt Park. It emerges from Fort George Hill near Dyckman Street and goes to 242d Street on an elevated structure.

Another branch of the west side system starts at Flatbush and Nostrand Avenues, Brooklyn, and runs in a subway through Nostrand Avenue to the Eastern Parkway, where it joins the other branch. Through trains run in both branches over the entire west side system. Transfers to the east side subway system are made at Nevins Street, at Atlantic Avenue or Borough Hall, Brooklyn, and at 96th Street and Broadway, Manhattan.

At 96th Street and Broadway, the west side system has a branch (part of the original Interborough subway) that extends under the northwest corner of Central Park to Lenox Avenue, to 145th Street, thence under the Harlem River to 149th Street, where it joins the east side trunk line on Westchester Avenue and the Southern Boulevard. Just south of Bronx Park, an extension, on an elevated structure, branches off and goes along White Plains Road to 241st Street, Mount Vernon. This extension also is used by Third Avenue "L" trains, north of Gun Hill Road.

The west side-east side systems have an elevated extension on Jerome Avenue extending north from Mott Avenue and 149th Street, up through Fordham and Bedford Park, to a point between Van Cortlandt Park and Woodlawn Cemetery, ending at about 242d Street. This extension is also used by Sixth Avenue and Ninth Avenue "L" trains, north of 162d Street.

The east side system starts at Flatbush and Atlantic Avenues (Long Island R. R. Terminal), Brooklyn, goes under Flatbush Avenue to Fulton Street; to Joralemon Street; thence under the East River to Battery Park, Manhattan; thence under Broadway, to Park Row; to the Brooklyn Bridge; to Lafayette Street, to Fourth Avenue; to 42d Street (Grand Central Station); to Lexington Avenue; to 130th Street; thence under the Harlem River to Mott Avenue, to 149th Street, where it emerges onto an elevated structure; to Westchester Avenue; to the Southern Boulevard; to the southern part of Bronx Park (Bronx Zoo).

An extension of the east side system starts at Mott Avenue and 138th Street and goes through 138th Street to the Southern Boulevard; to Whitlock Avenue to Westchester Avenue, and through Old Westchester Village to the Eastern Boulevard, at the west side of Pelham Bay Park.

The Queensboro Branch of the Interborough subway system starts at 42d Street and Lexington Avenue, and uses the Belmont tubes under the East River at 42d Street to Long Island City, there emerging onto an elevated structure and going to the Queensboro Bridge Plaza. There it splits into two elevated branches, one going through Ravenswood, on Second Avenue, to Ditmars Avenue, Astoria; the other going on Queens Boulevard, Greenpoint Avenue and Roosevelt Avenue, to Alburtus Avenue, Corona. Both branches are used by the Second Avenue, Manhattan, "L" trains between Queensboro Bridge Plaza and the terminals of the branches.

The Queensboro line is being extended from Park Avenue and 42d Street, Manhattan, west to Eighth Avenue and 41st Street, Manhattan, and from Alburtus Avenue, Corona, eastward to Main and Amity Streets, Flushing.

Both Queensboro line branches from Queensboro Plaza station eastward are also used for B.-M. T. train service.

All of the Interborough subway lines are city-owned.

BROOKLYN-MANHATTAN TRANSIT CORPORATION'S SUBWAYS.

There are three B.-M. T. subways: The Fourth Avenue line with its branches, the Broadway line in Manhattan, and the Queensboro line from Manhattan into the Borough of Queens.

The Fourth Avenue route starts at Fourth Avenue and 86th Street, Bay Ridge, and runs along Fourth Avenue to Flatbush Avenue, to the Manhattan Bridge; re-entering a subway in Canal Street, Manhattan; continuing west to Broadway, where it joins the Broadway tubes of the same system.

It is being extended to 95th Street, Fort Hamilton.

The Broadway line starts at Flatbush Avenue and Malbone Street (Empire Boulevard), where it is operated as a part of the B.-M. T. Brighton line; goes along Flatbush Avenue to Fourth and Atlantic Avenues, where connections exist with the Fourth Avenue line; thence via Flatbush Avenue and Willoughby Street to Borough Hall, to Fulton Street, to Montague Street; thence under the East River to Whitehall Street, Manhattan; under Trinity Place, Church Street, Broadway and Seventh Avenue to 59th Street.

A branch extends under 59th and 60th Streets and by tunnel under the East River to connect with the Queens lines at Queensboro Bridge Plaza.

On June 30, 1924, the Fourteenth Street-Eastern District line was put in operation between Fourteenth Street and Sixth Avenue, Manhattan, and Bushwick and Montrose Avenues, Brooklyn, via a tube under the East River.

The route is to be extended to East New York to a junction there with the B.-M. T. "L" lines. The trains transfer passengers to the B.-M. T. Broadway line at Union Square, Manhattan.

Plans have been made by the Transit Commission for the construction of a second branch of the Broadway line from 59th Street up Central Park West, Manhattan Avenue and St. Nicholas Avenue to 162d Street, Washington Heights.

The Brighton line connects with the Broadway subway at Malbone Street, while the Sea Beach and West End branches of the Fourth Avenue route make through connection to Coney Island, so that there are through subway trains from Queens through Manhattan to Coney Island, and vice versa.

Plans have been made by the Transit Commission for the construction of a new crosstown subway in Brooklyn, from a connection with the B.-M. T. Queensboro subway in Long Island City, southward through Long Island City, Greenpoint and Williamsburg, principally along Manhattan Avenue, Roebling Street and Bedford Avenue, to a temporary terminus at Bedford Avenue and Halsey Street, in Brooklyn.

Owing to the many connecting and transfer points, the grouping of Interborough and B.-M. T. routes is arbitrary, intended for the reader's general convenience, inasmuch as trains are operated at times over other than the group routes indicated.

All of the B.-M. T. subways except the Sea Beach extension are city-owned.

Under the contracts between the City and the Interborough and the B. M. T., the five-cent fare is assured upon all subway and elevated lines of both systems, passengers being carried in some instances more than twenty-seven miles for a five-cent fare.

Several surface lines of the B. M. T. system, however, under other old franchise agreements and through separate identities, are enabled to charge a ten-cent fare to Coney Island and other points.

The lines remaining to be completed, in the Dual System, are, for the Interborough Company: The extension of the Queensboro subway from Grand Central Terminal to 41st Street and Eighth Avenue, Manhattan (now under construction); and, for the Brooklyn-Manhattan Transit Corporation, the 14th Street-Eastern line (now under construction), and the Nassau Street line.

"L" LINES—MANHATTAN AND BRONX.

There are four elevated roads in these two boroughs, all operated by the Interborough.

Second Avenue "L" starts at South Ferry, Battery Park, runs north to Pearl Street and New Bowery to the Bowery; to Division Street; to Allen Street; First Avenue to 23d Street; to Second Avenue; to 129th Street, where it merges with the Third Avenue "L."

Third Avenue "L" starts at Park Row (old Chatham Street) and the Brooklyn Bridge, and runs on Park Row to the Bowery, at Chatham Square, where it bends into the Bowery; to Third Avenue; to 129th Street, where it crosses the Harlem River, and continues north through Willis and Melrose Avenues, to Third Avenue, the Bronx; thence past Crotona and Bronx Parks to Williamsbridge, at White Plains and Gun Hill Roads. There it connects with the White Plains Road elevated Interborough subway extension to Mt. Vernon.

At 149th Street, the "L" connects with the Interborough subway elevated line that runs on Westchester Avenue, the Southern Boulevard, and White Plains Road to Mt. Vernon. The "L" trains use this extension along with the subway trains.

Ninth Avenue "L" starts at South Ferry, Battery Park, and runs north through the park to Greenwich Street; to West 14th Street and Ninth Avenue; on Ninth Avenue to 53d Street, where it merges with the Sixth Avenue "L," and the two roads jointly continue on Ninth (Columbus) Avenue to 110th Street; to Eighth Avenue; to 155th Street, where the road crosses the Harlem River, bearing east, connecting with the Yonkers branch of the N. Y. Central R. R. at Sedgwick Avenue, and continuing east to Jerome Avenue, whence it uses the Jerome Avenue elevated extension of the Interborough subway that goes on up to Woodlawn Cemetery.

Sixth Avenue "L" starts at South Ferry, Battery Park, and runs north through the park to Church Street; to Park Place; to West Broadway; to West Third Street; to Sixth Avenue; to West 53d Street; to Ninth Avenue, where it merges with the Ninth Avenue "L."

TO CONEY ISLAND

The only direct "L" line to Coney Island at the present time is the Culver Line, operating via the Fifth Avenue line to 36th Street, and thence via a new structure, principally on Gravesend Avenue, to Coney Island.

Since the completion of the Brighton Line subway connection in 1920, no regular elevated service is operated over the Brighton route, a shuttle service only being maintained between Franklin Avenue and Fulton Street and Prospect Park. During the summer months express trains run from Fulton Street and Franklin Avenue to Brighton Beach.

The Myrtle Avenue "L" runs from the Brooklyn Bridge, and also via the Williamsburg Bridge, to Metropolitan Avenue, Ridgewood.

The Fulton Street "L" runs from the Brooklyn Bridge to East New York, and thence via Pitkin and Liberty Avenues to Lefferts Avenue, Richmond Hill.

The Lexington Avenue "L" runs from the Brooklyn Bridge to Jamaica, via Myrtle and Lexington Avenues and Broadway.

The Broadway "L" runs from Manhattan via the Williamsburg Bridge to East New York and Canarsie.

The Fifth Avenue "L" runs from the Brooklyn Bridge to Bay Ridge, at 65th Street. At 36th Street the line connects with and transfers to the Culver route.

ELEVATED LINES IN BROOKLYN AND QUEENS.

The "L" roads in Brooklyn and Queens (except the Interborough's subway extensions) are operated by the New York Rapid Transit Corporation, a B. M. T. subsidiary. They run trains over the Brooklyn and the Williamsburg Bridges across the East River. Thus these lines connect Manhattan with the Borough of Brooklyn and with the outlying districts, including Richmond Hill, Jamaica, Canarsie, Sheepshead Bay, Brighton Beach and Coney Island. The East New York, Jamaica, Brownsville lines inter-connect at East New York, so that passengers may transfer via any bridge between Manhattan, Jamaica, Ridgewood, and Canarsie, and the intervening districts of Brooklyn.

FOR FIVE CENTS.

SUMMARY OF RAPID TRANSIT DATA.

There are over 600 miles of subway and "L" tracks in the city, of which 361 miles are Interborough lines, and 258 are B. M. T. lines. The Interborough subway roads total 222 miles. the Manhattan "L" system, 139 miles. The Interborough subway roads have cost over $300,000,000; the Brooklyn Rapid Transit subway roads over $193,000,000. The Interborough's share of the cost has been over $148,000,000, including $48,000,000 the company spent on the first East River tubes and the extension to Flatbush and Atlantic Avenues, Brooklyn. The city has put up the rest of the cost of the Interborough subways. Of the cost of the Brooklyn Rapid Transit subways the company has borne over $69,000,000; the city over $124,000,000.

Under the Dual System of rapid transit all of the lines operated by the Interborough and the N. Y. Rapid Transit Corp. (the latter a B. M. T. sub-

sidiary), including the first subway and the elevated lines of the two systems, are combined in two great operating units, covering four of the five boroughs. Each company has lines which operate through the so-called community centre of the city, namely, the section of Manhattan Island below 59th Street.

The Dual System was created when the city, through the Public Service Commission, on March 19, 1913, entered into an agreement (the dual contracts) with the Interborough and the B. R. T. (now the B. M. T.), providing for the construction and operation of new lines and extensions.

In October, 1922, the Transit Commission and Interborough secu ity holders agreed, it was announced, on a financial reorganization, under which there are to be no dividends for 5 years; dividends never are to exceed 5 per cent. in a year; and the Manhattan "L" stock no longer gets a fixed dividend.

RESULTS OF OPERATION OF STREET RAILWAY COMPANIES, N. Y. CITY.

SUBURBAN TRAVEL.

During 1923 the travel into and out of New York City totaled 356,000,000 passengers, of which the railroads carried 257,000,000.

Thus about 550,000 suburbanites traveled in and out of the city every day.

The travel originating within 40 miles of the city in 1923, in the so-called metropolitan district, was 289,000,000 passengers, of which 146,000,000 were railroad commuters, 44,000,000 were other railroad passengers, 56,000,000 came and went by ferries, and the Hudson and Manhattan tubes handled 43,000,000.

Of the 190,000,000 railroad passengers, 60,000,000 were from Long Island, 33,000,000 from Westchester and Connecticut, and 97,000,000 from New Jersey.

In a day, 2,440 railroad trains enter the city of which 327 bring commuters from 8 A. M. to 9 A. M.

NEW YORK COMMUNITY TRUST.

The New York Community Trust, 120 Broadway, was organized in 1920 "to assure the permanent and effective administration of funds, large or small, which may be intrusted to it, for such purposes as will promote the well-being of mankind and primarily of the City of New York and its vicinity."

Eleven banks and trust companies act as trustees for the Community Trust. Resources are received by trust agreements, by gifts *inter vivos*, and by wills. The principal of a gift or bequest is administered by the trustee designated by the donor. The income resulting from such principal is expended under the supervision of a Committee on Distribution.

Donors either specify the institutions or activities to be supported by income from their gifts, or they leave such discretion to the Distribution Committee. In either event, if originally designated beneficiaries become harmful, impractical or moribund, the Distribution Committee has authority to make such modifications in the allocation of income as will prevent funds from being devoted to obsolete purposes.

Thomas Williams is Chairman of the Distribution Committee. Alvin W. Krech is Chairman of the Trustees' Committee. Ralph Hayes is the Director of the Trust.

THE NEW YORK SOUTHERN SOCIETY.

The New York Southern Society, with offices at 270 Broadway, was formally organized in the City of New York on Nov. 9, 1886, and incorporated under the laws of the State of New York in May, 1889. The object of the society is to cherish and perpetuate the memories and traditions of the Southern people and to cultivate friendly relations between the Southern men in New York City.

The officers are: *President*, Martin W. Littleton; *Vice President*, Robert Adamson; *Secretary*, Charles Cason; *Treasurer*, George N. Hartmann; *Chaplain*, Rt. Rev. Thos. F. Gailor.

The organization has a membership of about 1,150, with members located in nearly every State in the Union and in many foreign countries.

OWNERSHIP OF INDUSTRIES IN NEW YORK CITY.

Of the 32,590 manufacturing establishments in New York City, 14,921 were owned, in 1919, by individuals; 8,696 by corporations; 8,973 by all others.

Of the 638,775 wage earners, 102,607 worked in plants owned by individuals; 409,035 in plants of corporations; and 127,133 in all other plants.

Of the total value of products ($5,260,707,577), plants of individuals contributed $754,135,789; and plants of corporations, $3,287,177,364.

Of the 32,590 industrial plants in the city, 769 made, in 1919, products averaging $1,000,000 or more per plant; 1,121 were in the $500,000 to $1,000,000 class; 6,326 in the $100,000 to $500,000 class; 11,254 in the $20,000 to $100,000 class; 8,477 in the $5,000 to $20,000 class; and 4,643 each turned out products worth less than $5,000.

The city's manufacturing plants, in 1919, had 184,589 engines or motors; with 2,936,530 total horsepower, divided as follows—steam, 1,299,548 h. p.; water wheels and turbines, 343,023 h. p.; electric, 1,683,838 h. p.

NEW YORK CITY PENAL AND CORRECTIONARY INSTITUTIONS.

New York County Penitentiary, Welfare Island. It receives male prisoners from the five boroughs. One wing is set apart for those sentenced to the Workhouse.

Self-committed drug addicts and court cases are also received in the institution.

Correction Hospital (formerly the Workhouse), Welfare Island.

This houses women sentenced to the Penitentiary and Workhouse in the north wing.

The Municipal Farm, Riker's Island. Drug addicts, both convicted and self-committed, are sent to this institution.

The Reformatory Prison, Hart's Island. Here are the aged and crippled and those unable to work; boys unfit for assignment to the New York City Reformatory at New Hampton; active cases of tuberculosis, and men assigned to work in the industries.

New York City Reformatory for Male Misdemeanants, New Hampton, Orange County. This is a model institution, where misdemeanants and felons between the ages of sixteen and thirty are confined. Honor camps are maintained at Greycourt, and at the Warwick Dairy Farm.

There are three city prisons for the detention of court cases—the City Prison, Manhattan (known as the *Tombs*), the City Prison, Brooklyn (referred to at times as the *Raymond Street Jail*), and the City Prison, Queens, at Long Island City.

Jefferson Market Prison is now known as the *Women's Detention Prison*. No women are imprisoned at the *Tombs*.

Department of Correction figures are included in those of the Police Department.

* Discharges of drug addicts. † Figures given in annual reports. ‡ Dr. Carleton Simon's figures.

Note—Hospital figures are minus those committed through Police Department. In 1919 there were 7,464 enrolments at the Narcotic Clinic of the Health Department, of which 3,000 entered Riverside Hospital for treatment. This experiment was abandoned in favor of custodial care in April, 1920.

93,861 FOOD AND DRUG STORES IN NEW YORK CITY.

A census taken within the past year by the Municipal Department of Health showed 93,861 establishments in New York City handling food and drugs.

In addition, there are 49,509 dairies and creameries outside the municipal limits which ship milk and cream to this city; also 119 shellfish beds outside the city which are contributing to the city's food supply.

The number of milk places within the city includes 5,000 wagons, which make house-to-house deliveries.

The table below indicates the number of places, by boroughs, selling food and drugs:

Places.	Manhat'an	Bro'klyn.	Bronx	Queens.	Richm'd.	Whole City.
Bakers, retail	1,836	1,600	600	442	77	4,555

Oth. & tot'l	44,196	31,632	10,896	9,805	2,019	98,548

The totals in the above table show some duplications, which being eliminated leaves 93,861 as the Health Department estimate of the total places in the city handling food and drugs. The table includes piers, railroad terminals, ferries, etc.

Included in food received in 1923 at New York City were 12,515 carloads of live poultry, averaging 4,000 chickens to a car, each chicken averaging 3 lbs. in weight.

About 3,000,000 persons eat daily in the restaurants of this city.

Other chief foods consumed here in a year are (pounds):

Meats—Pork, 450,000,000; beef, 350,000,000; veal, 50,000,000; mutton and lamb, 40,000,000; fish, 190,000,000.

Dairy products—Milk, fresh, 1,600,000,000; milk, preserved, 110,000,000; butter, 120,000,000; eggs, 120,000,000; cheese, 30,000,000.

Fruits—Bananas, 435,000,000; oranges, 275,000,000; apples, 275,000,000; grapes, 105,000,000; cantaloupes, 61,000,000; watermelons, 55,000,000; grapefruit, 50,000,000; pears, 42,000,000; dried fruits, 40,000,000; berries, 30,000,000; peaches, 7,000,000; lemons, 6,000,000; plums, 5,000,000; other fruits, 30,000,000.

Vegetables—Potatoes, white, 600,000,000; potatoes, sweet, 55,000,000; onions, 85,000,000; dried beans and peas, 55,000,000; spinach, 46,000,000; tomatoes, 45,000,000; cucumbers, 45,000,000; cabbage, 43,000,000; lettuce, 40,000,000; peppers, 32,000,000; fresh beans and peas, 41,000,000; carrots, 21,000,000; celery, 14,000,000; turnips, 11,000,000; other vegetables, 85,000,000.

Sugar, 525,000,000; lard, 116,000,000; coffee, 90,000,000; tea, 20,000,000; cooking and salad oils, 30,000,000.

Total for all food consumed in this city is over 9,000,000,000 lbs. a year.

Westchester County—Ardsley, 730; Bronxville, 3,055; Dobbs Ferry, 4,401; Eastchester, 2,808; Elmsford, 1,535; Greenburg, 3,181; Hastings, 5,526; Irvington, 2,701; Larchmont, 2,468; Mamaroneck, 8,368; Mount Vernon, 42,726; New Rochelle, 36,213; North Pelham, 2,385; Pelham, 1,056; Pelham Manor, 1,754; Scarsdale, 3,506; Tarrytown, 5,807; Tuckahoe, 3,509; White Plains, 21,031; Yonkers, 100,176.

METROPOLITAN DISTRICT (IN NEW JERSEY).

Bergen County—Alpine, 350; Bergenfield, 3,667; Bogota, 3,906; Carlstadt, 4,472; Cliffside Park, 5,709; Closter, 1,840; Cresskill, 942; Delford, 1,286; Demarest, 654; Dumont, 2,537; East Rutherford, 5,463; Edgewater, 3,530; Englewood, 11,627; Englewood Cliffs, 594; Fairview, 4,882; Fort Lee, 5,761; Hackensack, 17,667; Harrington Park, 627; Hasbrouck Heights, 2,895; Haworth, 748; Leonia, 2 979; Little Ferry, 2,715; Lodi, 9,162; Lyndhurst, 9,515; Moonachie, 1,194; North Arlington, 1,767; Northvale, 827; Norwood, 820; Old Tappan, 404; Palisades, 3,833; Palisades Park, 2,633; Ridgefield, 1,560; Ridgefield Park, 8,575; Riverside, 1,077; Rutherford, 9,497; Teaneck, 4,192; Tenafly, 3,585; Teterboro, 24; Wallington, 5,715; Wood Ridge, 1,923.
Essex County—Belleville, 15,660; Bloomfield, 22,019; East Orange, 50,710; Glen Ridge, 4,620; Irvington, 25,480; Montclair, 28,810; Newark, 414,524; Nutley, 9,421; Orange City, 33,268; South Orange, 12,557.
Hudson County—Bayonne, 76,754; East Newark, 3,057; Guttenberg, 6,726; Harrison, 15,721; Hoboken, 68,166; Jersey City, 298,103; Kearny, 26,724; North Bergen, 23,344; Secaucus, 5,423; Union, 20,651; Weehawken, 14,485; West Hoboken, 40,074; West New York, 29,926.
Middlesex County—East Brunswick, 1,857; Helmetta, 687; Highland Park, 4,866; Metuchen, 3,334; Milltown, 2,573; Perth Amboy, 41,707; Raritan, 5,419; Roosevelt, 11,047; Sayreville, 7,181; South Amboy, 7,897; South River, 6,596; Spotswood, 704; Woodbridge, 13,423.
Monmouth County—Atlantic Highlands, 1,629; Highlands, 1,731; Keansburg, 1,321; Keyport, 4,415; Matawan, 3,766; Middletown, 5,917; Raritan, 1,659.
Passaic County—Clifton, 26,470; Little Falls, 3,310; Passaic, 63,841; Paterson, 135,875; West Paterson, 1,858.
Union County—Clark, 795; Cranford, 6,001; Elizabeth, 95,783; Garwood, 2,084; Hillside, 5,267; Kenilworth, 1,312; Linden, 8,368; Rahway, 11,042; Roselle, 5,737; Roselle Park, 5,438; Union, 3,962; Westfield, 9,063.

ADJACENT TERRITORY OUTSIDE METROPOLITAN DISTRICT (IN NEW YORK).

Rockland County—Grand-View-on-Hudson, 175; Nyack, 4,444; Orangetown, 6,266; Piermont, 1,600; South Nyack, 1,799.
Westchester County—Harrison, 5,006; Port Chester, 16,573; Rye, 6,211.

ADJACENT TERRITORY OUTSIDE METROPOLITAN DISTRICT (IN NEW JERSEY).

Bergen County—East Paterson, 2,441; Emerson, 973; Garfield, 19,381; Hillsdale, 1,720; Maywood, 1,618; Midland, 2,203; Rivervale, 583; Saddle River, 2,845; Washington, 194; Westwood, 2,597.
Essex County—Milburn, 4,633.
Middlesex County—Madison, 1,808; New Brunswick, 32,779.
Monmouth County—Holmdel, 1,100; Marlboro, 1,710.
Union County—Fanwood, 724; Mountainside, 493; Scotch Plains, 2,343; Springfield, 1,715.

SUMMARY.

Metropolitan district	7,910,415
In city proper	5,620,048
Outside	2,290,367
City and Suburban territory	8,034,349
Suburban territory, detailed above	2,414,301

POPULATION AND AREA OF NEW YORK CITY, 1920, BY WARDS.

(U. S. Census data. Figures in parentheses show acres.)

Manhattan—1 (154), 9,604; 2 (81), 372; 3 (95), 1,227; 4 (83), 17,872; 5 (168), 3,004; 6 (86), 15,085; 7 (198), 78,081; 8 (183), 27,001; 9 (322), 54,499; 10 (110), 46,732; 11 (196), 104,544; 12 (6,154), 951,904; 13 (107), 45,952; 14 (96), 32,331; 15 (198), 25,174; 16 (349), 49,200; 17 (331), 140,799; 18 (450), 57,222; 19 (1,481), 285,396; 20 (444), 56,570; 21 (411), 55,614; 22 (1,529), 225,920. Total—Manhattan (13,226), 2,284,103.

Brooklyn—1 (233), 21,441; 2 (97.7), 5,642; 3 (161.4), 18,050; 4 (111.3), 10,490; 5 (119.4), 16,035; 6 (302.9), 50,026; 7 (458.5), 44,059; 8 (1,843.2), 98,451; 9 (623.6), 62,997; 10 (318.7), 42,016; 11 (252.6), 21,855; 12 (663.1), 28,254; 13 (230.3), 40,804; 14 (282.6), 31,805; 15 (244.8), 37,315; 16 (244.8). 62,791; 17 (823.3), 69,507; 18 (873.0), 35,739; 19 (413.8), 48,049; 20 (461.4), 33,857; 21 (483.2), 84,945; 22 (1,361.6), 93,357; 23 (736.0), 76,790; 24 (1,198.5), 123,314; 25 (567.8), 69,823; 26 (3,590.2), 246,591; 27 (400.7), 54,446; 28 (884.4), 102,400; 29 (3,800), 110,350; 30 (5,401.1), 157,758; 31 (6,312.3), 68,870; 32 (5,479.5), 43,109. Total—Brooklyn (38,977.8), 2,018,356.

Bronx—23 (4.267), 414,180; 24 (22,255.8), 317,836. Total—Bronx (26.522.8), 732,016.

Queens—1 (4.650), 89,971; 2 (14,700), 174 866; 3 (22,000), 49,387; 4 (36,600), 133,278; 5 (3,770), 21,540. Total—Queens (81,720), 469,042.

Richmond—1 (3,340), 38,650; 2 (4,130), 20.319; 3 (10,050), 23,492; 4 (8,180), 20,318; 5 (10,900), 13,302. Total—Richmond (36,600), 116,531.

Whole City—(197,406.6) 5,620,048.

The figures as to area, by wards, do not include water; hence they are slightly different from those of which the borough totals are given in the article on population of New York City and London compared, on page 484.

Average number of inhabitants per acre—Manhattan, 172.7; Brooklyn, 51.8; Bronx, 27.6; Queens, 5.7; Richmond, 3.2; whole city, 52.2.

POPULATION OF NEW YORK CITY, BY ASSEMBLY DISTRICTS, 1920.

Bronx—1, 110,315; 2, 117,611; 3, 83,042; 4, 84,195; 5, 88,428; 6, 70,482; 7, 89,123; 8, 88,820.

Brooklyn—1, 86,912; 2, 109,104; 3, 90,760; 4, 82,336; 5, 67,808; 6, 85.895; 7, 77,455; 8, 79,658; 9, 92,754; 10, 75,873; 11, 78,062; 12, 77,872; 13, 83,399; 14, 97,344; 15, 72,994; 16, 97,110; 17, 76,186; 18, 98,100; 19, 83,897; 20, 99,357; 21, 84,484; 22, 122.637; 23, 98,359

Manhattan—1, 137,522; 2, 147,115; 3, 113,098; 4, 94,980; 5, 103,166; 6, 99,165; 7, 85,486; 8, 109,522; 9, 82,994; 10, 79.801; 11, 79.314; 12, 121,539; 13, 76,008; 14, 120.879; 15, 96,072; 16, 108,117; 17, 85,663; 18, 141,790; 19, 78,052; 20, 83,156; 21, 76,982; 22, 74,895; 23, 88,787.

Queens—1, 78,805; 2, 74,441; 3, 76,593; 4, 83,175; 5, 83,228; 6, 72,800.

Richmond—1, 55,681; 2, 60,850.

NUMBER OF JEWS IN NEW YORK CITY.

There are 1,643,012 Jews in the City of New York, according to the estimate of the American Jewish Year Book for 1923-24.

This is the estimate, also, of Dr. H. S. Linfield, of the Bureau of Social Research of New York City.

Of the Jews, the Borough of Manhattan shelters 657,101; Brooklyn, 604,380; the Bronx, 278,169; Queens, 86,194; Richmond, 17,168.

About 29 per cent. of the New York City population is Jewish, by the above estimate; they comprise 38 per cent. of the inhabitants of the Bronx.

POPULATION OF NEW YORK CITY BY BOROUGHS.

The figures in this table are official U. S. Census figures for every Federal Census year prior to 1910; for all other years prior to 1910, and for 1910 and every succeeding year the figures are estimates of the Bureau of Vital Statistics, Municipal Department of Health.

JULY 1.	Manhattan.	Bronx.	Brooklyn.	Richmond.	Queens.	Totals.

POPULATION AND AREA OF NEW YORK AND LONDON.

NEW YORK.

The City of New York comprises five boroughs—Manhattan, Bronx, Brooklyn, Queens and Richmond. Manhattan covers New York County. Brooklyn covers Kings County, and the other boroughs cover the counties from which they were named.

The City (five boroughs) of New York has an extreme length, north and south, of 36 miles; and an extreme breadth of 16½ miles, measuring from the North River along 23d Street, Manhattan, and thence to the easterly border of Queens Borough.

From the western border of the Borough of Richmond to the eastern border of Queens Borough, the distance is 25 miles.

Manhattan Borough is 12½ miles long and its extreme breadth is 2½ miles; Bronx, length 8.1 miles, breadth 9.2 miles; Brooklyn, length 11.5 miles, breadth 10.3 miles; Queens, length 15.1 miles, breadth 13.7 miles; Richmond, length 15.5 miles, breadth 7.0 miles.

The total area of the five boroughs and of the incorporated City of New York, according to the Tax Department, is 314.75 square miles. By acres, the areas of the boroughs are as follows:

Manhattan, 14,038; Bronx, 26,017; Brooklyn, 49,709; Queens, 75,082; Richmond, 36,600; total—201,446. Their population, Jan. 1, 1920, was, by the U. S. Census, as follows: Manhattan, 2,284,103; Bronx, 732,016; Brooklyn, 2,018,356; Queens, 469,042; Richmond, 116,531; total—5,620,048.

LONDON.

The registration City of London coincides in area with the municipal and parliamentary City of London; it contains 675 acres, and in 1921 it had a night population of 13,706.

The registration County of London coincides in area with the administrative County of London; it contains 74,816 acres; and in 1921 it held a population of 4,483,249. The area of registration County of London is approximately the collective area of the London parliamentary boroughs. The registration County of London is the census London and is the area covered by the registration of London vital statistics.

The "outer ring" of London takes in many of the suburbs; in 1911 it had 2,729,673 population, estimated to have increased, in 1921, to 2,992,919. It is included in the bailiwick of the City and Metropolitan Police.

The area of the so-called Greater London, comprising the registration County of London and the "outer ring," is about 693 square miles (443,449 acres); in 1921 its population was 7,476,168.

Average population per square mile—Greater New York, 17,841; Greater London, 10,789.

Balances for 1924 totalled $26,389,851,777.70; average daily balances, $86,808,722.95; per cent. balances to clearings, 11.20; largest exchanges on any one day, July 1, 1924—$1,443,826,554.64; smallest exchanges on any one day, April 19, 1924—$347,266,160.15.

Largest day's exchanges on record, July 1, 1924—$1,443,826,554.64.

Transactions of the Federal Reserve Bank of New York in the year—Debit exchanges, $2,851,193,039.42; credit exchanges, $24,130,607,076.02; credit balances, $21,279,414,036.60.

NEW YORK CLEARING HOUSE ASSOCIATION DATA.

(Prepared for The Almanac by the Manager, William J. Gilpin.)

The association, which was 71 years old Oct. 2, 1924, is composed of 16 national banks, 10 State banks, and 12 trust companies. The Federal Reserve Bank of New York and the Clearing House City Collection Department also make exchanges at the Clearing House, making 40 institutions clearing direct. There are 6 banks and trust companies in the city and vicinity, not members of the association, that make their exchanges through banks that are members.

President—James S. Alexander, Chairman of the Board, National Bank of Commerce; *Secretary*—Dunham B. Sherer, Vice-President, Corn Exchange Bank; *Manager*—William J. Gilpin; *Assistant Manager*—Clarence E. Bacon; *Department of Inspection and Examination*—Charles A. Hanna, Examiner.

There are 657,542 parcels of real estate in the City, of which 88,051 are in Manhattan, 81,178 in the Bronx, 250,058 in Brooklyn, 188,463 in Queens, and 49,792 in Richmond.

The number of those assessed on personal property is 43,196, of whom 22,786 are in Manhattan, 6,440 in the Bronx, 11,200 in Brooklyn, 2,195 in Queens, and 575 in Richmond.

The assessed valuations of real estate were increased in 1903 from a varying percentage theretofore of the full value to presumably the full value thereof.

TAX RATES IN NEW YORK CITY, BY BOROUGHS, SINCE 1899.

N. Y. City totals (1923), realty, $11,148,811,493; personalty, $231,174,150; grand total, $11,379,-985,643.

TENTATIVE 1925 ASSESSMENT.

The tentative total 1925 realty assessment, subject to revision and reduction on appeal, is $12,301,509,-295; personalty, $843,958,450.

EXEMPTION ON NEW HOMES.

The 1924 realty exemptions on new dwellings (1923 figures in parentheses) are: Manhattan, $44,009,000 ($22,932,000); Bronx, $103,117,440 ($49,849,025); Brooklyn, $183,893,000 ($99,753,140); Queens, $133,685,050 ($66,507,610); Richmond, $17,362,380 ($9,128,550); whole city, $482,066,870 ($248,170,325).

The 1925 exemption is approximately $833,000,000, including that on 44,333 new buildings for housing purposes.

OTHER EXEMPT REALTY.

Other exempt realty (1924) not including new dwellings—Manhattan, $1,764,109,847; Bronx, $250,-544,294; Brooklyn, $553,751,525; Queens, $103,531,-610; Richmond, $71,625,525; total, whole city—$2,743,562,801.

Included in the exemptions are U. S. Govt. property, $148,346,300; N. Y. State property, $16,797,-050; N. Y. City property, $2,051,044,950.

Among the exempted property are—U. S. forts, $20,701,500; Navy Yard, $21,519,200; Post Offices, $21,273,500; Custom House, $9,176,000.

Public schools, $172,446,250; water system $115,-356,900; piers and ferries, $241,719,300; bridges $111,447,170; parks, $822,308,995; public libraries, $35,082,000; sewers, $87,559,225; subways, $278,-112,015; churches, $242,907,695; private asylums, homes, hospitals, $95,455,300; private schools, $59,089,800; cemeteries, $54,114,726.

MILEAGE OF STREETS IN NEW YORK CITY.

The mileage of streets, paved and unpaved, in the City of New York by boroughs, is as follows, according to official figures as of Jan. 1, 1924—

Jan. 1, 1924.	Paved.	Unpaved.	Total.	Jan. 1, 1924.	Paved.	Unpaved.	Total.
Borough.	*Miles.*	*Miles.*	*Miles.*	*Borough.*	*Miles.*	*Miles.*	*Miles.*

EXCESS OF FAMILIES OVER DWELLINGS IN NEW YORK CITY.

(U. S. Census figures, as of January 1, 1920.)

The following table shows the number of families in the City of New York that have no separate dwelling for their own occupancy, but occupy a home in common with others.

City and Census Year.	Dwellings.	Families.	Excess of Families Over Dwellings.		City and Census Year.	Dwellings.	Families.	Excess of Families Over Dwellings.	
			Number.	Pct. Total Families.				Number.	Pct. Total Families.

The word *dwelling*, as used in U. S. Census tables, means any building or structure in which one or more persons regularly sleep. It may not be a house in the usual sense of the term.

A tent, a boat, a freight car, or a room in a warehouse, if regularly used as a sleeping place for one or more persons is a census *dwelling*.

An entire apartment house, on the other hand, constitutes but one dwelling.

The word *family*, as used in U. S. Census tables, means a group of persons, whether related by blood or not, who live together as one household, usually sharing the same table.

Thus, one person living alone is counted as a family, and all the people in a hotel, boarding house or institution constitute but one family.

VALUABLE MANHATTAN BUILDINGS.

THE PULITZER SCHOLARSHIPS.

Desirous of aiding a number of boys of exceptional ability to gain an education that would fit them for careers of leadership and usefulness, the late Joseph Pulitzer founded in 1889 the notable scholarships that bear his name.

For a time the boys selected went to the College of the City of New York, but the lack of suitable preparatory schools at that time caused a new arrangement to be made in 1893 for a seven years' course for the students selected, three years in Horace Mann High School and four in Columbia University.

In that year Columbia, in return for a gift of money, undertook to carry ten boys a year, forty in all, upon its scholarship rolls without tuition fee.

Still later, as the public high schools multiplied in number in the city, the scholarships were thrown open to graduates of the high schools—those of Kings, Queens and Richmond being later added to the list.

To the holders of the Scholarships, never fewer than forty, a stipend of $250 each, available in any American college of the first class, was annually paid by Mr. Pulitzer during his lifetime, and payment is now continued by Columbia University under the terms of his will out of the income of a fund provided for the purpose.

Some 400 boys have thus been aided to gain an education. Of these the first to graduate have been at the work of the world for a quarter of a century or more.

Their number includes many men who are prominent in law, medicine, the army, education, journalism and engineering throughout the country.

THE PULITZER SCHOOL OF JOURNALISM.

The School of Journalism at Columbia University, founded and endowed by the late Joseph Pulitzer, opened in September, 1912, and a year later entered its new building at 116th Street and Broadway.

Joseph Pulitzer, in setting forth the aims of the School, wrote: "In all my planning the chief end I had in view was the welfare of the Republic. It will be the object of the college to make better journalists, who will make better newspapers, which will better serve the public. It will impart knowledge—not for its own sake, but to be used for the public service. It will try to develop character, but even that will be only a means to the one supreme end—the public good."

The Director is Dr. J. W. Cunliffe; the Director Emeritus, Dr. Talcott Williams. One-fourth of the 172 students in the scholastic year 1923-24 were from New York City and vicinity. There are a reference library of 100,000 books, a file of 50 daily papers (American and foreign) and a "morgue" of 500,000 newspaper clips, of which Dr. Talcott Williams's choice private collection was the basis.

Advisory Board — Nicholas Murray Butler, Columbia University, N. Y. City; Solomon B. Griffin (1923-1927) *Springfield Republican*, Springfield, Mass.; John Langdon Heaton, *The World*, N. Y. City; Arthur M. Howe (1923-1927), *Brooklyn Daily Eagle*; Victor Fremont Lawson, *Chicago Daily News:* Robert Lincoln O'Brien (1923-1927); *Boston Herald*; Edward Page Mitchell, *The Herald* and *The Sun*, New York City; Melville Elijah Stone, Associated Press, N. Y. City; Ralph Pulitzer, *The World*; Joseph Pulitzer, Jr. (1924-1928), *The St. Louis Post-Dispatch;* John Stewart Bryan, *Richmond, Va., News Leader* (1923-1926); Rollo Ogden (1923-1926), *The Times*, New York City; and Alfred Holman (1923-1926), *The San Francisco Argonaut.*

PULITZER PRIZES.

(Awarded at Commencement, June 4, 1924, for work done in the year 1923.)

For the most disinterested and meritorious public service rendered by an American newspaper during the year—$500 gold medal to *The New York World* for its work in connection with the exposure of the Florida peonage evil.

Previous awards: 1918, *The New York Times* for its publication in full of so many official reports, documents and speeches relating to the World War; 1919, *Milwaukee Journal* for its campaign for Americanism; 1920, no award; 1921, *The Boston Post* for its work in exposure of Get-Rich-Quick Ponzi; 1922, *The New York World* for its work in exposing the operations of the Ku Klux Klan; 1923, *The Memphis Commercial Appeal* for "its courageous attitude in the publication of cartoons and the handling of news in reference to the operations of the Ku Klux Klan."

For the best example of a reporter's work during the year, the test being strict accuracy, terseness, the accomplishment of some public good commanding public attention and respect—$1,000 to Magner White for his story of the eclipse of the Sun in the *San Diego Sun*, Sept. 10, 1923.

Previous awards: 1917, Herbert Bayard Swope, for his articles in *The New York World* on conditions in the German Empire during the World War, Oct. 10, Oct. 15, and from Nov. 4 daily until Nov. 22 of that year; 1918, Harold L. Littledale, *New York Evening Post* for articles leading to reforms in the New Jersey prison system; 1919, no award; 1920, John J. Leary, Jr., for his articles in *The New York World* during the national coal strike in the winter of 1919; 1921, Louis Seibold of *The New York World* for his interview with President Wilson, published June 18, 1920, 1922; Kirke L. Simpson of the Washington Staff of the *Associated Press* for his articles on the burial of the Unknown Soldier; 1923, Alva Johnston for his reports on the proceedings of the convention of the American Association for the Advancement of Science held in Cambridge, published in *The New York Times*, Dec. 27-30, 1922.

For the American novel published during the year which shall best present the wholesome atmosphere of American life, and the highest standard of American manners and manhood—$1,000 to Margaret Wilson, author of *The Able McLaughlins.*

Previous awards: 1918, to Ernest Poole, author of *His Family;* 1919, Booth Tarkington, author of *The Magnificent Ambersons;* 1920, no award; 1921, to Edith Wharton, author of *The Age of Innocence;* 1922, to Booth Tarkington, author of *Alice Adams;* 1923, to Willa Cather, author of *One of Ours.*

For the best book of the year upon the history of the United States — $2,000 to Charles Howard McIlwain, author of *The American Revolution: a Constitutional Interpretation.*

Previous awards: 1917, to His Excellency J. J. Jusserand, the French Ambassador, author of *With Americans of Past and Present Days;* 1918, James Ford Rhodes, author of *A History of the Civil War;* 1919, no award; 1920, to Justin H. Smith, author of *The War with Mexico;* 1921, to Rear Admiral William Snowden Sims, author of *The Victory at Sea;* 1922, to James Truslow Adams, author of *The Founding of New England;* 1923, to Charles Warren, author of *The Supreme Court in United States History.*

For the best American biography teaching patriotic and unselfish services to the people, illustrated by an eminent example, excluding as too obvious, the names of George Washington and Abraham Lincoln —$1,000 to Prof. Michael Pupin, author of *From Immigrant to Inventor.*

Previous awards: 1917, to Laura E. Richards and Maude Howe Elliott, assisted by Florence Howe Hall, authors of *Julia Ward Howe;* 1918, William Cabell Bruce, author of *Benjamin Franklin, Self-Revealed;* 1919, to Henry Adams (post obit), author of *The Education of Henry Adams;* 1920, to Albert J. Beveridge, author of *The Life of John Marshall;* 1921, to Edward Bok, for *The Americanization of Edward Bok* (autoblography); 1922, to Hamlin Garland, author of *A Daughter of the Middle Border;* 1923, to Burton J. Hendrick, author of *The Life and Letters of Walter H. Page.*

For the original American play performed in New York which shall best represent the educational value and power of the stage in raising the standard of good morals, good taste and good manners—$1,000 to Hatcher Hughes, author of *Hell-Bent fer Heaven.*

Previous awards: 1918, to Jesse Lynch Williams, author of *Why Marry;* 1919, no award; 1920, Eugene O'Neill, author of *Beyond the Horizon;* 1921, Miss Zona Gale, author of *Miss Lulu Bett;* 1922, to Eugene O'Neill, author of *Anna Christie;* 1923, to Owen Davis, author of *Icebound.*

For the best editorial article written during the year, the test of excellence being clearness of style, moral purpose, sound reasoning and power to influence public opinion in the right direction—$500 awarded to *The Boston Herald* for *Who Made Coolidge.*

Previous awards: 1917, to an editorial in *The New York Tribune*, on the first anniversary of the sinking of the *Lusitania;* 1918, to the Louisville (Ky.) *Courier-Journal*, for the editorial article *Vae Victis*, by Henry Watterson; 1919, no award; 1920, to Harvey E. Newbranch of *The Evening World-Herald*, Omaha, Neb., for *Law and the Jungle;* 1921, no award; 1922, to Frank M. O'Brien, for an article entitled *The Unknown Soldier*, printed in *The New York Herald*, Nov. 11, 1921; 1923, to William Allen White, for *To an Anxious Friend*, printed in *The Emporia* (*Kan.*) *Gazette.*

A Special Prize of $1,000 was awarded to the widow of Frank I. Cobb in recognition of the distinction and influence of her husband's editorial writing and service.

For the best cartoon published in any American newspaper during the year, the determining qualities being that the cartoon shall embody an idea made clearly apparent, shall show good drawing and striking pictorial effect, and shall be helpful to some commendable cause of public importance—$500; awarded to J. N. Darling for *In Good Old U.S.A.* in *The New York Tribune.*

Previous award: 1922, to Rollin Kirby of *The New York World*, *On the Road to Moscow;* 1923, no award.

For the best book of verse by an American author—$1,000 to Robert Frost for *New Hampshire.*

Previous awards: 1922, to Edwin Arlington Robinson; 1923, to Edna St. Vincent Millay.

An award of $1,000 for *the best history of the services rendered to the public by the American press* during the preceding year was made in 1918 to Minna Lewinson and Henry Beetle Hough (School of Journalism), for *The History of Service Rendered to the Public by the American Press During the Year 1917.*

PULITZER SCHOLARSHIPS.

Three travelling scholarships, having the value of $1,500 each, to graduates of the School of Journalism to enable each of them to spend a year in Europe for study—Joshua Garrison, Jr., Hilda Juanita Couch, and Alfred DeGroff Walling.

An annual scholarship having the value of $1,500 to the student of music in America who may be deemed the most talented and deserving, in order that he may continue his studies with the advantage of European instruction—No award.

An annual scholarship having the value of $1,500 to an art student in America who shall be certified as the most promising and deserving by the National Academy of Design, with which the Society of American Artists has been merged—Awarded to Philip Bower.

QUEENS CONTINUATION, A. D. S. Building, Borden and Van Alst Aves., Long Island City.

BOROUGH OF RICHMOND.

CURTIS HIGH SCHOOL (boys and girls), Hamilton Ave. & St. Mark's Pl., New Brighton. Annex—P. S. 20, Heberton Ave., Port Richmond.

JUNIOR HIGH SCHOOLS AND JUNIOR HIGH SCHOOL DEPARTMENTS—These schools and departments contain classes of the seventh and eighth years of the elementary school course and first year of the high school course. They enable pupils to save time and expense by affording opportunities for the completion of the first year of the high school course in a school in the neighborhood. They also allow pupils to select courses best adapted to their abilities, e. g., a general course, or a commercial course, or an industrial course. Pupils who complete the first year of high school work will be promoted to the second year of the high schools.

PRE-VOCATIONAL SCHOOLS OR DEPARTMENTS—In some Elementary and Junior High Schools instruction is offered in a number of industrial or pre-vocational subjects. The object of this instruction is to give pupils "more complete motor training, a clearer insight into trade activities, and an opportunity to ascertain their aptitudes by studying different vocational activities."

In general, boys may study Sheet Metal Work, Printing, Electric Wiring, Wood Working, Plumbing, Machine Shop Practice, Trade Drawing, Clay Modelling, Sign Painting, and Garment Designing.

Girls may study Dressmaking, Millinery, Novelty Work, Power Machine Work, Art Weaving, Home-making and Industrial Art.

RAPID ADVANCEMENT COURSES (to save a year)—These classes are organized in certain Junior High Schools to give particularly bright pupils who complete the work of the 6B grade and are in good physical condition, an opportunity to save a whole year of the school course by completing the work of the seventh, eighth, and ninth years (i. e., the first year of the high school), in two years.

Pupils who complete the ninth year in these classes will be promoted to the second year in the high school.

CIVIL SERVICE RULES IN THE CITY OF NEW YORK.

Synopsis of regulations governing the admission of persons into the Civil Service of the City of New York. Information may also be had by applying to the Secretary of the Municipal Civil Service Commission, Municipal Building, 14th floor.

Under the White Civil Service Law, Chapter 370, Laws of 1899, April 19, the rules apply to all positions in the service of the City of New York except officers elected by the people, all legislative officers and employees, heads of any department, or superintendents, principals, or teachers in a public school, academy, or college. This requires "examinations, wherever practicable, to ascertain the fitness of applicants for appointment to the Civil Service of said city." The Constitution requires that these examinations shall be competitive, "so far as practicable."

There are approximately 55,000 permanent employees in the city service, exclusive of the teaching force of the Department of Education.

The entire Administration of the City of New York is divided into two general services; namely the Unclassified Service and the Classified Service. The Unclassified Service includes all elective officers; the officers and employees of the Board of Aldermen; members of the Board of Elections; the head, or heads, of any department of the City Government; or any person appointed by name in any statute.

The Classified Service includes all positions not in the Unclassified Service.

The Classified Service is divided into four classes; namely:

Exempt Class—The Exempt Class includes the deputies of principal executive officers authorized by law to act generally for and in place of their principals: one secretary of each officer, board, and commission authorized by law to appoint a secretary; one clerk and one deputy clerk, if authorized by law, of each court, and one clerk of each elective judicial officer. In addition thereto there may be included in the Exempt Class all other subordinate offices for the filling of which competitive or non-competitive examination may be found to be not practicable.

Non-Competitive Class—Includes all those positions of a minor nature, in the city institutions or elsewhere, that it is not practicable to fill through competitive examination.

Labor Class—Includes all unskilled laborers and such skilled laborers as are not included in the competitive or non-competitive classes.

Competitive Class—Includes all positions in the Classified Service (excepting those in the Exempt, Non-Competitive or the Labor Class) for which it is practicable to determine the merit and fitness of the applicant by competitive examination.

Vacancies in the Exempt Class may be filled without examination, appointments being made by the Mayor or other official having jurisdiction over the department where the vacancy exists.

Positions in the Non-Competitive Class are filled as a result of the examinations held by the department where the person is to be employed.

Filing Applications for Positions in Competitive Class—Applications for positions in the Competitive Class will be issued and received only for the position or positions advertised, and only during the period specified by the commission in such advertisement. Advertisements for the various examinations appear in the prominent daily papers and in the *City Record*. The *City Record* is on file in the reading room of any of the city libraries.

All applications for an examination must be on a prescribed form addressed to the "Secretary of the Municipal Civil Service Commission." When an examination is advertised application blanks may be obtained at the office of the commission, Room 1400.

Application blanks will be mailed upon request provided a self-addressed stamped envelope or sufficient postage is inclosed to cover the mailing. The commission will not guarantee the delivery of the same. Postage on applications forwarded by mail must be fully prepaid.

Applicants must be citizens of the United States and residents of the State of New York. The requirement as to residence may be waived by the commission, but only with the proviso that applicants become residents of the State of New York prior to the date of their appointment.

Applicants for patrolmen must have resided within the State of New York at least one (1) year prior to the date of appointment.

The prescribed application form filled out in the applicant's handwriting sets forth the following:

The applicant's name, age, residence, statement regarding citizenship or naturalization, statement regarding arrests or previous service in a City Department, if any, and also the certificate for citizens whose residences or places of business are within the City of New York.

In examinations for positions requiring previous experience, applicants must fill in and file with their application an experience paper. In some examinations where experience is a qualifying subject, applicants receiving less than the minimun passing mark in this paper are barred from the remainder of the examination.

Applications for positions in the Labor Class are issued and received continually.

Applicants for all positions in the Competitive and the Labor Classes are required to take a medical and physical examination.

Applicants for Labor Class positions that require previous training or experience must take an oral, or practical test; no written examination is given to applicants.

CONDUCT OF EXAMINATIONS.

Applicants shall be admitted to examination upon the production of the official notification to appear for that purpose.

All paper upon which examinations are to be written shall be furnished to the applicants by the examining board and shall bear some suitable official indorsement, stamp, or mark, for the purpose of identifying the same.

All examinations shall be in writing, except such as refer to expertness or physical qualities, and except as herein otherwise provided.

The sheets of questions shall be numbered and shall be given out in the order of their numbers, each, after the first, being given only when the competitor has returned to the examiners the last sheet given to him. In general, no examination shall extend beyond five hours without intermission, and no questions given out at any session, to any candidate, shall be allowed to be answered at another session.

The time allowed for completing the examination shall be announced before the first paper is given out.

The following municipal departments and offices come under jurisdiction of Civil Service rules:

- Accounts, Com. of
- Armory, Board of.
- Art Commission.
- Assessors, Board of.
- Bellevue and Allied Hospitals.

NATIONAL ACADEMY OF DESIGN.

(Founded 1825. Headquarters, 109th Street and Amsterdam Avenue, New York.)

The National Academy of Design and the Society of American Artists (founded 1877) were united April 7, 1906. All members of the latter organization then became members of the former.

Council—Edwin H. Blashfield, President; Harry W. Watrous, Vice President; Charles C. Curran, Corresponding Secretary; Douglas Volk, Recording Secretary; Francis C. Jones, Treasurer. De Witt M. Lockman, A. A. Weinman, Herbert Adams, Gardner Symons, F. Ballard Williams, Hobart Nichols.

ACADEMICIANS.

(The year named is that of election.)

Painters—Karl Anderson, George R. Barse jr., 1900; Gifford Beal, 1914; Cecilia Beaux, 1902; George Bellows, 1913; Frank W. Benson, 1905; Louis Betts, 1915; Edwin H. Blashfield, 1888; Frederic A. Bridgman, 1881; George DeForest Brush, 1908; Howard Russell Butler, 1899.

Emil Carlsen, 1906; Carlton T. Chapman, 1914; John E. Costigan; B. West Clinedinst, 1898; William A. Coffin, 1912; Colin Campbell Cooper, 1912; E. Irving Couse, 1911; Bruce Crane, 1901; Charles C. Curran, 1904.

Elliott Daingerfield, 1906; W. P. W. Dana, 1863; Charles H. Davis, 1906; Lockwood DeForest, 1898; Franklin DeHaven, 1920; Louis Paul Dessar, 1906; Charles Melville Dewey, 1907; Thomas W. Dewing, 1888; Frederick Dielman, 1883; Paul Dougherty, 1907; Frank Vincent DuMond, 1906.

Lydia Field Emmet, 1912; Ben Foster, 1904; August Franzen, 1920; Frederick Karl Frieseke, 1914.

Daniel Garber, 1913; Edward Gay, 1907; W. Granville-Smith, 1915; Walter Griffin, 1922; Albert L. Groll, 1910.

Hamilton Hamilton, 1889; Alexander Harrison, 1901; Birge Harrison, 1910; Childe Hassam, 1906; Charles Hawthorne, 1911; Robert Henri, 1906; William H. Howe, 1897.

Ernest Ipsen, George Inness jr., 1899; John C. Johansen, 1915; Francis C. Jones, 1894; H. Bolton Jones, 1883.

William Sargent Kendall, 1905; W. L. Lathrop, 1907; Ernest Lawson, 1917; DeWitt Lockman, 1921; Will H. Low, 1890.

Gari Melchers, 1906; Richard E. Miller, 1915; Louis Moeller, 1894; F. Luis Mora, 1906; Thomas Moran, 1884; H. Siddons Mowbray, 1891.

Hobart Nichols, 1920; Leonard Ochtman, 1904; Ivan G. Olinsky, 1919.

Walter Palmer, 1897; Maxfield Parrish, 1906; DeWitt Parshall, 1917; Edward H. Potthast, 1906; Henry Prellwitz 1912.

Robert Reid 1906; William Ritschel, 1914; William S. Robinson, 1914; Charles Rosen, 1917; Edward F. Rook; Carl Rungius, 1920; Chauncey F. Ryder, 1920.

John S. Sargent, 1897; W. Elmer Schofield, 1907; Aaron D. Shattuck, 1861; Henry B. Snell, 1906; Robert Spencer, 1920; Gardner Symons, 1911.

Edmund C. Tarbell, 1906; William Thorne, 1913; Louis C. Tiffany, 1880; D. W. Tryon, 1891; Helen M. Turner, 1921.

Robt. W. Van Boskerck, 1907; Douglas Volk, 1899; Robert W. Vonnoh, 1906.

Henry O. Walker, 1902; Horatio Walker, 1891; Harry W. Watrous, 1895; Frederick J. Waugh, 1911; John F. Weir, 1896; C. D. Weldon, 1897; Carleton Wiggins, 1906; Irving R. Wiles, 1897; Frederick Ballard Williams, 1909; Charles H. Woodbury, 1907.

Cullen Yates, 1919.

Sculptors—Herbert Adams, 1899; Robert I. Aitken, 1914; Paul Wayland Bartlett, 1917; A. Stirling Calder, 1913; James Earle Fraser, 1917; Daniel Chester French, 1901; Charles Grafly, 1905; Anna Vaughan Hyatt, 1922; Isador Konti, 1909; Evelyn Beatrice (Batchelder) Longman, 1919.

Frederick W. MacMonnies, 1906; Hermon A. MacNeil, 1906; Paul H. Manship, 1916; Charles H. Niehaus, 1906; A. Phimister Proctor, 1904; Frederick G. R. Roth, 1906; Lorado Taft, 1911; Bessie Potter Vonnoh, 1921; Adolph A. Weinman, 1911; Mahonri Young, 1923.

Architects—Arnold Brunner, 1916; Cass Gilbert, 1908; Thomas Hastings, 1909; William Rutherford Mead, 1910; Charles A. Platt, 1911; Charles Russell Pope.

Engravers and Etchers—Timothy Cole, 1908; Joseph Pennell, 1909.

ASSOCIATES.

Painters—Wayman Adams, Ernest Albert William J. Baer, Hugo Ballin, Reynolds Beal, E. A. Bell, Frank A. Bicknell, Charles Bittinger, Ernest L. Blumenschein, Mary Green Blumenschein, George H. Bogert, Adolphe Borie, Joseph H. Boston, Hugh H. Breckenridge, R. Sloan Bredin, Roy Brown, George Elmer Browne, K. A. Buehr, Bryson Burroughs.

Dines Carlsen, John F. Carlson, Charles S. Chapman, Adelaide Cole Chase, Eliot Clark, Ralph Clarkson, C. C. Coleman, Charlotte B. Coman, William Cotton, Louise Cox, Arthur Crisp.

Francis Day, W. R. Derrick, Sidney E. Dickinson, W. H. Drake, Edward Dufner.

William B. Faxon, Anna Fisher, Gertrude Fiske, John E. Folinsbee, Will Howe Foote, Kenneth Frazier, Henry Brown Fuller.

I. M. Gaugengigl, Robert David Gauley, Lillian M. Genth (Miss), Howard Giles, William J. Glackens, Edmund Greacen, Frank Russell Green, Oliver Dennett Grover, Jules Guerin.

Ben Ali Haggin, Phillip L. Hale, William J. Hays, Albert Herter, Aldro T. Hibbard, Eugene Higgins, Victor Higgins, Howard L. Hildebrandt, Laura C. Hills, James R. Hopkins, Felicie Waldo Howell (Miss), Henry S. Hubbell, Frederick W. Hutchinson, William H. Hyde, Alphonse Jongers.

Myra Wheeler Keith, Paul King, William Fair Kline, Leon Kroll.

Jonas Lie, Chester Loomis, Mary Fairchild Low, Albert P. Lucas, Jean MacLane (Johansen).

Fred Dana Marsh, Paul Moschcowitz, Jerome Myers.

Walter Nettleton, G. Glenn Newell, Spencer Nichols, John H. Niemeyer, Robert H. Nisbet, John Noble, Violet Oakley (Miss).

Lawton Parker, Henry W. Parton, William M. Paxton, Joseph T. Pearson jr., Ernest Peixotto, Van Dearing Perrine, Henry R. Poore, W. Merritt Post, Arthur J. E. Powell, Edith Mitchell Prellwitz.

Henry R. Rittenberg,

William Sartain, Eugene Savage, Amanda Brewster Sewell, Robert V. V. Sewell, Leopold Seyffert, Rosina E. Smith, Arhtur P. Spear, Eugene Speicher, T. C. Steele, Albert Sterner.

Henry O. Tanner, Leslie P. Thompson, Walter Ufer, Harry A. Vincent, Edward C. Volkert.

H. M. Walcott, Harry F. Waltman, Everett L. Warner, J. Louis Webb, William Wendt, William J. Whittemore, Guy Wiggins, Charles Morris Young.

Sculptors—Chester Beach, Cyrus E. Dallin, Abastenia St. L. Eberle, Rudolph Evans, John Flanagan, Sherry E. Fry, Charles Louis Hinton, Charles Keck, H. Augustus Lukeman.

Philip Martiny, Edward McCartan, Andrew O'Connor (elect), Willard D. Paddock, Attilio Piccirilli, Furio Piccirilli, Edmond T. Quinn, Janet Scudder.

Architects—Grosvenor Atterbury, Donn Barber, William A. Boring, Welles Bosworth, J. H. Freedlander, John Galen Howard, James L. Greenleaf (landscape architect).

C. Grant LaFarge, Frederick Law Olmstead, S. B. P. Trowbridge, C. Howard Walker.

Engravers and Etchers—Frank French, Charles Dana Gibson, Ernest Roth.

ROOSEVELT MEDAL WINNERS.

The Roosevelt Memorial Association, in 1924, awarded gold medals to:

Elihu Root, Secretary of State in President Roosevelt's Cabinet, for distinguished service in the administration of public office.

Associate Justice Oliver Wendell Holmes, for his service in the development of public law.

Charles W. Eliot, President Emeritus of Harvard, for service in the leadership of youth and development of American character.

The Association, in 1923, awarded gold medals to:

Major General Leonard Wood, Governor General of the Philippines, for distinguished service in the promotion of the national defense.

Henry Fairfield Osborn, President of the American Museum of Natural History, New York City, for the promotion of the study of natural history.

Miss Louisa Lee Schuyler, founder and a leader of the New York State Charities Aid Association, for promotion of the welfare of women and children.

The nine fields in which the medals may be awarded are: Administration of public office; development of public and international law; promotion of industrial peace; conservation of natural resources; promotion of the welfare of women and children; the study of natural history; the promotion of outdoor life; the promotion of the national defense; the leadership of youth and the development of American character.

Three medals are awarded annually. President Coolidge presented the medals for 1924 at the White House on June 2.

AMERICAN ACADEMY OF ARTS AND LETTERS.

The first seven members of the American Academy of Arts and Letters were selected by the National Institute of Arts and Letters from its own body in 1904 by ballot. The seven were William Dean Howells, Augustus Saint-Gaudens, Edmund Clarence Stedman, John La Farge, Samuel L. Clemens, John Hay and Edward MacDowell. In order to become eligible to the American Academy one must first be a member of the National Institute of Arts and Letters. This society was organized at a meeting of the American Social Science Association in 1898. The qualification for membership is stated in the constitution, "It shall be notable achievement in art, music or literature." The number in the institute is limited to 250, and the election is by ballot.

The American Academy of Arts and Letters numbers fifty members and the officers are: William Milligan Sloane, President; Nicholas Murray Butler, Chancellor; Thomas Hastings, Treasurer; Robert Underwood Johnson, New York City, Secretary.

The following are the living members of the academy, as of November 7, 1923:

Herbert Adams, N. Y.
Paul Wayland Bartlett, Wash, D. C.
Edwin Howland Blashfield, N. Y.
William Crary Brownell, N. Y.
George deForest Brush, N. Y.
Nicholas Murray Butler, N. Y.
George Washington Cable, Northampton, Mass.
George Whitefield Chadwick, Boston.
Timothy Cole, Poughkeepsie, N. Y.
Daniel Chester French, N. Y.
Hamlin Garland, N. Y.
Charles Dana Gibson, N. Y.
Cass Gilbert, N. Y.
William Gillette, Hadlyme, Conn.
Robert Grant, Boston.
Arthur Twining Hadley, New Haven, Conn.
Childe Hassam, N. Y.
Thomas Hastings, N. Y.
David Jayne Hill, Washington, D. C.
Archer Milton Huntington, N. Y.
Robert Underwood Johnson, N. Y.
Henry Cabot Lodge, Nahant, Mass.
Abbott Lawrence Lowell, Cambridge, Mass.
Frederick MacMonnies, N. Y.
Brander Matthews, N. Y.
William Rutherford Mead, N. Y.
Gari Melchers, N. Y.
Paul Elmer More, Princeton, N. J.
Joseph Pennell, N. Y.
Bliss Perry, Cambridge, Mass.
Charles Adams Platt, N. Y.
James Ford Rhodes, Boston.
Elihu Root, N. Y.
John Singer Sargent, Chelsea, S.W., London, England.
Stuart Pratt Sherman, Urbana, Ill.
Paul Shorey, Chicago.
William Milligan Sloane, Princeton, N. J.
Lorado Taft, Chicago.
Booth Tarkington, Indianapolis, Ind.
Augustus Thomas, N. Y.
Henry van Dyke, Princeton, N. J.
John C. van Dyke, New Brunswick, N. J.
Brand Whitlock, Toledo, Ohio.
Owen Wister, Philadelphia.
George Edward Woodberry, Beverly, Mass.

The directors of the academy are: N. M. Butler, Hamlin Garland, Cass Gilbert, Thomas Hastings, A. M. Huntington, R. U. Johnson, Brander Matthews, W. M. Sloane, and Augustus Thomas.

THE NATIONAL INSTITUTE OF ARTS AND LETTERS.

President—John C. Van Dyke, New Brunswick, N. J.; *Vice Presidents*—Robert I. Aitken, Louis Betts, Walter Damrosch, Jefferson B. Fletcher, Clayton Hamilton, Ashley H. Thorndike.
Secretary—John H. Finley, New York; *Treasurer*—Arnold W. Brunner, New York.

The members, as of October 15, 1924, were as follows:

MEMBERS.

DEPARTMENT OF LITERATURE.

Brooks Adams, Boston.
Jas. T. Adams, Bridgehampton, N. Y.
George Ade, Brook, Ind.
Richard Aldrich, N. Y.
James Lane Allen, N. Y.
Irving Babbitt, Cambridge, Mass.
Irving Bacheller, Winter Park, Fla.
G. P. Baker, Cambridge, Mass.
Ray Stannard Baker, Amherst, Mass.
Simeon E. Baldwin, New Haven, Conn.
John S. Bassett, Northampton, Mass.
Bernard Berenson, Florence, Italy.
A. J. Beveridge, Indianapolis, Ind.
J. B. Bishop, N. Y.
W. H. Bishop, Brooklyn, Conn.
Gamaliel Bradford, Wellesley Hills, Mass.
Robert Bridges, N. Y.
William Crary Brownell, N. Y.
Richard Burton, N. Y.
Nicholas Murray Butler, N. Y.
G. W. Cable, Northampton, Mass.
Robert W. Chambers, N. Y.
E. Channing, Cambridge, Mass.
Hobart C. Chatfield-Taylor, Santa Barbara, Cal.
J. B. Connolly, Dorchester, Mass.
Royal Cortissoz, N. Y.
Herbert Croly, N. Y.
Wilbur L. Cross, New Haven, Conn.
Samuel McChord Crothers, Cambridge, Mass.
Owen Davis, N. Y.
Charles de Kay, N. Y.
Finley Peter Dunne, N. Y.
W. P. Eaton, Sheffield, Mass.
Harry Stillwell Edwards, Macon, Ga.
John Erskine, N. Y.
Chester B. Fernald, London, Eng.
John H. Finley, N. Y.
O. W. Firkins, Minneapolis, Minn.
Jefferson Butler Fletcher, N. Y.
James Forbes, N. Y.
Worthington C. Ford, Boston.
Robert Frost, South Shaftsbury, Vt.
H. H. Furness Jr., Philadelphia.
Hamlin Garland, N. Y.
F. H. Giddings, Hartsdale, N. Y.

GOLD MEDAL OF THE INSTITUTE.

The Gold Medal of the Institute is annually awarded to any citizen of the United States for distinguished services to arts or letters in the creation of original work.

1st—for sculpture—to Augustus Saint-Gaudens. The medal was presented to Mrs. Saint-Gaudens at the meeting held in memory of her husband, Nov. 20, 1909.

2d—for history—to James Ford Rhodes, 1910.

3d—for poetry—to James Whitcomb Riley, 1911.

4th—for architecture—to William Rutherford Mead, 1912.

5th—for drama—to Augustus Thomas, 1913.

6th—for painting—to John Singer Sargent, 1914.

7th—for fiction—to William Dean Howells, 1915.

8th—for essays and belles lettres—to John Burroughs, 1916.

9th—for sculpture—to Daniel Chester French, 1917.

10th—for history or biography—to William Roscoe Thayer, 1918.

11th—for music—to Charles Martin Loeffler, 1919.

No award of the medal—for poetry—was made in 1920.

12th—for architecture—to Cass Gilbert, 1921.

13th—for drama—to Eugene Gladstone O'Neill, 1922.

14th—for painting—to Edwin Howland Blashfield, 1923.

MUSEUMS IN NEW YORK CITY.

AMERICAN MUSEUM OF NATURAL HISTORY—77th St. between Columbus Ave. and Central Park West. Open, free, every day; weekdays, 9 A. M. to 5 P. M.; Sundays, 1 P. M. to 5 P. M. A. M.

AMERICAN MUSEUM OF SAFETY—120 E. 28th St.

AMERICAN NUMISMATIC SOCIETY—Broadway and 156th St. Open daily (except Mondays) 2 P. M. to 5. P. M.

AQUARIUM—Battery Park. Open, free, every day; April-Sept., 9 A. M. to 5 P. M.; Oct.-March, 10 A. M. to 4 P. M.

BOTANIC GARDEN, BROOKLYN—Flatbush Ave. and Malbone St. (Empire Boulevard). Open daily, free.

BOTANIC GARDEN, N. Y.—Bronx Park, north of Pelham Parkway. Open daily, free.

BROOKLYN INSTITUTE OF ARTS AND SCIENCES, CENTRAL MUSEUM—Eastern Parkway and Washington Ave. Open daily, weekdays, 9 A. M. to 5 P. M.; Sundays, 2 P. M. to 6 P. M. Free (except Mondays and Tuesdays, 25c.). Children's Museum, 185 Brooklyn Ave. Free. Open daily, 10 A. M. to 5 P. M.; Sundays, 2 P. M. to 5 P. M.

DYCKMAN HOUSE—Broadway and 204th St. Open daily, 10 A. M. to 5 P. M. (except Sundays and Mondays, 1 P. M. to 5 P. M.).

HISPANIC SOCIETY OF AMERICA—Museum and library, 156th St., west of Broadway. Open 10 A. M. to 5 P. M. daily; Sunday, 1 P. M. to 5 P. M. Reading Room open 1 P. M. to 4.45 P. M. daily, except Sunday and Monday.

JUMEL MANSION (Washington's Headquarters)—Edgecombe Ave. and 160th St. Free. Open daily and Sunday, 9 A. M. to 5 P. M.

METROPOLITAN MUSEUM OF ART—Fifth Ave. and 80th-84th St. Open, 10 A. M. to 5 P. M., the year through, except Saturdays, Sundays and holidays, when the closing hour will be 6 P. M. The opening hour on Sundays is 1 P. M. Free daily (except Mondays and Fridays, 25c.).

MUSEUM OF THE AMERICAN INDIAN, HEYE FOUNDATION—Broadway and 155th St. Free. Open daily, 10 A. M. to 5 P. M. (except Sundays and holidays, 1 P. M. to 5 P. M.).

NEW YORK HISTORICAL SOCIETY AND MUSEUM—Central Park West and 76th St. Open daily 9 A. M. to 5 P. M.; Sundays, 2 P. M. to 5 P. M., except July-Aug.-Sept. Admission free. Closed during August, and on New Year's, July 4, and Christmas Day.

POE COTTAGE—Poe Park, Kingsbridge Road and Grand Boulevard, Bronx. Open daily.

ROOSEVELT HOUSE—28 E. 20th St. Open week days, 10 A. M. to 5 P. M.; open Sundays, 1 P. M. to 5 P. M. Admission 25 cents, Saturdays and Sundays free. Free at all times to school children with teachers.

VAN CORTLANDT HOUSE—Van Cortlandt Park, Broadway and 242d St., Bronx. Free (except Thursday, 25c.). Open daily, 10 A. M. to 5 P. M. (Sundays, 2 P. M. to 5 P. M.).

Zoo, BRONX—Bronx Park. Open daily, 10 A. M. to half hour before sunset. Free (except Mondays and Thursdays, 25c.).

Zoo, BROOKLYN—Prospect Park. Free. Open daily.

Zoo, CENTRAL PARK—Fifth Ave. and 63d St. Free, daily.

AMERICAN MUSEUM OF NATURAL HISTORY.

The American Museum of Natural History, located at 77th Street and Central Park West, N. Y. City, was founded and chartered in 1869 for the purpose of encouraging and developing the study of natural science, of advancing the general knowledge of kindred subjects, and to that end of furnishing popular instruction. It is open free every day in the year from 9 A. M. to 5 P. M., on Sundays from 1 to 5 P. M.

The building, which is the property of the city, is one of the largest municipal structures in the city, and has cost over $5,000,000. At present only eight sections of the building have been erected, which when completed will cover the entire area of Manhattan Square. The city makes an annual maintenance appropriation. All the collections, however, are the property of the corporation and are acquired by gift of the trustees and members and other friends and supporters. The funds from which the trustees purchase and prepare specimens, carry on explorations in all parts of the world, publish the results of its research work and enlarge its present library of natural history of over 70,000 volumes are raised by the museum and its friends, and derived from the income of an endowment amounting to $11,591,617.

The New York State Legislature, in 1924, voted to erect the Theodore Roosevelt Memorial Hall as the centre pavilion of the new east side front of the Museum facing Central Park, and appropriated $2,500,000 for the building. It is expected that construction will begin in 1925. The new Hall of Oceanic Life, adjoining it to the south, was completed in 1924, and a new wing, the African Hall, will be built at once to adjoin it on the north. A new School Service Hall has been built.

The total membership exceeds 7,600. The attendance, all free, was 1,443,726 in 1923 as compared with 1,309,856 in 1922.

NOTEWORTHY EXHIBITS.

First Floor—Collections illustrating the life of the Indians of the North Pacific Coast, the Eskimo, Indians of the woodlands, plains and Southwest. Two new and large groups (Hopi and Apache) in the Southwest Hall. Forestry Hall—Sections of trees, including one from a big tree of California which measures 16 feet in diameter and is 1,341 years old. Natural woods, with specimens of their leaves and flowers, and sections of the finished woods. Darwin Hall—Specimens, models and groups showing invertebrate life, the Nahant Tide-Pool and the Wharf-Pile Groups.

Second Floor—Collections from Africa. Material illustrating the life of prehistoric man of North America. Ancient monuments of Mexico and Central America. Birds of the world. Recent fishes. Mammals of North America. Akeley group of African elephants. Extensive reptile and amphibian material, including a number of beautiful groups (Lower California lizard, bullfrog, great salamander and New England spring groups).

Third Floor—Shells. Collections from the living tribes of Asia, including Chinese bamboos, porcelain, basketry, inlaid work, embroidery, cloisonne enamel, agricultural implements, carvings in wood, ivory and stone and an especially valuable collection of ancient bronzes and pottery; material illustrating the mode of living, costumes and war implements of Siberia. Large and fine collections from the Indians of South America. Hall of Primates—Monkeys, apes and primitive man. Mammals of the world, including whales. Insect life. Birds of North America (the famous habitat groups). Public health exhibits.

GEMS AND FOSSILS.

Fourth Floor—Collections from the Philippine Islands and the South Seas. Mineral and gem collections. Hall of Gems, the gift of J. Pierpont Morgan—Collections including practically every variety of known gem, cut and uncut, some of remarkable size and purity of color; largest perfect crystal in the world, mounted on bronze base supported by three Chinese figures; exceptionally fine cameos, carved jade, etc. Hall of Fossil Invertebrates and Historical Geology—Large collections and models of caves and of Copper Queen Mine, showing cross sections and surrounding country. Halls of Fossil Verebrates devoted to the great collections of the remains of creatures which lived from 30,000 to 20,000,000 years ago. These collections, by right of extent, variety, quality and methods of preparation and exhibition, are the finest in the world. The collections illustrating the evolution of the horse approach in importance and value the combined collections of this sort to be found in all other institutions. Hall of the Age of Man—Casts of prehistoric men and skeletons of the animals of their time (mammoths, mastodons and giant ground sloths). In the adjoining hall are fossil camels, giant pigs, a pygmy hippopotamus and primitive rhinoceros-like animals; fossil lemurs and monkeys which have an important bearing on the ancestry of man. Dinosaur Hall—Remains of fossil reptiles and fishes which lived from three million to ten million years ago. "Mummy" of dinosaur (trachodon) in which the texture of the skin has been preserved and the famous dinosaur eggs found by the Museum's Third Asiatic Expedition in 1923. Fossil aquarium.

Fifth Floor—Public reference library. Osborn library of Vertebrate Paleontology.

ACTIVITIES IN 1924.

The fourth Asiatic expedition, headed by Roy Chapman Andrews, was sent to Mongolia for further exploration in the territory where he discovered the dinosaur eggs. The Faunthorpe-Vernay field party secured a large collection of Asiatic birds as well as more big game specimens. Dr. Roy W. Miner made an extensive study of coral in the Bahamas, bringing back forty tons for the new Hall of Oceanic Life. Dr. Pliny E. Goddard conducted a field expedition searching the prehistoric ruins of the Southwest, and Dr. Lutz found the stingless bee in Panama. The Whitney South Sea Expedition made further valuable researches in many departments in the Pacific on board the schooner France, which is a permanent part of the field work of the Museum.

METROPOLITAN MUSEUM OF ART.

(Revised by the staff of the institution.)

The Metropolitan Museum of Art, in Central Park, opposite East 80th-84th Streets, New York City, was incorporated April 13, 1870, "for the purpose of establishing and maintaining . . . a museum and a library of art, of encouraging and developing the study of the fine arts, and the application of arts to manufacture and practical life, of advancing the general knowledge of kindred subjects, and, to that end, of furnishing popular instruction." After one-half century of growth, it has to-day, through bequests, gifts, and purchases, collections of incalculable value, embracing both fine and decorative arts. They comprise objects in almost every material—marble, stone, wood, pottery, porcelain, glass, metals, lace, textiles, etc.—and embody man's attempts, throughout the ages, to achieve his ideals of beauty. In date they range from 3000 B. C. to the twentieth century and represent the ancient world—Assyria, Babylonia, Cyprus, Egypt, Greece, and Rome; the Orient, including China, Japan, Corea, India, Persia, and Asia Minor; Europe from the Early Christian and Byzantine Art through the Romanesque, Gothic, Renaissance, and later periods; and our own country.

TOMBS AND ANTIQUITIES.

These collections are housed in a building erected by the city, in Central Park, affording 280,000 square feet of exhibition floor space. Among the more noteworthy individual objects or collections are the mastaba tomb erected about 4,500 years ago in the Egyptian cemetery at Sakkara for a Theban dignitary named Perneb and re-erected here in its original form, with its painted scenes in low relief still preserved; six large alabaster reliefs from the palace in Nimrod of Ashur-nasir-pal, who reigned over Assyria from 885 to 860 B. C.; an Etruscan bronze chariot of the sixth century B. C., the only complete ancient bronze chariot known; the Cesnola antiquities from Cyprus; a group of Roman fresco paintings from Boscoreale, especially those on the walls of a reconstructed cubiculum (bedchamber), and a gathering of ancient glass, "one of the richest and most important in the world." In the accumulations of Near Eastern art of special interest are the domed room from a Jain temple in India, recently installed, the gift of Robert W. and Lockwood de Forest, which represents the wood carving of India and is supplemented by an extensive collection of Indian and Thibetan jewelry; the Indian miniatures in the Alexander Smith Cochran Collection, and some remarkable examples of early Indian stone carving; the Persian manuscripts and miniatures in the Cochran Collection; twenty-four manuscripts and a number of single sheets represent such masters of decoration as Behzad and Mirak, and some of the greatest names in Persian calligraphy from the fifteenth to the eighteenth century. The Far Eastern objects include the well-known Benjamin Altman gathering of Chinese porcelains and the Heber R. Bishop assemblage of jades.

The paintings, over twelve hundred in number, represent the Italian, Spanish, German, Dutch, Flemish, French, English and American schools. There is an unusual showing of the works by Rembrandt, twenty in all, thirteen received in the bequest of the late Benjamin Altman. Through the gift of J. Pierpont Morgan the Museum possesses a Raphael, the so-called Colonna altarpiece, a Virgin and Child Enthroned with Saints. Groups of paintings kept together by the conditions under which they were received are: The George A. Hearn Collection, principally American in character; the Benjamin Altman Collection, strongest in its Dutch paintings, but including four Memlings, a Durer, a Giorgione, a Fra Angelico, two Velasquezes, and other works of rare excellence; the Michael Dreicer Collection of Italian and northern primitives, in which such artists as Memling, Roger van der Weyden, Schongauer, and Piero di Cosimo are represented; and the Catherine Lorillard Wolfe Collection, consisting largely of works by French artists of the early and middle years of the nineteenth century.

Others of special note are the William H. Riggs Collection of Arms and Armor, which in its scope and quality ranks with European national collections, and, with the Ellis and Dino Collections gives an opportunity to study the development of armor from the fifteenth to the eighteenth century the Crosby Brown gathering of 3,600 specimens including representative instruments of all nations among them the earlier of the two existing pianos by Bartholommeo de Francesco Cristofori, the inventor of the pianoforte; the James F. Ballard Collection of rugs, Turkish, Persian, Indian, and Spanish, of the sixteenth and seventeenth centuries; and the William H. Huntington assemblage of portraits of Washington, Franklin, and Lafayette in all materials.

THE MORGAN COLLECTION.

The Pierpont Morgan Collection, the gift of J. Pierpont Morgan, fills an entire wing and is a priceless gathering of the decorative arts of Europe from Gallo-Roman and Merovingian periods to the end of the eighteenth century. The rarest and most precious section of the collection represents the supreme work of the goldsmiths, Byzantine and mediaeval enamellers, and ivory carvers. The most comprehensive gathering included in the Pierpont Morgan wing is that brought together by Georges Hoentschel of Paris, the collector, and consisting of two parts; sculpture, furniture, textiles, ivories, woodwork, and architectural fragments of the Gothic period, chiefly of French, Flemish, Dutch, German, Spanish, and Italian origin, and French decorative arts of the seventeenth and eighteenth centuries; furniture and woodwork, many samples from historic buildings, decorative paintings, and ormolu fittings. Among the treasures of the Pierpont Morgan Collection are also five Gothic tapestries, known as the sacrament set because they picture in weaving the sacraments of the church; two sculptured groups, an Entombment and a Pieta, from the famous Chateau de Biron in southwestern France; superb examples of the goldsmith's craft from the fifteenth to the eighteenth century; a unique collection of snuff boxes, vanity boxes, scent bottles, and dance programmes, signed by famous jewellers of the eighteenth century; and a large collection of watches representative of the work of the best craftsmen in Europe from the sixteenth to the nineteenth century. The Dreicer Collection also contains valuable examples of Gothic and Renaissance sculpture and decorative arts.

Through the gift by Mr. and Mrs. Robert W. de Forest in 1922 of a wing, opened in October, 1924, the museum will now have a special building devoted entirely to American decorative arts of the Colonial, Revolutionary, and Early Republican periods, including the woodwork of fifteen rooms representative of various periods of American architecture along the Atlantic seaboard.

A reference library and photographs are open to the public and a collection of lantern slides, photographs, post cards, etc., is available, on terms, for lectures given east of the Mississippi. Opportunity to copy objects in collections is granted with restrictions. A study room of textiles has been fitted up for the use of the collection of laces and textiles, and other study rooms are for the convenience of those who wish to study.

MUSEUMS OF THE BROOKLYN INSTITUTE OF ARTS AND SCIENCES.

The Central Museum (Brooklyn Museum) on Eastern Parkway and Washington Ave., the Children's Museum in Bedford Park, the Department of Education with activities in the Academy of Music Building, the Brooklyn Botanic Garden, adjoining the Museum, are under the general management of the Trustees of the Brooklyn Institute of Arts and Sciences, though each department has its own director and Governing Committee. The Museum and the Botanic Garden receive appropriations from the city for maintenance, but their collections are provided for entirely from private sources. The construction work is done through the Department of Parks and the bills are audited through this department. The new wing, sections F and G, of the Central Museum was finished in part in 1914. In June, 1923, the municipal Board of Estimate made an appropriation to complete it. The Eastern Parkway-Brooklyn Museum station of the Interborough subway is directly in front of the Museum building.

The Central Museum contains a noteworthy collection of paintings, sculpture, carvings, textiles and other objects of art; archaeological gatherings, Egyptian relics and jewelry, Oriental objects, including Japanese, Chinese and East Indian armor and ornaments, objects from American Indian life and legends, etc.; natural history, minerals, zoological collections, especially the fauna of Long Island, habitat groups, etc.

The Children's Museum, the first established of its kind, aided by an influential Women's Auxiliary Committee, interests and instructs thousands of children through its lectures and nature clubs and its historical and natural history exhibits.

THE HALL OF FAME.

(Director, Dr. Robert Underwood Johnson.)

March 5, 1900, the Council of New York University accepted a gift of $100,000, afterward increased to $250,000, from a donor whose name was withheld, for the erection and completion on University Heights, New York City, of a building to be called "The Hall of Fame for Great Americans." A structure was built in the form of a terrace with superimposed colonnade connecting the University Hall of Philosophy with the Hall of Languages. On the ground floor is a museum 200 feet long by 40 feet wide, consisting of a corridor and six halls to contain mementoes of the names that are inscribed above. The colonnade over this is 600 feet long with provision for 150 panels, each about 2 feet by 6 feet, each to bear the name of a famous American.

Only persons who shall have been dead twenty-five or more years are now eligible to be chosen. Fifteen classes of citizens were recommended for consideration, to wit: Authors and editors, business men, educators, inventors, missionaries and explorers, philanthropists and reformers, preachers and theologians, scientists, engineers and architects, lawyers and judges, musicians, painters and sculptors, physicians and surgeons, rulers and statesmen, soldiers and sailors, distinguished men and women outside the above classes. Fifty names were to be inscribed on the tablets at the beginning, and five additional names every fifth year thereafter, until the year 2000, when the 150 inscriptions will be completed.

Men and women now are admitted to one and the same Hall of Fame.

The rules prescribed that the council shall invite nominations from the public. Every nomination seconded by a member of the University Senate shall be submitted to an electorate of one hundred eminent citizens selected by the senate. Executive office of the Hall of Fame is at No. 331 Madison Avenue New York.

The hall was dedicated May 30, 1901, when twenty-six national associations each unveiled one of the bronze tablets in the colonnade.

May 30, 1907, eleven new tablets were unveiled, orations being given by the Governors of New York and Massachusetts.

May 21, 1921, twenty-six new tablets were unveiled.

April 27, 1922, a temporary bust of Gen. U. S. Grant was unveiled by Marshal Joffre of France.

In May, 1922, busts were unveiled of Edgar Allan Poe, George Washington, Miss Maria Mitchell, Gilbert Stuart, and Mark Hopkins.

The busts of Robert Fulton and Horace Mann had been unveiled several years before.

May 22, 1923, there were unveiled busts of R. W. Emerson, H. W. Beecher, Frances E. Willard, U. S. Grant (permanent), R. E. Lee, Alexander Hamilton, and Abraham Lincoln.

On May 13, 1924, busts were unveiled of John Adams, Rev. Phillips Brooks, Samuel L. Clemens (Mark Twain), Peter Cooper, James B. Eads, Joseph Henry, Andrew Jackson, Thomas Jefferson, William T. G. Morton, and Alice F. Palmer.

THOSE ELECTED TO THE HALL OF FAME.

Chosen in 1900—George Washington, Abraham Lincoln, Daniel Webster, Benjamin Franklin, Ulysses S. Grant, John Marshall, Thomas Jefferson, Ralph Waldo Emerson, Henry W. Longfellow, Robert Fulton, Washington Irving, Jonathan Edwards, Samuel F. B. Morse, David G. Farragut, Henry Clay, Nathaniel Hawthorne, George Peabody, Robert E. Lee, Peter Cooper, Eli Whitney, John J. Audubon, Horace Mann, Henry Ward Beecher, James Kent, Joseph Story, John Adams, William E. Channing, Gilbert Stuart and Asa Gray.

Chosen in 1905—John Quincy Adams, James Russell Lowell, William T. Sherman, James Madison, John G. Whittier, Mary Lyon, Emma Willard, Maria Mitchell.

Chosen in 1910—Harriet Beecher Stowe, Oliver Wendell Holmes, Edgar Allan Poe, James Fenimore Cooper, Phillips Brooks, William Cullen Bryant, Frances E. Willard, Andrew Jackson, George Bancroft, John Lothrop Motley.

Chosen in 1915—Alexander Hamilton, Mark Hopkins, Francis Parkman, Louis Agassiz, Elias Howe, Joseph Henry, Rufus Choate, Daniel Boone, Charlotte Cushman.

Chosen in 1920—Samuel L. Clemens (Mark Twain), James B. Eads, Patrick Henry, William T. G. Morton, Augustus Saint-Gaudens, Roger Williams, Alice Freeman Palmer.

Total to date—Fifty-six men, seven women.

The next election to membership in the Hall of Fame will occur in 1925 when twelve names may be chosen.

MEMORIAL TO ARTISTS AND ARCHITECTS.

Distinct from the Hall of Fame but also under the aegis of New York University is the Pantheon of American Artists and Architects, a collection of busts in the rotunda of the Gould Memorial Library of the University.

Nine of the sixteen busts are already in place—Carroll Beckwith by George T. Brewster, George Inness by Scott Hartley, Clinton Ogilvie by Paul Bartlett, Frank Duveneck by Charles Grafly, Walter Shirlaw by Paul Bartlett, Augustus Saint-Gaudens by John Flanagan, J. Q. A. Ward by J. Q. A. Ward, William M. Chase by Albin Polasek, and Henry K. Brown by Henry K. Bush-Brown.

MUSEUM OF THE AMERICAN INDIAN.

The Museum of the American Indian, Heye Foundation, at Broadway and 155th Street, Manhattan, forms one of the handsome harmonious group of buildings which New York owes to public spirit of Archer M. Huntington, who gave the site of the museum, which was built by the trustees at a cost of $250,000 and $100,000 for equipment. The fireproof limestone edifice was opened on Nov. 15, 1922. Three floors are devoted to exhibition rooms, which are open free to the public daily and Sundays. The Museum has over 2,000,000 exhibits and can display but about one-quarter of these at one time. The top floor is devoted to laboratories, work and study rooms, which are open under suitable conditions to students. George G. Heye, who founded the Museum and turned over to it nearly half a million specimens, is the director, and F. W. Hodge, Reginald Pelham Bolton, M. H. Saville, M. R. Gilmore, Dr. M. Raymond Harrington and Alanson Skinner are among those associated with the work. Individual trustees have given important special collections and financed field work.

The Museum had its inception twenty years ago. Its sole aim is to gather and preserve for students everything useful in illustrating and elucidating the anthropology of the aborigines of the Western Hemisphere. Field work has been constantly kept up, and in 1923 six major expeditions were at work. The publications and monographs of the Museum are notable.

The collections are especially rich in articles illustrative of the ethnology and archaeology of the Indians of the United States. Ecuador and Colombia and the West Indies have proved very fertile fields.

HISPANIC SOCIETY OF AMERICA.

The Museum and Library of the Hispanic Society of America occupies the central fireproof limestone building of the notable group on Broadway, between 155th and 156th Streets, Manhattan, which New York owes to the farsighted public spirit and generosity of Archer M. Huntington. He is President of the society, which he founded on May 18, 1904. The museum building was opened in January, 1908. It is open from 10 to 5 daily, and on Sunday from 1 to 5. The reading room is open from 1 to 4.45 daily, except Sunday and Monday.

The deed of foundation provides for the establishment in the City of New York of a public library and museum designed to be a link between the English, Spanish and Portuguese speaking peoples. It provides also for the advancement of the study of the Spanish and Portuguese languages, literature, art and history, for the study of the countries wherein Spanish and Portuguese are or have been spoken languages.

In furtherance of these aims a collection of paintings, manuscripts, maps and coins, and a library of about 40,000 books was placed in the charge of the society in 1904. These varied collections have been increased and enriched so that, for example, the library now contains no fewer than 100,000 volumes, forming the most notable Hispanic library in America. Students have access to original documents as well.

Though its home and headquarters are in America, the Hispanic Society is an international organization; its members, limited to 100, include specialists and scholars of all countries who have become distinguished in the Hispanic field.

The society has held several notable exhibitions, among them those of the works of Sorolla, Zuloaga, Cervantes, and Lope de Vega, as well as of collections of sculpture, photographs, prints, etc.

NEW YORK HISTORICAL SOCIETY GALLERY AND MUSEUM.

The New York Historical Society, founded in 1804, is open free to the public daily, 9 A. M. to 5 P. M.; Sundays, 2-5 P. M., except July, August and September, and on holidays 1 to 5 P. M. (excepting Christmas, New Year's and July 4. Closed for the month of August for cleaning and repairs). The society has occupied since 1908 the building on Central Park West between 76th and 77th Streets, completed and furnished by the society at a cost of $1,000,000, including the land. The home before that was on Second Avenue. It is supported by endowment funds and membership fees without aid from city or State. The society maintains a library, museum and gallery of art. The library contains 130,000 volumes and 150,000 pamphlets, newspapers, prints, maps and a large collection of manuscripts, all relating to American history. The newspaper collection numbers 5,386 volumes, of which 3,181 were printed in this city and State. The earliest file being the "Boston News-Letter," beginning in 1704. The first newspaper printed in New York City was "The New York Gazette," established in 1725 by William Bradford, the first printer in the Colony of New York. The society's file of this paper begins with 1730. The largest collection of New York City and State newspapers may be found here. The old New York prints over the period from the earliest "View of the City," published in 1651, to modern times, and is unrivalled in its completeness by either private or public collections elsewhere, among which may be mentioned The Burgis View of the City, 1717, of which only one other copy is known; the Maverick View of Wall Street, about 1825, and the Tiebout Engraving of the City Hall on Wall Street. The maps include the James Lyne survey of the city in 1731, published by William Bradford—the first engraved map of the city published—one of three known copies; the Dyckinck plan of 1755, the Ratzer map of 1767, and the commissioner's map of 1811, besides a large collection of atlases and maps of all periods. The more important manuscripts are the Cadwalader Golden papers, De Peyster family papers, James Duane papers, Albert Gallatin papers, General Horatio Gates papers, diary of Philip Hone, Rufus King papers, Lloyd family papers, Rutherford papers, and Lord Sterling papers.

The museum contains many relics of New York and American history, besides an Egyptian collection of 3,000 objects, the first brought to America. Three mummied bulls from the tombs are features, while every form of Egyptian art during the Old and Middle Kingdom and the Empire, 2900-1167 B. C., is represented. The collection is especially rich in papyri. The society also possesses the Nineveh sculptures, presented in 1858 by the late James Lenox. Of local relics the Beekman family coach, used before the Revolutionary War, in this city, may be mentioned, as well as the remains of the famous equestrian statue of King George III., and the statue of William Pitt (the Earl of Chatham), champion of the American cause in Parliament.

The Gallery of Art now numbers over 1,000 paintings, including old masters. Over 300 of the paintings are American portraits; George Washington by Stuart, Peale and Durand, John Adams, John Quincy Adams, Bayard family portraits, Aaron Burr, Henry Clay, George and De Witt Clinton, John S. Copley by himself, De Peyster family portraits, Hamilton Fish, Benjamin Franklin, Albert Gallatin, Fitz-Greene Halleck, Alexander Hamilton, Andrew Jackson, John Jay, Thomas Jefferson, Lafayette, James Madison, Oliver H. Perry, Edgar Allan Poe, Red Jacket, Schuyler family portraits, Stuyvesant family portraits, Zachary Taylor, Daniel Webster and N. P. Willis. The society also possesses the original water color drawings made by John James Audubon for his "Birds of America"—460 beautifully executed pictures. Special exhibitions of the society's collections are held from time to time to which the public is invited. Since the occupation of the present building in 1908 the society's treasures in art and literature have been exhibited and freely placed at the disposal of the public for its enjoyment, use and study.

NEW YORK BOTANICAL GARDEN (BRONX BOROUGH).

The New York Botanical Garden occupies a reservation of nearly 400 acres of Bronx Park, north of Pelham Parkway. The tract includes the beautiful natural features of the valley of the Bronx River, its gorge, its waterfall and its rapids, and over 100 acres of natural woodland, including the famous Hemlock Forest, the most southern grove of hemlock spruce near the Atlantic Coast. The institution was chartered by the Legislature of New York, 1891, and the first reservation of 250 acres was set aside by the city in 1895, and about 140 acres were added by the city in 1915. The grounds and buildings are open to the public every day in the year without charge.

Museum Building, situated a short distance from the Botanical Garden Station of the New York Central & Hudson River Railroad, has a frontage of 312 feet, is Italian Renaissance; front approach is ornamented by a bronze fountain by Carl E. Tefft and by terra cotta and marble fountains and seats: the vista lines are formed by four parallel lines of tulip trees. Three floors are devoted to public exhibits.

There is a large public lecture hall in the basement of the museum building, in which free public lectures are given every Saturday afternoon from Spring until Autumn. The upper floor of the building contains the library of 34,000 volumes on botany, horticulture and related sciences, including several special collections; the herbarium, containing prepared and dried specimens of plants from all parts of the world, occupies the greater portion of several rooms on the upper floor and comprises some 1,500,000 specimens. There are also laboratories equipped for research on the upper floor, to which properly qualified students of botany are admitted and instructed by one or another member of the garden staff.

The Conservatories include two ranges in the southern and eastern parts of the grounds. In them are housed collections of palms, cacti and other succulents, ferns, orchids, aquatics, and other groups of exotic plants. Flower shows and lectures are held in the central display house of Conservatory range 2, near the Allerton Ave. entrance.

The gardens, besides displays of shrubs, trees, and herbaceous plants, include flowering displays in season of tulips, narcissi, lilacs, irises, rhododendrons, peonies, roses, lilies, gladioli and dahlias.

BROOKLYN BOTANIC GARDEN.

The Brooklyn Botanic Garden, located between Eastern Parkway and Empire Boulevard and Flatbush and Washington Avenues, was opened to the public on Linnaeus's birthday, May 13. 1911. The Garden comprises about 50 acres of land, on which are located the various plantations, the conservatories, the laboratory building, and the children's building. The object of the Garden is the advancement and diffusion of a knowledge and love of plants, and its special aim is to be of service to the local community. The grounds are open free to the public daily. The garden is supported, in part only, by the city.

The Native Wild Flower Garden contains about 900 species that grow without cultivation within 100 miles of New York City; the Rock Garden contains over 600 species of alpine and other rock-loving plants; the Japanese Garden has been pronounced the most perfect specimen of that kind of garden in any public park in America; the general Systematic Garden, chiefly of European herbs and shrubs, occupies the central portion of the grounds; the Ecological Garden illustrates the relation of plants to various factors of environment, such as water, light, gravity, insects, etc. The Iris Garden extends along the brook, and the Children's Garden, containing plots for 190 children, is at the south end of the grounds. A library of over 16,500 books and pamphlets and over 700 periodicals on plant life and gardening is open free to the public, and also the herbarium of over 231,000 specimens. Illustrated lectures and occasional exhibits are also open free. The Conservatories contain a collection of tropical and sub-tropical plants, including those used for food, fibre, and other economic purposes, including banana, sugar cane, tea, coffee, rubber, hemp, papyrus, figs, citrus fruits, etc.

The Botanic Garden publishes several scientific periodicals, it co-operates with the public and private schools, and it maintains a bureau of botanic and garden information.

FLOWER GARDENS IN PROSPECT PARK.

Owing to their accessibility, the Greenhouse (where flower shows are given in season), the Old Fashioned Flower Garden and the Zoo, in Prospect Park, are visited yearly by hundreds of thousands on foot and in vehicles.

THE NEW YORK AQUARIUM IN BATTERY PARK.

(By Charles H. Townsend, Director.)

The Aquarium Building was erected in 1807 by the United States Government as a fort, called West Battery, and after the war of 1812 was called Castle Clinton. It had a battery of thirty guns, the embrasures for which still remain in the outer wall, which is nine feet thick. The old ammunition rooms are surrounded with walls of masonry fifteen feet thick. In 1823 the building was ceded by Congress to the City of New York and used as a place of amusement called Castle Garden, which had a seating capacity of 6,000. It was connected with Battery Park by a bridge, the intervening space having since been filled in. Gen. Lafayette was received here in 1824; President Jackson in 1832; President Tyler in 1843; Louis Kossuth in 1851. Prof. Morse, inventor of the telegraph, demonstrated here in 1835 the use of the Morse telegraphic code.

Jenny Lind began singing here in 1850 under the management of P. T. Barnum. Among other notables received here were President Van Buren and the Prince of Wales. The building was used as a landing place for immigrants from 1855 to 1890, during which period 7,690,606 immigrants passed through its doors.

Then, for several years, the historic old structure was in process of repair for the use of the Aquarium, which was opened by the city on Dec 10, 1896; and on Nov. 1, 1902, its management was transferred from the Department of Parks to the New York Zoological Society, a private scientific association with a membership of over 2,700.

The Aquarium is reached by all elevated, surface and subway lines running to South Ferry. The building is open, free, every day in the year. The hours for visitors are: 9 A. M. to 5 P. M., April-September; 10 A. M. to 4 P. M., October-March. The attendance exceeds 2,000,000 visitors a year.

The New York Aquarium is the largest in the world and contains a greater number of species and of specimens than any other. It has 7 large floor pools, 94 large wall tanks and 30 smaller tanks. There are also 26 reserve tanks containing specimens not on exhibition The building is circular in form, with a diameter of 205 feet. The largest pool is 37 feet in diameter and 7 feet deep. During 1924 the space available for exhibits will be increased one-fifth. The exhibits include fishes, turtles, crocodilians, frogs, salamanders, marine mammals and invertebrates, and are both northern and tropical in character. There are usually about 200 species of fishes and other aquatic vertebrates on exhibition. The total number of specimens, exclusive of invertebrates and young fry in the hatchery, varies from 6,000 to 7,000.

The fish hatchery, maintained as a fish-cultural exhibit, produces yearly from three to eight millions of young food and game fishes, which are afterward deposited in New York State waters. The Aquarium is equipped for heating sea water for tropical fishes in winter, and has a refrigerating plant for cooling fresh water in summer. Flowing fresh water is supplied from the city water system, while the pumps circulate about 200,000 gallons of salt water daily. The pumps run day and night. The salt water tanks are supplied from a reservoir holding 100,000 gallons of pure stored sea water. This water, originally brought in by steamer, is used as a "closed circulation," the water being pumped through the exhibition tanks, falling thence through sand filters back to the reservoir. It has been in continuous circulation since 1908.

NEW YORK ZOOLOGICAL PARK (BRONX ZOO).

(By W. T. Hornaday, the Director.)

The New York Zoological Park was founded in 1895 by the New York Zoological Society, a scientific corporation. The park was formally opened Nov. 9, 1899. The grounds, many of the buildings, and an annual maintenance fund are provided by the city. The remainder of the buildings and the animal collections are furnished by the society, which is also charged with the direct management of the park.

The Zoological Park is free to the public on all days of the week except Mondays and Thursdays. Should Monday or Thursday fall on a legal holiday, admission to the Zoological Park is free. The opening and closing hours are 10 A. M. until one-half hour before sunset. On pay days admission for adults is 25 cents, and for children under twelve years, 15 cents. The park embraces a tract of 264 acres. It contains thirty-five acres of water, and its land consists of heavy forest, open forest and meadow glades, in about equal proportions. The park is about one mile long and three-fifths of a mile wide.

The principal buildings are the Elephant, Lion, Primate, Zebra, Large Bird, Reptile, Antelope, Ostrich and Small Mammal Houses, and the Aquatic Bird House The principal open-air inclosures are the Bear Dens, Flying Cage, Pheasant Aviary, the Eagle and Vulture Aviary, Wolf and Fox Dens, Burrowing and Rodent Quarters, Beaver Pond, Duck Aviary, Wild Fowl Pond and Mountain Sheep Hill. The most valuable and important mammal collections are the apes, baboons and monkeys, the lions, tigers and leopards, the zebra and wild horse collection, the antelopes and deer, the bears, and the huge specimens in the Elephant House, comprising elephants, rhinoceroses and hippopotami. The collection of living birds in the Zoological Park is the largest and most varied to be found anywhere in the world. The collection of birds of paradise, including the rare bluebird of paradise, and the collections of parrots, parakeets and lories easily rank among the finest of their kind.

On May 25, 1922, the National Collection of heads and horns, for which a special museum building had been erected by the gifts of ten members of the Zoological Society, was dedicated and opened to the public. This collection is now displayed free to the public "in memory of the vanishing big game of the world." Both the collection and the building to contain it are quite unique and the collection is almost complete for all the hoofed, horned and tusked animal species of the world. The total value of the building and collection is more than $500,000.

In 1924 the census of the collections in the park was 553 mammals representing 198 species; 2,246 birds of 773 species; and 553 reptiles and amphibians, representing 93 species. Total number of specimens, 3,352; total number of species, 1,084. The attendance of visitors for 1922 was 2,395,120.

Routes to the Zoological Park—*Automobiles*—Lenox Avenue north to 145th Street; across Harlem River to 149th Street, continuing to top of hill, turn left at Mott Avenue; thence north along Franz Sigel Park to Grand Boulevard and Concourse; thence along Grand Boulevard and Concourse for about two miles to Fordham Road; thence to the right and continuing to the park. *Subway*—Seventh Avenue Division, Bronx Park train to end of the line at 180th Street and Boston Road entrance to the Zoological Park. Lexington Avenue Division, East 180th Street train to 177th Street and change to Bronx Park train to end of line at 180th Street.

NEW YORK CITY PENSION LAW.

The New York City Pension Law provides that all employees, except those in exempt and non-competitive classes, entering the city service after Oct. 1, 1920, shall become members of this system and all present city employees may become members by filing with the Board of Estimate and Apportionment a statement waiving all present or prospective benefits in other city retirement systems. The Board of Estimate and Apportionment has charge of all funds and of the entire system; the Comptroller is the custodian of the several funds, which are (1) Annuity savings funds, (2) Annuity reserve fund, (3) Contingent reserve fund, (4) Pension reserve fund, (5) Pension fund.

Teachers, policemen, firemen and street-cleaners do not enter into this system, as they have their own.

Among the provisions of this law are life insurance protection equal to the last six months' pay of the employee, disability insurance protection of from one-quarter to one-half of the salary any time after completing ten years of service and paying, as long as the disability continues, a three-quarter pay pension if the employee is disabled in the performance of duty, a half-pay pension to the dependents with return in cash of all contributions at 4 per cent per annum if the employee is killed in the performance of duty, retirement on demand after the ages of fifty-eight, fifty-nine and sixty, on a benefit proportioned to length of service and amount of compensation.

The city pays for all of these benefits except one-half of the cost of service or superannuation retirement benefit on account of service during membership in the fund. The city also pays the entire cost of the benefits allowed by reason of service rendered prior to Oct. 1, 1920. The amount of the salary paid into the pension fund is from 3.85 to 8.30 per cent.

95,000 ON CITY PAY ROLL.

There are approximately 95,000 officials and employees in the service of the City of New York. Salaries and wages in 1923 totaled $185,000,000.

HOSPITALS IN MANHATTAN, BRONX AND RICHMOND BOROUGHS.
